104. The Governor in Council may, on the application for his approval of the agreement, approve of the increase of the capital stock of the purchasing bank, which is necessary to provide for the payment of the shares of such bank to the selling bank, as provided in the said agreement.

105. The provisions of this act with regard to:—

(a) the increase of the capital stock of the bank by by-law of the shareholders approved by the Treasury Board; and,

(b) the allotment and sale of such increased stock;

shall not apply to any increase of stock made or provided for under the authority of the last two preceding sections.

106. The approval of the Governor in Council shall not be given to the agreement, unless:—

(a) the consent of the minister as prescribed by sub-section 2 of section 99 of this act has been given;

(b) the approval of the agreement is recommended by the Treasury Board;

(c) the application for approval thereof is made, by or on behalf of the bank executing it, within three months from the date of execution of the agreement; and,

(d) it appears to the satisfaction of the Governor in Council that all the requirements of this act in connection with the approval of the agreement by the shareholders of the selling and purchasing banks have been complied with, and that, after the approval by the shareholders of the selling bank, notice of the intention of the banks to apply to the Governor in Council for the approval of the agreement has been published for at least four weeks in The Canada Gazette, and in one or more newspapers published in places where the chief offices of the bank are situate.

2. Such banks shall afford all information that the minister requires.

Approval May be Refused.

3. Nothing herein contained shall be construed to prevent the Governor in Council or the Treasury Board from refusing to approve of the agreement or to recommend its approval.

107. The agreement shall not be approved of unless it appears that:—

(a) proper provisions have been made for the payment of the liabilities of the selling bank;

(b) the agreement provides for the assumption and payment by the purchasing bank of the notes of the selling bank issued and intended for circulation, outstanding and in circulation; and,

(c) the amounts of the notes of both the purchasing and selling banks, issued for circulation, outstanding and in circulation, as shown by the then last monthly returns of the banks, do not together exceed the then paid-up capital of the purchasing bank and the amount (if any) held for both of the said banks in the central gold reserves referred to in section 61 of this act; or if the amount of such notes does exceed such paid-up capital and the amount so held, an amount in cash equal to the excess of such notes over such paid-up capital and the amount so held, has been deposited by the purchasing bank with the minister.

As to the Deposit.

2. The amount so deposited under paragraph (c) of subsection 1 of this section shall be held by the minister as security for the redemption of the said excess of notes; and when the amount of the notes of the two banks outstanding and in circulation is less than the aggregate of the paid-up capital of the purchasing bank, the amount aforesaid (if any) held in the central gold reserves, together with the amount so deposited, the difference shall, from time to time, be repaid by the minister out of the deposit, to the extent thereof, to the purchasing bank, but without interest, on the application of such bank, and on the production of such evidence as the minister may require to show the amount of the notes of the two banks then outstanding and in circulation.

Notes of Selling Bank.

108. The notes of the selling bank so assumed and to be paid by the purchasing bank shall, on the approval of the agreement, be deemed to be, for all intents and purposes, notes of the purchasing bank issued for circulation; and the purchasing bank shall be liable in the same manner and to the same extent as if it had issued them for circulation.

2. The amount at the credit of the selling bank in the Circulation Fund shall, on the approval of the agreement, be transferred to the credit of the purchasing bank.

3. The trustees shall not permit any part of the deposit (if any) of the selling bank in the central gold reserves to be withdrawn under the provisions of this act after the last judicial day of the month in which notice of intention to apply to the Governor in Council for approval of the agreement has been given and pending such approval, unless and until the trustees are notified in writing by the minister of his consent thereto; and on the approval of the agreement the trustees shall hold the deposit (if any) for and as if such deposit had been originally made by the purchasing bank.

4. The notes of the selling bank shall not be re-issued, but shall be called in, redeemed and cancelled as quickly as possible.

BOOK DEPARTMENT

Monetary Times of Canada
62 Church Street, TORONTO
MONTREAL WINNIPEG

109. The approval by the Governor in Council of the agreement shall be evidenced by a certified copy of the order in council approving thereof.

2. A copy of such order in council or extract thereof, and a copy of such agreement, purporting to be certified to be true by the clerk or assistant or acting clerk of the King's Privy Council for Canada shall, in all courts of justice and for all purposes, be prima facie evidence of the said agreement, and of its due execution, and of its approval by the Governor in Council, and of the regularity of all proceedings in connection therewith.

110. On the agreement being approved of by the Governor in Council, the assets therein referred to as sold and purchased shall, in accordance with and subject to the terms thereof, and without any further conveyance, become vested in the purchasing bank.

2. The selling bank shall, from time to time, subject to the terms of the agreement, execute such formal and separate conveyances, assignments and assurances, for registration purposes or otherwise, as are reasonably required to confirm or evidence the vesting in the purchasing bank of the full title or ownership of the assets referred to in the agreement.

Selling Bank to Cease Business.

111. As soon as the agreement is approved of by the Governor in Council, the selling bank shall cease to issue or re-issue notes for circulation, and shall cease to transact any business, except such as is necessary to enable it to carry out the agreement, to realize upon any assets not included in the agreement, to pay and discharge its liabilities, and generally to wind up its business; and the charter or act of incorporation of such bank, and any acts in amendment thereof then in force, shall continue in force only for the purposes in this section specified.

In the case of the Nova Scotia-Metropolitan bank merger, an increase of capital stock is not necessary, as the Bank of Nova Scotia already has authorized capital of $10,000,000.

The shareholders of the Metropolitan Bank will meet in Toronto on September 14 to consider the agreement of sale to the Bank of Nova Scotia.

◆

The Nipissing Mining Company of Cobalt has on the advice of Mr. R. B. Watson, who has examined the mine, taken over the Teck-Hughes property of Kirkland Lake. The control of the Teck-Hughes stock is held by the Great Northern Silver Mines by what it has been developed. Mr. James Hughes, one of the original owners of the property, also holds a large stock interest. The Nipissing takes over the mine on a working option basis, agreeing to spend a considerable amount of money on the development of the mine with a large payment if it is finally decided to take it up.

A special meeting of the shareholders of the Lake Erie and Northern Railway Company will be held at the head office of the company, in Montreal, on August 4th, for the purpose of considering the advisability of: (a) leasing the company's railway to the Canadian Pacific Railway Company, and, if considered expedient, to approve of the agreement for lease and the terms, conditions and form of the lease; (b) cancelling the mortgage securing second mortgage bonds to the amount of $500,000; (c) authorizing an issue of bonds to aid in the construction of the company's railways; (d) entering into a new mortgage securing the said issue of bonds, if authorized: and (e) if it is decided to enter into a new mortgage to authorize and approve the form thereof.

The total revenue of the Moose Jaw Electric Railway Company for the year 1913 amounted to $136,300.48. The expenses of management, operation and maintenance, together with interest, amounted to $96,906.11, leaving a surplus of $39,394.37. During the year the company expended on capital account $150,221.14. At the end of the year the balance to the credit of profit and loss account was $54,753.96, from which the directors paid the dividends at the rate of 6 per cent. per annum, aggregating $35,842.35, leaving a credit of $18,911.61 to the credit of the account. At the close of last year an offering of $50,000 of new stock was made to the shareholders, and was over-subscribed. The assets of the company are placed at $731,801.15 and of this amount $720,349.47 is investment in property, plant and equipment. The capital paid in amounts to $640,845.

* * *

INVESTMENT NOTES

Cape Breton Electric Company.—The statement of the Cape Breton Electric Company for the month of May shows an increase of $2,160 in net earnings:—

Gross earnings	$29,485	$29,989
Operating expenses, taxes, interest and sinking funds	22,533	25,197
Balance for reserves, depreciation and dividend	$ 6,952	$ 4,792

Camaguey Company.—The net earnings of the Camaguey Company for June show a decrease of $300 as compared with the same month of last year.

	1914.	1913.	Inc. or dec.
Gross earnings	$17,572	$16,081	+ $1,491
Net earnings	6,347	6,648	— 301

The decline is reported as due to increase of power house expenses following a breakdown of turbine which has now been repaired.

* * *

The British Columbia Sugar Refining Company has erected a $17,000 building on the property in Regina's industrial district, sold to them by the city.

The Canadian Westinghouse Company, of Hamilton, manufacturers of electrical equipment and supplies, have opened an office and warehouse in Fort William.

SASKATCHEWAN'S FIRST INSURANCE REPORT

Superintendent Arthur E. Fisher Submits Annual Document—Unlicensed Insurance

In 1913 there were 87 fire insurance companies operating in Saskatchewan, according to the first annual report of Mr. Arthur E. Fisher, superintendent of insurance for the province. Thirteen companies transacted the business of hail insurance, their operations having been placed under the superintendent's supervision by order in council.

Up to the present 161 companies have been licensed under the new act, classified as follows:—

	Companies.
Fire insurance	83
Life insurance	32
Hail insurance	0
Plate glass insurance	3
Accident insurance	26
Mutual fire insurance	7
Fraternal societies	4

Of these, 134 are Dominion licensees, and 27 provincial licensees.

In many cases companies have taken supplementary licenses under section 15 of the Saskatchewan insurance act.

During 1913 and up to the date of this report (June last), the following companies formerly operating in the province, have withdrawn from Saskatchewan:—

Western Union Fire Insurance Company.—Policies reinsured with the Pacific Coast Fire Insurance Company, Vancouver, B.C.

Winnipeg Fire Insurance Company.—Policies reinsured with the Nova Scotia Fire Insurance Company, Halifax, N.S.

Nova Scotia Fire Insurance Company.—Policies reinsured with the Home Insurance Company of New York.

Saskatchewan Insurance Company.—Policies reinsured with the Central Canada Insurance Company, Brandon, Man.

Alberta-Canadian Insurance Company.—Policies reinsured with the Central Canada Insurance Company, Brandon, Man.

Security National Fire Insurance Company.—Policies reinsured with the British Northwestern Fire Insurance Company, Winnipeg.

Sovereign Fire Insurance Company.—Policies reinsured with the Phœnix of Hartford.

Union Life Assurance Company.—In liquidation; policies reinsured with the Metropolitan Life of New York.

Ontario Fire Insurance Company.—In liquidation.

Rimouski Fire Insurance Company: In liquidation.

British Columbia Accident and Employers' Liability Insurance Company.—Withdrawn.

Factories Insurance Company.—Withdrawn.

Deposits have been Withdrawn.

The following companies have withdrawn the deposits made with the government under the Saskatchewan fire insurance act:—Imperial Underwriters—Secured Dominion license; Winnipeg Fire Insurance Company—Reinsured; Alberta-Canadian Insurance Company—Reinsured; Security National Fire Insurance Company—Reinsured; Saskatchewan Insurance Company—Reinsured; Western Union Fire Insurance Company—Reinsured.

The financial statements of the various provincial licensees are shown in the superintendent's report. These statements have been compiled from the annual reports submitted to the Saskatchewan insurance branch, which in the majority of cases have been duly verified.

Of the Insurance Branch.

Taken as a whole the duties of the superintendent are threefold, says the report. First, his duty to the province by virtue of the insurance act; secondly, a duty to all citizens of Saskatchewan to see that their rights are respected and safeguarded; thirdly, a duty to the licensed companies and the agents to see that they have that protection which should be accorded companies and agents that comply with the intent and spirit of the law.

From the increasing number of requests for information and advice regarding insurance there is no doubt but that the citizens of the province are beginning more and more to appreciate the fact that the insurance branch will render them service. During the year numerous complaints covering

"SOLID AS THE CONTINENT"

Every year shows a marked increase in the number of policies for large amounts placed with the North American Life.

The fact is significant.

It proves that the Company's financial standing and business methods stand the test of expert scrutiny.

unsatisfactory settlements and claims have been presented to Mr. Fisher, the superintendent. In some cases the companies have been at fault, but the indifference of the assured to the requirements of the adjusters has resulted in settlements being delayed in a great many instances. In almost every case Mr. Fisher has assisted in bringing about just settlements to all parties interested, numerous controversies and much consequent litigation having been avoided.

Regulation of Unlicensed Insurance.

The regulation of unlicensed insurance is a question that vitally concerns all insurance departments. This refers to all classes of unlicensed insurance. It is surprising that some of our citizens and good business men continue to patronize the unlicensed concerns. Their contracts are null and void under our laws, and are not enforceable in our courts. Parties placing insurance in such companies have the following conditions to contend with:—First, the difficulty in case of any loss which may occur as the policyholder is without recourse to the courts of the province to secure his rights, and of necessity must resort to the home state of any such company; secondly, the Saskatchewan insurance branch, having no jurisdiction, would be unable to assist the assured in any way. The operation of the act will tend to lessen the amount of unlicensed insurance, there being no discrimination between insurers by its terms.

The Saskatchewan act requires that each and every person, firm or corporation representing an insurance company must have a certificate of authority from the superintendent. Up to the date of this report 1,630 certificates have been issued.

Mr. Fisher's report is an excellent compilation.

◆

INVESTMENT NOTES

Lorne Power Company.—This company, with an Ontario charter, is a subsidiary company of the Mond Nickel Company, has increased its capitalization from $300,000 to $1,000,000.

Twin City Rapid Transit Company.—The comparative weekly statement of passenger earnings for July shows the following increase:—

	1914.	1913.	Increase.
First week	$193,723.77	$179,735.60	$13,988.17
Second week	181,141.12	166,435.43	14,705.69
Month to date	$374,864.89	$346,171.03	$28,693.86
Year to date	$4,843,804.80	$4,535,051.48	$308,753.32

Ontario Power Company.—During the six months ended June 30, the Ontario Power Company, of Niagara Falls, and the Ontario Transmission Company, Limited, whose entire stock it owns, sold power amounting to $797,147. The company purchased power costing $8,500 and paid government rental of $48,132, leaving gross earnings for the six months of $739,514, or an increase of $52,580 over the first six months of 1913. Operating expenses of $111,123 leave net earnings of $628,391, as against $597,215 for the same period last year; and receipts other than those from the sale of power bring the total net increase up to $681,467. Interest charges, however, in the past six months increased by $107,132 over the first six months of 1913, so that the surplus of $235,251 for 1914 is a decrease of $34,783 from the surplus for January-June of 1913.

Brazilian Traction, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power, and telephone services, operated by subsidiary companies, controlled by this company, for the month of June, 1914, follows:—

	1914.	1913.	Inc. or dec.
Total gross earnings	$2,013,832	$1,916,603	+ $97,139
Operating expenses	855,434	921,501	— 66,157
Net earnings	1,158,398	995,102	+ 163,296
Aggregate gross earnings from January 1st ...	11,791,355	11,552,887	+ 238,468
Aggregate net earnings from January 1st ...	6,742,430	6,147,791	+ 594,639

Canadian Life Underwriters at Halifax

Position of Insurance in Economics of the Dominion, with its Many Characteristics, Discussed by Experts and Fieldmen

A CONSIDERABLE volume of life insurance is being written in Canada and the companies are exerting great energy in placing more business upon their books. A large number of prospective policyholders are awaiting the argument that will make them holders and many folks who have already insurance upon their lives do not need much convincing as to the necessity for more. This position brings the companies once more to the point at which they must recognize one day the gap which they must help to fill by educating not only certain sections, but the public at large, as to the benefits of life insurance and the principles upon which the business is written.

The authorities of Laval, McGill and Queen's universities have practically agreed to adopt semi-popular courses of extension lectures preparatory possibly to half or full courses of an academic character. The Canadian companies shortly may try a co-operative campaign of advertising, in which the business of life insurance will be given the publicity it has lacked in the past. Articles regarding the advantages of insurance and explanations of the technical terms of insurance, such as have been printed frequently in *The Monetary Times*, will probably be issued by the companies. Life insurance must be as simple to the public understanding as is the bank deposit.

In addressing the Canadian life underwriters at Halifax last week, Mr. E. J. Clark, president of the National Association of Life Underwriters of the United States, stated that energy in the future should be directed towards the question of life insurance education in the interests of the agent, the policyholder and the prospective applicant for life insurance. The National Association has recognized this obligation and has begun an active and systematic campaign of education and conservation for the benefit of the agency force, policyholders and insuring public of the United States. The campaign of education which is being conducted under the supervision of the National Association must necessarily result in a more intelligent understanding of the fundamental principles of life insurance, a deeper appreciation of its benefits and necessities, less lapsation, fewer loans on policies and a corresponding ultimate increase in the number of lives insured and average amount at risk on each life. One branch of this educational campaign is to establish proper courses of life insurance instruction in the leading colleges and universities of the country and special courses of lectures and study more elementary in character in high schools. In the Wharton School of Finance, University of Pennsylvania, where life insurance has been taught for the past nine years, there were 126 students attending this year's courses and 86 students in the evening department of the school, making a total of 212. Of the 86 men who took the evening course a large number were connected with various life insurance companies.

Life insurance is more necessary than the citizen's morning paper. It remains for the life insurance companies and the press to convince the public of that.

A report of the interesting proceedings at the recent convention of life insurance underwriters at Halifax is given below.

SERVICE, SALESMANSHIP, AND SUGGESTIONS

President of National Life Underwriters' Association Points Out the Opportunities of Agents

One of the distinguishing characteristics which differentiate the present era from those of the past, has been the evolution and growth of life insurance and the change of sentiment on the part of the insuring public toward the importance of life protection in its many forms covering the varying needs of the family life and business community, said Mr. E. J. Clark, president of the National Life Underwriters' Association at Halifax.

The institution of life insurance as it exists to-day is comparatively new, having had its entire growth in Canada during the past sixty-seven years and in the United States in practically the same period of time. On December 31st, 1913, there were twenty-five legal reserve Canadian companies doing business in Canada, besides certain of our American companies. These twenty-five companies had assets on the above date of $252,950,454.00—661,791 policies in force, aggregating $993,585,505. Add to these results the record of the two hundred and thirty-nine legal reserve companies reporting to the various state insurance departments, and we find that the Canadian and United States agents have already served their policyholders to the extent of building up an institution with admitted assets of $5,067,175,441 and 38,456,223 policies in force, aggregating $22,108,264,141 of insurance. Who made this record possible? The agent. Not the officer or medical director. When you pause to consider the meaning of this to the social and economic life of these two great countries, you cannot but be impressed with respect for this great institution of life insurance and the dignity of the profession of life insurance. Such have been not only the possibilities of the past, but these are some of the actual results already accomplished. Notwithstanding the magnitude of these figures and the services already extended to twenty-five and one-half million policyholders on the American Continent by life insurance agents, life insurance has been undergoing many changes during recent years with the result that it stands to-day as the greatest bulwark against adversity, caused through the ravages of death and financial reverses, ever conceived by the mind of man.

The people in Canada and the United States carry more than twice as much life insurance as all the rest of the world combined. They have the best insurance companies, the highest grade agency force, and no profession or business has ever attained such remarkable growth and usefulness in the same space of time, and yet, the $22,108,264,144 of legal reserve life insurance is estimated to cover less than 7 per cent. of the life values of our insurable risks; whereas, it is estimated that the combustible property of Canada and the United States is protected against the possible destruction by fire to the extent of 82 per cent. of its actual value.

Serve the Policyholder.

Do not these facts reveal not only an unlimited field of activity, but greater responsibility than before appreciated? There is no evidence of any abatement whatsoever in the growth of life insurance. On the contrary, its field of operations is constantly broadening.

To be a mere salesman of life insurance does not meet the demand and does not constitute a full measure of service to policyholders. The ability to put a certain volume of life insurance on the books of a company as though it were so much merchandise, does not spell success; but the ability to advise, guide and serve the interests or welfare of the applicant or policyholder in the selection of the proper form and amount of insurance adjusted to the particular needs or requirements of himself, his family or his business, constitutes successful life underwriting and proper service to one's clients.

Not only may a form of policy best suited to one man be entirely unsuited to another, but different forms of contract are often required by the same man for different purposes at different times of his life and under different conditions of his family relationship or business affairs. It must not be left to the applicant to know what policy or policies will best serve his means, no more than the client in need of legal services should prescribe the form of legal advice to be given him by his attorney, or the patient should dictate to his physician the course of medical treatment which should be administered for his particular malady. New and important branches of life insurance have opened up in which special knowledge and training are required on the part of the agent—income insurance: providing fixed incomes for wives and children payable during their lives in monthly, quarterly, semi-annual or annual instalments. Corporation or business insurance: to protect corporations or partnerships against the death of valuable members, maintaining an equilibrium of commercial credit, retiring stock, discharging outstanding liabilities made restive by death, or adjusting the interest of deceased partners, all of which involves on the part of the agent a knowledge of commercial law.

The Counsellor's Permanent Client.

An agent's service to his policyholder does not end with the writing and placing of a policy. On the contrary, he should keep in touch with the insured; regard him as a permanent client whose insurance interests he is under obligation to conserve and care for whenever the opportunity presents and to be ever ready to give proper and necessary attention to securing a prompt renewal of premiums if there should develop any tendency towards slowness in payment or lapsation. Changes in the policy may be required on account of subsequent changes in the family or business of the insured. Assignments and changes of beneficiary may be required; loans against the policy requested, but to be discouraged wherever possible, and additional insurance to be placed from time to time as the circumstances and requirements of the insured permit.

The life insurance profession is now being controlled by specialists who have been trained either through the medium of regular educational courses, or practical training in the field and who appreciate the responsibilities and requirements of the service to policyholders which is now being demanded. We can never grant to our policyholders the right kind of service until we occupy the same position in our community that is occupied by the skilled physician and the leading attorney whose advice is sought after and seldom questioned.

The agent of the future, therefore, must be an insurance adviser or counsellor in all that the term implies—one whom any prospective insurer or policyholder may consult with perfect confidence of receiving intelligent, honest and conscientious advice and service. The agent should at all times so regard it, appreciating the responsibilities that devolve upon him as an insurance counsellor first and a scientific salesman second, never permitting his pecuniary interest in any transaction involved to influence his advice or service rendered.

Insurance and Enough of it.

We are dealing with the most serious and important problems in all the world, namely, those questions which pertain to death and its influence, endeavoring so far as it lies within our power to alleviate poverty and distress which usually follow in consequence with all that poverty means in its effect on disease, vice, illiteracy and even crime. Do you know that according to carefully compiled statistics 85 men out of every hundred at death leave no income producing estate and that only three men out of one hundred at death leave an estate of $10,000 or over, exclusive of life insurance? That 35 per cent. of all widows are left in absolute want and 90 per cent. of the widows lack the comforts of life?

Notwithstanding the enormous volume of insurance already in force, it is so inadequate in comparison to the life values of this country, that the benefits of maturing policy contracts are overshadowed by the poverty and distress caused through either the entire absence of insurance or an amount entirely at variance with the life values destroyed.

It should be the duty of every life insurance agent in order to retain the confidence and patronage of his policyholders to systematically call on each policyholder at least once every year and let that call be timed immediately preceding the change of age and rating of the policyholder, whether he continues to be an insurable risk or not. This call more than any and all others during the year constitutes the psychological opportunity of serving the policyholder with increased insurance and with the fewest opposing forces to overcome.

The call is appreciated and as a rule the policyholder is willing on request to furnish the agent of the company with whom he carries his insurance information regarding his sons or sons-in-law, intimate friends or employees, including such necessary forms of introduction (cards, letters or personal) as circumstances may dictate. This form of service alone, where systematically conducted, has been found universally productive of a very large increase.

These facts and requirements devolving on the agent of the future including the multiplicity of contract forms now required in order to properly serve the insuring public,—there being something like three hundred forms issued by the various companies,—combined with the general lack of knowledge regarding life insurance by the insuring public, render it necessary that the applicant or policyholder depend absolutely on the agent for guidance and advice, consequently these conditions necessitate a more careful and discriminating selection by companies and general agents of men for the life insurance profession, and a higher and more systematic training and education of the agent in order that the varied interests of the prospective applicant and policyholder may be properly conserved.

◆

PRIZE WINNING LIFE AGENTS

The prize to the local association showing the largest percentage of increase in membership, presented by Mr. John R. Reid, was awarded to Niagara District whose membership increased 180 per cent. Mr. C. H. Armstrong of the Imperial Life Assurance Company, Toronto, was again the winner of the essay competition. The winner of the president's gold watch, in the membership competition, was won by Mr. H. J. McEvoy, St. Catharines, Ontario. The presentation was made by past president J. B. Morrisette, of Quebec, in fitting terms.

◆

COMMISSION CONTRACTS AND PENSIONS

Commission contracts and pensions formed the subject of one discussion at the Life Underwriters' Association Convention at Halifax.

There was a growing tendency on the part of companies to follow the lead of the New York Life in the matter of co-operating with the agent in allowing him the opportunity of working out for himself the idea of a pension without loss of self-respect when his period of usefulness has ceased. It tends to foster loyalty and causes staffs to be less migratory, said Mr. W. L. Reid, Ottawa.

Mr. G. W. Hunt thought this matter was seriously being considered by the Imperial Life. The agents will have to help the companies in arriving at a satisfactory scheme, and they would be glad to hear from agents in this regard.

Other speakers alluded to the efforts that are being made by their several companies to provide satisfactory pension schemes, and Mr A. C. Lawson, Fredericton, asked, "Why pensions at all?" Was that not the purpose of endowment policies? He asked why the insurance companies could not do something in the way of pensioning after the fashion of the government annuities. He alluded to the trouble experienced each year in connection with insurance companies' annuities in the way of proving the existence of the party, etc., and compared it with the ease with which a government annuitant receives his money. He did not think the system of pensioning a satisfactory one at all. He did not believe in pensions. Let the people economize during their life time; drink less and smoke less. Mr. George E. Williams, Montreal, said the great trouble seemed to be the varying styles of representatives in the field which made it difficult to come to a satisfactory scheme. However, some companies have succeeded in working it out and doubtless others would follow.

TWENTY TIMES MORE LIFE INSURANCE

Is What Dominion of Canada Needs—Present Legislative Tendencies Are Harmful

Each individual agent is indebted to those men who prepared the way, and each profits from the work of his contemporaries, whose aggregate efforts keeps our business a live issue in the public mind. The insurance per capita carried by the Canadian people is still so small and the opportunity for increasing it so correspondingly great that each agent gains more from the general canvas of the field by all agents than he loses as a result of competition. You are competitors in comparatively rare cases only,—you are joint workers in the main. You have a great field to cultivate in common, said Mr. J. F. Weston, the new managing director of the Imperial Life Assurance Company to the life underwriters at the Halifax convention. You need intelligent co-operation to devise and to carry out the most effective means of removing the prejudice, carelessness and other causes which keep the Canadian people so under-insured, and you need to present the united front of a strong association against the use by any of methods and practices which are calculated to counteract your efforts in this direction. The stronger you keep your association to enforce observance of fair methods in competition and square dealing with the public, the more rapidly you will increase the demand for the protection you have to sell, and the higher you will elevate your profession in public regard. In this direction you have advanced further during the few years you have had an association than you did during all the years preceding it.

Early in the history of your association you did good work in resisting the imposition of certain legislative restrictions. There is a growing tendency on the part of our politicians to pass legislation inimical to our business and to the public interests which we and they serve.

We need a campaign of education on this point, and none are in a position to carry it on so effectively as you, the field men, who are scattered through all parts of the country, and are in daily contact with the people and with their representatives to our legislatures.

Canada's Insurance Needs.

The aggregate assets of the companies in Canada is about $345,000,000, and their premium income is over $47,398,376. These appear to loom large in the eyes of our politicians and to be a fair source from which to draw revenue for present needs. They seem never to consider the number of claims which these large sums cover, nor to realize how pitifully inadequate the amount of average claim is to replace the life value of the insured to their beneficiaries. We have insurance in force in Canada, including industrial, of $1,163,477,891. The average amount of the policies comprising this is only $715. Exclusive of industrial we have in force $1,046,481,104 in policies averaging $1,970. The average amount per death claim paid last year including industrial was $723. Excluding industrial it was $1,710. These amounts, on the average, represent all which many families have to protect them against dependence, often on the state, till they can adjust their conditions to replace the earning power of the life upon which the claim is paid, or until they can devise means of self-support. Then there are the many who have no insurance. Altogether we need about twenty times the insurance we have in force in Canada to equal the life values of our people.

This is the opportunity for business expansion which lies before you. It is a business proposition to you, and it should be the business of good government to lend assistance toward the protection of those values in its citizenship But in adding their tax to the cost of insurance, our governments are defeating what should be their aim. The truth of this principle has been recognized in older countries.

How Older Countries Act.

In England as long ago as 1853, when Gladstone introduced his first budget, he reduced the duties on life insurance and public opinion has justified the act by enlarging the extent of the exemption until now the premiums paid by an individual for life insurance are exempt from taxes up to one-sixth of his income, and the British government has inaugurated old age annuities.

In Germany the industrial population are compelled to insure, and the government pays twelve million dollars, annually toward the cost. Holland makes exemption, but here in Canada not only are there no exemptions made, but on the contrary, an exceedingly high tax is levied on the premiums paid by all who insure, so in effect a man is fined for acting on a provident impulse to protect those dependent on him, or himself in his own old age.

Can you imagine a falser economy on the part of any government that to thwart the efforts of the people to raise themselves and their dependents to an independent position of self-support, by extracting from the funds laid by for that purpose money to be used for present needs? In following such a policy they lower the standard of future citizenship and bring upon the governments of the future the cost of dealing with a larger measure of want, crime and degradation, which must spring from the more general poverty which will ensue. It is part of the work which awaits you to enlighten the people and our legislators upon this point, which surely should be obvious to us all.

◆

DEPRESSIONS IN COMMERCE

Modern business depends largely upon financial prosperity. Expansion is necessary if the commerce of the world is to be kept alive. Banks are called upon to discount notes and advance money for expansion of business, and financial depression makes it difficult to obtain accommodation in this respect, thus retarding expansion, remarked Mr. J. C. Stredder, when opening a discussion on how financial depression affects business, at the convention of life underwriters at Halifax.

There was a time when communities were self-sustaining. For instance the three maritime provinces of Canada at one time were self-sustained, but the development of the west in products of the soil, construction and completion of the great transportation lines, have made them as well as Ontario and Quebec, to a certain extent dependent upon the activities in our west. Slackness of trade, or depression in that vast territory brings its effects in our five eastern provinces. As it is in this Dominion of ours so it is in the whole world. When the unsettled condition of affairs in the near east took place, its effect was felt by the whole civilized world. Money became tight, the demand for products became small effecting the countries nearest, which countries are great consumers of the natural products of this continent, thereby restricting their purchasing power and decreasing the demand. This decrease in demand causes loss of trade, thus decreasing the earnings of the great transportation lines both land and water.

The fluctuation in the earning powers of our transportation and steamship lines is a fairly reliable barometer of industrial conditions. The decrease, therefore, in the industrial earnings of the world affects the earning capacity of the hundreds of thousands of employees.

How does it effect insurance? It affects the profession in several ways. Scarcity of money means less money to spend, thus restricting the purchasing power of the community, making it more difficult to establish our propositions in a satisfactory manner to the general public. Facts seem to be against us in this particular, for notwithstanding the depression during the last two years the life insurance business produced has shown a remarkable increase. This can only be acounted for by the dogged perseverance, tact, and diplomacy, of those engaged in our profession to overcome difficulties that arise and to exert that determination found in successful life insurance men. How much greater the expansion might have been if the same activities had been displayed under more favorable trade conditions.

The effects of the financial depression is further evidenced by the large amount of loans and surrenders during the last two years. Of the assets in Canada of life insurance companies doing business in the Dominion, no less than 12.19 per cent. were accounted for under the heading of "Cash loans and premium obligations on policies in force." This taken in conjunction with the fact that of all policies terminated from all sources during 1913, practically 10 per cent. were attributable to surrendered policies for cash, is evidence of how financial depression effects this business and this is a serious aspect of the life insurance business.

BUSINESS AND HUMANITY

How Life and Fire Underwriters Can Improve and Prolong Human Life

Fire insurance companies can bring pressure to bear upon city councils and landlords to root out the fire-traps which so often serve as the haunts of filth, squalor and vice in every community. I think it would be entirely unjust to suppose that their only interest in such matters was because these were fire-traps: I give them credit for the ability to turn even fire-traps to their financial advantage, if they so desired and determined, suggested Dr. A. Stanley Mackenzie of Dalhousie University, when addressing the life underwriters at Halifax, on "Business and Humanity." It is not giving them of at least some of the finest of their leaders too much credit to believe that they were brought face to face with these conditions, and they used and are using their combined powers to wipe out such evil-breeding places from off the earth. There is almost no reasonable limit which can be set to the good that such powerful organizations as the fire underwriters' associations can do in this direction, in making the homes of the poorest fit to live in and bring up a family in with some expectation of morality and freedom from degrading vice.

Can Help in Prolongation.

It is a similar part, but a part much more far-reaching in its influences, that the life insurance men can play in the improvement and prolongation of human life, and in the freeing from the misery of disease and especially of vice-produced disease, the luckless sick millions of our every day. To them as to no other body of men comes home the integral result of the fearful destruction of health and life due to avoidable disease. The appalling count of the maimed and the dead due to drink and syphillis alone, for instance, is known to you as to no others but the medical profession and even these do not deal with it mathematically and in the aggregate as you do.

Abate Prevailing Evils.

Such bodies as yours have stepped from their narrower sphere of counting and averaging the expectation of life of each type of man, to the broader and more human problem of trying to assist in assuaging these evils and robbing life of some of its terrors, by making an effort to bring pressure upon communities and upon governments to make regulations that will abate these evils under which the world suffers unnecessary pains. As philanthropists or humanitarians it is in your power to bring the great weight of your organization to bear to bring governments to a realization of the well-accepted fact that the health and stamina of the individuals of a nation are as great a factor in its possibility of greatness and lasting qualities as are its gold and its wheat-fields and its forests and its fisheries. You could be a prominent factor in the process that would force the government to have a ministry of public health, as important at least as the ministries of commerce or of war. In this twentieth century it is almost criminal that with our tremendously increased knowledge of the possibility of the prevention of disease we should have one government after another play with the fundamental question of public health. Such a body as yours could do no better public work than to press this problem upon governmental attention.

Remove the Cause.

Take but one single phase of this enormously far-reaching problem, the stamping-out of tuberculosis as an ever-present plague. No one can realize as well as you do the terrible toll of money and life which this dread scourge assesses on the community and the state, and so no one can speak with the emphasis you can in asking governments to enter the field of life insurance, (in one sense of the word), and life-preservation, by erecting the needful sanatoria and taking the needful precautions to drive this black shadow away. Again no body can so well as your own raise its voice against the evil of intemperance; and no one can speak with a greater voice of authority than you can that legislation must be framed to reduce the causes of drunkenness.

ELIMINATION OF THE PART-TIME AGENT

As Seen From the Fieldmen's Standpoint—Pros and Cons of His Appointment

The question of the part-time man has formed the subject of many arguments and it was therefore very appropriate that the question put down for the debate at the recent life underwriters convention was, "Resolved that the part-time man should be eliminated." The affirmative was led by Mr. J. A. Johnston, of Vancouver. He said there were various degrees of part-time men to be considered. It all depends on the style of agency. He thought the worst species of part-time man is the man who has a full-time contract and does not work. For city agencies there should be no part-time men. It is heart-breaking to have a time-man hunting up a prospect and then for him to find that by some mysterious manner it is taken from him. Personally he would not take a dollar's worth of business from a man unless he was a real agent with his contract with him. A manager in New York has laid down a rule not to accept any business from any agent or broker not having a contract with him. Mr. Johnson preferred the full-time-man that goes over the territory like a cyclone, systematically and periodically, and who goes out full of energy and who works at it from morning till night; that man will get more satisfactory business than by depending on men in the various towns who take a good supply of literature and then stay away and are afraid to go out and tackle the proposition

Business at Less Cost.

Mr. C. A. Owens, St. John, said he had recently seen 25 letters in journals against the part-time man and nothing in favor of them. He thought the great objections to part-time men were largely sentimental. It would be a good thing if all who carried the rate book were full-time men, but to become a successful agent required experience and where was the prospective agents to get his experience? It would not be right to persuade a man to leave a good situation to enter the business when it was not certain that he was adapted for it, but if that man devoted part-time to it at first he would have an opportunity of deciding his fitness for the work. He was agreed that the part-time man should not be employed in the cities, but in the country districts he was all-right. With part-time men the business is produced at a smaller cost.

A Need in Nova Scotia.

The part-time man should not be in operation, said Mr. J. C. Stredder, Moncton. Let a man use part-time to see if he is likely to be a success; if he is, take him on full-time, and if not call in his rate book. To be a success in a job a man has to be dependent on it The part-time man deprives the full-time man of his living. He questioned if a part-time man produced business at smaller cost.

Mr. J. H. Trefry, Yarmouth, who represented one of the younger companies thought that by employing the part-time man was the only chance to make good in Nova Scotia. Most of their men started in as part time men.

Are Legitimate Agents.

Part-time men were regarded by Mr. W. Lyle Reid, Ottawa, as legitimate agents; they have taken rate books and are looking for business. He had in mind one man who was putting in part-time but who would become a full time man when he could see his way clear to become one. As much care should be exercised in the selection of part time men as is done in the case of regular men, suggested Mr. Archibald, Sydney, who agreed with Mr Owens that the part time man was almost a necessity, especially in trying them out before leaving positions to go into insurance altogether. Mr. V Reeve, London, said there were many full time men that ought to go out of the business. There are just as many good part-time men as good full timers. What was the difference between the part-time insurance man and the full-time man that sold automobiles, sewing machines, real estate, etc. They should be generous in this matter. A good man will not have time to grumble about the part-time man.

LADY UNDERWRITERS ARE A SUCCESS

Glances at Life Underwriting From a Convention Banquet Hall

It would be difficult to conceive of a more enthusiastic gathering than that which assembled on the occasion of the annual banquet of the Life Underwriters' Association. The Hon. A. K. MacLean, M.P., replied to the toast of "Canada." In a most interesting address he referred to the fact that almost everyone in these days appreciates the value of insurance companies to the state. He ventured the statement that there is hardly an organized force in Canada or elsewhere so capable of good to the state and its citizens as those companies. It is easy to foretell the future of a country such as Canada when you consider the great expanse and the rich soil, the great proportion of which is still to be found in natural pristine fertility. Of our natural resources the greater portion is still undisturbed. If Canada's future is not great it will not be the fault of the country; it will be the fault of its citizens. It is the character of our people and the national ideals which require to be looked after.

Business is Noble.

Mr. T. B. Macauley in toasting "Our Business" said our business is to lift the load of want and care from the widows of the future; to feed and educate the orphans of the future; to provide for the old age of the men and women who are at the present time robust in health. He did not think there was any business in the world so noble and godlike as theirs. It is not only noble, honorable and honored, but when it comes down to actual facts it is found to be very exacting and demands the very best that is in the man. "The Ladies" was proposed by W. McL. Robertson, who said: The relation of woman to life underwriters and their profession may be divided into three classes:—First, as the beneficiaries of the commodity in which they deal. Secondly, as competitors or co-workers in the profession. Thirdly, as mothers, wives and sweethearts to themselves as to men of all professions and callings.

From Woman's Viewpoint.

Mrs. Shaal, a well-known large writer of business of Boston, in her reply said: Women to-day know not only how to live, but how to think, and how to do things. Whether it is commerce, or science, or domestic life that calls them they will find their place and fill it well and give a noble impulse to its development. A commercialized age has forced many of them into the arena of public and mercantile life, and they are to be taken into account as important factors in the labor markets of the world. Into this field of activity woman has come to stay, and she seeks only the opportunity to win whatever laurels she may side by side with man in open competition.

She brings to her new tasks in the business world all the varied qualifications that have made for her success in social life, but in all the wide range of professions, vocations and avocations which she has filled and is filling so acceptably, there is none for which she is so peculiarly adapted as that of life insurance. She can use in this work all the subtle sympathy, the quick perception and enthusiasm that belongs to her sex. From the vantage ground of creator and manager of the only woman's department of any life insurance company for many years, I have not only seen the possibilities for women in this work but I have seen them achieve success in it and I shall be only too happy if I may so tell what I have seen that some of the splendid young women of Canada may be led to choose the "Pathway to Success" through the great profession represented by this honorable body.

The woman in the field is of inestimable value to her company and her brother solicitor to the extent of educating the wife, mother and sister on insurance.

All over the country women are making brilliant successes as life insurance agents, as incomes all the way from one to ten thousand a year will attest. They are college graduates, professional women, teachers, social leaders and women of this sort. They are finding this is a very attractive business because of the inducements it offers of greater freedom, the keen pleasure of meeting and convincing an opponent and the mental growth and development that is the result of coming in contact with such varied personalities and with quick perception adapting one's self to their different views of life in general and of life insurance in particular.

The insurance field has need of just these qualities which women possess in a supreme degree. By the aid of our good qualities blundering mistakes would be avoided and the machinery of business made to move on a smoother and higher plane.

◆

INSURANCE HOLDS HIGH POSITION

Apart from the benefit derived from such a gathering as this, by those immediately connected with the life insurance business, a convention of this character cannot but leave its impress upon a community, by showing to the public the prominent place our business has taken in modern civilization and commerce, remarked Mr. A. J. Dove, president of the Halifax Life Underwriters' Association, when welcoming the Dominion Association for its convention in that city. We sometimes meet people who underestimate the dignity and importance of our business, and consequently the profession which represents it. Such an occasion as this, given over almost entirely to a consideration of ways and means for the uplift of the business and profession, cannot fail to do much to remove any misapprehension regarding the beneficent functions of life insurance, and its relation to modern business and civilization, and this I take it, is what we are met here for. Can we accomplish it? As life insurance agents, we stand for benevolence, charity, honesty and integrity. We stand also for that enthusiasm in our business which makes a joy of every duty, and the hardest work a pleasure, which meets no difficulties because it sees none, which thrusts aside or surmounts every obstacle, which pushes straight forward to the end it has set for itself, without a thought of turning aside, or doubt of reaching it, which daring everything and knowing nothing of failure, assures success.

If we stand for these things what can we not accomplish? The ultimate success of our aims is assured.

◆

THE OFFICERS OF THE LIFE UNDERWRITERS' ASSOCIATION OF CANADA FOR THE ENSUING YEAR

The Underwriters' new officers are:

President, Mr. A. J. Meiklejohn; vice-presidents, Nova Scotia, New Brunswick and Prince Edward Island, Mr. A. J. Dove; Ontario and Quebec, Mr. T. Hendry; Manitoba and Saskatchewan, Mr. H. B. Andrews; Alberta and British Columbia, Mr. J. A. Johnson; secretary, Mr. W. L. Reid; treasurer, Mr. F. T. Stanford; representative National Life Association, Mr. J. Tory.

Executive:—Messrs. Wilson, J. T., Halifax; McIsaac, A. R., Sydney; Owen, C. A., St. John; Alexander, George, Sherbrooke; Kay, H. H., and Williams, G. E., Montreal; Hyndman, H. O., Prince Edward Island; Morin, Oscar, and Morash, Frederic, Quebec; Shorey, O. B., and Keddie, W. G., Ottawa; White, H.B., Brockville; Cook, J. B., Kingston; Parks, Belleville; Hall, G., Peterboro; Nugent, W. E., and Lawrence, H. A., Toronto; McAvoy, H. J., St. Catharines; McCartney, Hamilton; [illegible] Lochhead, W. M. O., Waterloo; Roberts, A. G., Windsor; McGregor, R. A., Owen Sound; Reeve, V., London; Burbank, J., Brantford; Routley, J. L., Port Arthur; Rowland, R. S., and Stevenson, Winnipeg; Matthews, J. E., Brandon; Spencer, Regina; Reaney, G. J. A., Saskatoon; Meadows, C. E., Moose Jaw; Reynolds, E., Edmonton; Sinclair, T. C., Prince Albert; McDonald, Frank, Calgary; Keealyside, E. W., Vancouver; Ferguson, K., Victoria.

◆

Premier Murray of Nova Scotia, sent greetings to the Canadian Life Underwriters' Convention at Halifax and added. "The work being done by insurance underwriters always had my entire sympathy. One is impressed with the magnitude of your business when he reads the record for the past year, but we all realize that the value of life insurance cannot be measured by figures for the reason that besides its inestimable benefits to individuals, life insurance develops and fosters a centre of brotherhood and common interests."

MORTALITY RATE AND DOLLARS

Cost of Life Insurance will be Lowered as Death Rate Decreases

The cities in the United States spend five times as much per capita to prevent fire waste as they do to prevent life waste, and yet, on a conservative estimate, the annual economic loss due to life waste is six times greater than that due to fire waste, and this ratio doubtless holds good, or nearly so, in Canada.

Surely, if it is right for a fire insurance company to spend money to prevent fire waste, it cannot be wrong for a life insurance company to spend money to prevent life waste.

An institution that is paying in death claims over $1,400 every minute of the working day cannot long remain indifferent to the estimated loss of a human life every minute of the entire day from preventable cause, suggested Mr. E. E. Rittenhouse, president of the Life Extension Institute, New York, before the Life Underwriters' Association Convention, Halifax.

Inasmuch as mortality is the prime factor in the cost of life insurance, any rational proposition suggested to reduce this cost, merits the careful consideration of life insurance men, especially when the plan enhances the popularity of life insurance.

The associations of life underwriters, and of life insurance executives, and many individual companies, have commended the health conservation idea in life insurance. In addition to this, a number of companies have actually undertaken the expenditure of money in health educational work among policyholders and others. All of this is convincing evidence that the idea has merit. In truth, it has been quite generally accepted by executives as a legitimate and proper function of a life insurance management. This being the case, a knowledge of the plan and its underlying principles should be a part of the education of every life insurance man.

Nothing so excites human sympathy as human suffering and untimely death. This accounts to some extent for the growth of the general movement. Therefore, life insurance, in joining in the great world-wide campaign to conserve health and life, is in tune with popular sentiment, and moreover, it has adopted a wise economic policy. This action has already served to bring life insurance before the public in a most commendable way.

What the Dollar Can Do.

We know that the mortality rate can be reduced, not only from observing the untimely passing of our relatives and friends as a result of preventable disease, but because we have actually reduced the death-rate by the expenditure of money in educational work and in applying the discoveries of science in the field of preventive medicine.

Careful calculations indicate that the general death rate in the United States has decreased 24 per cent. during the past thirty years. This means that over 400,000 people will be alive on next New Year's Day, who would have died this year if the death rate of 1880 still prevailed.

It is true that this extraordinary saving in human life is due to the discoveries of science, but it took time, energy and money to disseminate knowledge of these discoveries and to teach people how to apply them in avoiding disease. The dollar is indeed "almighty" when intelligently applied to the dissemination of knowledge upon the subject of the conservation of health and life. Speaking of discoveries, the greatest life-saving and happiness-promoting discovery of the age is the discovery that we can reduce the death rate by the intelligent use of the dollar.

Rejected One Hundred Thousand.

During the past three years, one of the large New York companies has rejected nearly 22,000 applicants for life insurance; 42 per cent., or over 9,000 of these people, were declined because of impairments or indications of impairments of the heart, blood-vessels and kidneys.

During the same period 43 per cent. of the 8,000 deaths in that company were chargeable to these same causes. This means that about 3,500 of these claims were due to these chronic diseases, at least 90 per cent., or 3,000 of which were premature. Over 3,000 claims were paid on lives that could have been easily prolonged several years, if these chronic diseases had been discovered in their incipiency when they readily respond to treatment.

It is estimated that the American companies rejected last year over 100,000 applicants for life insurance. If the experience of the company just referred to prevailed in this group, 42,000 of these people were turned down because of these same preventable maladies, not to mention other preventable impairments which could easily raise the number to 60,000. Think of the time, labor and money it cost to get these people to the medical examiner and to make the examinations. And what is more important,—think of the insurance protection that was lost to the dependents of these people because of their procrastination. Every disease must have a start, and these particular diseases usually start in a very quiet and insidious way, and develop some times for months without the knowledge of the afflicted.

Saving Lives and Money.

It is obvious that every life prolonged among policyholders operates to reduce the cost of life insurance. The lower we can maintain the mortality level, the greater will be the mortality savings. Last year the American companies spent over seven million dollars for medical selection in order to keep the actual a safe distance below the expected mortality. If it is worth while to spend this vast sum before people are insured, in order to keep the mortality down, why is it not worth while to spend a reasonable sum after they are in to accomplish the same purpose? We will not take a man with tuberculosis, or heart disease, or with indications of these diseases, but we do not care how soon he gets them after he is insured.

We know that the benefit of medical selection soon wears off, and that then the average policyholder is an excellent subject for a health examination. Why not offer it to him? We cannot compel him to take it, but out of every group of policyholders a certain percentage will voluntarily do so. This number will not be sufficiently large to burden any company with a heavy expenditure, but at the same time the group will be large enough to make it a very profitable investment.

This plan was first put into effect in 1909 by a company over which Mr. Rittenhouse was presiding at the time. Since then the idea has developed until several companies have adopted the health examination plan in some form, and a number of others are now carefully considering the advisability of doing so. He predicted that this would happen and stated at Halifax, "It now seems safe to predict that it will be but a few years before all companies will be engaged in this life-saving work."

PHASES OF LIFE INSURANCE PROGRESS

The report of the executive committee of the Life Underwriters' Association of Canada drew attention to three important phases of life insurance now being developed, in the following terms.

(1) During the year considerable progress has been made with respect to the placing of courses on life insurance in the curricula of several universities. The authorities of Laval, McGill, and Queen's have practically agreed to adopt somewhat popular courses of extension lectures preparatory to possibly half or full courses of an academic character.

(2) Not much progress has been made regarding co-operative campaign of advertising, but the committee is still strongly of the belief that it must come; the logic of circumstances is too strong to defeat it permanently. As the matter now stands, substantially all the Canadian companies have agreed to a trial, but the United States companies have so far refused. At the meeting of the Association of Life Presidents, held in New York in December, a plea was put to the United States companies, by Mr. L. Goldman, ex-president of the Life Officers' Association, not to block the inauguration of a scheme which promised so much of good to the whole life insurance business.

(3) The march of taxation of insurance premiums has gone steadily on, and the companies are growing restive under this injustice to the policyholders. In Ontario the tax has been increased to 1¼ per cent., and would have been placed at a higher figure but for the co-operative resistance of the Life Officers' Association, and Ontario representatives of our Association. In Quebec steps are being taken by the two bodies to make a strong protest against the tax to the Provincial Government.

POLICIES, POPULATION AND PRODUCTION

Nova Scotia's Proud Position—Resources and Transportation

A matter of importance, and which is a more encouraging feature of life insurance business of to-day, is, the number of men of high-grade character who have entered and are entering the business. It was not so many years ago when the life insurance field was considered as a "last hope," and a man who had failed in other work took up insurance as a last resort. To-day, all this is changed. Life insurance is now regarded as a profession which gives scope for the finest ability and the highest qualities of trained men. It is now a well recognized fact that life insurance, through its own merits, has made for itself a lasting place among the economic organizations of the country, and life insurance men to-day realize the fact as well as other business organizations that what is wanted in the business is men of high character, aggressive and progressive, who realize that in the work they are undertaking they are furthering not only their own interests, but that of humanity. These were words of Mr. F. B. McCurdy, M.P., and president of Halifax board of trade, in his welcome to the Canadian Life Underwriters' Association to Halifax, to hold their annual convention.

Basically Sound Conditions.

A recent report issued by the department of finance, Ottawa, on the business of the insurance companies operating in Canada in 1913 showed that while they issued about $177,000,000 of new policies in 1911, they issued about $232,000,000 in 1913. While the whole world during the previous year has been experiencing a period of depression, records such as mentioned could have been made only in a country whose business system was basically sound, and in such a case, is sure to recover any ground, temporarily lost, as soon as the rest of the commercial world, with whose affairs its are bound up, resumes its old rate of progress. While reaction in some lines of activity have been noticeable in some parts of Canada, nevertheless, the position of the province of Nova Scotia during the recent world-wide depression is, upon investigation of the facts, a noteworthy one. Here, progress has been conservative and consistent, and less fluctuation has taken place here than in other provinces.

This is perhaps due to two causes:—First, the character and habits of the people. Nova Scotia's most valuable asset is in the character of its population. The standard of intelligence, if I may use the term, in this province is exceptionally high; education is rightly considered of prime importance, and the people are thrifty, frugal and industrious.

Second, the resources of the province are extremely varied, and produce year in and year out a steady revenue, sufficient to support a thrifty population in comfort and happiness, and enable the industrious citizen to steadily put by something for a rainy day.

Nova Scotia's Advantageous Position.

The annual production of wealth in the province averages $137,335,000 and the population of the province at the time of the last census, 1911, was 492,338, so that the average production per head was approximately $280, or taking five members to a family, $1,400 per home.

There are other advantages of great importance; for instance, the resources are concentrated, and navigation is open twelve months of the year. No part of the province is situated more than fifty miles from tide-water, so that the matter of expensive transportation can never become so burning a question in Nova Scotia as it has and must be, owing to geographical reasons, in some other parts of Canada.

During a period when other provinces were paying attention particularly to the construction of works yet to become productive, the activities of the residents of Nova Scotia have been devoted very largely to the actual production of wealth. The result has been that in Nova Scotia, generally speaking, liabilities are small, and a consultation with bankers will disclose that during the financial strain of the past two years payments in this province have been better, and there has been less interference with the volume of business here than in any other part of Canada.

EDUCATION IN INSURANCE PRINCIPLES

It Is Needed By Policyholders and Legislators, Says J. C. Morissette

Strenuous steps in the path of progress are being taken by our Association, suggested Mr. J. B. Morissette, retiring president, in a graceful address before the Life Underwriters' Association at Halifax, the greatest problem confronting us at the present time being the educational one, as it is also our greatest opportunity. More elaborate plans have undoubtedly to be devised for spreading abroad a wise understanding and proper knowledge of the science of insurance and the work of the Life Underwriters' Association. The time has arrived when we should utilize the great educational influences of the daily press and of the magazines following the lead in this direction now being given to us by the National Association. The widespread ignorance of the great life insurance business is to-day the source of many handicaps, and here it may justly be claimed for our Dominion Association that it has done more for the benefit of the cause than any other factor at work.

It has frequently been pointed out that there is no other institution or business in the country into which people pay so much money, and concerning which they understand so little as that of insurance. The need of insurance education both for policyholders and for legislators is consequently great. All taxation of life insurance, for instance, above the cost of proper supervision, is extortion, and would be so regarded if the true nature of the business were clearly understood. The tax necessarily falls upon the policyholders, so that these men who are carrying life insurance to-day, to the end that those dependent on them, may never become public pensioners, are taxed upon every premium they put up, in addition to the ordinary taxes which they pay in common with the rest of the community. Law-makers do not realize the injustice of this tax, nor yet do the bulk of the policyholders themselves. They suppose that the taxes are paid by a wealthy corporation, while as a matter of fact the returns to policyholders are reduced by the amount the companies pay in taxes, which is ten times the sum required to cover the cost of supervision.

John Stuart Mill has well said that such taxes are "a discouragement of prudence and forethought." The committee on insurance law of the American Bar Association has said: "It is just as dishonest for a state to lay unholy hands on trust funds as for an individual to do it;" and; "it is a monstrous injustice for a state government to maintain itself by legislative raids upon trust funds and the climax of cowardice to commit extortion in the name of the police power."

As representing all companies, all sections, and all political opinions, and because of our personal and close contact as life underwriters with both policyholder and lawmaker, we have clearly both the opportunity and the obligation of safeguarding our clients' interests in these matters. This subject has engaged the serious attention of the committee on legislation, which is working, in harmony with the Life Officer Association, for a fair and reasonable adjustment of the matter—one which affects so seriously the interests of a very large proportion of the Canadian people.

There can be no doubt that the existing insurance laws have within the last few years greatly improved the conditions of insurance. But I believe that we should go a step further, and that legislation which will obviate the recurrence of recent unusual experiences in life insurance administration should be placed upon our statute books. I have reason to believe, as a matter of fact, that a measure of this kind, which will afford all desirable security, is already in contemplation.

◆

FREIGHT RATE REDUCTION IN UNITED STATES.

The interstate commerce commission of the United States has handed down its long expected decision in regard to the request of the railroads for authority to increase freight rates. The commission holds that no showing was made to warrant a general increase. Its revision of rates is expected to add about 1½ per cent. to the revenues of the roads affected.

POLICY LOANS, LEGITIMATE BORROWINGS

May Be Basis of Young Man's Business Career—Discourage Extravagance

I would be sorry to say a word that would encourage the practice of borrowing on the strength of a life insurance policy for the purpose of indulging in an extravagance that could not otherwise be provided for, stated Hon. Justice Russell, of Halifax, when addressing the Dominion Life Underwriters in that city. The man who borrowed money on his life insurance, for instance, in order to pay for an automobile was in plain language, a fool; but he was no greater fool than the man who mortgaged his house for the same purpose,—not quite so big a fool in all probability, inasmuch as the interest and conveyancing charges of the mortgagee and his lawyers would certainly be greater than those of the insurance company. If there had to be a borrowing, in other words, if the occasion and purpose of incurring the debt were legitimate, then he must say that his opinion was the very opposite of that expressed by more than one of the newspaper commentators on the warning of the life insurance presidents. The debt had to be paid in any event, there was no discharge in that warfare. If the amount was not borrowed from the life insurance policy at four or five per cent., it must be procured from the banks at six or seven per cent., if not considerably higher rates through the intervention of the money lender. "Borrowing money on life insurance is or ought to be the last extremity," so ran the comment of one of the many newspapers that had taken up the discussion. On the contrary, for the reasons of economy already mentioned, it seemed to him that borrowing on the strength of his previous accumulation represented in the life insurance policy, was one of the most legitimate, because the most economical, modes of paying a debt.

Not at Expense of Creditors.

The man who satisfied his creditors by this method was not "borrowing from posterity" as one commentator declared; "posterity" had no valid claim upon his bounty until his just debts to his contemporaries were honestly discharged. Neither was he "borrowing from his own heirs, by dipping into the principal of the protecting fund for his family." It was a fair question whether in any event a man had a right to provide for the protection of his family at the expense of his creditors. The creditor also presumably had a family to be provided for, and it was good morality that a man should be just before he was generous. The laws of the country, the common law, with its profound and essential equity, aided by the statutes of Elizabeth, and the jurisprudence of the equity courts, had settled the question to what extent and under what circumstances a man should be allowed to make provisions for his family that should prevail over the existing or subsequent claims of his creditors. Within those limits, such preferences were ethically sound, but outside of them, the suggestion that the family should be provided for at the expense of the creditor was essentially dishonest, even if the project could be successfully accomplished.

The question was not really as to the best method of providing for the payment of a debt, but as to the propriety of incurring the debt at all. On that point, there was really no room for different opinions. To borrow from the life insurance fund for the purchase of an extravagant indulgence was, of course, the very extreme of thriftlessness and folly; and he had no doubt that in far too many instances, the loans which had run into such abnormally large figures, were taken up for wholly illegitimate purposes to make provision for gratifications that could not be afforded, and extravagances that should not be indulged. As already said, the real question was always whether or not the debt should be incurred, and that was always a mere question of common prudence.

Foundations for Business.

But that there should be no debtor and creditor relation was an absurdity on its face debt, as had been well said by a high authority, was one of the conditions of civilization. There was, he believed, no credit system in Patagonia, and no money borrowed on life insurance policies among the bushmen of Africa. If there was no borrowers there could be no lenders. If there could be no lenders there need be no accumulations and there would be little thrift. One of the strongest incentives to industry and economy would be taken away. The whole monetary system of the world would have to be turned upside down. He need not surely pursue or elaborate the argument; the general truth of the proposition must be self-evident.

Now, take the case of a young person going into business or qualifying himself for a profession. He has talent, virtue, industry and a reasonably prosperous outlook but he has no capital. Must he spend the best years of his life gathering together by uncongenial toil and slow accumulation the funds that are necessary for his project? Or shall he find, if he can, a capitalist with faith in his ability and his outlook, and secure him against loss by taking out a policy of life insurance in his favor. After he has paid a sufficient amount in premiums to make the policy a valuable asset, shall he not be allowed to recoup himself for his outlays by receiving back a part, a comparatively small part of what he has paid in, and a still smaller amount, if the relation is to be between the amount of the loan and the sum ultimately payable under the policy. The transaction leaves a security for wife or family, substantially, almost as good as it was before. It enables the borrower to escape to the extent of a loan at least, the large interest exacted by the bankers. It spares him the necessity of going to the manager hat in hand, for continuous and repeated renewals. It probably increases his credit with the bankers for the occasion when an emergency will call for an accommodation; it gives him back a part of the money which he has advanced at no inconsiderable inconvenience, to keep his premiums paid. It affords the company an investment with its accumulations which is absolutely secure, because the amount so advanced by the company can by no possibility ever result in a loss. Thus, it was a fair transaction all round, and he saw nothing whatever in such a procedure to present the occasion of reasonable criticism or complaint.

Not a Crime Against Posterity.

Of course, it was only fair to the companies that they should not be exposed to the inconvenience of sudden and unexpected demands for large advances; should such applications come upon the company in an avalanche like the run on a bank, they must necessitate the realization of securities under circumstances resulting in loss to all concerned. There should, of course, be provision for reasonable and timely notice; but with these provisions under the conditions indicated, for legitimate purposes, he contended that the acceptance of a loan on the strength of the policy of life insurance was not a crime against posterity, a robbery of the air, or an injustice to the family. Nor did it answer to any other of the descriptions under which it had been presented in the newspaper comments upon the deliverance of the Association of Life Insurance Presidents. That deliverance he was fully prepared to concede, and the warnings which it conveyed were essentially wise and fair and he sincerely hoped it might result in checking the thriftlessness and extravagance which, in too many instances, were the cause of the enormous expansion in the amount of the loans which was indicated by the statistics of the life insurance companies.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt Station for the week ended July 31st:—

Crown Reserve Mine, 42.000; La Rose Mines, 87.510; Dominion Reduction Company, 84,300; Cobalt Townsite Mine, 85.850; McKinley-Darragh Savage Mine, 82,260; Peterson Lake Mine, 63.080; Cobalt Lake Mining Company, 123,270; total 570,070 pounds or 285 tons. The total shipments since January 1st, 1914, are now 23,263,673 pounds, or 11,631 tons. Week ended July 31st, 1914:—Gold ore from Cobalt (originally from Swastika) Tough Oakes Gold M., 102,430 pounds; New Liskeard—Casey Cobalt S. Co. M., 57.424 pounds.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons, in 1913, 20,261 tons.

PROSPECT NEEDS POLICIES

The reason why so many people neglect to effect life insurance is sheer thoughtlessness. They have not given the subject that large consideration which would enable them to realize the numerous and substantial benefits which a life insurance involves, is the thought contained in the address of Mr. A. R. McIsaac, Sydney, given at the Life Underwriters' Convention. Education is necessary to impress on insurable subjects the extent and character of these benefits, and in that work of public education insurance companies and their agents are taking a leading place, and the more fully the public realize the immense amount of good that is being done for mankind by the life insurance companies, the less need there will be for strong closing arguments, for this would be the strongest of arguments. Working classes, as a rule, are inclined to suspect the motives of sharp business people. The best thing to disarm that suspicion is honest evidence of friendship. The insurance agent must, therefore, approach the subjects of his canvass in a truly fraternal spirit. He must make it plain to the people that the object of his proposition is to help them. This task accomplished, his further work is easy; no further closing arguments are necessary.

It behoves the insurance agent to deal with his subjects in a candid, cordial manner. When other business men are laying their proposals before their clients and customers, the latter usually feel that what is offered to them is needed by them—it may be bread, it may be meat, it may be raiment, it may be any thing that is popularly deemed necessary. In the case of life insurance, however, not all are able to see without efficient explanation, that such a thing is necessary for them at all. And herein lies the immense need of an agent's skill and tact. He must be kind, courteous, and convincing. To all men he must be perfectly honest in his representation of facts. Without any undue pressure, he must make it clear to the man whom he addresses that there are mutual interests and advantages embodied in the proposition urged. At the very outset there should be clear confidence and good-will established between the insurer and the insured. Without this, it is exceedingly difficult to secure, in subsequent transactions, the willing co-operation of both parties. An agent has no apology to make for insisting on the propriety of insuring, if the subject of the risk can afford it and otherwise acceptable. There are some people who delude themselves into the belief that they cannot carry insurance. An ordinary laborer could buy a year's insurance of a thousand dollars with the wages of one month leaving the earnings of eleven months to defray all other financial obligations, and surely any young man should put away for the future one month's earnings every year. Any average wage-earner in good health could afford $1,000 insurance, if he so willed.

NORTHERN CANADIAN MORTGAGE COMPANY.

A satisfactory report was presented to the shareholders of the Northern Canadian Mortgage Company, Limited, of Winnipeg at the recent annual meeting. The earnings for the first half year were $28,147, and for the last half $33,264, making a total for the year of $61,411, an average for the year of 12⅓ per cent., and for the last half of over 13 per cent., on the capital employed.

These figures, as Mr. Cass, the president, stated, are particularly good in view of the fact that the company has operated during the past year on its own capital only (practically no money having been borrowed during the period) and after paying the half-yearly dividends at the rate of 9 per cent. per annum, $15,000 has been added to reserve account and $2,135 carried forward.

The officers, directors and shareholders of the company are unanimous in their faith in the strength of the corporation, but some of the shareholders raised a question as to the advisability of paying the present dividend, their point being that it would be better to pay a smaller dividend and build up a larger reserve. The directors stated their opinion that the earnings justify the dividend, but asked for an expression of opinion from the shareholders on this matter. It was discussed at the annual meeting and the action of the directors was ratified in declaring a dividend at the rate of 9 per cent. per annum and the shareholders approved the policy of paying the present rate of dividend provided that the earnings are sufficient to allow of at least 20 per cent. of the net profits being first carried to reserve.

The company has made no move as yet with reference to placing debentures. Unfortunately the international war will prevent any steps being taken in that direction for the time being. The company's authorized capital is $1,000,000 all of which is subscribed and $521,380 paid up. There is a reserve of $50,000 and a surplus of $2,135.

The directors of the company are as follows:—Edward Cass, president; R. W. Paterson, vice-president; T. L. Hartley, secretary-treasurer; T. Harry Webb, Thos. McAvity Stewart.

◆

An English minister, who guarded his morning study hour very carefully, told the new maid that under no circumstances were callers to be admitted,—except, of course, he added,—in case of life and death. Half an hour later the maid knocked at his door. "A gentleman to see you, sir." "Why I thought I told you—," "Yes, I told him," she replied, "but he says it is a question of life and death." So he went downstairs and found an insurance agent. This was one story told by Mr. F. B. McCurdy, M.P., at the Underwriters' Convention at Halifax.

BRITISH COLUMBIA'S MINERAL PRODUCTION

The gross output of the mines of British Columbia in 1913 was over $30,000,000, $2,000,000 less than in 1912, but nearly $7,000,000 greater than in 1911.

These figures are given in the annual report of the provincial mineralogist, Mr. W. Fleet Robertson. The following are the details for 1913 compared with the two previous years:—

	Customary	1911.		1912.		1913.	
	Measure.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Gold, placer	Ounces	....	$ 426,000	....	$ 555,500	....	$ 510,000

DEBENTURES AWARDED

Barrie, Ont.—$52,190, to Dominion Securities Corporation, Toronto.

Welland, Ont.—$82,000, to Dominion Securities Corporation, Toronto.

Dauphin, Man.—$31,000, to Messrs. C. H. Burgess and Company, Toronto.

Englehart, Ont.—$28,000, to Messrs. C. H. Burgess and Company, Toronto.

Oxford County, Ont.—$36,000, to Dominion Securities Corporation, Toronto.

Owen Sound, Ont.—$63,000, to Dominion Securities Corporation, Toronto.

Wallaceburg, Ont.—$36,000 30 years, to Messrs. Wood, Gundy and Company, Toronto.

Waterloo Township, Ont.—$18,360 5½ per cent. 10 years, to Mutual Life of Canada, Waterloo.

Berlin, Ont.—$90,200 5 per cent., to Messrs. Wood, Gundy and Company, Toronto.

Moncton, N. B.—$120,000 5 per cent. 40 years, to Messrs. J. M. Robinson and Sons, St. John.

Fredericton, N.B.—$22,000 4 per cent., to Eastern Securities Company, Limited, St. John.

Brandon, S.D.—$37,000 5 per cent. 20 years, to Messrs. Wood, Gundy and Company, Toronto.

Dunnville, Ont.—$9,500 5 per cent. 20 years, to Messrs. R. C. Matthews and Company, Toronto.

St. Vital, Man.—$140,000 6 per cent. 20 instalments, to Messrs, Wood, Gundy and Company, Toronto.

Weyburn S.D., Sask.—$25,000 5½ per cent. 30 years, to Messrs. Wood, Gundy and Company, Toronto.

Oshawa, Ont.—$55,000 5 per cent. 20 and 30 years, to Messrs. R. C. Matthews and Company, Toronto.

Smith Falls, R.C. S.D., Ont.—$35,000 5½ 30 years, to Messrs. R. C. Mathews and Company, Toronto.

Strathroy, Ont.—$25,000 5 per cent. 30 instalments, to Messrs R. C. Matthews and Company, Toronto.

Pelee Townships, Ont.—$9,350 6 per cent. 20 instalments, to Messrs. Wood, Gundy and Company, Toronto.

Lochiel Township, Ont.—$5,038 6 per cent. 10 and 20 instalments, to Messrs. Macneill and Young, Toronto.

Clarence, Township, Ont.—$15,000 5 per cent. 20 instalments, to Messrs Macneill and Young, Toronto.

St. Jean de Baptiste S.D., Alta.—$1,200 6½ per cent. 10 instalments, to Messrs. Macneill and Young, Toronto.

Tilbury, North Township.—$2,400 5½ per cent 10 instalments, to Messrs. Macneill and Young, Toronto.

St. Jerome, Que.—$50,000 5 per cent. 50 years, to Canada Securities Corporation, Limited, Toronto.

Brantford, Ont.—$134,431 5 per cent. 20 and 40 years, to Messrs. Wood, Gundy and Company, Toronto.

St. Paul R.M., Man.—$18,000 6 per cent. 30 instalments, to Messrs G. A. Stimson, and Company, Toronto.

Brant S.D., Man.—$9,000 6 per cent. 20 years, to Messrs. Brent, Noxon and Company, Toronto.

Moose Jaw, R.C. S.D., Sask.—$170,000 6 per cent. 40-year debentures, to Alberta School Supply Company, Edmonton.

◆

NEW INCORPORATIONS.

Canada's new companies recently incorporated number 300. The head offices of these companies are located in seven provinces. The total capitalization amounts to $85,558,000 the largest companies being:—

Western Ontario Natural Gas Company, Limited, Brantford, Ontario	$1,000,000
Glen Lake Cobalt Mines, Limited, Toronto	1,000,000
Ontario Bond Corporation of Canada, Limited, Hamilton, Ontario	1,000,000
Pennsylvania Oil Wells of Pitt Meadows, Limited, Vancouver, B.C.	1,000,000
Souris Valley Oilfields, Limited, Estevan, Sask.	1,000,000
Weston Real Estate Corporation, Limited, Toronto	1,250,000
Clansman Mines, Limited, Toronto	1,500,000
National Explosives, Limited, Toronto	2,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Manitoba	11	$ 1,155,000
Ontario	69	12,915,000
Quebec	68	6,915,000
New Brunswick	7	322,000
Nova Scotia	2	300,000
British Columbia	17	3,930,000
Saskatchewan	25	4,406,000
Alberta	101	55,615,000
	300	$85,558,000

Of these there were incorporated 20 oil companies in Alberta with capital of $1,000,000; 2 with $2,000,000 and 1 with $5,000,000 capital.

F. T. STANFORD,

Elected Treasurer of the Life Underwriters' Association of Canada.

J. A. TORY,

Representative to the convention National Life Underwriters' Association of the United States.

Canada as a Borrower in Peace & War

Canada has borrowed £500,000,000 from Great Britain, the outstanding figure in the present war. Will it have to finance its immediate needs in the United States now that the British banker is prevented from acting? The facts and figures which help to give an authoritative reply to this question, are contained in

"Capital Investments in Canada"

By FRED. W. FIELD THIRD EDITION

While it had not been the publishers' intention, the demand for a revised edition of "Capital Investments in Canada" has made necessary the publication of the third edition of this useful and timely volume. Orders already received will be filled as soon as possible, and new orders are now being taken. With the exception of the appendix containing a list of Canadian flotations in London since January, 1905, which will be revised at the end of each year, the book will not be revised again. This is the last opportunity, therefore, to obtain the complete volume.

"Capital Investments in Canada" contains some valuable facts and figures respecting one of the most attractive investment fields in the world. It deals in detail with British, United States and foreign investments in the Dominion Canadian government, railroad and industrial borrowing in London each have a separate chapter.

Municipal borrowings overseas, one of the most important phases of Canadian financing to-day, is dealt with at length, and a complete list is given of the £34,000,000 of loans which Canada's municipalities have raised since 1905.

Other subjects treated are:—Canada's credit abroad; Canadian provincial securities and the British trustee list; new capital from immigration; the relation of trade to borrowed money; Canada's share of British capital; Canada and international finance; crops and borrowing; and some notes of warning.

The volume is revised, throughout, to January 1st, 1914. The appendix of Canadian flotations is brought up to the end of July, 1914.

DEBENTURES FOR SALE

TENDERS FOR WATERWORKS AND SEWER DEBENTURES.

TOWN OF NEEPAWA, MAN.

Tenders, addressed to the undersigned, will be received up to Thursday, August 27th, 1914, for the purchase of $7,500 waterworks and sewer debentures of Town of Neepawa as follows:—

Extension of waterworks system	$2,609.34
Frontage tax sewers	4,890.76
Total	$7,500.00

The debentures bear interest at the rate of SIX per cent. per annum, payable half-yearly on the first days of May and November, repayable thirty years from date of issue, and have Interest Coupons attached.

The highest or any tender not necessarily accepted.

J. W. BRADLEY,
Secretary-Treasurer.

Neepawa, Manitoba.

DEBENTURES FOR SALE.

Sealed tenders will be received by the undersigned up to 12 o'clock noon, Saturday, August 15th, 1914, for the purchase of the following Debentures of the Town of North Bay, Ontario:—

1. $40,000 issue for street improvements bearing interest at the rate of five per cent. per annum, payable in twenty equal annual instalments.
2. $30,000 Public School issue bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.
3. $5,000 issue for purchasing apparatus, appliances, and appurtenances for Fire Protection bearing interest at the rate of five per cent. per annum, payable in ten equal annual instalments.

Tenders will be received for the whole of the several issues, or for one or more of the different issues.

Delivery to be made at the Royal Bank of Canada, North Bay, Ontario.

W. K. P. KENNEDY,
Town Clerk.

North Bay, Ont., July 24th, 1914.

Northern Canadian Mortgage Company
(LIMITED)

REPORT OF DIRECTORS AND BALANCE SHEET

The Directors beg to present the following statement of the business of the Company for the 6 months ending 30th June, 1914.

By discounts earned for 6 months ending 30th June, 1914		$10,715.09
By interest account for 6 months ending 30th June, 1914		28,371.74
By transfer fees		14.00
		$39,100.83
Expenses of management, printing, audit and directors' fees, etc., for 6 months	$ 5,687.76	
Commission on stock	148.75	5,836.51
Balance net profit		$33,264.32
By balance from 31st December, 1913..		7,251.99
		$40,516.31
Appropriated as follows:		
Dividend No. 8, 30th June, 1914, at 9 per cent. per annum, for half-year.	$23,381.03	
Transferred to reserve	15,000.00	
		38,381.03
Balance forward		$2,135.28

REPORT OF AUDITORS

Gentlemen:—

We have completed the audit of your accounts to the 30th of June, 1914, and herewith submit the usual half-yearly statements as follows, viz:

(a) Balance sheet as at 30th June, 1914.

(b) Profit and loss account for half-year ended 30th June, 1914.

Yours faithfully,

WEBB, READ, HEGAN, CALLINGHAM & CO.

10th July, 1914.

Profit and Loss Account for half year ended 30th June, 1914.

By discounts on agreements earned....		$10,715.09
By interest		28,371.74
By transfer fees		14.00
To expenses	$ 5,836.51	
To balance carried down	33,264.32	
	$39,100.83	$39,100.83

Warfare in the Morning's Mail

FOR the past two weeks the business man's desk has been used chiefly as a reading table for "special extra" war issues of the daily papers. The plunging of the British Empire into a great international struggle was a shock to business. It had to halt to grasp the significance. The time has come now to get back to business routine, as far as extraordinary conditions will allow. Until peace is declared, we must accept warfare as a part of the daily inevitable. Business cannot afford to skulk. It must go upon its way, even though it has to take circuitous paths. The knowledge that war is the companion of business will have its effect upon trade, commerce, the common round and the daily task throughout Canada. That effect need not be intensified by idle hands and brains. The sooner the country gets back to routine work, the better will it be for the country. Great Britain has set an excellent example, having settled down to business to the extent war will allow, and the struggle is very near the British Isles. Everything will be done by Canada to assist Great Britain in the crisis. Everything should be done also to support the present strength of the business situation in Canada. War news is now part of the morning's mail, and should be treated accordingly.

Public Works in Time of Crisis

WHAT will be the effect of the great international struggle in Europe upon engineering undertakings proposed and in course of construction in Canada? It is difficult to predict with any guarantee of accuracy, because the present situation is unparalleled, not only in the history of Canada but also in that of the whole world. We can but analyze the situation so far as available data will allow. In the matter of works of construction the natural division seems to be as follows:

(1) Work in progress and possible of postponement.
(2) Work in progress and necessary to continue.
(3) Proposed works, capable of postponement.
(4) Proposed works, necessary to continue.
(5) New work undertaken, due to war.

Obviously, all these divisions are dependent upon successful financing. It is likely that some of the undertakings now in course of construction, and which might even be postponed without disadvantage, will proceed if the funds for the work were obtained prior to the outbreak of war. On the other hand, those enterprises which have not been financed and which, to any degree of convenience can be postponed, will undoubtedly be stopped. There are certain works which must continue, and it is probable that these have been financed completely, except unusually large undertakings, such as the Toronto Union Station, the Greater Winnipeg Water District scheme, and the Harbor Board's development at Toronto. The total cost of these and similar undertakings in each case is high. The Toronto Harbor Board raised funds by the sale, some months ago, of several million dollars worth of bonds, which will finance their work for some little time to come. The Greater Winnipeg Water District Board obtained $2,000,000 in London last month, and that sum will finance their work for some months. The railway companies interested in Toronto's Union Station probably have enough money to proceed, slowly at any rate, with the work of construction.

Works which have been proposed but which are capable of convenient postponement, will undoubtedly be delayed to some extent, if not lengthily postponed. This applies more particularly to the undertakings of private corporations. There are certain proposed works which it is highly desirable to continue, such as, for instance, certain improvements and extensions of the Ontario Hydro-Electric Commission's general scheme. Private corporations probably will not consider it justifiable, in view of events in Europe, to proceed with any extensive proposed works and which were thought perhaps to be necessary.

Some new work may be undertaken in Canada due directly to the outbreak of hostilities. This would likely be in ship-yards chiefly, in connection with naval and military operations generally, and with war engineering.

In considering these factors, we must subdivide them again into:

(1) Works of private capital.
(2) Works of government authorities.

The Monetary Times has thought always that governments in times of extreme trade depression should spend money on public works, so far as proper economy dictates. In a time such as the present, and in view of the fact that the theatre of war is not actually on Canadian soil, the Dominion Government well might employ fairly substantial sums upon certain public works. Private borrowers will hesitate considerably at present because Canada's chief lender (Great Britain) has a bigger job on hand now than loaning money to its overseas dominions. Indeed, private borrowers, in which are included corporations, are almost helpless, except for funds in hand and for the possibility of borrowing elsewhere than in Great Britain.

On the other hand, the Dominion's credit is better than that of any other borrower in the Dominion, and there are several methods, such as the raising of temporary loans, which the government might use in case of necessity. The citizens of Canada likely would not protest against any action taken by the government to give employment to the citizens and to their industries, in such a time as this, any more than they will protest when the government imposes a special tax on tea and other commodities for war purposes in the British Empire.

Aside from that particular phase, the situation is regulated considerably by the fact that Great Britain, which has loaned Canada altogether £500,000,000, cannot, for the time being, continue to lend. One naturally turns to our nearest neighbor, the United States, which in its time has borrowed enormous sums of money from Great Britain, and which has in recent years become one of the two minor lending countries, the other being France, Great Britain taking first place. The United States has enjoyed for several years sixty per cent. of Canada's import trade. If the United States is able at this time to finance the immediate needs of Canada, there is a pleasing likelihood that a fairly substantial amount of construction work will proceed. This will be further emphasized if the Dominion Government, having due regard to the menace of war, will go on with a certain amount of public work.

Capital's Work and the Big Gun

THE cost of the present war can be guessed roughly, that is all. It has been in progress only two or three weeks. In that time, cities and towns have been razed, costly bridges dynamited, water channels set loose, immense battle and merchant ships sunk. The big gun is destroying in a few minutes the work which capital has created in many years. Several statisticians of repute have figured the cost of a war such as the present. Dr. Charles Richet, statistician of the University of Paris, for instance, has published detailed and elaborate estimates. From them he concludes that the daily expense of the actual campaign would be something like $54,000,000.

Dr. Richet bases his estimates on the assumption that, roughly, 20,000,000 men would be called to arms, of whom at least half would be sent to the front. On this basis he works out the daily expenditures for the seven powers as follows—the figures being here rendered into dollars:

Provisioning of troops	$12,500,000
Feeding of horses	1,000,000
Pay	4,250,000
Wages, arsenals and harbors	1,000,000
Mobilization	2,000,000
Transport of foodstuffs, weapons, etc.	4,000,000
Ammunition—	
Infantry	4,000,000
Artillery	1,250,000
Ship artillery	375,000
Fitting out of army	4,000,000
Ambulance service	500,000
Movement of ships	500,000
Deficit in taxes	10,000,000
Support of population without means	6,750,000
Requisitions, damage to towns, bridges, etc.	2,000,000
Total	$54,125,000

If such a war lasted only as long as the brief Franco-Prussian conflict of 1870, the outlay on this basis would exceed $5,000,000,000, irrespective of war indemnities.

Another idea of the cost is gathered from Great Britain's vote for purposes of the present war of $1,025,000,000—two votes in one week of $525,000,000 and $500,000,000 respectively. Germany at the same time voted $1,025,000,000. Canada next week will probably vote $100,000,000, although all of this may not have to be used.

Another statistician has shown us what previous great wars—none of them as big as the present—have cost. Here are the figures:

Wars—	Duration in days.	Cost in money.
England-France, 1793-1815	8,168	$6,250,000,000
Crimean War, 1854-56	731	1,525,000,000
United States Civil War, 1861-65	2,456	3,700,000,000
Franco-German, 1870-71	405	1,580,000,000
Russo-Turkish, 1877-78	334	950,000,000
*United States-Spanish, 1898	101	165,000,000
Boer War, 1899-1902	962	1,000,100,000
Russo-Japanese, 1904-05	576	2,250,000,000
Balkan Wars	302	200,000,000

* Cost to United States only.

Professor Richet, quoted above, estimating armies in the field numbering 21,200,000 men, gives the following approximate daily expenses on the basis of such a war footing: Feed of men, $12,000,000; feed of horses, $1,000,000; pay (European rates), $4,250,000; pay of workmen in arsenals and ports, $1,000,000; transportation, $2,100,000; transportation of provisions, $4,200,000; munitions—infantry, $4,200,000; artillery, $1,200,000; marine, $400,000; equipment, $4,200,000; ambulances, 500,000 wounded or ill, $500,000; armature, $500,000; reduction of imports, $5,000,000; help to the poor, $6,800,000; destruction of towns, etc., $2,000,000. Total per day, $49,950,000. These figures do not include any reference to the navies which are participating.

In 1912, M. Jules Roche, former minister of commerce for France, made some calculations as to the cost of a big European war. He took as the basis the expense incurred by France during the war of 1870, and he reckoned that, assuming for the sake of example (a remarkable coincidence) that the six nations of the Triple Alliance and the Triple Entente went to war, the cost of maintaining the armies alone would be no less than $5,400,000,000 a month, without taking into account the other expenses.

"And what would be their internal condition?" he asked. "The belligerent nations would be struck with general paralysis, and would see their very means of subsistence disappear. Suspension of work would be forced even on those who were not included in the general mobilization, since whom would there be to work for? To whom would they sell their products? How could they be exchanged or transported? All the large works and factories where the division of labor is completed would have to be shut. Even agriculture would be impossible.

"No more purchases or sales, either the economic or the financial death of labor, an abrupt stoppage of the heart's action in the national organism of all the nations at war, with profound reaction on all others—such would be the consequences of a general conflagration in the present conditions of European civilization."

Mr. Alfred Neymarck, vice-president of the Society of Political Economy, in Paris, after pointing out the huge magnitude of commercial, industrial and financial interests, as well as the enormous expansion in credit and business generally among the some six nations engaged, asserted also, in 1912, that the consequences of an abrupt cessation of all this activity through a general war would be incalculable in its vastness.

The tremendous price of the present war may make another such impossible. That would be at least one consolation of practical value.

Securities and the Wealth Behind

WHEN the Balkan war broke out in 1912 it was a severe blow to the market in $600,000,000 worth of government securities. That was the total amount then on the market of the loans of the five Balkan powers. Those figures give an idea of the enormous volume of securities which will be affected by the present struggle.

M. E. Terry, a well-known French economist, estimates that Europe possesses about $150,000,000,000 nominal capital in public securities, representing together the producing plant, the working capital of trade, commerce, and agriculture, reserves for the future, etc. These securities increase annually by four or five thousand millions; and from the ease with which they can be converted into money, they circulate from hand to hand just like coinage. The same thing applies to bank notes, cheques, and bills of exchange. In ordinary times, he says, that organization works well, but calamity was predicted by him in case of a general European war.

Since that prediction we have seen, during the past few weeks, the actual effect upon the securities of the world of international warfare in Europe. Emphasis is usually placed upon the aggregate securities dealt in on the world's stock exchanges. That there is great wealth behind these securities must not be overlooked. That wealth is always ready to support them. Not long ago it was thought it would be powerful enough and willing to prevent war, but in 1914 only its willingness is in evidence.

In Mr. Terry's estimate, it is not clear if the term "Europe" includes the United States or not; but, judging from the solidarity of all commercial bourses, it is a fair presumption that it does. Therefore, these $150,000,000,000 substantially measure the "securities" of the commercial world. What lies behind them is shown in the Wall Street Journal's estimate of the wealth of the commercial world:—

Country.	Population, millions.	Wealth, millions.
United States, 1912, computed	95.3	$130,000
Great Britain, 1909, computed	45.0	88,725
France, 1909, computed	40.1	83,000
Germany, 1909, computed	64.0	63,500
Russia, 1910, computed	146.8	60,000
Austro-Hungary, 1910, estimated..	51.3	46,170
Italy, 1908, estimated	34.0	30,600
Spain, 1912, estimated	20.0	14,000
Turkey, 1910,* estimated	24.0	9,600
Belgium, 1907, estimated	7.3	10,950
Holland, 1909, estimated	6.0	9,000
Balkan States, 1910, estimated	14.0	7,000
Switzerland, 1910, estimated	3.5	3,030
Sweden, 1908, computed	5.4	2,197
Portugal, 1910, estimated	5.4	2,700
Denmark, 1906, estimated	2.6	2,340
Norway, 1910, estimated	2.4	1,400
Greece, 1907, estimated	2.6	1,300
North and South America, except United States, estimated	70.3	34,448
Total	640.0	$600,000

* Egypt and Tripoli both excluded.

The securities are $150,000,000,000, while the wealth is $600,000,000,000, or four times as much.

There are reasonable grounds for hoping that in the future this enormous wealth may be used to prevent such a destruction of capital as is proceeding to-day.

An official cable has been received from the Belgian minister of foreign affairs by Clarence I. de Sola, Belgian consul in Montreal, requesting him to inform Canadian grain exporters that the Belgian government has decided to cover all risks of war on wheat or any other grain shipped to Belgian ports. The Belgian consul has given out the following cablegram in New York, received from the Belgian minister of war at Brussels:—"Let American exporters of wheat know that Belgian credit remains unimpaired, and that England has advised that all boats with wheat come direct to Antwerp without stop, all payments being assured as in time of peace."

The New York Journal of Commerce says:—Great Britain, as a preliminary step for financing a war but a week old, has authorized £1,000,000,000 in new consols which must immediately be sold. Other countries will necessarily take similar action. Thus the world's markets are confronted with a huge issue of securities that from patriotic motives in their respective countries, banks and individuals will feel impelled to fully subscribe. The funds for these national securities must be obtained in large measure by the sale of securities that are foreign to the markets of the various countries. In this way it is obvious that New York will be impelled to meet competition of outside securities.

BANK RETURN IS HISTORIC

Last Week's Bank of England Figures—How to Read the Statement

The weekly statement of the Bank of England is usually published on Thursday. Last week, owing to the break in financial conditions everywhere, on account of the war, the return was made public on Friday. The proportion of the bank's reserve to liabilities last week was 14.60 per cent. In the previous week it was 40.03 per cent. The figures of various returns compare as follow:—

	Aug. 7, '14. £	July 30, '14. £	Aug. 2, '13. £
Circulation	36,105,000	29,706,000	29,956,000
Public deposits	11,499,000	12,713,000	9,350,000
Private deposits	56,749,000	54,418,000	39,822,000
Government securities	11,041,000	11,005,000	12,756,000
Other securities	65,351,000	47,307,000	26,988,000
Reserve	9,966,000	26,875.000	27,507,000
Prop. res. to liab. %.	14.60	40.03	55.92
Bullion	27,622,000	38,131,000	37,410,000
Bank rate, %	6	4	4½

Marked the Reserve.

How the events of the week made their mark upon the proportion of reserve to liabilities is clearly shown in the following table, which cites that proportion for last week and for the corresponding weeks of previous years:—

Year.	Per cent.	Bank rate %.
1914	14.60	6
1913	55.92	4½
1912	48.80	3
1911	54.10	3
1910	51.05	3
1909	50.70	2½
1908	48.60	2½
1907	46.90	4
1906	48.73	3½
1905	46.72	2½
1904	51.29	3
Average	50.28	3.2

The principal features on August 7th of the Bank of England return—one which will become an historic document—are as follow:—

Total reserve decreased	£16,908,000
Circulation, increased	6,399,000
Bullion, decreased	10,509,475
Other securities, increased	18,044,000
Other deposits, increased	2,330,000
Public deposits, decreased	1,213,000
Notes reserve, decreased	17,029,000
Government securities, increased	36,000

How to Read Bank's Return.

The weekly accounts of the Bank of England are commonly called the bank return, and, as Mr. Hartley Withers, a London authority, has pointed out, are closely studied as containing the key to the position of the Bank of England and the available resources of the London money market.

The issue department contains one line of liability, viz., the notes issued. On the other side, giving the list of the assets held against these notes, the first line is "Government debt," which is the original debt from the Government to the bank, to provide which the Bank of England was founded in 1694, swollen from the original £1,200,000 to over 11 millions by subsequent additions. The next line, "Other securities," gives the holding of British Government stock, which raises the fiduciary backing of the Bank of England's note issue to the £18,450,000, at which it now stands. The rest of the notes issue are backed by gold coin and bullion, though the line "Silver bullion" recalls the fact that by the bank act of 1844 the bank was empowered to hold silver against its notes to the extent of one-fourth of the gold or one-fifth of the total bullion. But it is more than half a century since this right has been exercised, and a recent attempt to put it into force was so strongly resisted by city opinion that it was promptly dropped.

The items in the banking department require a little explanation. The "Proprietors' capital" speaks for itself, except that it differs from that of other English banking companies by being fully paid up, though, as was observed above, there is some doubt as to whether there is further liability on it.

The next item among the liabilities, "the rest," as it is called, is the Bank of England's reserve fund in the ordinary sense of the word—that is to say, an accumulation of profits which have not been divided among the proprietors, but have been kept in hand to strengthen the Bank's position. Unlike most reserve funds, however, this item, "the rest," fluctuates from week to week, and may be supposed to contain the current profit and loss account balance. It should be added that, by unwritten custom, it is never reduced below £3,000,000, and the amount above this level at which it stands at the end of the bank's half-year is the amount available for distribution by way of dividend among the proprietors.

Public Deposits.

The public deposits are the deposits of the various departments of the British Government which the bank holds on its account as keeper of the national balances.

The other deposits are the bank's liabilities to all customers other than the British Government, and so include the balances of the other banks which use the Bank of England as their banker and holder of a considerable portion of their cash reserves. Included along with them, however, there are the balances of the bank's private customers, including municipalities, colonial governments, etc., and the amount of the bankers' balances on which the resources of the London money market, apart from the Bank of England, really depend, can only be guessed at. It is believed that they generally average about 22 or 23 millions, and it is generally found that when the amount of the other deposits as a whole falls to about 41 millions, money in Lombard Street is scarce and comparatively dear.

Seven-Day Bills.

The item of seven-day and other bills is an old-fashioned form of remittance provided by the bank and used chiefly for the purposes of revenue payments.

On the other side of the account we find the bank's assets divided into "Government" and "Other securities" and its holding of its own notes and of gold and silver coin. Here again "Government" means only the British Government, and under the item "Government securities" are included the bank's holding of consols and other British Government stocks, treasury bills, or other forms of unfunded debt, and likewise any promises to pay that it may hold from the Government against temporary advances that it may have made to it in the ordinary course of its relation with it as its banker.

The "Other securities" item is equally, or still more, comprehensive. It includes the bank's holding of stocks or shares, any bills that it may have taken from the London market, its loans to private customers or to bill brokers or stockbrokers, and the discounts and advances that it makes in the course of its ordinary banking business at its branches in the country. It will thus be seen that the return in this respect is far from informing, and it is contended, not without reason, that the Bank of England might well set an example of clearness in the account which it presents by separating its loans, its discounts, and its holding of securities as investments.

Bank of England's Reserve.

The last two items among the assets of the banking department contain what is usually called the "Bank of England's reserve." It is not a reserve in the ordinary sense of the word, accumulated profits held as a reserve fund. That we find among the liabilities under the name "rest." When reference is made to the Bank of England's reserve, what is meant is its holding of cash in the banking department. This cash consists very largely of the Bank of England's notes issued by the issue department.

The amount of the Bank of England's reserve, as shown in its weekly return, is an item of the utmost importance to those who have to forecast tbe condition of the London money market. The amount of the reserve is now rarely allowed to fall below 20 millions, though there are many still alive who can remember the time when a 10-million reserve was considered an adequate amount. When gold is taken from the bank it follows that the notes issued against it by the issue department are cancelled, and thus the amount of notes held among the assets of the banking department are cancelled likewise. The export of gold so immediately reduces the reserve of the banking department and lowers the proportion between it and the bank's liabilities on public and other deposits and seven-day bills. Both the amount of the reserve and its proportion to liabilities are carefully watched by the bank court, and any serious reduction in them is met by measures described above, viz., the raising of its official rate, accompanied, if necessary, by the borrowing process by which the Bank of England frequently has to make its rate effective.

FINANCE MINISTER W. T. WHITE.

How Canada's Government Will Prevent Possible Trouble

THE special provision made by the Dominion government to cope with the financial situation in Canada in time of war will be of the greatest value perhaps when the crop movement commences. The provision which was described fully in *The Monetary Times* last week, authorizes the banks to issue Dominion notes to such an amount as may be necessary against such securities as may be deposited by the banks and approved by the minister of finance and his expert advisers. The banks also have authority to make payment in bank notes instead of in gold or Dominion notes until further notice, and to make use of the crop movement emergency circulation from now until further notice.

In ordinary years, the crop movement is financed in large part by the help of England, the Canadian banks drawing bills of exchange against grain being shipped. This year, it may not be possible, so that another means becomes necessary. Provision is made, therefore, that Dominion notes may be given out by the government's finance department against certain approved securities. Among these securities will probably be grain and other agricultural produce and possibly any goods Canada may have for export. This, at any rate, is the assumption of a banker who was interrogated on this point, and was probably the intent of the finance department and the bankers who met at Ottawa to discuss the measure.

The minister of finance has appointed the following gentlemen to advise him as to the securities to be accepted: Mr. D. R. Wilkie, president Canadian Bankers' Association, Toronto; Sir Frederick Williams Taylor, general manager Bank of Montreal, Montreal; Mr. E. L. Pease, general manager Royal Bank of Canada, Montreal, and Mr. H. B. Walker, manager, Canadian Bank of Commerce, Montreal.

With the assistance of the minister of finance and these four capable bankers, together with the support of Canada's banking fraternity and system as a unit, the Dominion need have little fear of a banking crisis or financial disaster.

MR. D. R. WILKIE.

SIR FREDERICK WILLIAMS TAYLOR.

MR. E. L. PEASE.

MR. H. B. WALKER.

MONTREAL'S PORT PRACTICALLY CLOSED

New Situation for Canada's Great Centre—Grain and Provision Exports

By T. C. ALLUM.

It is natural that in war time, in a port of the consequence of Montreal, difficulties should have arisen in many connections, such, for instance, as in the grain export trade. Last week, the harbor commissioners, realizing the importance of the situation, decided to declare the port closed. The exact significance of this action is not easy to determine, but it means in general that movements cannot take place in the harbor with customary freedom. It is doubtful even if ships may sail without permission—a condition which perhaps prevails at all times, but which is a mere formality under ordinary circumstances.

Undoubtedly ships having cargoes of grain would not be permitted to sail to the ports of the enemy, although, unfortunately, it is unnecessary under the circumstances to place any obstacles in the way of ships taking grain. In addition, restrictions are placed upon the movements of private individuals upon the wharves, and the drydocks are in charge of a patrol. All these restrictions became still more severe, following the declaration of war by Germany on Great Britain, and military patrols are in charge of all property which it might be deemed advisable by the enemy to have destroyed.

Ships Tied in Port.

At present, a large number of ships are tied up in the port. They are unable to move, owing mainly to the fact that war risks have occasioned difficulties between exporters on this side of the Atlantic and importers on the other side. This remark applies more especially to the grain business. Insurance rates have gone so high and the risk of capture on the high seas was deemed so great, that shippers would not take chances on the grain reaching the other side safely, knowing, in case of capture, they would not receive payment for their grain. It was announced later that in order to relieve the situation the British Government would guarantee the war risks. The details of this matter do not seem to be understood fully here by grain men and bankers. At any rate, it has not relieved the situation, inasmuch as payment apparently is still being demanded for the grain on board, here, instead of, as formerly, on the other side of the Atlantic.

It is felt here that there is no reason why exporters should assume risks, particularly as the market is rising and those on the other side of the Atlantic are in position to need the grain. That they will meet the situation before long, no one here doubts. Meantime, should any contracts be cancelled, exporters will be able to realize a large profit out of the advance which has taken place.

Sympathy is expressed for the condition of the tramp ships which are tied up in port. There are half a dozen or so of these which were chartered to carry grain. The expense continues on these at the rate of probably not less than $300 a day, and no doubt will have to be met by owners.

Flour and Provision Exports.

During the past few days flour millers have been reaping a harvest. The price of flour rose 30 cents per barrel early last week, and even at the advanced price, no sales would be made for future delivery, and a limit was placed on the amount which would be sold for immediate delivery. It is believed by millers that the argument is entirely in favor of higher prices, although the possibility that war risks might become so great that no exports at all would take place, is not overlooked. In such a case, the supply would be too great for local consumption and prices would decline. In reality, however, it is not thought that there is much likelihood of such a situation developing.

A somewhat similar situation exists in connection with the provision markets. Exporters are anxious about the cessation of shipments, but are of the opinion that the situation will develop shortly one way or the other, and they will then have a better idea of where they stand. It is assumed here in commercial circles that the British fleet will first go on a hunt for the German and make an effort to destroy it or bottle it. Following this, convoys will likely be sent over to accompany shipments of wheat, grain and provisions of all kinds.

◆

Copper producers are planning to curtail production from 25 to 50 per cent.

CANADA'S STEEL INDUSTRY

President Plummer Tells How War Conditions May Affect His Company

Replying to an inquiry as to how the European war would affect the Dominion Iron and Steel Company's plant, Mr. J. H. Plummer, president of the company, said:—

"We have a considerable tonnage of rail orders on our books, but they are chiefly for shipment by water. The disturbed condition which affects the sending of material by sea and the further disturbance of financial arrangements of our customers caused by the war would seem to make it inexpedient to continue rolling on these orders.

Cargoes Awaiting Shipment.

"We already have several cargoes awaiting shipment, and more or less held up by those conditions. We think it probable, therefore, that we shall have to shut down much of the plant, or rather to suspend a major part of our operations for a time until we see more clearly what conditions we have to meet.

"In time of war the general iron and steel industries are usually very active and that effect is likely at this time to be more marked in neutral markets because the great centres of industry in Europe are all directly involved. It is difficult to say how this would affect us in Canada, but if there is an active market in the United States we shall follow them to a greater or less degree.

"At the moment we are preparing to damp down two of the blast furnaces now in blast, and the open hearth furnaces. The finishing mills can and will be operated so far as orders are obtainable. We have on hand a supply of billets sufficient to keep these in full operation for some months. The demand for coal is unlikely to fall off, and unless our transportation arrangements should be seriously interfered with, this portion of our business will continue without change."

Nova Scotia Steel Company.

President Harris of the Nova Scotia Steel Company has announced that as a result of the financial situation created by the war it has been decided to close down a portion of the plant at Wabana Mines and the blast and open hearth furnaces at Sydney mines have been temporarily stopped.

◆

MUST NOT HELP GERMAN LOANS

Here is a copy of one of the numerous Royal proclamations being issued by the Dominion government at Ottawa:—

"By the King a proclamation notifying that British subjects contributing to a loan raised on behalf of the German Emperor or contracting with the German government, will be guilty of high treason, as adhering to the King's enemies.

"By the King.

"A proclamation.

"George R. I.

"Whereas a state of war exists between Us and the German Emperor:

"And Whereas it constitutes adherence to Our enemies for any of Our subjects or persons resident or being in Our Dominions during the continuance of the state of war to contribute to or participate in or assist in the floating of any loan raised on behalf of the said Emperor, or to advance money to or enter into any contract or dealings whatsoever with the said Emperor or his Government (save upon Our command), or otherwise to aid, abet, or assist the said Emperor or Government,—

"Now, Therefore, We do hereby warn all Our subjects and all persons resident or being in Our Dominions who may be found doing or attempting any of such treasonable acts as aforesaid that they will be liable to be apprehended and dealt with as traitors, and will be proceeded against with the utmost rigour of the law.

"Given at Our Court at Buckingham Palace, this fifth day of August, in the year of Our Lord one thousand nine hundred and fourteen and in the fifth year of Our reign.

"God Save the King."

UNITED STATES MAY BENEFIT

Sir George Paish Says the War May Give Chance to Become World's Banker for a While

While predictions in economic realms are difficult during the time of international war, unique in history, it seems to be conceded generally that the United States will obtain certain advantages. It is the only important commercial nation, having a surplus of manufactured products for export, which is not engaged in the war. Sir George Paish, one of the leading financial and economic authorities in London, thinks that the war will enable the United States to sell its great crops in places which will give a much greater income than if there was no war.

"Almost every industry," he says, "will derive more or less advantage. American investors and bankers should get in much profit from the ability to buy back from Europe great quantities of securities at attractive prices in payment for the foodstuffs and raw material exported from the United States.

Greatest Market for Capital.

"The United States can become, as it has this week, the world's greatest market for capital, and if the American people rise to their opportunity they can do a great deal to mitigate the disastrous economic consequences which would otherwise result in many countries from a great European war.

"It is obvious that for the time being the money markets of Europe will be closed to the demands for new capital of Canada, Brazil, Argentina, Mexico and other countries, and at such a time the prestige of the United States would be immensely enhanced if it were to take the place of Europe and meet the pressing needs of these borrowing countries.

May Help With War Loans.

"It is possible that the United States may participate in the great loans that will have to be raised in Europe if almost the whole continent becomes engaged in war. Possibly the participation will be indirect rather than direct.

"For the United States to gain benefit from the position as the wealthiest nation in the world, it is essential that American investors should not only have confidence in the future of their own country, but also believe that, war or no war, the world will continue to progress.

"In brief, a great war in Europe will give the United States an opportunity of assuming the post of world banker, by supplying capital freely to countries and individuals in all parts of the globe who need it and can provide the required security. Should the American people take advantage of the golden opportunity afforded them by the outbreak of war, it will mean no diminished but increased prosperity for the United States."

Will Be Injurious, Says Clews.

Mr. Henry Clews, of New York, takes a less optimistic view, but his opinion does not carry as much weight as that of Sir George Paish. Mr. Clews says:—

"The effect of war upon the United States (and also upon Canada) will be highly injurious. Food products would rise, and the taking of hundreds of thousands of men out of employment in Europe would mean a prolonged demand upon our food supplies. The scarcity of labor abroad would also be reflected here, resulting in higher wages in some industries and a general further rise in the cost of living.

"Probably some industries would benefit by the demand for war material, and there would be a better demand for our manufactures of steel, textiles, etc., to meet the vacancy caused by the loss of foreign trade which Germany and other European nations would inevitably incur. It is folly to suppose that such wholesale destruction of life and property could be of benefit to the world at large.

"The drawback would not end in an increase in the cost of living. The world's money markets would be violently deranged, and our own would ultimately feel the strain. Higher interest rates would surely follow the wholesale destruction of capital, and much of the reinforcing of the future which has got to be met would face serious obstacles. Our foreign trade will be demoralized."

◆

The British war loan is expected to be over-subscribed within two days of issue.

BRITISH CONSOLS' NEW RECORD

Lowest Price Since 1821 Was Touched Last Week—War and Stock Prices

Among other records in financial spheres created during war times is the decline of British Consols on July 30th, to 69, the lowest price since 1821, when a sale was made at 68¾. The lowest price between 1790 and 1821 was 50¼, recorded in July, 1803. In 1913, British Consols went no higher than 75⅝ as against the high level of 1912, 79 1/16. The lowest figure last year was 71 1/16. Three per cents. were created first about 1726. In 1737, the price touched 107. During the 1745 rebellion the monthly average price dropped to 75. In 1752, the quotation reached over 107. Two and one-half per cents. were created in 1903. The highest price in that year was 92 9/16 in April, and the lowest 86⅞ in September.

War and Stocks.

The following table of price comparisons for leading stocks, compiled by the London Financial Times, shows the lowest prices reached on July 27th, the day on which the Austrian invasion of Servia began:—

Stock.	Ten years, ended Dec. 31, 1913. Highest.	Lowest.	Lowest, 1912.	Lowest, July 27.
Consols	91 15-16	71⅛	72 11-16	71
Austrian Rentes, 1876	102¾	84½	88	82½
French Rentes	100	83	88⅛	77½
German 3 per cent.	91¼	72⅝	75¼	74
Hungar Rentes	100⅝	84	87⅜	74½
Russian 4 per cent., 1889	98⅞	69⅛	84	80
Servian unified	85½	69¼	83	67
Peruvian Cor., pf.	59⅛	17¼	43⅜	30½
Great Cent., pref.	40⅝	18⅜	26⅜	21
Great North Def.	57¾	32¼	47¾	46¼

Rio Tinto	109 7-16	46 1-16	60 13-16	60½
Brazilian Tract	105¼	82⅜	90¼	61

Balkan War Hurt.

The 1912 low figures are significant, on account of the outbreak of the Balkan war in that year. The lowest prices on July 27th were below the lowest recorded in 1912, and in many cases the differences are severe. Lower prices than those recorded on July 27th have been registered in many instances in the past ten years, but in the case of Consols the business at 71 was a record. As regards the railway and mining securities, dividend fluctuations have, of course, affected prices in the past. In 1904, for instance, when Union Pacific's touched 74, the dividend was only 4 per cent., while Canadian Pacific's were only paying 6 per cent., as against 10 per cent. now, so that absolute comparisons in such cases cannot be made of lowest prices.

◆

BRAZIL'S FINANCIAL MEASURES

Both chambers of the Brazilian Congress on Wednesday approved the emission of 300,000 contos (approximately $160,000,000 nominal) of paper. Of this sum 200,000 contos is destined for the payment of treasury creditors, and is convertible, 10 per cent. of the proceeds of the customs dues being allotted for the purpose. The remaining 100,000 contos is intended to aid the banks, which will pay 6 per cent. interest on them and are called upon to re-purchase them before December 31st, 1915.

◆

The banks at Lima, Peru, were re-opened on August 9 and business proceeded quietly.

FINANCIAL LONDON FEELING BETTER

Remarkable Return to Nearly Normal Conditions Reveals Capable Handling of Affairs

One of the most gratifying phases of the financial situation is the remarkable way in which Great Britain has piloted its banking and financial craft to an impregnable harbor. All the elements of a crash were present. What might have appeared at first glance panic measures, such as the raising of the Bank of England rate to 10 per cent., were in reality precautionary measures. They were successful. The result is, as an English writer says, "London has recovered its second wind." The traditional solidarity of London, having proved itself in a time of stress, the financial world elsewhere is breathing more easily.

In 1866, when the bank rate previously was at 10 per cent., it remained there for three months. On this occasion it stood at 10 per cent. for only five days, August 1st to August 6th. In reality the 10 per cent. rate was operative only on the first day, as Sunday followed; Monday was a regular bank holiday, and Tuesday, Wednesday and Thursday were made an extended bank holiday. On Thursday, the rate was dropped from 10 to 6 per cent., and on Saturday, August 8th, to 5 per cent. This is only two points higher than the lowest rate this year, namely, 3 per cent. The Bank of England rate, as the world's financial barometer, reads "Fair and temperature rising."

Resuming Normal Aspect.

The financial district of London on Friday, August 7th, according to cable messages, almost resumed its normal aspect with the reopening of the banks. Interest centred around the Bank of England, where a gradually extending line of people gathered anxious to exchange paper money for gold. There was no great rush till noon.

In strong contrast with the customary noise in the bullion department of the Bank of England, where a large staff is usually employed weighing bullion the whole day, not a person was to be seen there. At other banks business was quite moderate. Cheques in most cases were paid in notes.

Reports from the provinces indicate that the British public is not losing its head, as withdrawals have been small.

Chancellor Lloyd George in the House of Commons on August 7th announced that reports received from points throughout the country showed that with the opening of the banks the financial position was perfectly satisfactory.

The Bank of England, he said, had received on foreign accounts £$5,500,000 in gold; that there was no sign of gold being hoarded, and that trade was regaining its normal condition. Some banks had received more money than they had paid out.

Helping With Gold.

Another message from London says:—"Every citizen is being reminded by the different journals that every sovereign in the banks is an addition to the nation's gold reserve and a source of strength to the Empire. The fact that Premier Asquith and Lloyd George are working in the closest harmony with the leading bankers, gives a general feeling of confidence."

◆

A despatch from Berlin, says the Russian funds seized by the German government in Berlin banks are said to total $25,000,000.

The Boston office of Messrs. N. B. Stark and Company has issued the following:—"Probably no securities are likely to show less effect of the foreign wars than Canadian municipal bonds, backed by thoroughly sound municipal conditions, absolute legality and rich natural resources. Canada and her affairs are far removed from the tumult of political insurrections and war scares. The British investor will confidently turn to Canada for re-investment of his funds, as he realizes the strength behind Canadian municipals, as well as the exceptional interest return offered. The American investor having held for months accumulated funds will turn to Canadian municipals because of their absolute safety and high yield, and, in consequence, we feel the demand for these securities will likely mean an advance in price within the near future."

INSURANCE OF WAR RISKS

British Government Announces Scheme—Will Help Keep Open Trade Routes

The following is a summary of the war risks insurance scheme, announced this week by the British government:—

Firstly—Ships. The government scheme for war risks on ships is worked through war risk insurance association of shipowners already existing, and every effort is being made to bring as many ships as possible into this association.

The government scheme only applies re insurance of King's enemies risks; the object of the scheme is to secure as far as practicable the maintenance in time of war of oversea trade.

The government is entering into an agreement with an approved association to re-insure to the extent of 80 per cent. all risks assumed by the association as far as they are King's enemy risks, on the following terms:—

(1) On voyages at the outbreak of war re-insurance will be without premium

Must Comply With Conditions.

(2) On such voyages ship must comply with as far as possible the orders of the government and directions of the committee of the association to which it belongs, as to routes, port of call and stoppages.

(3) On voyages begun after the outbreak of war premium will be charged. This premium which will not be less than one per cent. nor more than 5 per cent. upon voyage will be fixed by the government.

(4) On such last-mentioned voyages ships must (a) comply as far as possible with the orders of the government and directions of committee of the association to which it belongs as to the routes, ports of call, and stoppages; (b) Not start on a voyage if ordered by the government not to do so.

Associations Approved to Date.

Associations at present approved are United Kingdom Mutual War Risks Association, Limited, 24 St. Mary Avenue, E. C., London, and Liverpool War Risks Insurance Association, Limited, 10 Water Street, Liverpool; North of England Protecting and Indemnity Association, Collingwood Buildings, Newcastle-on-Tyne.

Secondly—Cargo. A war risk insurance office has been opened in London for insurance of cargoes, other than enemies' property or goods (export of which is prohibited by proclamation), shipped for voyages commenced on or after office opened for business. Cargo in British ship at the time of outbreak of war will be treated at port of call as though that port were port of loading. Only risks which will be covered will be King's enemy risks.

Insurance of Cargo.

Cargo will be insured only if shipped or to be shipped in vessel covered for voyage against King's enemy war risks under scheme outlined above for ships. Rate of premium will be a flat one, irrespective of voyage or cargo insured. It is capable of variation from time to time within a maximum of five guineas percentage and minimum of one guinea percentage. If sailing is delayed under order of government, assured shall have option of cancelling policy and receiving back premium paid.

Value of cargo for State insurance will be values agreed to in maritime insurance policies covering same cargo, which policies will be produced at war risks insurance office when insurance is finally arranged.

Thirdly—This scheme was framed and primarily intended for ships continuously registered in the United Kingdom, but his Majesty's government have decided that its benefits may be extended to colonial registered ships which are included in one of the above-mentioned approved associations.

◆

BIG BULGARIAN WAR CREDIT

The British official war bureau says:—"The Bulgarian government has demanded a credit of $10,000,000 for mobilization expenses in addition to a previous credit of $30,000,000 for armaments."

HOW WAR HITS CANADA

It Closes Financial Markets—Withdraws Men From Field and Factory

BY J. DOWER.

Canada, a few weeks ago, may have been incredulous regarding the effects of a European war upon the business and commerce of the country. The contraction in credit, caused by the Balkan war, had been overlooked. In the past few days, some of the war's effects have been apparent equally to the boy whose last Christmas toy was stamped "Made in Germany."

Heads of families and hotel managers bought large supplies of foodstuffs, fearing a shortage, and war's high prices. Retail storekeepers' stocks were nearly exhausted, and no orders at prevailing prices were accepted for flour, sugar, etc. Wholesale houses were awakened hurriedly from summer dreams, by caller, telephone, wire and mail.

Manufacturers were caught with small stocks and lack of raw material.

Civic authorities are watching the horizon with their money-finding telescopes. New York looks good to some for temporary aid. Bankers are watching reserves. Brokers have adopted the boy scout's slogan, "Be Prepared."

The man on the street has missed the familiar face of his waiter at the lunch counter. He has been spirited away by war's alarms.

Political economists have lost much ammunition, many of their guns will have to be recast before again they can fire this charge which is taken from a popular work of a British authority:—

"It is commerce which is rapidly rendering war obsolete, by strengthening and multiplying interests which are in natural opposition to it. And it may be said without exaggeration, that the great extent and rapid increase of international trade, in being the principal guarantee of the peace of the world, is the great permanent security for the uninterrupted progress of the ideas, the institutions, and the character of the human race."

Canadian travellers abroad in time of pe[illegible] need to inspect paper notes and are averse to ca[illegible] on account of its weight. War has altered this, and Canadians in Europe, with travellers' cheques, etc., are glad to get gold coin, indeed any coin.

Effect on Foodstuffs.

The theatre of war is centred in one of the world's greatest wheat-producing areas, there the harvest is just ripening. With the men at war, crops may be lost, much destroyed, and some become in an unmarketable condition. Future developments will be closely watched relative to the profit accruing from Canada's crops as well as the effects on the steel, pulp and paper, food packing and canning, together with many other industries. At present owing to prevailing uncertainties no definite statements as to results can be made. Sir L. Melvin Jones, president of the Massey-Harris Company, Limited, at the outbreak of hostilities, in response to my inquiry, wrote thus:—

"Naturally having a large business in Europe, and in both of the countries who are at present at war, it would have an adverse effect upon our business, how serious, it is quite too early yet to pass an opinion. We are earnestly hoping the war will be kept within the present area, and that a general European war will be averted, and further that the present war between Austria-Hungary and Servia will cease in the near future, as it should do in the interests of the two countries involved, and in the interest of the peace of Europe."

Withdrawal of Labor.

Another important phase that affects Canada largely is the withdrawal of large numbers of men from productive industry. They are now being utilized as destroyers of capital and of human life.

Canada will feel the effects of the credit breakdown. "Credit is better than gold." That was a remark recently of an economic expert. The truth of this statement is self-evident. But the basis for the granting of credit has to be a solid one, it may be personal character, national resources, or real dollars. Credit is the postponed payment of money. Trade, production, transportation and international commerce cannot be carried on effectively without it, for it is in reality the life blood of all commercial transactions.

Norman Angell has said, "Trade and finance are built on credit—that is, confidence in the fulfilment of obligations, upon security of tenure in titles, upon the enforcement of contract according to law—and if that credit is profoundly touched, there is not a section of the elaborate fabric which is affected. The more our commercial activity gains in complication the more does the common prosperity of all of us depend upon the reliance which can be placed upon the due performance of all contracts."

Gold and Credit.

Once there arises in the minds of men the suspicion that there is not enough of gold to redeem existing credit, the public's confidence is shaken. If it is an individual's credit his creditors force him to assign, or to make terms agreeable, if a bank there is a "run" which may cripple it, and make it close its doors. If a municipality defaults its bonds, where and when can it find a purchaser for its future issues. If a nation cannot meet its international debts it becomes a bankrupt state whose securities are mere pieces of practically worthless paper.

In such cases every borrower is questioned, each signature verified, and every doubt removed, and the borrower, whether individual, corporate, municipal or government, must show the gilt edge of genuine ability to keep promises before accommodation is granted.

With a trade value exceeding one billion dollars and relations with each of the countries that are fighting, Canada necessarily must feel, with every nation, the disastrous effects of a war.

◆

EUROPEAN BANK RATES

The following are rates of the fourteen largest European central banks with the date of the last change:—

Bank of	Rate %.	Date of last change 1914.
England	5	Aug. 8.

The Canada Life Assurance Company announces the following regulations as to military and naval service:—First—No extra premium will be charged on policies now in force on the lives of any policyholders who may engage in military or naval service, in or outside of Canada, irrespective of whether such policies provide for an extra premium or not. Second—For new policies the extra premium will be $50 per thousand for active service outside Canada. Policies will be written up to $5,000, except term insurance. No extra will be charged for service in Canada. Other companies are following this example.

In co-operation with the Dutch government and the Bank of the Netherlands a bankers' syndicate has been formed to furnish 200,000,000 florins to traders, individuals, and savings banks on such securities as stocks, bonds, warrant bills and mortgages, and having a value 30 per cent. in excess of the loan, with interest at 9 per cent. The bank law has been changed to enable those banks furnishing money to reduce from 40 to 20 per cent. the amount of gold covering bank notes. The exchange of bank notes into gold has temporarily ceased. Scarcity of silver has caused the government to issue 25,000,000 florins of paper money in denominations of 1, 2½ and 5 florins.

BANK OF ENGLAND GOLD AT OTTAWA

Unique Arrangement Made to Overcome War Risks to Gold

Gold is to be held at Ottawa on behalf of the Bank of England. The Canadian minister of finance will act as trustee. Bankers on this side of the Atlantic desiring to pay gold in London will be able to do so through Ottawa, thus avoiding the risk of gold making an ocean trip in time of war. The arrangements have been completed by the Canadian government and the British authorities. Messrs. J. P. Morgan, New York, are understood to have shipped $10,000,000 gold to Ottawa.

The above are the facts regarding the story cabled from London that the Bank of England would open a branch at Ottawa. Wired by *The Monetary Times* as to that report, Sir Frederick Williams Taylor said it would be both impracticable and incredible. He added that the idea evidently had been confused with the fact that it is understood that the Bank of England is willing to purchase gold for deposit at Ottawa against payment in London. Later, Sir Frederick accorded a special interview on the subject; it is printed elsewhere on this page.

One of the most discussed cable messages this week was a statement first made by the London Daily Mail that a branch of the Bank of England shortly would be established in Ottawa to allow gold from the United States to be paid without a risk of an ocean voyage. That journal also said that a branch might be opened in South Africa as well.

The events leading to the action of the Bank of England were discussed by Hon. W. T. White, minister of finance, Ottawa, as follows:—

"It was found practically impossible to finance shipments of products from Canadian ports, and there has been a great congestion at Montreal awaiting normal exchange conditions. Shippers could not sell their grain or other produce bills because the banks could not sell these as usual in New York, and if they were forwarded for collection in Britain and paid there the banks could not bring the gold over.

Lift Financial Embargo.

"The result of attempting to finance Canada's vast export produce trade in such conditions of exchange would have been that Canada would pile up gold balances in Britain and be depleted of gold here. To meet this situation and restore normal rates of exchange a simple plan has been worked out. The minister of finance will act as trustee to hold gold for account of the Bank of England. American bankers desiring to pay gold in London will forward it to the minister of finance here for account of the Bank of England. Thus it will not be necessary to ship gold across the Atlantic to make payments in London, and exchange rates should at once ease off. American and Canadian exports, which will go forward to Europe this fall, will speedily restore the financial balance, and possibly bring it about that exchange will be in favor of America. There seems little doubt that the arrangement will at once lift the financial embargo upon Canadian food products awaiting shipment.

Perley Was Negotiator.

"Under the arrangement the banks here would be able to pay interest on provincial government, municipal and corporation securities maturing in London by depositing gold with the minister and making the necessary arrangement in London. The negotiations between the Bank of England and the government have been carried out through Hon. Geo. Perley, acting as High Commissioner."

Speaking of the arrangement, Mr. D. R. Wilkie, president of the Canadian Bankers' Association, said:—"There ought to be no difficulty, because the Mint at Ottawa is a branch of the Royal Mint in London. It would be a splendid thing for Canada to have a large supply of gold held here. It would have a steadying effect everywhere."

New York bankers, according to despatches, "see in such a move what they call an attempt on the part of the great British institution to pile up large amounts of credit with this country (the United States) which we may have to pay in gold shipments to the Dominion. With all the rest of the world on a non-specie basis, it is believed that such a manoeuvre would be vigorously opposed. The matter was under discussion in representative financial quarters to-day, and the attitude of American bankers may find expression in a definite statement later.

"There were further indications in New York that any movement looking to large shipments of gold to Canada, whether for the Bank of England or for any other purpose, will be unpopular in banking circles. New York bankers deem it of the highest importance that gold be held here regardless of foreign obligations. There are other ways, it was pointed out, of meeting American debts in London, and this, it was argued, should be resorted to. The money rates and foreign exchange were quotably easier to-day, but actually without material change. All time rates continued on a 6 to 8 per cent. basis, with some offerings at the lower figure. Exchange brokers were doing a little more business with London, but nothing like a general movement in that direction is probable for some time."

Branches of the Bank.

The first branches of the Bank of England were opened in 1826. In 1825, there occurred in England a serious financial crisis and the weakness of the country banks was prominent. Ill effects were experienced through the monopoly of note issue of the Bank of England. Measures were taken to mitigate the trouble. The Bank of England was at first advised and authorized to open branches in some of the principal provincial towns and to issue notes from these branches. The towns first selected being Gloucester, Manchester and Swansea. Legislation was passed in 1826 to allow the establishment of joint stock banks under certain conditions with the privilege of note issues.

While actually no branch of the Bank of England is being established at Ottawa, the arrangement regarding gold, noted above, practically performs one of the functions of a branch.

BANK OF ENGLAND'S GOLD AT OTTAWA.

Monetary Times Office,
Montreal, August 12th.

Owing to the unusual situation created by the appointment of finance minister White at Ottawa as trustee for the Bank of England, to receive gold on deposit for that institution, to facilitate financing processes between this side of the Atlantic and London during the present crisis, *The Monetary Times* requested Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, to comment upon the significance of the action. Sir Frederick replied:—

"The plan adopted by the Imperial Government through their bankers, the Bank of England, is of the utmost importance, as the measure of ease to Great Britain it will produce will only be limited by the extent to which it is availed of.

"The first effect to accrue should be an approach to more normal conditions from the present penalizing rate of sterling exchange. It is common knowledge that Great Britain is possessed of an enormous income from abroad. This income will have been temporarily suspended, as from most European countries, owing to the war; and therefore, it becomes all the more essential that Great Britain should not be deprived of her income from North America. Sterling exchange at the level that has prevailed during the past 10 days, has made it practically prohibitive for American railways and other companies and corporations to remit the interest falling due on their loans domiciled in London, America's total indebtedness aggregating, it is computed, some $4,500,000,000.

"The plan of the Imperial Government referred to above will now enable such obligants to meet their indebtedness in London with comfort and relatively free from expense, providing they can secure gold for the purpose of deposit at Ottawa. These remarks apply precisely in the case also of all Canadian borrowers with interest obligations in London. It will be obvious too that the Imperial Government with gold at their disposal in this country, will be in the best of positions to purchase food supplies.

Canadian Stock Exchange Position

It is unlikely that the stock exchanges of importance will open for several weeks to come. London and New York probably will be the first to recommence trading, and some precautionary measures may be taken regarding marginal trading. The Montreal and Toronto exchanges will follow London's lead. Canadian stockbrokers do not think that London will reopen until the collapse of the German campaign or the receipt of official news of decisive British victories. The Montreal exchange has announced that three days' notice of opening will be given. Toronto will probably do the same.

The Canadian banks have watched the stock exchange situation with exceptional care. They may cooperate later with the brokers in a plan for renewed trading in stocks, but only for cash. This trading will be at fixed prices for each stock. These prices will be based on the closing quotations at the time panic struck the exchanges. Naturally, this trading will not allow any speculative operations, as there will be a fixed margin of one point or thereabouts between buyers and sellers, thus preventing fluctuations. *The Monetary Times* understands that such a scheme is being discussed and may materialize in the comparatively near future.

When the Canadian stock exchanges open again, they are likely to receive strong support from influential syndicates both in Montreal and Toronto. Everything will be done to prevent a needless sacrifice of stocks at unreasonable prices.

When the Canadian exchanges first closed, several brokers continued to trade privately. This did not proceed many hours before the banks stated that such private trading would have to stop, otherwise, the bankers would take action to increase their margins. Bankers and brokers and their customers are now united in opinion and, so far as is known, trading in stocks has ceased absolutely for the time being.

◆

Nearly $10,000,000 of gold for Canada has come from New York during the present movement.

The Bank of England on August 10 received $10,970,000 in American eagles, and $1,290,000 in bar gold.

The Dominion Government has commenced the purchase of supplies in Canada for the War Office. The Imperial authorities asked the Dominion to furnish certain stores for war purposes as their agents, and 700,000 bushels of oats stored in elevators at the head of the lakes have been taken over at a uniform price of 47½ cents. The actual purchase was placed in the hands of a sub-committee of council, Messrs. Rogers, Reid, Cochrane, Pelletier and Kemp, with Hon. Robert Rogers as chairman. The grain was valued for the government by three well-known grain men, Messrs. Lionel Clarke, Harry Richardson and James Carruthers. The government is also purchasing for the same purpose 10,000 tons of hay.

"After August 15, the date upon which the Panama Canal will be thrown open to the traffic of the world, warships of any nation will have the right to peaceable and uninterrupted passage through it," says United States secretary of war Garrison. "This is guaranteed by the provisions of the second Hay-Pauncefote treaty, ratified November 18, 1901." One article of the Hay-Pauncefote treaty says:—"Vessels of war of a belligerent shall not remain in such waters longer than 24 hours at any one time except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of war of the other belligerent."

BREAKING FINANCIAL DEADLOCK

A London cable dated August 12th, says:—With the purpose of terminating the present deadlock in the money market and to enable trade and commerce to resume their normal courses, the government has agreed to guarantee the Bank of England against any loss it may incur in discounting bills of exchange of either home or foreign banks on trade accepted prior to August 4th.

The Bank of England, therefore, announces that it is prepared on the application of the owners of any approved bill of exchange accepted before that date to discount it at any time before its due date at the bank rate and without recourse to such holder, and upon the bill maturing the bank will give the acceptor the opportunity of postponing payment, with interest at two per cent. over the bank rate.

It is also announced that the bank will be prepared to approve such bills of exchange as customarily are discounted by it and also good trade bills and acceptances of such foreign or colonial firms or bank agencies as are established in Great Britain.

◆

MOVEMENT OF GOLD AND WAR.

The Cunard line steamship Carmania, which sailed from New York on July 29, arrived at Queenstown on August 6. Her cargo of gold amounted to $11,481,318. The gold shippers and the amount of their shipments are as follows:—Guaranty Trust Company, $5,000,000; Kidder, Peabody and Company, $2,000,000; Bernhard, Scholle and Company, $1,500,000; National City Bank, $1,000,000; Heidelbach, Ickelheimer and Company, $750,000; Goldman, Sachs and Company, $706,318; National Bank of Commerce in New York, $525,000; total gold, $11,481,318. Silver shipments—American Smelting and Refining Company, $55,000; L. Vogelstein and Company, $13,320; American Metals Company, $13,893; United Metals Company, $40,825; total silver, $123,038; grand total, $11,604,356.

The Dutch steamer Tubauria, carrying gold reserves to Germany from South America, has been captured by a British warship in the English Channel. The London Daily Telegraph refers to rumors that have been current in the past few days to the effect that the government has seized the gold reserves of the various German banks operating in London, and says the amount of these reserves is variously estimated, but the figure which finds general acceptance is $2,750,000. The Hamburg-American Line steamer Cap Ortegal, with $5,000,000 in specie aboard, has been captured by the British, according to the London Daily Mail. The $10,600,000 gold coin and $3,700,000 in silver bars, the treasure which the steamer Kronprinzessin Cecilie put into Bar Harbour, Maine, to avoid capture by English or French warships, arrived in New York on August 10.

◆

English millers have received notice that the government has taken over every flour mill in the country.

The war risks insurance office in London on August 8 reduced its rates on cargo from 5¼ to 4 1-5 per cent.

BANK OF ENGLAND RATE.

The Bank of England last week gave a most anxious time to its governors. The rate was changed six times in ten days, one day being a Saturday, one a Sunday, one a regular bank holiday, and three days special bank holidays. The Bank trained its rate, with remarkable effect, upon the financial enemy. Here is a table showing the changes:—

	Per cent.
July 29	3
July 30	4
July 31	8
August 1	10
August 6	6
August 8	5

MORATORIUM HABIT IS SPREADING

Great Britain's Declaration Followed By Other Countries —More Explanations

A moratorium has been declared at various times during the past week, in Great Britain, France, Sweden, Brazil, Peru and China. In Germany, says a Berlin despatch, a moratorium is deemed unnecessary.

The rising generation at least cannot be blamed for unfamiliarity with the word moratorium. It was a new one to Wall Street, which is generally reputed to know every word in the financial vocabulary and to have invented a few besides. A large bond house in New York received a cable last week from its London correspondent which ended up, "moratorium expected." The message was not in code, but the word "moratorium" stumped the cable clerk. He finally consulted his code book and discovered that moratorium was the symbol for "We draw on you for $7,000." Unfortunately this interpretation did not fit in with the sense of the message. The office manager was called in. He couldn't help. The partners in their turn failed to shed any light on the matter. The cable company was persuaded to repeat and the message came back with that curious word still unchanged. The mystery remained unsolved until somebody happened to notice a piece on the news ticker to the effect that a general moratorium had been declared in England.

What the Dictionary Says.

The word "moratorium," according to the New International Encyclopedia, comes from the Latin moria, delay.

"An extraordinary act of a government by which the collection of all debts is suspended for a specified time. A recent instance is the moratorium decreed by Argentina in 1890, at the time of the great financial crisis which led to the suspension of the Barings of London. Such an act may cause international complications."

According to the Encyclopedia Britannica, "The term is sometimes used to mean the period over which the indulgence or period of grace stretches. A moratory law is usually passed in some special period of political or commercial stress. For instance, on special occasions during the Franco-Prussian war the French government passed moratory laws. Their international validity was discussed at length and upheld."

The reason for and the effect of the moratorium in Great Britain was explained in *The Monetary Times* last week. Chancellor Lloyd George has announced that a general moratorium will be in effect for one month. Wages, salaries, rates and taxes, government payments and national insurance are not to come within the scope of the moratorium.

London despatches state that it now transpires that had moratorium not been declared bills of exchange would have been presented from Tuesday on for £350,000 without means of meeting them.

What a Banker Says.

The vice-president of the National City Bank of New York, the representative of that institution in London, in reply to queries from United States bankers, cabled as follows:—

"Moratorium only affects bills of exchange other than cheques or demand bills. Bills accepted before August 4th must be re-accepted, extending the maturity one calendar month from date of original maturity. Amount then payable is plus accrued interest at bank rate current at date of re-acceptance."

The prescribed form of re-acceptance follows: "Re-accepted under proclamation of August 2nd, 1914, stating total amount due, namely, amount of bill plus interest."

Brazil Wants a Long One.

The Brazilian Congress has recommended a moratorium of four months, and a new issue of paper currency. Brazil is probably not in the best financial position, as it had contemplated in Great Britain, a large loan, which the war has prevented.

The various governments, including the British, French and Japanese, says a Shanghai despatch, have agreed to the moratorium which the Chinese government has declared for an indefinite period. It is pointed out that this cessation of foreign payments should enable the Chinese government to pay the troops regularly from the proceeds of various revenues pledged to foreign debts and thereby to eliminate the danger of mutinies.

The Peruvian government has issued a decree proclaiming a moratorium for thirty days from August 8th.

Berlin's Inspired Touch.

There are good grounds for belief that the financial despatches issued from Berlin are getting an inspired touch. While Germany is probably strong in the matter of gold reserves, it is obvious that in a time of world-wide financial crisis, Germany cannot be the exception to the rule. While Great Britain and other nations have declared moratoriums, a Berlin despatch says:—"The German Federal Council has decided not to proclaim a moratorium for the present. The courts were empowered to deal leniently with debtors, and the terms for the payment of debts may be extended for three months. In certain cases relief also was granted for bill exchange transactions."

◆

HOW WAR STIFLES PROSPERITY

Fuel, Which Supplies Machinery of Production, is Now Feeding War Machines

BY R. D. BELL, MONTREAL.

"Why should a war in Europe affect business in Canada? The money that is used in warfare is not destroyed; it is spent; it remains in circulation. What has that to do with our business?" From such a viewpoint it is generally considered that the banks are responsible for hard times, and that the bankers are deliberately withholding funds for their own profit. This attitude is so common that, at the risk of covering well-known ground, we will discuss a moment the facts:—

Money is the Fuel.

Money, which means gold and credit built thereon, is the moving force, the fuel which drives the machinery of production. One can conceive of money as oil which is burned to generate power. This is stored in a reservoir system which includes all the money centres of the world and has a central reservoir in London. Paris, Berlin, New York, Montreal and other cities maintain their reservoirs connected, just as by a pipe, with the London reservoir. Turn the tap loose in Vienna and the Paris reservoir is drained. This drains, in turn, the London reservoir, and, as the supply diminishes there, the fluid runs automatically from all the other reservoirs, just as water seeks its level.

Now there is just enough of this fuel available in the world to supply the machinery of production. If all the fuel and all the population are used to keep the machines going at capacity turning out food, clothes and the necessary amount of luxuries, there will be just about enough produced to supply all hands and maintain what we are pleased to call prosperity.

Destruction of Wealth.

If the supply of fuel is diverted to supply the enormous demands of the war machines, the productive machines at once suffer. And the juggernauts, manned by thousands of men and driven by millions of dollars, all diverted from the production of wealth, proceed to the work of the destruction of wealth.

It may be objected that money is not analogous to oil, because oil burns up and is gone while money remains in circulation. There are two answers to that: one is that credit, the greater part of money, is actually burnt up and destroyed just in proportion to the amount of wealth that is destroyed. As for the actual gold, as it cannot be in two places at once, it is just as effectively lost to the productive machines, in any given period, as if it were burned.

◆

The British government has issued an order specifying as absolute contraband of war:—Arms of all kinds, clothing and harness of a military character, animals suitable for war purposes, foodstuffs, fuel, harness and telescopes and field glasses.

War, Finance and Commerce

Oats from Alberta.

Alberta's gift to the Motherland will be 500,000 bushels of oats to be delivered f.o.b., any port on the Atlantic coast.

German Banks Close.

The German banks in London have been obliged to close until the British government grants their applications for licenses.

British Government Buying Silver.

At a meeting of the silver brokers in London it was said that the government had taken over all the available silver supplies for current purposes.

Now on the Ocean.

According to figures gathered at steamship offices, 31 trans-Atlantic liners, carrying upwards of 20,000 passengers and crews, are on the high seas at the present time.

Germany Has Year's Supply.

A special commission appointed by the government in Germany reports, says an optimistic Berlin despatch, that the country has a sufficient stock of food to last for a year.

German Banks to Re-Open.

The British government has given permission to the German banks in London to reopen for business under the supervision of Sir William Plender, appointed to the Treasury.

Wheat Did Not Reach Germany.

The Cunard line steamer Carmania and the British steamer Kumeric, the latter with a cargo of wheat from Galveston for Germany, arrived at Queenstown, escorted by a cruiser.

St. Lawrence Shipping Stopped.

Under directions from the naval department, all shipping on the St. Lawrence route, with the exception of incoming vessels, was stopped on August 10, pending further instructions.

May Take Over Harvest.

Chancellor of the Exchequer Lloyd George informed the House of Commons that the government was considering the question of taking over the entire harvest throughout the British Isles.

Bank of France Opened.

In Paris the Bank of France opened for business on August 6, with the announced discount rate at 6 per cent., in accordance with the action of the Bank of England fixing its rate at that figure.

Merchant Ships Taken.

An official statement issued by the Admiralty said that up to the present, 75 German merchantmen have been captured by the British warships or taken possession of by British port authorities.

China Turns to British Banks.

Cables from Tien-Tsin say that despite previous denials the Chinese merchants are withdrawing funds from German banks, and placing the bulk of their deposits in Hong Kong banks with British charters.

New Taxes for United States.

United States congress leaders are unanimous for the imposition of additional taxes to make up for the decline of revenue, due to the European war. The additional tax proposed is to operate for two years.

Montreal-Liverpool Route Clear.

"The ocean route is clear from Montreal to Liverpool and any ship can sail when she pleases in perfect safety," was the announcement made on August 11th by Mr. R. S. White, collector of customs, Montreal.

Busy Making Tents.

The Grant-Holden-Graham Company and the Smart-Woods Company, manufacturerers of tents, flags, blankets, and camp equipment at Ottawa are busy with orders for the Canadian and British armies, placed through the Canadian government.

Atlantic Tonnage Tied Up.

The United States department of commerce figures that 80 per cent. of trans-Atlantic shipping tonnage is tied up with prospect of 5 per cent. more being tied up, leaving but 15 per cent. of normal capacity to accommodate all traffic laid down at seaboard.

Banks Cashing Drafts.

The Dominion government has been officially advised that no difficulty is being found abroad in cashing drafts drawn on Canadian banks issuing snch letters, and that no special assistance from the government by placing the High Commissioner in funds is necessary.

Ships to American Flag.

Fourteen steamers belonging to the International Mercantile Marine Company probably will be placed under the American flag when Congress has passed the amendment to the Panama Canal act, repealing the six months' notice of change and the five years' age limit of steamships.

No Money Orders Here.

The Canadian post office department has received notice that the money order service with Germany, Austria, Hungary, Belgium and Egypt, has been entirely suspended. The post office department also has issued instructions that no more money orders payable in England are to be issued.

Morgans to Help France.

Messrs. J. P. Morgan and Company confirmed the report that their Paris house, Morgan, Harjes and Company, has completed arrangements by which it will receive at once from the Bank of France $5,000,000 in gold, which will be available for cashing letters of credit and honoring other obligations.

Scientists and War.

The French government, in appointing a commission to consider the food supply, sanitation, organization of employment bureaus, and other kindred subjects that may arise, is arranging for the country to have the service of a number of the most distinguished public men in France, who cannot be taken into the Cabinet.

Gift of Flour by Canada.

The Imperial Government has accepted with deep gratitude an offer of the Canadian government to send one million bags of flour as a gift of the people of Canada to the people of the United Kingdom, to be placed at the disposal of his Majesty's government and to be used for such purposes as it may deem expedient.

To Keep Down Food Prices.

The inquiry instituted by the Canadian government to prevent the inflation of prices by Canadian dealers, using the war as an excuse, will be handled by Mr. F. C. T. O'Hara, deputy minister of trade and commerce; Mr. R. H. Coats, statistician of the labor department, and one of the legal officers of the department of justice.

Must Keep Industries Going.

The London Chamber of Commerce advocates that the community be afforded fullest support by the government; that it is vital that the industrial population shall be kept in employment and that the government should support the bankers only on the clear understanding that the banks afford some support to the industrial and trading interests.

Rush for News Paper.

Canadian paper mills have withdrawn all quotations for newsprint paper on account of the war situation, and no quotations will be made until the situation clears. Large orders for paper are said to have been received from South Africa, Australia and New Zealand, but action on these orders has been delayed until it is known what shipping arrangements can be made.

Millions of Securities Arrive.

It is estimated that the Olympic, which arrived in New York on August 4, discharged $45,000,000 of American securities. These securities were sold in the New York market before Thursday, July 30th, the last day on which the Stock Exchange was open, so that disposition of them is complicated by the fact that the regular rules regarding deliveries prevailed when the sales were made.

Gold Bullion for Bank.

Bullion amounting to $17,830,000 was taken into the Bank of England on August 7. It was received from South America, and included $10,755,000 in American eagles, $4,370,000 in bars, and $2,685,000 in sovereigns. In addition India released $10,000,000 which had been set aside by the Bank and credited to the Secretary for India. The continent engaged $17,175,000 gold for shipment on August 8.

War and Cotton.

Writing on the effect of a general European war upon the cotton manufacturing industry, David Clark, editor of the Southern Textile Bulletin, Charlotte, N.C., says, in part: —"Temporarily the effect will be bad because financial and shipping arrangements will be demoralized, but these will soon be adjusted and the cotton manufacturing industry of this country should have a period of prosperity greater than it has ever known."

Will Appropriate People's Savings.

Nordeutsche Allgemeine Zeitung says that Germany has successfully conquered the financial difficulty which followed her mobilization. "The Reichsbank," the newspaper adds, "came up to expectations and all the great banking institutions in Berlin and the provinces followed it. In the public interest no moratorium is desirable or necessary. The people's savings of 30,000,000,000 marks (about $7,500,000,000) will be taken first."

Has Hit Italy.

Trading on the Bourse at Rome has been stopped indefinitely. Three decrees of the government have been published, the first authorizing savings banks to limit until August 20 the payment of more than 5 per cent. of deposits, but requiring them to pay any depositor not less than 50 lire ($10) if that much is to his account. The second suspends for 20 days all payments with interest. The third authorizes banks to increase their note issues.

World's Savings for a Year.

A. S. Johnson, professor of economics at Cornell, says in New York Times, that the United States has opportunity to regain supremacy of the seas and of South American markets, but securities thrown back on the United States will be troublesome. War, he says, will provide great necessity for increase of securities, as it must be financed by loans. He thinks a $5,000,000,000 estimate of money cost of war to Europe is very low. This would equal a year's aggregate savings for the world.

United States Customs Busy.

In order to prevent any articles rated as contraband of war, from being taken from United States ports into Canada, the treasury department at Washington has instructed all collectors of customs along the border to require masters of vessels sailing from United States ports, destined for Canada, to submit a manifesto of their cargoes for examination before the ship leaves port. In case any goods are found to be contraband, they will be removed before the ship is given her clearance papers.

To Prevent Unemployment.

Plans to prevent unemployment through the war, and for the systematic relief of the distressed are being arranged in England on a large scale. Instead of economizing on public works in the interest of military expenditures, the British government has adopted the policy of greatly increasing government employment, for the purpose of providing for those who will lose their work through the shutting down of factories. Road building will be one of the principal employments, and the board for the development of roads has a fund of several million pounds which it will spend.

Power to Seize Foodstuffs.

Walter Runciman, secretary of agriculture, introduced a bill into the House of Commons, giving the British government power to seize all foodstuffs. The bill passed through all its stages. Mr. Runciman said his reason for introducing the bill was what he termed the "greed of wealthy people, who, with a long line of automobiles, had disgraced themselves by cornering large stocks of provisions, and causing great hardship among the poorer classes." He said he believed the panic was now over, but the government wished to be prepared in case of necessity.

Who Hoards Gold is Enemy.

In the British House of Commons Chancellor Lloyd George contended that anyone hoarding gold was assisting the enemy of his country. At the same time, with the view of economizing gold and maintaining the integrity of the gold standard, it was proposed to issue notes of one pound ($5) and 10 shillings ($2.50) convertible to gold at the Bank of England. These would be available on August 7 to the extent of $15,000,000, and after that would be issued at the rate of $25,000,000 daily, while necessary. Postal orders are also to be made legal tender on the same terms as notes. He made an appeal to patriotic people not to withdraw gold.

Stop Trade with Germany.

A royal proclamation from Ottawa warns Canadians that they must discontinue trade with Germany and setting forth that in future coal must not be sent to any countries other than the United Kingdom, British possessions, the United States, France and Russia. The export of a long list of articles to any country other than Great Britain is prohibited, including arms of all kinds, powder and explosives, projectiles, guns and military equipment petroleum, saddles, draught and pack animals, clothing and equipment of a military character, articles of military camp equipment, harness, etc.

United States Supports Silver Market.

In order to stabilize the silver market and to anticipate the needs for subsidiary coin, the treasury department beginning next week, will purchase about one-half the silver production of the United States for a period of two weeks or more. This will amount to about 1,000,000 ozs. a week. The remainder of the production, it is expected, will be taken by the smelters. The price will be fixed by public bids and it is expected that this will remain somewhere around the last-quoted price. The treasurer purchased 200,000 ozs. for San Francisco at 51½ cents. On August 10, the government bought $2,700,000 at 52 cents per ounce.

◆

CANADIAN PACIFIC'S AUTHORIZED CAPITAL.

At a special meeting to be held on October 7th, shareholders of the Canadian Pacific Railway will be asked to sanction an increase in the authorized common stock from $260,000,000 to $335,000,000. The authority asked does not foreshadow any new issue of stock in the immediate future, but the company desires to bring the authorized issued up to the amount for which it has the sanction of the government. No portion of the additional $75,000,000 capital will be issued until the shareholders have given their authority at a special general meeting called for the purpose.

◆

COMPANIES INCREASING CAPITAL.

The following companies in Alberta have increased their capital stock:—

Success Oil and Gas Company of Alberta, Limited, from $500,000 to $1,000,000. Medicine Hat Pump and Brass Manufacturing Company, Limited, from $50,000 to $75,000. Strome Milling and Grain Company, Limited, from $50,000 to $200,000. The Port McMurray Registered Townsite Company, Limited, from $20,000 to $40,000.

The following company in Saskatchewan has increased its capital stock:—

Northland Milling Company, Limited, from $150,000 to $160,000.

The following company with a Dominion charter has decreased its capital stock:—

Atlantic Sugar Refineries, Limited, from $10,000,000 to $6,500,000.

◆

Mr. J. A. Wilson, formerly provincial manager for Manitoba for the Prudential of Winnipeg, has been appointed inspector of agencies for the Canada Life Assurance Company in the prairie provinces.

Colonel J. D. Taylor, M.P., has been elected hon. president of the Port Coquitlam board of trade, the other officers being: President, Mayor James Mars; vice-president, Mr. L. D. Shafner; secretary-treasurer, Mr. R. Carruthers.

REPAYMENT OF MUNICIPAL LOANS

Sinking Fund Method Explained—Some Important Considerations for Municipalities

By S. P. Grosch.

(Article III.)

The sinking fund method of repaying municipal loans provides for the setting aside annually an equal instalment, which by compound interest computed at the rate of 4 per cent. per annum, will accumulate to such an amount as will pay off the loan at the end of the prescribed period, interest on the total amount of principal being payable annually or semi-annually as the case may be.

This method differs from both the instalment and annuity methods, in that the lender is not paid back any portion of the principal during the period of the loan. The total amount of the loan being repaid at the expiration of the period during which it is to run. This overcomes the lender's objection in this respect.

Rate of Accumulation.

The annual amounts raised by taxes to pay into the sinking fund and pay interest each year are equal and in this respect this method is similar to the annuity method, where the burden of the loan is shared by the taxpayer by equal annual instalments. In this respect the reasons for and against such a method as already discussed under the annuity method are applicable here.

In the instalment and annuity methods there is no question as to the rate of accumulation. The amounts are repaid direct to the lender and interest ceases on the amount of principal repaid, therefore, the local authority obtains the same rate of interest on repayments as it is paying on the loan itself. According to Saskathewan statutes, sinking funds are calculated on a 4 per cent. basis.

Cost to Taxpayer.

In order that we may readily understand the relative cost to the ratepayer of adopting the various methods discussed, let us consider the total amount required to redeem a loan of $100,000 spread over thirty years and basing the sinking fund at the statutory rate of 4 per cent.

(1) A loan of $100,000, 30 years, 5 per cent.

The instalment method	$177,500.00
The annuity method	195,154.20
The sinking fund method	203,490.30

The above figures show a difference of $17,654.20 in favor of the instalment method over the annuity method, and a difference of $25,990.30 in favor of the instalment method over the sinking fund method, also a difference of $8,336.10 in favor of the annuity method over the sinking fund method.

(2) A loan of $100,000, 30 years, 6 per cent.

The instalment method	$193,000.00
The annuity method	217,946.70
The sinking fund method	233,490.30

What Figures Show.

The above figures show a difference of $24,946.70 in favor of the instalment method over the annuity method, and a difference of $40,490.30 in favor of the instalment method over the sinking fund method, also a difference of $15,543.60 in favor of the annuity method over the sinking fund method

(3) A loan of $100,000, 30 years, 7 per cent.

The instalment method	$208,500.00
The annuity method	241,759.20
The sinking fund method	263,490.30

The above figures show a difference of $33,259.20 in favor of the instalment method over the annuity method, and a difference of $54,990.30 in favor of the instalment method over the sinking fund method, also a difference of $21,731.10 in favor of the annuity method over the sinking fund method

Rate of Interest.

It will be observed that the difference increases as the rate of interest increases: this is due to the spread between the increased rate of interest and the permanent basis of computing the sinking fund at 4 per cent.

The differences are shown on a loan of $100,000. If the loan is less the difference will be proportionately less and if the loan is greater the difference will be proportionately greater. So if the term of repayment is shorter the difference will be less and if the term of repayment is longer the difference will be greater. When the total debenture indebtedness of some of the local authorities running into the millions is considered the additional cost to the ratepayers assumes large proportions.

In the case of the sinking fund method the difference may be made up by careful administration and investment of the fund, although my attention has been called to the sinking fund of one local authority which was deposited as a savings account in a local bank and earning interest at the rate of only 3 per cent., while the statutory basis of this fund is 4 per cent. This, if allowed to continue, which it was not, would have meant a shortage in the fund, when the time came to repay the loan, unless such shortage were made up in the meantime.

To Reduce Total Cost.

It would, therefore, appear that for those local authorities that have adopted the sinking fund method for repaying outstanding loans and that desire to reduce the total cost of this method to the ratepayers, investment of the sinking fund is almost a necessity. Ample provision has been made by the legislature for such investment, and authority has been vested in municipal councils, sinking funds trustees, and the local government board to administer and invest sinking funds.

Taking into consideration the trouble, anxiety and possible loss in connection with the administration and investment of sinking funds, the care and supervision required for their proper administration, the expert knowledge required of officials, the additional cost and expense of investment, the additional cost of the sinking fund method over other methods of repayment, when investment is not made to make up the difference, it would be well for local authorities to consider whether the additional price (if any) which they may obtain for straight term debentures will sufficiently offset the disadvantages of the sinking fund method, especially for the smaller local authorities whose borrowings are seldom of sufficient magnitude to reach the larger markets where the sinking fund method of repayment is almost demanded.

(To be concluded.)

◆

TORONTO'S FINANCES

The city of Toronto's current expenditure during the first half of the year was $4,851,017 out of a total amount available of $10,339,502, leaving a balance on hand of $5,488,485. The following is a summary of the appropriations and the portions of each which have been expended:—

Uncontrollable.

	Available.	Expended.
Expenditure	$4,371,915	$2,132,032

Controllable.

Board Control	$ 632,415	$ 311,502
Committee on Parks and Exhibitions		
Exhibition buildings	40,986	7,472
General maintenance parks	486,468	220,744
Committee on Property:—		
Architect's Department	60,707	27,835
Fire Department	740,07[illegible]	225,493
General maintenance	831,[illegible]87	239,555
Committee on Works:—		
Civic car lines, operating. ...	220,57[illegible]	78,608
Waterworks, maintenance ..	760,[illegible]	371,333
General maintenance	1,17[illegible]	795,704
Street Cleaning, Watering and Scavenging Department ..	1,062,547	421,670
	$10,3[illegible],502	$4,851,017

The board of education had $2,[illegible]80,423 and has spent $1,275,000. The only overdraft shown is in the registry office maintenance. The amount appropriated was $1,040. It has been exceeded by $291. Street lighting cost $85,446. The amount available is $386,555.

ALGOMA CENTRAL TERMINALS

Committee's Scheme on Behalf of Scrip Holders of Second Issue of Bonds

The following communication has been sent to scrip-holders of the Algoma Central Terminals, Limited, second issue of £527.300 bonds:—

"It is probably within your knowledge that we have been negotiating with the Algoma Central Terminals, Limited (hereinafter referred to as "the Terminals Company"), on behalf of the scrip-holders of the above bonds.

"It appears that the Terminal Company's issue of £527.300 bonds was purchased by the Canadian Agency, and by the Agency offered for subscription to the public. The agreement between the Terminals Company and the Canadian Agency provided that payment for the purchase should be made to the Terminals Company by instalments, and that bonds should only he released to the Canadian Agency proportionately to the instalments paid.

"At the time of the suspension of the Canadian Agency the purchase money for £400,000 of the £527.300 bonds had been paid by the Canadian Agency, and the bonds duly handed over, but £127.300 of the bonds, the purchase money for which was unpaid, remained in the hands of the Terminals Company.

Committee's First Object.

"The first object of this committee was to obtain possession of the £400,000 bonds, for which the Canadian Agency had made payment. This they were able to do, and these bonds are now deposited for safe custody with the Bank of Montreal to the order of the committee. The result of the committee's action is that the scrip held by the scrip-holders can thus be honored to the extent of about 76 per cent. of its nominal amount.

"The committee had then to consider what arrangement was possible in regard to the balance of about 24 per cent represented by the £127,300 bonds which remained in the hands of the Terminals Company, owing to the non-payment by the Canadian Agency of the balance of the purchase money.

"As a result of protracted and difficult negotiations, the committee have to report that they have now reached an agreement with the Terminals Company, which, after full consideration of the circumstances, this committee unanimously recommended the scrip-holders to accept in settlement of all outstanding questions and disputes.

Terms of Agreement.

"The terms of the agreement are as follows:—

(1) Each holder of Canadian Agency scrip for Terminal Company bonds, on payment to the Terminals Company or its nominees of 10 per cent. of the nominal face value of his scrip, shall be entitled to receive from the Terminals Company, on surrender of his scrip for cancellation, his pro rata proportion of the £127.300 Terminals Company's bonds, carrying the August 1st, 1914, and subsequent coupons. Each scrip-holder, on payment as aforesaid, will simultaneously receive his pro rata proportion of the £400,000 bonds now held by us on behalf of the scrip-holders. The Terminals Company agrees to pay the stamp duty on bonds thus distributed to scrip-holders. Thus a scrip-holder, holding scrip for £1,000 bonds, will, on payment of £100 be entitled to receive £1,000 bonds duly stamped.

(2) The August 1st coupons attached to the bonds will provide for the interest due August 1st on the scrip. The Terminals Company agrees to provide funds (a) to meet any prior interest unpaid on scrip surrendered as aforesaid, and (b) to cover the payments which this committee has to make for legal and other expenses.

Will Assign to Trustee.

(3) The Terminals Company will assign to a trustee, on behalf of the scrip-holders (such trustee to be nominated by ourselves), all rights and claims it possesses against the Canadian Agency in respect of the last instalment of purchase money. All sums recovered in respect of such rights or claims are to be applied by such trustee, as to that proportion which represents scrip-holders who make the 10 per cent payment, on behalf of such scrip-holders, and as to the balance as the Terminals Company directs.

(4) Only those scrip-holders who make the 10 per cent. payment are to be entitled to the benefit of this agreement, which is made without prejudice to the rights of the Terminals Company against the other scrip-holders.

"A form is enclosed to be filled in and lodged with your scrip and cheque for 10 per cent. of the nominal amount with the Bank of Montreal, 47 Threadneedle Street, E.C., who will in due course issue to you your full amount of bonds."

All Parties to Blame.

In March 1913, the Canadian Agency offered for public subscription in London £527,300 5 per cent. first mortgage bonds of this company at the price of 96 interest and principal are guaranteed by the Lake Superior Corporation. The payment of the instalments was completed in May following, yet the bonds have not been delivered in exchange for the Canadian Agency scrip, though interest has been duly paid each August and February. "Now on the failure of Mr. Arthur Grenfell's Canadian Agency," says the Canadian Gazette, "it is found that about £100,000 of the money subscribed has been 'disapplied,' and the question is, how is this altogether unprecedented difficulty to be met? All the parties concerned are, no doubt, to blame—the subscribers that they did not insist on the delivery of the bonds on the payment of the scrip coupon of August 1 last year, and the Algoma Central Terminals and the Lake Superior Companies, on whose behalf the bonds were issued."

The injurious effect of this laxity on the securities of the Lake Superior group is shown in the following record of depreciation during the past six months:—

Lake Superior Corporation shares have declined from 24 to 15, the first mortgage bonds from 91½ to 85, and the income bonds from 77½ to 67.

Algoma Central and Hudson's Bay bonds are now 77, as compared with 97.

Algoma Central Terminals bonds have fallen from 93 to 77.

Algoma Eastern Railway bonds have gone from 92 to 77.

Algoma Steel bonds are now quoted 78, as compared with 84½.

◆

TRAINING OF LIFE AGENTS

It is first necessary to find the right type of man and then to make him see the real advantages in the business, was the suggestion of Mr. C. H. Carpenter, Toronto, conveyed in a paper on "Procuring and Developing Agents," read at the life underwriters' convention at Halifax. The proper development of men means everything. To simply give out a rate book, some applications and a little literature is about the same as sending a sailor to sea without a chart or compass. It is a difficult matter for one man to show another just how he should sell life insurance, but experience has taught us that the best and quickest way to educate new men is to have them accompany an experienced man at the start. It is rather a good idea to familiarize new men with one policy before branching out, on the theory that it is better to know one thing thoroughly than several things partly. It is well to point out such features as Government supervision and the non-seizable feature, according to the provisions of the insurance act.

It is well to appoint only such men as we are in a position to develop, as the various companies will be judged by their representatives, and we should all strive continually for the upbuilding of this, the greatest business in the world.

The reading of this paper evoked the following remark from Mr. J. A. Tory, Toronto: A manager who takes on a man who has proved a failure in other lines invites failure from the start. He made a practice of only employing men who had been successful in other lines. He would sooner take a man earning $2,500 a year and start him in life insurance than take half a dozen earning $10 a week, for he would have far more assurance of success in the one. Get men of good material and train them.

Mr. A. J. Dove, Halifax, said the procuring of agents and the training of them is a vital matter. The home offices are paying more attention to it to-day, and there must be more co-operation between the home offices and the field forces in getting and encouraging the best men.

THE DOMINION BANK

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

UNITED STATES FREIGHT RATES

Interstate Commerce Commission Hands Out Long-expected Decision

The chief points in the freight rate decision of the United States interstate commerce commission, rendered the other day, are as follows:—

Freight rates between Buffalo and Pittsburg and the Mississippi River (Central Freight Association territory) advanced a full 5 per cent. on approximately 65 per cent. of the total traffic in that region.

Advance as allowed, it is estimated, amounts to 1½ or 2 per cent., and means about $10,000,000 or $12,000,000 in additional revenue, per annum, to the carriers involved.

All proposed rate advances east of Pittsburg and Buffalo denied.

No increases granted on lake-and-rail rates.

All class rates within the Central Freight Association territory advanced 5 per cent.

Commodity rates got a like advance, excepting coal, coke, brick, tile, clay, starch, cement, iron ore and plaster.

Two Dissenting Opinions.

Commissioners McChord and Daniels filed dissenting opinions at the last moment, McChord holding that no difference should have been made between the territories east and west of Pittsburg, and Daniels holding that a 5 per cent. increase should have been granted generally.

The new rates are expected to increase the income of the railroads approximately 1½ per cent.

All the principal east and west systems will benefit by the increases, as their lines traverse the territory affected.

Commodities upon which no advances were allowed compose approximately 35 per cent. of the volume of traffic in the central territory.

It was held that the income of the railroads was smaller than is demanded in public interest, but that no showing was made warranting a general increase.

Advances in passenger fares and elimination of costly free service to shippers and practically all free passes and development of greater efficiency are suggested.

Tended to Mislead Public.

"There can be no doubt," says the commission, referring to the "propaganda" to influence its decision, "that this clamor and outcry have tended to mislead the public and have seriously aggravated the present commercial depression."

The railroads which applied for the commission's permission to raise their freight rates 5 per cent. were the fifty-two lines east of the Mississippi and north of the Ohio and Potomac rivers. They asked for a 10 per cent. increase in 1910, and it was refused.

Railroad managers contended that in the last three years the roads spent $600,000,000 in new capital, but that in 1913 the earnings were $16,000,000 less than in 1912; that higher wages, taxes and new investments caused the increase in expenses; that the New York Central was forced to lay off 23,000 men since September, 1913, and unless relief was granted government ownership of railroads might follow.

Opposing contentions were that the railroads were constantly getting higher revenues; that they spent more on improvements last year than ever before in history; that one terminal cost $108,000,000; and, above all, that free services to big industrial concerns approximated in value $30,000,000 a year.

What Railroad Men Say.

The New York Journal of Commerce has gathered the following opinions of United States traffic and railroad men on the decision:—

Decision, while disappointing in net results obtained, foreshadows new era in railroad regulation in this country. Abandonment of strict policy of restrictions and adoption of more liberal policy by the Interstate Commerce Commission predicted.

Means general campaign to raise passenger rates, and levying of charges amounting to many millions per annum on shippers and general public for so-called "free services."

Will force trunk line roads in New England and nearby territory to pursue a careful and strict policy of economy and retrenchment.

WESTERN CANADA'S POSITION

Authoritative Crop Report—Readjustment of Labor, Rents and Ownership

(From a Special Correspondent).

The western crop situation is rather complicated, and it is not easy to generalize. Undoubtedly a very large area of Southern Alberta and South-western Saskatchewan has been very sadly hit. Roughly, the district affected might be found by placing one leg of a compass on the Fourth Meridian and the other at Macleod, and describing a half-circle, which would include all the land between Herbert on the Canadian Pacific Railway and Macleod, extending as far north as Kindersley and Alsask. In this area there is very little crop indeed. I am afraid that some of the settlers there will leave the country. There is a bit of crop on summerfallowed land, but in that new territory very little summerfallow is in evidence.

From Fair to Good.

In Central Saskatchewan the crop is rather patchy. Elsewhere conditions are much better. Northern Alberta, South-Eastern Saskatchewan, South-western Manitoba all have splendid crops. Most of Manitoba can be described as from fair to good.

The steady development in mixed farming which has been in evidence of late years will be of great value to the Western Provinces this year. Owing to the capital required, it is a slow matter for farmers to get into stock, and some of those critics, who complain of the prevalence of grain growing, overlook the difficulty which a man of small means encounters when he undertakes business requiring capital and upon which no returns will be received for three or four years.

Two or Three Years.

There can be no possible doubt that the process of readjustment will take two or three years. There is readjustment of labor, of rents in our cities and towns, and readjustment in the ownership of speculative holdings here and there. There can be no permanent confidence until this readjustment has run its course.

In the meantime it is comforting to know that better farming methods are being adopted, stock is increasing in number and quality, many of those who have lived without labor are again in reproductive enterprise, and the outlook in all these respects is most encouraging.

◆

BRITISH COLUMBIA LIFE ASSURANCE COMPANY

During the six months ended June 30th, 1914, the amount of insurance issued by the British Columbia Life Assurance Company, of Vancouver, was $1,283,157, being an increase of nearly fifty per cent. over that issued during the corresponding period of last year, and which brings the total insurance in force at June 30th to $3,744,357.

The company's assets at the end of the half-year were $232,090, and the reserves for policyholders were $97,615 as against $85,504 held on December 31st, 1913. A good feature of the business for the past six months is that the company shows a small surplus for that time, which, in view of its youth and general conditions throughout the country, is very satisfactory.

Another death claim was reported, this time one of $2,000, or $3,000 in all since the company commenced business. This is a good record, and the company obviously is exercising care in the selection of its insurances.

Mr. L. W. Shatford, president of the company, recently said to the shareholders: "Great care is taken in every phase of our operations, first, by our medical department in passing upon risks, as only the most suitable are accepted; then, careful supervision is given in placing our funds in the very best securities for the protection of both policyholders and shareholders, and our running expenses are kept down to the lowest possible figure consistent with efficient administration."

The figures for the half-year, as published, show that the British Columbia Life Assurance Company is in an exceptionally good position for a young underwriting concern.

APPROVED LIFE AGENTS' LICENSES

Scheme Must Cover All Underwriters—Must Keep Records

A discussion which created much interest at the recent life underwriters' convention was that referring to the licensing of agents and a resolution approving of the licensing of agents under proper fees and supervision, was carried.

Some provinces has already adopted laws licensing agents, said Mr. H. B. Andrews, of Winnipeg. While in Saskatoon recently, he made inquiries and found there were differences of opinion as to its working. The insurance inspector is satisfied it is working out with much benefit to life insurance men. The managers in the west are agreed that it is advantageous. There was a feeling abroad that licensing will create an additional tax. He could not see why the government should do the licensing, why should not the life underwriters' association grant their own licenses? There were many sides of the question to consider, the full-time man's standpoint, the new agent's standpoint, and the part-man's standpoint, and possibly the industrial agent's standpoint. It is difficult to arrive at a scheme to cover all. One good feature of licensing was that by the records required to be kept, the companies would be able to weed out undesirable men.

Many Advantages in System.

Mr. H. M. Kay, Montreal, thought this question the most important before the convention and the advantages from licensing were too many to enumerate. There need be no anxiety about the fee; it is usually nominal,—it might go as high as $5, while in New York State it was only $2. He thought it would eliminate the parasites from the business. Life insurance is a profession and entitled to protection and the state should protect it; if not the state, who would do it? It is working in New York State to perfection, and no man can renew unless he has accomplished a certain amount of business each year. While the association could not dictate to the Insurance Commissioner to whom he should grant licenses, it could be a forceful body, and the commissioner would know where he could get information before granting licenses

Mr. J. A. Johnson, Vancouver, reminded the convention that New Brunswick had had a law for twenty years. By that law the manager of a company was required to send in a sworn statement of all agents representing his company and a fee of $2.00 for each. Certificates were issued to the manager for the men. If the government issues the license there is someone to look after it. His experience in three different states convinced him life insurance was taken more seriously there than in Canada. The commissioner looked after his business, and was a man of some importance. In the State of Washington a man could not get a license without a clear record and men applied to the commissioner and not the manager.

Some Doubts as to Results.

Mr. H. Trefry, Yarmouth, was strongly opposed to licensing in Nova Scotia. It might be all right in New York.

The province of Nova Scotia would have to deal with the question for that province, intimated Mr. J. A. Tory, Toronto, Speaking from years of experience he considered that with the co-operation of field managers, head offices, and the different departments and then a licensing law, conditions would be nearly perfect.

Mr. Geo. E. Williams, Montreal, said as regards fees, in some states where the law was working nicely there was no fee. If the manager is honest in his convictions and with himself, he would not recommend a license be granted to a man who would not be an honor to the profession.

There was an impression that licensing would cure many existing evils, but Mr. J. T. Wilson doubted it.

◆

Mr. Alexander MacDonald, of Winnipeg, has purchased through the well-known Western Canadian financial house of J. S. Carmichael, Saskatoon, seventy feet on First Avenue on the basis of $200 per foot.

MORE SHIPPING ON PACIFIC COAST

British Columbia Occupies Third Place Among Provinces —Power Supply to be Augmented

(Staff Correspondence).

Vancouver, August 8th.

The growth of shipping in 1913 in British Columbia is greater than that of 1912 by 17,000 tons, according to the marine department list. With the registered net tonnage as a base, this province takes third place now in Canadian provinces, Ontario and Quebec being first and second respectively. There are four ports of registry on this coast, Vancouver, Victoria, New Westminster and Prince Rupert, Victoria leading with a tonnage of 75,129; Vancouver second with 63,761; New Westminster, 12,607, and Prince Rupert, 1,536. The boats of the Canadian Pacific Railway coast service are registered at Victoria, which easily gives it the lead. In its statement of new vessels built and registered at Dominion ports, the shipping list gives Vancouver first place among the cities of the Dominion and British Columbia leading place among the provinces.

The report refers only to the registered tonnage on this coast, and there is not taken into account the expansion of shipping interests generally.

To Use Canadian Lumber.

A factor in the increase of shipping and also resulting in greater business for the lumber mills of this province at a time when trade is needed was the proviso in the contract for federal works in the east that Canadian timber should be used. This has resulted in about 30,000,000 feet of timber being purchased in British Columbia when the orders were about to have been placed with firms on the other side of the line. It was this policy that helped to a large extent to build up American coast cities. Of late there has been much discussion on the point, for the policy is being urged in connection with the construction of the Second Narrows bridge over Burrard Inlet to North Vancouver, and also in the matter of supplies for other provincial and municipal works.

The Canadian Pacific Railway has started to use its new terminal facilities in Vancouver. Work has been going on for many months past on the new depot and a bridge over the tracks from Granville Street to the wharf, with additional track accommodation and increased facilities throughout. The expenditure has been over one million dollars, and the railway company is now in a position to more conveniently handle its increasing traffic. The new depot is about two city blocks in length, and the fact that its telephone switchboard is the largest in Canada with the exception of that in Montreal and the largest on the whole Pacific coast gives an idea of the immense amount of business carried on daily. The new terminals of the Canadian Pacific Railway will give it facilities that will be needed within the next few years.

Power Scheme Proposals.

One of the subsidiary enterprises of the Canadian Northern Railway is the power scheme to be carried out in the Hope district. This embodies a dam and plant on the Sumallo River, a tributary of the Skagit. Levels are now being taken, and Engineer Jensen is also in the field personally. It is proposed to develop 50,000 horsepower, which will be transmitted along the Canadian Pacific Railway route to Port Mann, where it will be used to a large extent in handling the trains of the company between that terminus and the False Creek terminals. The industrial and lighting field is well covered through the lower mainland territory by the Western Canada Power Company and the British Columbia Electric, though by the time the Canadian Northern Railway scheme has been perfected, development may be such that the additional business may allow it a wider scope than is apparent at present.

◆

The first pulp manufactured in Temiskaming has been made in the big machines at the plant of the Abitibi Pulp and Paper Company. Regular production is expected to start to-morrow, and daily shipments of pulp should commence in the afternoon of Monday.

Trust Company Service

MONTREAL TRAMWAYS' GOOD REPORT

Earned Over Thirty Per Cent. on Its Average Paid-up Capital Stock

A good report has been presented to the shareholders of the Montreal Tramways Company, it having earned over 30 per cent. on its stock, while showing substantial increases both in gross and net earnings. For the year ended June 30th, the gross earnings showed a gain of $388,577, or 5.7 per cent., and the net earnings an increase of $215,127, or 7.9 per cent.

Two Years Compared.

The following table compares the chief items of the reports of the two years:—

	1914.	1913.
Gross earnings	$7,142,804	$6,754,227
Expenses	4,206,114	4,032,664
Net earnings	$2,936,689	$2,721,562
Less—		
City's percentage of earnings	527,383	489,079
Bond interest	787,768	721,151
Debenture interest	800,000	800,000
Taxes	84,700	73,000
Leaving—		
Net income	$ 736,836	$ 638,331
Dividends	242,056	156,382
Surplus	$ 494,780	$ 481,949
Reserves	275,000	223,670
Bond discount	82,236	63,714
Net surplus	$ 137,543	$ 194,564

The company's net income was $736,836 for the year, after payment of the city's percentage of earnings. Interest charges and taxes were $98,505, or 15.3 per cent. higher than the previous year. On the average paid-up capital stock for the year this represented earnings at the rate of 30.4 per cent. After dividends had been paid, a surplus balance of $494,780 remained, or $12,831 more than the previous year. From this balance $275,000 was transferred to reserve funds and $82,236 was applied to write off discount on bonds sold.

Company's Financial Position.

The balance sheet reveals an advance in current liabilities from $1,475,995 to $1,646,238, with a decline in current assets from $3,725,925 to $1,893,482. This is explained by the fact that new construction was undertaken last year to the extent of about $1,000,000 more than was originally intended, while in the previous year the company had a large sum credited to its account with its bankers against the projected sale of bonds covering plant additions. As expenditures have now been to an amount in excess of $1,000,000 for which the company has the right to issue bonds or stock, the liquid position can be strengthened by the sale of securities at any time.

The company reports that during the year the sum of $2,711,572 was expended on new construction, against $976,008 the previous year; the sum of $829,706 was also expended on maintenance and charged to operating expenses while a further amount of $417,124, charged to renewal account also went towards the upkeep of the properties.

◆

The Unity building was sold at Montreal by public auction by the liquidators, and only one bid was received, amounting to $50,000. This was made by the bondholders' committee and accepted. Out of total issues of $300,000 bondholders of $292,400 subscribed to the plan recommended by bondholders' committee. A new company is to be formed in which those subscribing to the plan of co-operation will become shareholders, and the building will be improved and made more attractive for tenants.

CANADA'S USEFUL INSURANCE LAW

Incidents Which Led to Its Present Form—Lesson of the Union Life

Through the influence of the Life Underwriters' Association of Canada a disastrous law had been transformed into one of the best in the world. The amendment to this insurance law owes its origin entirely to the incidents connected with the episodes of the Union Life and the Home Life Companies of Toronto, intimated Mr. T. B. Macaulay, president of the Sun Life, to life underwriters at their annual convention at Halifax. A number of evils were shown to exist in connection with those companies which it was highly desirable should be stopped. In the case of the Union Life the management was a combination of extravagance: there were bad investments and unwise contracts lasting over a long term of years with the National Agency Corporation. There were long term contracts with officials. The British people who gave up their hard cash on unfair representation will never get back one cent of all they paid in. The management was an impossible one. They defied the insurance department. They took the position that the insurance department dare not interfere. There were over 100,000 policyholders. The small distribution to policyholders in the course of years would give a few dollars to each and the 100,000 policyholders would probably lose their all and the insurance department would not dare put them into insolvency. The evil got worse and worse and the position at last got to be a desperate one. The insurance department by a brilliant arrangement finally succeeded in inducing the Metropolitan Life to take over the business by an arrangement which was quite a little turn around the law, stretching it as far as it could be stretched, making the Metropolitan a creditor for the reserve; so they stepped in and took over the business. In that way the danger was averted and loss to the policyholders was averted. But something must be done to prevent repetitions in the future. The matter was complicated by the fact that there was only one Canadian company doing industrial business. We have boasted that no policyholder in a Canadian company has ever lost money by the failure of a Canadian company but it looked as if that boast was to be a thing of the past. The Metropolitan saved the situation.

Department Needed More Power.

It is necessary to understand the Union Life difficulty to follow the proposed amendment to the insurance law. In the first place, it was felt the department ought to have more power so that in future they could stop a company going as far as the Union Life. That it should be able to say to a manager you must do certain things. One of the clauses of the act consists of an arrangement whereby the department is given this power. Under the act, as at present, a company which gets into difficulties may be given a license to do business connected with its old policies only. It can collect renewal premiums but it cannot issue further policies. Through that there will be added the provision that the department can notify officials of the company that they must reinsure the business in another company to the satisfaction of the department. If it is not done the company can be placed in insolvency and the insurance department can reinsure for them. In order to avoid delay and expense, instead of official assignees and outside lawyers, a superintendent of insurance will be appointed to liquidate the company and do it as quickly as possible and without expense.

Gave Many Extensions.

Another provision of the law which gave a great deal of trouble in the case of the Union Life was that they would ask for an extension of a month, stating that they expected to get money at a certain time: the department, not wanting to press them into liquidation, gave the extension. Under the amendment only 30 days may be given and any extension which may be given shall not be considered as a renewal under the meaning of the act. He thought these provisions giving the department greater power are admirable. Under the act as it at present stands, if the company gets into insolvency, the courts realizing on assets and distributing the assets when realized upon to the policyholders, has many objections. In the first place there is a year's delay. Then it is very expensive. A large part of the funds is paid out to the assignees. In the third place it is not fair. The policy of dividing assets is wrong, slow, expensive and unjust

Under the amendment it provides that hereafter there shall be no distributing of assets, but there will be reinsurance, which is the only method in which justice can be done to policyholders. By making the insurance inspector the liquidator expense is eliminated, and we will have one of the best methods of dealing with a company in difficulties it is possible to get. As a going concern a company's business is worth more than the assets; there is the good-will. If the company winds up the good-will is gone, but by reinsuring the good-will counts for something.

Policyholders are Treated Alike.

Another point was the position in an insolvent Canadian company of its policyholders in the United States and abroad. There was an attempt made to say that Canadian policyholders should have prior claim. This was unfair and the matter was waived and under the new act the insurance department must act for the policyholders not only in Canada but outside.

The National Agency contract also came up. It was desirable to prohibit such contracts altogether. It has yet 30 years to run. It gave entire control of the Union Life over to that company and was objectionable. The act provides if there be any contract of any kind with any official, agent or other person, and the company fails, then the contract shall cease and the claim uuder that contract shall be limited to three months' indemnity at the rate of the last three months. Any contract with a manager or agent shall be terminable by three months' notice or indemnity. This shall not apply to agents' commissions. Commissions on stock was one of the greatest evils. It cost something like 30 per cent. of the amount received for the Union Life to secure stock. It was sought to prohibit claims on stock altogether. They could not secure that, but as a compromise it was agreed that the terms of the banking act shou'd be incorporated word for word in the Canadian Insurance Act.

As to Promotion Expenses.

If a promoter wishes to secure fresh capital he will be limited to such expenses as clerical and travelling allowances; he must submit to the treasury board a full statement showing the expense already incurred or contemplated. The board passes on that, and if they are reasonable the company is given a license and if not reasonable, then the money must be returned to the stockholders. In regard to capital cost; there will be a clause by which companies shall he prohibited from advertising their authorized capital unless they also advertise the subscribed and paid-up capital; also the surplus to policyholders unless mentioning the subscribed and paid-up capital which is included in that. Another clause authorizes group insurance companies to insure under special policies no less than 10 of the employees of any employer on special terms. There could seem to be no objection to that although under the present insurance law no company could do that, but the fraternal societies and trades unions have made great objections to it and it was found that this would be a contentious clause. Members of parliament were called upon by their constituents and it looked as if it would be thrown out. The insurance department and others are now all agreed and the bill is no longer a contentious measure. The insurance department has co-operated with the association heartily and Mr. Macaulay thought the amendment when in force, will make the insurance laws of Canada one of the best.

◆

Mr. Kenneth W. Blackwell, vice-president of the Merchants' Bank, has been elected a director of the Canadian Car and Foundry Company.

Mr. William C. Tomkins has been appointed assistant to vice-president of the Grand Trunk System. Mr. James A. Yates to be assistant treasurer.

Mr. Alexander S. Murray, chartered accountant and formerly manager of the Maritime Bank in Fredericton, N.B., died at his home in Fredericton.

"Suppose a large oilfield is really discovered in Western Canada," writes a correspondent, "where would the market be for it? I understand that on account of sea-freight the oil in Vancouver will always be cheaper if brought from California, Mexico and other States on the sea border. In the East, oil from the Eastern States is very cheap by lake freight up to Fort William. Therefore, the only market possible appears to be the prairie provinces, and their consumption is very limited."

LIFE INSURANCE TAXATION

Underwriters Opposed to Principle—Policyholders Are Sufferers

The subject of life insurance taxation was discussed at length at the recent convention, and much information was brought out. Mr. George E. Williams, of Montreal, said that if everybody knew what life insurance was there would not be this problem. The matter of the tax on life insurance premiums is a large one. About thirteen million dollars are taken out of the pockets of the policyholders to help support the various governments of our states and provinces. If this was not extracted in the way of taxes on life insurance the beneficiaries it is estimated would be five hundred million dollars better off. A life insurance premium is a voluntary tax a man imposes on himself to provide an old age pension for himself, and for the maintenance of those who would otherwise be dependent on public charity; and to take this tax and superimpose another tax upon that was a very evil thing. A principle of taxation that has been laid down is that no tax should be levied that is not capable of being economically collected. In the matter of life insurance there is no other tax that is capable of being collected so economically. The companies swear to the premiums collected in a province and they are taxed on that statement and any misrepresentation is severely dealt with.

That if that convention did nothing more than to sound a warning note to those provinces that have not as yet introduced the tax the time will not have been spent in vain, suggested Mr. Lawrence, Toronto. While head offices should be active in protecting the rights of the companies in this respect, members of the underwriters associations are more in touch with the policyholder and by the combined efforts of the managers, the association, the head offices, together with the agents, it should be possible to inform and educate the insuring public in respect to the tax.

Did not Heed Warning.

Mr. J. A. Tory, Toronto, who in his presidential address of last year warned the underwriters that he considered the tax one of the greatest evils, and unless united action were taken an effort would be made to increase the tax in every province, the idea was then scoffed at and the companies thought he was twenty-five years ahead of the times. But his prophecy came true, as was evidenced by the action of Ontario. He conscientiously believed to-day that the action of Ontario could have been prevented if his suggestion of last year had been carried out, and a campaign started in the Province of Quebec. He wanted it against Quebec in order to prevent other provinces adopting the Quebec law. The campaign was made, but it was too short. To prevent this tax it is necessary to deal with the policyholders. Show to them that their profits are reduced by reason of the tax and the member of parliament would soon hear of it.

Mr. Hunt, Toronto, then moved a resolution to the effect that the association as a body is opposed to the tax on life insurance premiums and that they pledge their support to any campaigning against it in any province, and that a committee be appointed.

Mr. H. H. Kay, Montreal, suggested that the head offices include with the notices of premiums a letter stating what the tax means to the policyholder. The latter is much in ignorance up to this time. Also include a slip to be signed by the policyholder protesting against the tax, and then present a petition and the signed slips to the government; he thought this would have much effect.

British North America Act Suggested.

Mr. T. B. Macaulay said the matter was of vital importance to life insurance men. The bill when first introduced in Quebec provided for a tax of two per cent. A vigorous protest was made by the life managers and they succeeded in getting it reduced to 1¾ per cent. They had represented again and again to the government of Quebec that they were not merely excessively taxing the people of that province, but they were setting an example to the other provinces. Politicians look on life insurance funds as one of the easiest of marks and they are not going to give up if they can help it.

It might be accomplished in another way; by means of the British North America Act. That act sets forth the

"SOLID AS THE CONTINENT"

Every year shows a marked increase in the number of policies for large amounts placed with the North American Life.

The fact is significant.

It proves that the Company's financial standing and business methods stand the test of expert scrutiny.

North American Life
Assurance Company
Head Office: - TORONTO, CAN.

A Most Excellent Investment

One of the Policyholders of The Great-West Life, maturing his Endowment Policy, writes:

"I wish to take this opportunity of thanking your Company for the very satisfactory settlement made me on Policy number 1239, 20 Year Endowment. I paid in the twenty years, the sum of $870 00, and received a cheque for the sum of $1 418 00, thus giving me a profit of $548.00, my money back, and protection for $1,000 00 for twenty years. I beg to say that I consider this a most excellent investment."

The new booklet "WHAT OTHERS SAY" gives scores of such favorable expressions. Ask for a copy and for details of these valuable Policies.

powers of the federal and provincial governments the power to impose any form of taxation whatever without restriction. But the provinces have the power to impose only what is distinctly direct taxation, and differing from indirect taxation. The question as to whether the present tax is an indirect or direct one is now being referred to legal authorities and opinions are being secured. The lawyers have expressed the opinion that, while the matter is not entirely free from doubt, it is really an indirect tax. The life companies now feel that it is an unconstitutional tax and they propose to carry it direct to the Privy Council.

Mr. Wood, actuary of the Canada Life, said governments must have money. The legislators do not pretend to defend their act, but simply say the money must be forthcoming. Should the action in the courts fail there was no other way left but to attack the matter through the policyholders. He feared that if the present tax was declared illegal it would come up in another form.

Mr. Robert Lynn Cox, New York, said they had found in the United States that the tax could not be escaped through a legal channel, and they would have to resort to the policyholder. The trouble has been that there has not been the right kind of organized attack on the tax. It is a question of educating the people, and that will take time. The time to begin is now, not five years hence. Let the policyholder understand it is no longer the business of the companies, but his.

Mr. E. J. Clark, president, National Association Life Underwriters, Baltimore, advocated placing the matter in the hands of a special committee. In his district they had a special taxation committee. Let the local associations appoint their taxation committees and appoint one meeting a year to be devoted to this question and systematically carry on the work.

A suggestion of Mr. J. A. Johnson, Vancouver, was that if a notice were printed on the dividend notices to the effect that if the state did not tax the premium the insured would get so many more dollars, it would go a long way towards stirring the people.

◆

QUEBEC AUGMENTS MINERAL PRODUCTION

The mineral output of Quebec has been quadrupled in ten years. The value of the products for the year ended December 31st, 1913, was $13,119,811. Of this total sixty-three per cent. is credited to structural materials.

The products of metalliferous mines constitute only 7½ per cent. of the total. It is a slight increase as compared with the previous year, 6.09 per cent., and quite an appreciable one as compared with 1911, when the proportion was only 3.17 per cent. This increase is due solely to the further development of old districts, for we have yet no production to record from the northern fields. That these will eventually contribute to our mineral production, there is no doubt, is a remark contained in the report of the mines branch of the Province of Quebec. Promising geological and mineralogical conditions exist in the Kienawisik lake region, whence discoveries of gold have been reported. In this connection, it may be mentioned that, in the report of mining operations in the province of Quebec for 1912, a report on the northwestern part of the province of Quebec, by Dr. Bancroft, was published, as well as some notes on the gold discoveries at Lake Kienawisik.

The following table shows how the mineral production of the province of Quebec has increased for the last ten years.

Year.	Value.
1904	$3,023,568
1905	3,750,300
1906	5,019,932
1907	5,391,368
1908	5,458,998
1909	5,552,062
1910	7,323,281
1911	8,679,786
1912	11,187,110
1913	13,119,811

WINNIPEG'S SINKING FUND

Analysis of Investments—Financial Returns for Last Year

An interesting analysis of a city's municipal sinking fund is contained in the report of the Winnipeg sinking fund trustees, Messrs. E. F. Hutchings, chairman; W. H. Cross, G. R. Crowe, and H. C. Thompson, city treasurer, who is secretary of the trustees. On April 30th, 1913, the trustees had cash on hand amounting to $570.658, and the receipts for the year amounted to $1,609,484, making a total of $2,180,142.

This amount was disbursed as follows:—Investments made during the year, $1,739,095; accrued interest on bonds purchased, $14,797; debentures paid which matured during the year, $352,117; expense, $3,103; exchange, $323;. balance on hand, April 30th, 1914. $70,707. The actual cost of the trustees investments was $3,150,370; new investments made during the year, $1,739,095, and $428,365 was paid off during the year. The net profit on investments was $185, the actual cost of investments being $4,461,286. The fund is divided as follows:—Invested in Winnipeg, $2,454,924; invested in Manitoba, outside of Winnipeg, $844,095; invested in Saskatchewan, $867,681; invested in Alberta, $294,586; total, $4,461,286.

Investments at Cost.

Assets in excess of liabilities amount to $66,823. In arriving at these figures all stocks and bonds have been valued at the actual cost, which is $78,791 less than the par value.

Some years ago Winnipeg issued stock payable on April 1st, 1940, to cover the cost of local improvements, which in-by-law. During the past year the final levies were made under the individual by-laws, and were greater than what was actually needed for the yearly sinking fund under the stock by-law. During the past year the final levies were made under some of the individual by-laws. The trustees had previously purchased a block of this stock, and an amount equal to the amount of the short term issues was cancelled. The rate of interest on the stock was 4 per cent., and the purchase price was therefore considerably below par. The profit, however, on this transaction has not been taken into account, but has been left in the investment until the balance of the stock held has been cancelled and the investment closed.

The trustees have $700,000 invested in Winnipeg demand notes bearing 5 per cent. interest. This is a temporary arrangement between the city and the trustees, of benefit to both parties. Of the $700,000 city of Winnipeg demand notes held by the trustees, $575,000 were repaid July 2.

In reference to amount loaned to trust and loan companies, these were loans made when money was plentiful. The trustees have as security the total assets of the company interested, and also have earmarked first mortgages representing one hundred and twenty-five dollars for each one hundred dollars advanced. These loans mature in 1915.

The board reports that the repayments have been well met. Deducting from the amount of total investments held, that portion made up of Winnipeg securities leaves a balance invested in outside securities of $2,278,675, and of the repayments only $4,571 were due and outstanding at the end of the fiscal year.

The average rate of interest earned for the year was 5.09 per cent. The total expense for the year was about one-fifth of 1 per cent. on the new investments made during the year, and about one-fifteenth of 1 per cent. of the total investments held.

The following table shows par value and actual cost of investments on hand:—

	Par Value.	Actual Cost.
School Debentures—		
Manitoba	$709,346	$698,324
Saskatchewan	522,308	524.668
Alberta	279,021	279.275
Municipality Debentures—		
Manitoba	$ 86,500	$ 84,114
Saskatchewan	294.789	289.695
Cities and towns	$122.522	$111,697

SHOULD READ INSURANCE POLICIES.

One of the most fruitful causes of the dissensions and misunderstandings which frequently occur between owners of property and insurance companies, says a circular of the insurance department, before the Canadian Manufacturers' Association, is the fact that many policyholders do not place their insurance affairs in competent hands, or themselves take sufficient interest in their insurance contracts to understand properly the meaning of the policies for which they have paid.

Before a manufacturer signs or accepts a contract to deliver or purchase goods, involving a sum of several thousands of dollars, he not only scrutinizes it carefully himself, but may even submit the document to his solicitor. In a very great many cases, however, the same manufacturer loses sight of the fact that his fire insurance policy may at any moment become a document entitling him to the collection of a considerable sum of money, and that the wording of that policy will be the sole basis on which he can present his claim. He takes it for granted that the agent who drafted the wording is a man who knows his business. Consequently, when the amounts and premiums have been checked over, the policies are placed in the safe and forgotten until renewal time comes round again.

Misunderstandings have arisen from much smaller things than the inclusion or omission of a particular clause. Even incorrect punctuation may give a policy an entirely different meaning from that the holder imagines it to have. It by no means follows that an insurance company would take advantage of such an error to evade payment, but it is better not to leave such things to chance. An illustration of this occurred quite recently when a manufacturer intended that his policies should cover both stock and machinery. Through the misplacement of parenthesis the policies read to cover only on stock and if a loss had occurred the insuring companies would have been well within their rights if they had declined to pay for any damage resulting to the machinery.

If there are two policies covering the same subject matter, a difference in wording of the policies may cause endless trouble in the event of loss and may result in the policyholder not being able to collect the full amount of his claim. The policies probably contain the clause, "Further concurrent insurance permitted without notice." If the policies are not concurrently worded and the holder has not notified each company of the exact amount of additional insurance carried, he would be entitled to collect only 60 per cent. of the amount of his claim. This particular instance applies under Ontario laws, but each province has its own insurance act and each act contains traps into which the unwary may fall.

Messrs. Willis, Faber and Company, of Toronto and Montreal, conduct the insurance department of the Canadian Manufacturers' Association.

◆

At a meeting of the shareholders of the Canadian Gold Fields Syndicate, Limited, an order was given the directors to obtain a voluntary winding-up order, a time limit of three months being placed.

Government assistance will be rendered to the farmers of the drought-stricken districts of southern Alberta, according to a Calgary dispatch. W. A. Buchanan, M.P., of Lethbridge, has been in touch with the Dominion government, and will meet Hon. Martin Burrell, Dominion Minister of Agriculture. They will go through the south country and investigate conditions before proceeding to Ottawa, where some scheme of assistance will be formulated.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Alberta School Districts.—The following school districts have been empowered to borrow:—Grouard R.C. Separate School, No. 22, $12,000. Y. K. Floc'h, Grouard. Lac Ste. Anne Catholic School, No. 29, $2,500. Charles Williams, Lac Ste. Anne. Pincher Creek, No. 121, $33,000. W. A. Ross, Pincher Creek. Glory Hills, No. 400, $12,000. J. A. Willie, Stony Plain. Colchester, No. 452, $15,000. William Harke, West Salisbury. Patricia, No. 749, $600. A. J. Trounson, North Edmonton. Irvine, No S 2, $3,000. F. G. McLaughlin, Irvine. Kia Ora, No. 1421, $15,000. S. D. Ludlow, Acme. Chesterville, No. 2842, $12,000. Mrs. E. J. Hutchison, Lafond. Flat Creek, No. 3106, $800. J. J. Le Blanc, Edmonton.

Chatham, Ont.—A by-law to borrow $80,000 for school extensions is to be voted upon by the taxpayers.

St. Boniface, Man.—A by-law for providing parks calling for an expenditure of $200,000, may be voted upon by the electors.

Biggar, Sask.—The purpose of the proposed debenture issue is as follows:—$18,000 for extension of waterworks, $1,750 for fire appliances.

Weston, Ont.—The council at a special meeting passed a by-law authorizing an issue of $21,000 worth of debentures for the paving of Main Street.

Moose Jaw Sask.—A temporary loan of £100,000 has been arranged with Messrs. Wood, Gundy and Company, the city's fiscal agents. The loan is repayable on May 1st, 1915, with interest at the rate of 5 per cent. In addition there are the usual expenses in connection with temporary loans.

Montreal, Que.—The report of the city comptroller for 1913 is an interesting commentary on the financial position of the city. It shows that while the city during twelve months received $10,822,542 from general revenue (less refunds), its expenditure from revenue account for administration was $11,437,208, or over $600,000 more than was received.

Bassano, Alta.—The town council have set the tax rate for the current year at 19 mills. This is as last year although there are some changes as to the make-up. The general rate is reduced, being 9 mills, while the debenture rate is increased to 9½ mills, on account of additional bonded indebtedness incurred in 1913. The school rate now stands at one half mill. The assessment on a single tax basis is $1,750,000.

Fort William, Ont.—In order to facilitate the sale of the issue of waterworks debentures for the extension on the island and the tunnels, the consolidating by-law of all the waterworks debentures was repealed by the council, a by-law was passed increasing the rate of interest on the debentures from 4½ to 5 per cent., and a resolution sent to the railway and municipal board asking for an extension of time for the disposal of them for two years, as the last extension expired on July 16.

Halifax, N.S.—The increases of assessed property real and personal for three years are shown in the assessor's report:—

1912-13	$ 685,850
1913-14	1,879,100
1914-15	3,346,550
	$5,911,500

Regina, Sask.—The following is a list of debenture applications granted by the Saskatchewan local government board and the applying treasurers:—

School Districts.—Elk, No. 3266, $2,000. Abel Wright, Englewood. Bright Valley, No. 3353, $1,600. A. J. Beissel, Humboldt. St. Marks R.C.S., No. 1, $1,200 W. M. Fitzpatrick, Marquis. Bright Spot, No. 3[illegible], $1,600. R. W. Hunter, Natika. Desmond, No. 3329, $2,000. J. P. Jansen, Ritchie. Canuck, No. 719, $900. G. G. Mooney, Canuck.

Rural Telephone Companies.—Beaver, $15,000. Jas. B. Swallow, Yorkton. Hallville, $10,000. U. J. Souply, Aylesbury. Delisle, $7,500 D. C. Miller, Delisle. Banbury, $3,600. J. A. Menzies, Aylesbury.

Rural Municipalities.—Waldeck, No. 166, $10,000. J. J. H. Sawatzki, Rush Lake.

Villages.—Stenen, $2,000. J. C. Ferguson, Stenen. Edam, $3,000. A. J. Wollen, Edam.

GREAT BRITAIN'S BALANCE OF TRADE

The following table shows how the trade balance of the United Kingdom of the past six months compares with that of the corresponding period:—

	Half-year ended June 30th. 1913.	1914.
Imports	£378,740,000	£375,883,000
Exports and re-exports	316,111,000	314,734,000
Excess of imports	£ 62,635,000	£ 61,149,000
Add excess of bullion imports..	7,807,000	5,006,000
Total excess of imports....	£ 70,442,000	£ 66,155,000

The excess of imports, or favorable balance of British trade, has slightly declined, notes the London Financier. The excess of the imports of merchandise over the exports of home, foreign and colonial produce was, at £61,149,000, only £1,486,000 less this year than in 1913, but the excess of the imports of bullion fell from £7,807,000 to £5,006,000, with the result that the total excess of imports showed, at £66,155,000, a decline of £4,287,000.

"We need not conclude that we have been receiving a diminished return on our investments abroad" says the London authority, "though it is true that from some countries we have been obtaining less than formerly, especially Canada, Brazil, Mexico and the Middle East. No doubt, the fall in shipping freights has adversely affected the national income to no inconsiderable extent. Of the excess of imports no small proportion is represented by the freight charges included in the import prices, and, as there has been a general reduction in such charges, it is only reasonable to suppose that lower freights account for a large proportion, if not the whole, of the reduction in the favorable balance of our foreign trade.

◆

ETHICS OF COMPETITION IN LIFE INSURANCE

An interesting discussion at the Halifax life convention was that led by Mr. H. J. McAvoy, of St. Catherines, on the ethics of competition. Mr. McAvoy said he never invited competition. The first question to decide in the matter of competition is, what is considered a fair basis on which to meet our competitor. He suggested that there should be no misrepresentation of a competitor's company, or of one's own that cannot be honestly made in the presence of competing agents. In this way the indirect impairing of the other fellow's character would be abolished. If, when asked by a prospect what you think of any competing agent you reply "He is all right, but——," a false impression is left of an injurious nature. A man's selling ability depends largely upon the personality of the man. Personal magnetism is a large asset. The personal power is increased by the consciousness of a man knowing he is right, and it is decreased when a man persists in doing what he knows is not right. If the whole man's make-up shows fair dealing it gives him added strength. The reputation of a man in his vicinity is a great factor in determining his selling power and success. If a prospect finds you interfere with your competition he will question your dealings with himself. The insurance men must deal fairly and squarely one with another.

Mr. V. Reeve, Toronto, said honesty was the keynote of success.

Mr. A. C. M. Lawson, Fredericton, mentioned a case where an application was received by a company from a man who stated he was dissatisfied with the policy of another company, and was going to drop his policy with that company. The head office of the company to whom the man applied wrote to the other company and advised them of the man's action and stated they would hold the application over for a month until they heard from them respecting the grievance. He considered that a most hopeful sign.

Mr Faity, Yarmouth, advised them not to place too much reliance on the "honesty" plan; some of the most dishonest agents were men who used the "honesty" method to win out over the genuine honest man.

Mr. A. C. M. Lawson, Fredericton, said it was a matter largely of head offices. "As the head is, so is the tail," and a field man will not handle things right if his head office is wrong. How many managers discharge men for misrepresentation? Start with the head office and they would have what the Life Underwriters' Association has as a goal and will gain later on.

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, but the situation today justifies our conservative yet progressive policy.

MARITIME BUILDING STONES

Constructional Material of Many Varieties and in Large Quantities

Although nearly every kind of rock may be applied to structural purposes, the great majority of ordinary building stones may be classified as sandstone, limestone, or granite, suggests Mr. W. A. Parks, B.A., Ph.D., in a report issued by the department of mines. The strata of the carboniferous, or coal-bearing formation, which are widely developed in the Maritime Provinces, have been quarried for sandstone at various places through a period of time reaching back for a hundred years. Desirable stone of an olive-green, blue, brown, or red color has been extensively used for public and private structures throughout the provinces, and has been shipped to distant points in both Canada and the United States.

Limestone suitable for purposes of finer construction is practically absent, although many deposits of this material have been worked for the manufacture of lime. In this respect, the Maritime Provinces differ from Ontario and Quebec, where the great bulk of the stone raised for structural purposes consists of limestone, and where sandstones suitable for building are of very limited extent.

Proportions of Granite Industry.

Large areas of both Nova Scotia and New Brunswick consist of granite, which, in many places, is of the requisite grain and color to render it adaptable to both structural and monumental purposes. In spite of the desirability of these granites, the industry has never reached the proportions it deserves. With the granites proper we may include certain of the basic igneous rocks, such as diabase, diorite, etc., which are commonly known to the trade as "black granites." Stone of this kind has been quarried for monumental purposes at several points, more particularly in New Brunswick.

A type of stone which cannot be included in any of the three classes given is a hard metamorphosed slate: this has been extensively quarried near Halifax, where it has been used in the construction of government buildings as well as in many other structures.

Crystalline limestone or marble occurs at several places in both provinces and is extensively quarried for the manufacture of lime and for use as flux in the iron furnaces. Incidentally, this stone has been used locally for structural purposes, but its suitability for ornamental work is very doubtful. It must be admitted, however, that some very handsome variegated marbles occur, which, if they could be procured in sufficiently large pieces, would make ornamental material of considerable value.

Not Successfully Marketed.

Fine white gypsum or alabaster, of a character suitable for decorative purposes, occurs in the mines of the Albert Manufacturing Company, at Hillsborough, in New Brunswick. Some of the numerous other gypsum deposits present possibilities in this respect.

Many of the volcanic rocks in both provinces are of a handsome appearance when polished and are of undoubted value as decorative material. In this connection the handsome and vari-colored felsites and felsite-breccias of Scatari island are worthy of special mention.

Of the rarer decorative substances, chalcedony and agate are the most important.

Slate occurs in both Nova Scotia and New Brunswick, but the attempts that have been made to put this material on the market have not hitherto met with success.

WESTERN CITIES AND THEIR BORROWINGS.

The financial position of Canada's western cities is of much interest to the British investor and to supply information regarding these cities' borrowings. A book containing data regarding 11 cities has been issued, following an investigation during two tours through the Dominion.

"Canada: The Western Cities, their Borrowings and Assets." H. Howard. Two shillings. Investors' Guardian. London, England.

MANY NEW COMPANIES FORMED

Authorized Capital is Seventy-nine Millions—More Oil Concerns

Canada's new companies incorporated this week number 180. The head offices of these companies are located in six provinces. The total capitalization amounts to $79,266,000, the largest companies being:—

Liquid Natural Gas (Canada), Limited, Calgary..	$5,000,000
Governor Oil Company, Limited, Vancouver	2,000,000
Circle Syndicate No. 1, Limited, Calgary	1,500,000
North Vancouver Land and Improvement Company, Limited, Vancouver	1,250,000
Blue Bell Company, Limited, Calgary	1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	22	$7,165,000
Alberta	117	68,257,000
Saskatchewan	13	1,460,000
Ontario	23	1,390,000
Quebec	2	525,000
Prince Edward Island	3	469,000
	180	$79,266,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Cardston, Alta.—Ockey Brothers, Limited, $30,000.

Shaunavon, Sask.—Overland Store, Limited, $20,000.

Prince Rupert, B.C.—Tiahn Oil Company, Limited, $500,000.

Regina, Sask.—The Dollar for Dollar Company, Limited, $10,000.

South Fort George, B.C.—Willow-Chilaco Land Company, Limited, $9,000.

North Battleford, Sask.—The Clarendon Hotel Company, Limited, $75,000.

Estevan, Sask.—The Estevan Clay and Pottery Company, Limited, $200,000.

Lang, Sask.—The Lang Oil and Gas Development Company, Limited, $300,000.

Nokomis, Sask.—Dominion Milling and Elevator Company, Limited, $30,000.

Mundare, Alta.—The Victoria Black-Silver Fox Company of Pakan, Limited, $50,000.

Haileybury, Ont.—F. C. Preston, Limited, $40,000. J C. Church, S. H. Glassford, G. J. Gibbons.

Bridgeburg, Ont.—The W. R. Krafft Company, Limited $100,000. W. R. Krafft, W. T. Malkin, W. G. Edwards.

Fort William, Ont.—Morris Land Company, Limited, $40,000. M. Marqusn, K. Murkowsky, M. Murkowsky.

Galt, Ont.—The Maple Leaf Bedding Company, Limited, $40,000. J. C. Dietrich, R. C. Torrance, J. W. Dore.

Redcliffe, Alta.—Broadway Department Store, Limited, $50,000. Redcliffe Knitting Company, Limited, $100,000.

New Westminster, B.C.—Eureka Oil Wells, Limited, $800,000. Beaver River Lumber Company, Limited, $50,000.

Moose Jaw, Sask.—Binning's Fair, Limited, $40,000. Western Canada Gas, Oil and Development Company, Limited, $500,000.

Niagara Falls, Ont.—The Niagara Spanish Aerocar Company, Limited, $110,000. A. B. Y. Echeverria, G. T. Y. Polanco, E. J. McIntyre

Victoria, B.C.—Motor Agents, Limited, $6,000. Nanaimo Transport and Trading Company, Limited, $15,000. Alberta Victoria Petroleums, Limited, $150,000. The Variety Stores, Limited, $15,000.

Windsor, Ont.—Windsor Lawn Bowling Club, Limited, $40,000. E. C. Watson, W. H. Downey, C. R. Tuson. Windsor Abattoir, Limited, $40,000. M. M. Salsenstein, H. Salsenstein, M. Salsenstein.

Hamilton, Ont.—Dominion Cigar Company, Limited, $40,000. F. A. Carty, D. Carty, J. E. Robinson. Best Weather Strip Company, Limited. $40,000. M. W. Best, H. Thompson, M. F. Best.

Saskatoon, Sask.—The Prairie Business Colleges, Limited, $25,000 Oil Leases, Limited, $25,000. Simmons Brothers, Limited, $20,000. Belly River Oil Company, Limited, $200,000. Dunn's, Limited, $15,000.

Montreal, Que.—St. Lambert and District Building Company, Limited, $500,000. A. Wainwright, A. H. Elder, H. F. Glass. J. Edward Ogden Company, Limited, $25,000. E. S. McDougall, D. P. Gillmor, G. R. Drennan.

Prince Edward Island.—First National Fox Exchange of Prince Edward Island, Limited, $100,000. H. Howatt, S. M. Hicks, J. A. McMurdo. Alberton Hotels, Limited, $19,000. J. T. Profit, F. L. Rogers, C. J. C. Stewart, Cherry Island Silver Fox Company, Limited, $350,000. W. J. Rankin, R. B. Rankin, C. A. Woodman.

Ottawa, Ont.—The Rideau View Realty Company, Limited, $50,000. S. F. Smith, E. J. Labelle, A. Beauloeu. The Western Transportation Company, Limited, $100,000. J. H. Hall, R. T. Holcomb, A. Lefebvre. Victoria Foundry Company, Limited, $150,000. C. Murphy, H. Fisher, L. P. Sherwood. The Baker Laundry, Limited, $80,000. W. Baker, T. L. Roberts, N. H. Smith. Club Frontenac, Ottawa, E. Godbout, J. B. E. Pageau, R. Whalen.

Edmonton, Alta.—Alberta Avenue Liquor Company, Limited, $1,000. Canadian Leaseholds, Limited, $50,000. Capital City Stock Exchange, Limited, $20,000. The Great Northern Fox and Fur Company, Limited, $45,000. Namayo View Development Land Company, Limited, $100,000. The Capital Printing Company of Edmonton, Limited, $10,000. The North Western Fox and Fur Company, Limited, $60,000. The Twin City Silver-Black Fox Company of Alberta, Limited, $20,000.

Vancouver, B.C.—Skeena River Mills, Limited, $250,000. Malaspina Marble Quarries Company, Limited, $150,000. Maple Ridge Pitt Meadows Oil Company, Limited, $200,000. Port Haney Oil Fields, Limited, $250,000. The North Vancouver Land and Improvement Company, Limited, $1,250,000. Windebank, Limited, $400,000. Vancouver Drug Company, Limited, $100,000. Governor Oil Company, Limited, $2,000,000. Westminster and Pitt Meadows Oil Company, Limited, $500,000. Vancouver Scale Truck Company, Limited, $300,000. Charles A. Newhall Company, Limited, $10,000. Fresh Water Sand and Gravel Company, Limited, $100,000. Fuel Oil Equipment Company, Limited, $10,000. Atlantic and Pacific Oil Company, Limited, $100,000.

Calgary, Alta.—Standard Brokers, Limited, $10,000. Inter-Ocean Stock Corporation, Limited, $100,000. Morgan-Knox Company, Limited, $50,000. Liquid Natural Gas (Canada), Limited, $5,000,000. Blue Bell Company, Limited, $1,000,000. The Development Company of Winnipeg, Limited, $100,000. Capital Finance Company, Limited, $20,000. Canadian Montana Holding Company, Limited, $300,000. Circle Syndicate No. 1, Limited, $1,500,000. Western Canada Theatres, Limited, $10,000. The Okotoks Land and Improvement Company, Limited, $10,000. The Mid-West Brokers, Limited, $20,000. The following is a summary report of the new oil companies chartered in Alberta. There are 86 this week, with authorized capital of $59,462,000. Twenty-six of these companies have capital of $1,000,000 each; 3, $1,500,000; 2, $2,000,000; and 1, $3,000,000. The remainder have authorized capital of less than $1,000,000 each.

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 7th:—

Dominion Reduction Company, 84,400; Penn-Canadian Mine, 55,930; Brewer Brothers, 40,000; Coniagas Mine, 261,410; McKinley-Darragh-Savage Mine, 107,860; Tretheway Silver Company Mine, 125,180; Temiskaming Mining Company (Kerr Lake), 80,480; total, 815,260 pounds, or 407 tons. The total shipments since January 1st, 1914, are now 24,078,933 pounds, or 12,039 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

◆

MONTEREY COMPANY DEFER BOND INTEREST.

A circular has been issued by the Monterey Railway, Light and Power Company stating that the directors regret that, owing to the continuance of the disturbed political conditions which have obtained in Mexico for some time past, arrangements with the Government of the State of Nuevo Leon for a settlement of the claim of the Monterey Water works and Sewer Company under the government's guarantee of 10 per cent. on the capital expenditure have not yet been completed.

Notwithstanding this, it would have been possible to provide for the interest on the debenture stock, but for the low rate of exchange prevailing between Monterey and London, and on this account the directors regret that they are compelled to postpone the payment of the interest on the five per cent. first mortgage debenture stock, due on August 2 next until such time as it is possible to transfer the money on reasonable terms.

No interest on the debentures has been paid since August, 1913.

ALBERTA'S CROP SITUATION

Expect About 5,500,000 Bushels Less This Year—War's Effects

(Special Correspondence).

Calgary, August 10th.

The crop situation in Southern Alberta is now such that a reasonably accurate estimate may be made of the probable wheat yield. While not so large as the optimists hoped nor as small as the pessimists would have it, the figures are still equal to the output of 1911, when 15,000,000 bushels were harvested. This is a reduction of five and a half millions of bushels from the crop of 1913, but on account of a somewhat larger area under crop this spring, represents a smaller average yield per acre. Other grains are hardly far enough advanced to permit an estimate. Drought in the extreme south is the cause of the reduction. Many farmers in the south who had staked their all on the prospect of having grain to sell, find themselves in a very difficult position and will require assistance. It is rather unfortunate that dry weather should have made such havoc with the grain, for Alberta has been making marked headway in agriculture of late years. The central and northern portions of the province are in excellent condition. There are ample supplies of feed and produce readily available.

Business is, of course, temporarily affected by prevailing conditions, but there is no other thought than to profit by the experience. In this connection it is to be noted that the wisdom of setting farmers up again on some of the dried-out lands, though it be, as has been suggested, with livestock to encourage mixed farming, is not beyond question. Certain lands should not have been opened for homesteading, and the fact that the government consented to the demand of the people in this respect does not make the consent justifiable.

It is doubtful if, under present circumstances, success in the larger sense can ever be really attained in some of these locations, without a struggle such as no one in this country of much good land well situated, should be called upon to face. The department of the interior could well afford to give this aspect of the situation some serious consideration.

Delay Municipal Works.

On account of the possibility of being short of funds the city commissioners decided that no other municipal works of importance will be undertaken until the war scare ceases to be a trouble to financiers. This will release for other pursuits a number of men whose assistance will be welcome for harvesting and assist in removing the necessity for bringing men from outside. A fare of one cent a mile will be granted by the railways on presentation of a certificate from the United Farmers of Alberta.

All but two of the oil exchanges have closed in response to the request of business men. Very little business is being transacted in shares and prices have slumped in sympathy with the general desire to have money rather than certificates.

War and its consequences are uppermost in every conversation. Except for flour, which the millers advanced 30 cents a bag last week, prices of supplies are unchanged. Live stock men anticipate that prices of domestic animals of all kinds will advance. Offerings at the stockyards are about normal.—J. P. R.

◆

RURAL TELEPHONE COMPANIES INCORPORATED.

The following is a list of rural telephone companies incorporated in Saskatchewan, together with their capital and head office:—

Bennett Rural Telephone Co., Limited, $240. Craik.

Deep Lake Rural Telephone Co., Limited, $450. Indian Head.

The Lewiswyn Rural Telephone Co., Limited, $400. Raymore.

Ernscliff Rural Telephone Co., Limited, $350. Ellisboro.

Glenavon South Rural Telephone Co., Limited, $800. Glenavon.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Cardston, Alta.—Time for receiving tenders for debentures has been extended to September 2nd, 1914.

St. Lambert, Que.—Hanson Brothers, of Montreal, recently purchased and are offering to investors, an issue of $480,000 5½ per cent. 40-year debentures.

Sandwich, Ont.—36 votes were credited in favor of the by-law to expend $10,000 for a new public dock, while 90 voted against it. A by-law to extend water mains was carried by a majority of eight.

Parry Sound, Ont.—Owing to the outbreak of war, the proposed bond issue has been withdrawn from tender until the market is more settled, so Mr. J. D. Broughton, treasurer, informs *The Monetary Times.*

Redcliff, Alta.—The sale of $105,000 Redcliff debentures was practically negotiated in Toronto last week, when the declaration of war between Great Britain and Germany prevented a sale at the last moment. As a consequence all public work here has been stopped.

Hamiota Consolidated S.D., No. 692, Man.—Tenders will be received up to August 18th for the purchase of 19 debentures of $400 each, payable 1st of December each year, commencing December 1st, 1915, and one for $8,400 on 1st December, 1934. John Nairn, secretary-treasurer, Hamiota. (Official advertisement appears on another page.)

Regina, Sask.—In view of the present attitude of investors and bond buyers toward the debenture market, as expressed in recent communications received by the local government board of Saskatchewan, the board has advised the various government departments having supervision over local authorities, that until further notice it will be required that, in addition to the usual information submitted with applications for authority to borrow money by way of debenture, evidence satisfactory to the board be submitted showing that arrangements can be made to dispose of at a reasonable price, the debentures of which authorization is applied for.

Regina, Sask.—The following is a list of debenture applications granted by the Saskatchewan local government board and the applying treasurers:—

School Districts.—Deanview, No. 3368, $1,400. H. Blehn, Prussia; Coynach, No. 3360, $1,600. Jos. Buchen, Southey; Echo Valley, No. 1067, $1,600. S. M. Horton, Rapdan; Little Pipestone, No. 14, $1,500. T. E. Oliver, Wawota; Coterie, No. 3275, $1,800. P. F. W. Rea, Glenside; Valley Plain, No. 3330, $1,000. H. Scheuimann, Quill Lake; Valley, No. 2585, $1,500. J. J. Dais, Prussia.

Rural Telephone Companies.—Maymont R.T. Company, $9,000. P. Knowles, Maymont; Foxbury R.T. Company, $8,000. T. A. Parks, Craik.

Regina, Sask.—The following is a summary of applications for borrowing powers for authorization by the local government board of Saskatchewan from July 31st to August 6th, 1914:—

	Received.		Authorized.	
	No.	Amount.	No.	Amount.
School districts	17	$63,400	8	$12,400
Rural telephone companies	10	59,500	2	17,000
Villages	2	4,200	..	......

A school district application was reduced by the board to the extent of $1,000. There are nine school districts applications to the board for borrowing powers, pending investigation and representing aggregate loans of $50,000. There are also eight applications from rural telephone companies representing $42,500 and two applications from villages representing $4,200.

(Further information regarding municipal financing appears on page 49 of this issue.)

◆

In all these war declarations by the Kaiser, Controller Thomas Church, of Toronto, seems to have been overlooked.

The Canada Accident Assurance Company have removed its offices from 10 Adelaide Street East, to 8 Wellington East, Toronto.

PERSONAL NOTES

Mr. E. E. Barnes, of Toronto, inspector of the Bank of Nova Scotia, was on the Pacific coast recently on business.

Mr. A. E. Holt has been elected a director of Messrs. C. Meredith and Company, the well-known financial house of Montreal.

Mr. Bertram E. Hards, assistant manager of the Guardian Assurance Company, has returned to Montreal after a holiday in England.

Mr. H. C. Cox has been elected to fill the vacancy on the directorate of the Canadian General Electric Company due to the death of the late Mr. E. W. Cox.

Mr. Hamilton Gault, Montreal, has agreed to raise and equip a thousand men for the front. This splendid offer has been accepted by the British government.

Mr. M. M. Reynolds, who died recently, was a vice-president of the Grand Trunk Railway in charge of finance and accounting. The position has since been abolished.

Senator Valentine Ratz, of Parkhill, Ont., Mr. C. J. Sloan, manager of the Royal Bank in Toronto, and Mr. T. A. McNeely, of Toronto, have been visiting the Pacific coast.

Mr. D. Lorne McGibbon, who is an honorary lieutenant-colonel of the 6th Brigade Canadian Field Artillery, has made an offer to care for the families of all the men of that brigade who are called to war.

Mr. W. Lyle Reid, who has become secretary of the Canadian Life Underwriters' Association, is an Ottawa man. He is a hard worker and one of the most kindly and genial underwriters in the Dominion.

Mr. H. B. Andrews is a Winnipeg life insurance man, and at the recent Halifax convention became the vice-president of the Canadian Life Underwriters' Association. He is a big man physically and in his business, and is one of the splendid types of citizen of which the western metropolis has so many.

Mr. G. R. Martin has been appointed auditor of disbursements for the Grand Trunk and Grand Trunk Pacific Railways. Mr. Martin was formerly accountant in the Superintendent's office at St. Thomas, Ont., but in 1907 was appointed travelling accountant of the disbursement department. He was chief clerk in that office from 1908. Mr. D Ross succeeds Mr. G. W. Clark as locomotive foreman in charge of the work at Southwark Terminal. Mr. Clark was assigned to other duties.

Mr. James A. Yates has been appointed assistant treasurer to the Grand Trunk and Grand Trunk Pacific Railways. He entered the service of the Grand Trunk in 1891 as junior clerk in the audit department, but was transferred to the treasurer's office in the same year and has had continuous service there. When the Grand Trunk Pacific Railway was organized in 1907 he was appointed chief clerk to the treasurer and since January 1, 1912, has been chief clerk to the treasurer of both the Grand Trunk and Grand Trunk Pacific Railways.

Mr. William C. Tomkins has been appointed assistant to Mr. Frank Scott, vice-president and treasurer of the Grand Trunk Railway and Grand Trunk Pacific. Mr. Tomkins, entered the Grand Trunk service September 1st, 1885, in the office of auditor of pay rolls. Two years later he went over to the office of the general manager, which afterward became the president's office. In May, 1908, he became secretary to the late vice-president, Mr. M. M. Reynolds, remaining in charge of that office during Mr. Reynolds's service with the company.

Mr. Russell A. Little, the recently-elected president of the Glens Falls Insurance Company, which is doing business in Canada, is a son of Mr. Russell M. Little, the founder of the company, and from the beginning its secretary and manager, and for many years until his death in 1891, its president. The new president has always been in the insurance business. After leaving school he entered his brother's agency office in Glens Falls and afterward became special agent of the Royal. He came to the Glens Falls 41 years ago, and has served it ever since as special agent, general agent, secretary and vice-president. He is calm-minded, level-headed, with excellent judgment of men and things, and will preside ably over the affairs of the company he has served so long and so well.

Mr. James Lawler, secretary of the Canadian Forestry Association, has returned to Ottawa from a month's visit to the Maritime provinces, where he made preparations for the forthcoming Canadian Forestry Convention at Halifax, September 1 to 4. Mr. Lawler visited Prince Edward Island and lectured in 15 of the principal cities and towns of Nova Scotia. The attendance at these lectures indicated very general interest in the subject of forest conservation and there is every prospect of a successful convention in Halifax. The number of leading men from Canada and the United States who will attend insures that the papers and discussions will be valuable and full of interest. Mr. Lawler will now remain in Ottawa about a month before returning to Nova Scotia to complete the work there.

Mr. Frank Scott has been appointed vice-president and treasurer of the Grand Trunk Railway, in charge of all finance of the company reporting direct to the president He is well known in general banking and financial circles, as well as in the railway world, and is a son of the late Dr. William E. Scott, for many years professor of anatomy at McGill University, and chief medical officer of the Grand Trunk Railway. He is a brother of the Rev. Canon Scott, of Quebec, one of the leading Canadian poets. Mr. Scott has been treasurer of the Grand Trunk Railway for the past 13 years, adding to that office treasurership of the Grand Trunk Pacific in 1906. He entered railway service in 1879 as clerk in the audit department of the Grand Trunk, and has risen steadily to the vice-presidency. In 1891 he was appointed secretary of the audit board and purchasing committee. Two years later he was made assistant treasurer, and succeeded Mr. Charles Percy as treasurer in 1901. He is a member of the board of directors of the Grand Trunk Pacific; and a past president of the Society of Railway Financial Officers of America

Mr. George R. Crowe, a Nova Scotian, has been for many years intimately linked with sound western enterprise. In the early days when the Great West Life Assurance Company was founded his name was one of the first to be proposed for membership of the provisional directorate named in the charter, and he has been on the board continuously ever since. Mr. Crowe, says the Great West Life bulletin, was born in Nova Scotia, to which prosperous province extended reference was made in the last issue of the bulletin. He came to Winnipeg in 18[illegible] and so qualifies as one of our true western pioneers. After a short time spent in railroad construction, and later in the lumber business, Mr. Crowe embarked upon the occupation to which he has given the energies of a busy lifetime—the grain business. Since 1908 he has been vice-president and Winnipeg manager of the British Empire Grain Company, and is one of the most prominent figures of the Winnipeg Grain Exchange. Mr. Crowe is also vice-president of the Northern Trusts Company, a director of the Canadian Fire Insurance Company, of the Northern Mortgage Company and of the Royal Bank of Canada. Mr. Crowe is active in public affairs. The healthy recreations of golfing and lawn bowling keep him fit.

Mr. Thomas Hendry, of Brantford, who has been elected as one of the vice-presidents of the Canadian Life Underwriters' Association, is one of the prominent citizens of that city and is active in many spheres. He was born in the county of Lanark in 1871 on January 1st, received a country education and entered as clerk in a mercantile business which he followed until 1896, being then located in Hamilton. He was asked to take over the agency of the Sun Life Assurance Company, in Brantford, at that time. The field originally given to Mr. Hendry has increased and he now covers five counties and has a number of men connected with his office. The title of the position held by him at present is that of district manager. Mr. Hendry's office writes about $500,000 business per year in his territory. He also has a large fire insurance business besides the broker's business in connection with the office. He has been identified with the Life Underwriters' Association since its inception and is a past president of the local association. He takes an active part in the municipal affairs of the city and is a past chairman of the public library board and chairman this year of the building and grounds of the same board. He has been connected with the board of health in the inauguration of systems now in use, as well as with several other industries in the city of Brantford.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Cornwall, Ont.—August 7—Hotel Dieu. Loss, $1,000. Cause, lamp overturned.

Grimsby Beach, Ont.—August 8—35 cottages. Cause, lighted oil stove tipped over.

Weston, Ont.—August 7—Dwelling, owned by Mr. McGlen. Loss, $1,500. Cause unknown.

Hartland, N.B.—July 31—Canadian Pacific Railway station and four warehouses. Loss, $10,000. Cause unknown.

Redcliff, Alta.—August 3—Mr. W. Hall's residence, 4th Street; Mr. K. Dwyer's residence. Loss and cause unknown.

Scarboro, Ont.—August 10—Mr. Edward Hamilton's barn. Loss, $800, partially covered by insurance. Cause, lightning.

Windermere, Ont.—August 7—Boathouse, steam launch, gasoline launch, row boats, etc., owned by Mrs. T. Eaton. Loss and cause unknown.

Ridgeville, Man.—August 3—International Harvester Company's warehouse; Mr. Rosenstock's store, hotel, etc. Loss, $45,000. Cause unknown.

Montreal, Que.—August 7—Ice house owned and occupied by City Ice Company, Duke Street. Seven firemen injured. Cause unknown. Loss, $10,000.

Halifax, N.S.—August 4—Business block, Barrington and Duke Streets. Occupants, W. L. Tuttle, P. T. Shea, Cosgrove Brothers and Bens, Limited. Loss and cause unknown.

Iroquois Falls, Ont.—August 10—District north of Iroquois Falls, including the Foley-O'Brien mine power-house and buildings; at Pottsville, 12 houses; at Golden City, McKinnon's shack; the athletic grounds at South Porcupine. Cause, bush fires.

Sir Edgar Vincent, K.C.M.G., is chairman of the Dominions Royal Commission, which is now on the American side of the Atlantic and which will proceed with its sessions in Canada. The commission, however, in view of warfare, will not participate in any social functions. The other members of the commission are:—Sir Henry Rider Haggard, Tom Garnett, William Lorimer, Joseph Tatlow, Sir Alfred Edmund Bateman, K.C., M.G., Sir George Eulas Foster, LL.D., Donald Campbell, LL.D., the Hon. John Robert Sinclair, Sir J. W. S. Langerman, and the Hon. Edgar Rennie Bowring.

CANADIAN PACIFIC RAILWAY'S POSITION

Net Surplus Was Reduced, but Sixty Millions of New Stock Had Dividends

The net surplus of the Canadian Pacific Railway for the fiscal year ended June 30th was $9,698,254. This compares with a net surplus in the previous year of $18,310,259. The surplus, therefore, is reduced by nearly 50 per cent., but there are important reasons for this. The company has had to pay three quarterly dividends during the past year on $60,000,000 of new common stock, which was issued during the fiscal year. There has been also a widespread trade depression, especially in Western Canada, where the traffic receipts have been affected largely. The loss of the company's steamship. "Empress of Ireland," will probably figure in some way in the current year's accounts. War operations should also affect favorably to some extent the company's earnings here, although naturally in other directions it will affect them adversely.

Margin of Four Per Cent.

The surplus of $9,698,254 represents a margin of 3.7 on the $260,000,000 stock outstanding. The form of the accounts has been changed this year as foretold by Sir Thomas Shaughnessy at last year's annual meeting. This makes certain comparisons difficult. The following table, however, compares the profit and loss statement of the railway and steamship accounts for the past two years:—

	1912-13.	1913-14.
Gross earnings	$139,365,699	$129,814,824
Working expenses	93,149,825	87,388,896
Net earnings	46,245,874	42,425,928
From steamship department ...	1,245,563	......
Total net earnings	47,491,437	42,425,928
Fixed charges	10,876,352	10,227,311
Surplus	36,615,085	32,198,617
Steamship replacement account.	1,000,000	......
Balance	35,615,085	32,198,617
Pension fund contribution	125,000	125,000
Balance	35,490,085	32,073,617
To special income account.....	......	2,115,842
Available for dividends	35,490,085	29,957,774
Dividends for year	17,179,828	20,250,521
Net surplus for year	18,310,257	9,698,254

Changes in Accounts.

Among the changes in the form of accounts is the deduction, after fixed charges and pension fund, of the net earnings of the Pacific coast steamships, commercial telegraph and news department and their transfer to special income account. The amount so transferred amounted to $2,115,842, and naturally made a considerable hole in the amount available for dividends and the net surplus carried forward.

The item "net earnings of steamships in excess of amount included in monthly reports" does not appear in this year's account. When net earnings are brought down in the first place they include net from all sources. No allowance is made this year for steamship replacement fund, against $1,000,000 last year, but this was foreshadowed in the president's remarks at the last annual meeting, when he stated that as "the replacement fund now approximates the entire cost of your original Atlantic fleet, it is neither necessary nor desirable to increase it by liberal appropriations hereafter."

Land and Other Assets.

The company's land and other active and inactive assets have been included in the balance sheet, and on conservative basis show an addition from these sources to the surplus of $127,253,782.

The preliminary statement for the past fiscal year was presented at a meeting of the company at Montreal this week

The Transfer Books of the Bank will be closed from the 17th to the 31st day of August next, both days inclusive.

By order of the Board.
ALEXANDER LAIRD,
General Manager.

Toronto, July 17th, 1914.

PLANS HYDRO-ELECTRIC SCHEMES

Duke Interests Are Said to Have Big Undertakings in Mind for Canada

Mr. J. B. Duke and associates, who have invested close to $30,000,000 in hydro-electric developments and electric railways in North and South Carolina as represented by the Southern Power Company and the Piedmont and Northern Railway Company, now have plans, according to the Wall Street Journal, to enter extensively into hydro-electric propositions in Canada and probably in Norway and Sweden.

Mr. W. S. Lee, vice-president of the Southern Power Company, has returned to New York from a trip to Norway and Sweden where he inspected the large hydro-electric developments of those countries. Utilization of power in large quantities in the electric furnace has now been brought to such a high state of efficiency that it is believed that this is destined to effect a great revolution in all industries. Possibilities of hydro-electric development have been made so attractive in Canada and in Norway and Sweden that capitalists all over the world are now directing their attention to these countries, with reference to water-power development.

Excursion to Foreign Fields.

Mr. Lee is quoted in the Manufacturers' Record as saying: "This excursion into foreign fields does not mean that the interests responsible for the wonderful development of Piedmont Carolina intend to withdraw from this field, but on the contrary they expect to continue to make investments in it. Success along these lines must of course be measured by the encouragement and sympathy which the public accords the different enterprises.

There is no intention of abandoning America, but as to mammoth future developments the attention of these interests has been attracted elsewhere. There is a great field for development, particularly along the line of electro-chemical and electro-metallurgical processes, that is simply astounding in scope and possibilities. The utilization of power in large quantities in the electric furnace is the keynote secret of the undertaking and this is the field that is going to be stressed. In order to be able to proceed with such development, much of which is experimental, cheap power is absolutely essential and it must be available in large units. Raw material also must be abundant and cheap. In the elaboration of these great plans the men who are investing their millions must have a maximum of freedom from restraint and in order to achieve this highly prized essential they are now looking to foreign lands for a field for their activities."

Has Acquired Options in Canada.

It is understood in New York in hydro-electrical circles that Mr. Duke and his associates have been acquiring options on power sites in Canada for several years until to-day they have approximately 700,000 available horsepower that can be developed for something like $10 a horsepower or perhaps less. Engineers are also working on the perfection of the electric furnace. It is stated that deposits of Canadian iron ore are being investigated, with a view to purchase in order that raw material for steel making may be had.

Neepawa, Manitoba.

DEBENTURES FOR SALE.

Sealed tenders will be received by the undersigned up to 12 o'clock noon, Saturday, August 15th, 1914, for the purchase of the following Debentures of the Town of North Bay, Ontario:—

1. $40,000 issue for street improvements bearing interest at the rate of five per cent. per annum, payable in twenty equal annual instalments.
2. $30,000 Public School issue bearing interest at the rate of five per cent. per annum, payable in thirty equal annual instalments.
3. $5,000 issue for purchasing apparatus, appliances, and appurtenances for Fire Protection bearing interest at the rate of five per cent. per annum, payable in ten equal annual instalments.

Tenders will be received for the whole of the several issues, or for one or more of the different issues.

Delivery to be made at the Royal Bank of Canada, North Bay, Ontario.

W. K. P. KENNEDY,
Town Clerk.

North Bay, Ont., July 24th, 1914.

DEBENTURES FOR SALE

The undersigned will receive tenders for purchase of Debentures of the Consolidated School District of Hamiota, No. 602, of Manitoba.

Nineteen Debentures of $400.00 each, payable 1st of December each year, commencing December 1st, 1915, and one for $8,400.00 on 1st December, 1934, with Interest Coupons attached at rate of six per cent. per annum, payable at Union Bank of Canada, Hamiota, Man.

Tenders close on August 18th, 1914. Lowest or any tender not necessarily accepted.

JNO. NAIRN,
Sec.-Treas.,
Hamiota, Man.

To make the raising of live stock more profitable to the Saskatchewan farmer, the city of Regina has decided to establish stock yards and other industries which naturally follow, with the least possible delay. The exhibition grounds, which contain 75 acres and a great many large cattle barns, have been turned into stock yards, until such time as the city is able to secure a suitable site, and erect the necessary pens and buildings.

◆

Mr. W. H. Ardley has been appointed comptroller in charge of all accounting of the Grand Trunk and Grand Trunk Pacific companies, reporting direct to the president. In his 30 years' service with the Grand Trunk, he has risen from the junior clerkship to his present position as chief of the whole accounting department. He entered railway service November 5th, 1884, and has been chief clerk and general bookkeeper in general auditor's office 1893 to 1907; auditor of disbursements, 1907 to 1908; acting chief auditor, August 21st to December 31st, 1908; and general auditor Grand Trunk and Grand Trunk Pacific railways from January 1st, 1909, to date. He was recently appointed to the board of directors of the Grand Trunk Pacific Railway.

RAILROAD EARNINGS.

The following are the railway earnings for the week ended August 7th:—

Canadian Pacific Railway.

	1914.	1913.	Decrease.

AROUND THE LONDON EXCHANGE

The London Stock Exchange committee resumed meetings on Monday and discussed the question of re-opening the board. Opinion was divided as to the desirability of an immediate resumption.

◆

AROUND THE NEW YORK EXCHANGE

The New York exchange has now been closed as long as in 1873, the only previous suspension on account of critical emergencies, but there is no indication that regular dealings in securities will be resumed in the very near future. The troublesome point is the amount of foreign liquidation to be apprehended, and this is something which is so far only a matter of conjecture. In all probability a great deal of European liquidation could be absorbed without a material weakening of prices provided the selling was done over a period of months.

ANNUAL REVIEW OF PUBLIC AFFAIRS.

A volume of interest, being a commentary on the various happenings and developments of a year of growth of this Dominion, is that issued annually under the title "The Canadian Annual Review." As the complexities of Canada's affairs have increased, so has the scope of the book been enlarged. The administration of the Dominion, and the various provinces, army and navy, financial situation, transportation interests, literature, housing and town planning, foreign relations, are a few of the important topics covered. "Canadian Annual Review of Public Affairs." J. Castell Hopkins, F.S.S. Annual Review Publishing Company, Toronto.

Britain's Change to High Gear for War

THE transformation of Great Britain's mechanism from peace to war speed has been remarkable. The oft-heard suggestion that the nation would be found unprepared in the event of crisis, is answered. In the midst of war alarms, stock exchange panic, credit breakdown, suspension of international exchange, the country quietly and effectively adapted itself to extraordinary conditions in short time. This has been illustrated in a striking manner in banking, finance and commerce. With national credit chains thrown out of order by war, Great Britain has repaired its own in a truly British way. The government and bankers had to contend not only with conditions created by hostile declarations. Good reason there is to believe they had to face also a German campaign in finance planned to bring disaster to British credit and to disorganize British finance so that effective action by England would be impossible. On the one side there were factors which might have overwhelmed the best government and banking brains. Yet the situation was handled in a way which, upon reflection, will excite keen admiration.

Among the first notable actions in banking spheres was the rapid increase in the Bank of England rate in three days, from 3 to 10 per cent. The effect of the high rate was as deadly in finance as is the bullet in war. Less than a week later, the high bank rate having done its work, it was reduced to 5 per cent. The London stock exchange was closed, thus cutting short what would have proved a disastrous panic. One pound and ten shilling notes were in circulation within two weeks of the declaration of war, this emergency currency being of great assistance. The regulation of food prices was controlled immediately by the government. The question of employment for the unemployed received consideration at once and a scheme of road-building was planned. From the peer to the navvy, everyone in Great Britain worked zealously for the cause of the Empire. The British government and its Opposition, and the Bank of England in co-operation stood firm in the financial hurricane, inspiring confidence not only in British people the world over, but in other nations, too, where British credit means so much. Consequently, there were no runs on banks, no banking failures, no notable stock exchange failures. The national machinery, after its first shock, revolved again, hindered certainly by the sands of military and naval operations, but not by financial disaster as well. The nation has changed the low gear for peace to the high gear for war, and with little trouble.

The way in which the international exchange situation was treated was, perhaps, the most interesting phase of this unique British work. Matters had reached a serious point. Since the outbreak of war, exchange quotations had become prohibitive and gold shipments were practically impossible because of the presence of German cruisers in the Atlantic. As Hon. W. T. White, minister of finance at Ottawa, explained last week, the United States owes large sums in London which have to be paid in gold. Great Britain is the great creditor-nation, and London has been drawing the gold of the world to her vaults. There was, therefore, a rush in America to buy exchange, that is to say, gold in London. Any American or Canadian merchant or banker who has a balance in London could sell it at a high premium to other bankers or merchants who had to find funds in London to pay debts maturing there.

Before the war was declared there had been large shipments of gold to London because it was cheaper to send the gold than to buy exchange. War between Germany and Great Britain put an end to this, and the greatest difficulty was being experienced on this side of the Atlantic in making payments in Great Britain. It became practically impossible to finance shipments from Canadian ports of wheat, flour, meat and other food products.

There arose a great congestion of these commodities at Montreal awaiting normal exchange conditions. Shippers could not sell their grain or other produce bills because the banks could not sell these as usual in New York, and if they were sent forward for collection in Great Britain and paid there the banks here could not bring the gold over.

The result of attempting to finance Canada's vast export produce trade in such conditions of exchange would have been that Canada would pile up gold balances in Great Britain and be depleted of gold here.

This was, perhaps, the most difficult situation of all, its continuance meaning widespread disturbance to international finance and commerce. The British authorities, however, rapidly found a simple method to combat a dangerous problem. They arranged with the Canadian government that Canada's finance minister should act as trustee to hold gold for account of the Bank of England. United States bankers desiring to pay gold in London now will forward it to the finance minister at Ottawa for account of the Bank of England. Thus it will not be necessary to ship gold across the Atlantic to make payments in London and exchange rates should at once ease. United States and Canadian exports which will go forward to Europe this fall speedily will restore the financial balance and possibly bring it about that exchange will be in favor of America.

To break still more the deadlock in the money market, and to enable trade and commerce to resume their normal courses, the British Government then agreed to guarantee the Bank of England from any loss it might incur in discounting bills of exchange of either home or foreign banks on trade accepted prior to August 4th. The Bank of England, therefore, was able to announce that it was prepared, on the application of the owners of any approved bill of exchange accepted before that date, to discount it at any time before its due date at the bank rate and without recourse to such holder, and upon the bill maturing, the bank would give the acceptor the opportunity of postponing payment, with interest at two per cent. over the bank rate. The Bank is prepared to approve such bills of exchange as customarily are discounted by it, and also good trade bills and acceptances of such foreign or colonial firms or bank agencies as are established in Great Britain. This will abolish a large part of the banking and commercial difficulties experienced in the past fortnight. Accepting houses now have their hands free in financing importations and commodities. The market thus is revived to such an extent that it will not be necessary to take to the Bank of England nearly as many bills as the Government estimates, as the certainty of being able to find a purchaser greatly reduces the desire of the holder to sell.

Further, the British navy has shown in modern times that "Rule, Britannia," has a commercial significance which we now realize in a practical way. The shipping lanes have been kept open fairly well, with the exception of the short routes in the North Sea, and even those have been declared safe for shipping for brief periods from time to time. A London message says: "The whole country as well as the business community is quietly confident." With the British navy on the job and the satisfactory financial arrangements which have been made, commerce with Great Britain probably will be interrupted seriously only when opposing navies meet in extensive combat. That may mean but one interruption of any consequence.

Paying the Piper Regardless of Tune

A MONTREAL factory has a government order for 40,000 pairs of military boots. The Massey-Harris plants at Toronto, manufacturing agricultural implements, are closing for a week, for stocktaking, and after, until further notice. The company's export trade is stopped. Two thousand five hundred men at least will be unemployed. Tent-makers and military equipment manufacturers are working night and day to fill orders. Parliament at Ottawa is arranging the basis of a war tax. Some industries benefit temporarily from the effect of the European struggle. Others are paralyzed by it. The outstanding fact is that the war must be paid for. Every nation, whether or not one of the belligerents, will bear its share. National debts will receive a heavy extra burden. In *The Monetary Times* last week, the probable cost of the war was discussed. Statisticians who have figured this agree pretty closely that $50,000,000 a day is the approximate figure. If the struggle lasts a month, the cost will be $1,500,000,000. If it extends to a year, although there are hopes that the economic problems arising, will not allow that,—the war bills will total $18,000,000,000. Europe already has a pile of old war debts aggregating $27,000,000,000.

Canada has authorized a $50,000,000 war loan. Germany has authorized the use of $1,250,000,000, and Great Britain has appropriated more than a billion. France will meet early costs through the sale of Government notes to the Bank of France. These large amounts will not suffice for long. A German economist prepared for his Government recently an estimate of the financial needs of the early period of a possible war. He reported that the cost of mobilization alone would be $300,000,000 in the first six weeks, in addition to $250,000,000 to be expended for supplies. Great Britain has been spending in time of peace a sum equal to the combined naval and military expenses in the most costly year of the Napoleonic war. In 1912 she used $140,000,000 on her army and $220,000,000 for the navy—an outlay of $360,000,000 in a twelvemonth of peace. It might be that $50,000,000 a day will not pay for the world's biggest war.

As pointed out by Mr. W. B. Little, a New York writer, there are three accepted theories for financing a national war. The first contemplates an expenditure all drawn from newly-levied taxes. The second proposes that the entire outlay be met from the proceeds of loans, which must be followed by new taxes equal at least to the interest on the money borrowed. The third theory holds that extraordinary expenditures should come from a reasonable union of these two sources. It is necessary to distinguish between the regular and the extraordinary expenses brought on by a war. It is an error to think that current consumption is greater in time of war. The public consumption may increase, but the added burden is offset by the curtailment in private consumption. It used to be held that the infliction of taxes quickens production, but this theory easily may be carried too far. It has been demonstrated that excessive burdens laid on the backs of the producers stifles initiative and acts as a brake on the workers' energy.

A somewhat cheerful view of the financing of the campaign by Great Britain is taken by the London Statist, which reminds us that a little over a century ago, when the nation was at war with Napoleon, its income was a very small one, being less than one-eighth of what it is at present, and in a comparatively short space of time the British people succeeded in raising about £1,000,000,000 of money for war purposes, and so great was their confidence and courage that at the end of the great war, which severely taxed their resources, they were stronger and wealthier than they had been at the beginning. If the British people are animated with the spirit of their fathers they should experience no difficulty in providing loans for war purposes, if necessary, to the extent of several hundred millions a year. In the current year the new issues of capital in the London market alone will probably reach £250,000,000, after providing for the nation's expenditure upon the construction of houses and the extensions of works. If the occasion should arise, the British people should be able, without any serious difficulty, to raise loans amounting to £200,000,000 a year over and above any sums they may derive from the sale to the United States of a part of the great quantity of American securities they now possess.

Trade has been one of the first victims of the present war, which is between nations that do the greater part of the world's commerce. The eight countries already involved, as the New York Annalist points out, have carried on, in normal years of late, upward of $15,000,000,000 out of the $25,000,000,000 of international trading accredited to the nineteen leading commercial countries of the world. They do in their ships the transporting of nearly seven-eighths of all transoceanic cargoes. Among them has centred, as if they held the heart and the brain of the living body of world-wide commerce, the streams of moving merchandise and of international monetary exchange and finance. When it was seen that the war was inevitable, commerce over the whole world abruptly ceased its regular movement and international credit collapsed.

During the seven years ended March, 1913, Canada sold $1,122,000,000 worth of goods to Great Britain and $903,000,000 worth to the United States. It bought from Great Britain $763,000,000 of merchandise in the same period, and from the United States $2,109,000,000. The disturbance to traffic on the Atlantic route ordinarily might have given a great impetus to United States trade in Canada, but the Dominion's difficulty is to obtain the funds with which to pay. Great Britain already has acted as banker to Canada to the extent of £500,000,000, but it cannot act in that capacity at present. The United States, therefore, may have to do a little lending in Canada, a country that has proved one of its best markets.

With a decisive British victory in the North Sea, the Atlantic trade channels should return to normal conditions. They are nearly so now. But a renewal of Canadian borrowing operations in London cannot be anticipated for a considerable time. Whatever may happen in Europe, there is bound to come a great change in the international trade relationships of the world. Great trade routes may still focus in the English Channel, if the war be over soon, but other new currents inevitably will be established.

We have had already a sufficient demonstration of the drastic effects of this war upon trade, commerce and finance. It has made men eager to know how long the struggle will last. The power of armies and navies is one of the factors of termination, but equally important is the economic factor. So many nations are engaged that they may find, in a much shorter time than anticipated, the necessity of seeking peace because of acute financial and economic obstacles. Both Russia and Japan were exhausted by a single campaign. It is not unreasonable to believe, as the London Economist points out, that if all the leading States of the Continent could go on fighting for three years, or, at all events, if passions were so excited and the demands of the more victorious side were so extortionate that fighting was continued, exhaustion would be the inevitable consequence. Whichever side was able to acquire and retain the command of the sea would have a great advantage over the side that lost such command. That advantage might not assert itself so evidently for a considerable time as to end the conflict. In the present condition of Europe, unless a war can be very quickly finished, it will exhaust the combatants and immensely lessen the predominance of Europe in the other Continents of the world.

Halting Germany's Industrial Machine

MILITARY and naval Germany in its insane war lust is paralyzing industrial Germany. At the conclusion of hostilities, the nation's industry and commerce will have suffered a blow, from which it will take at least a quarter, perhaps a half century, maybe more, to recover. Modern Germany presents two outstanding facts, the great increase of the population since 1871 and the growing dependence of the population upon industrial and mercantile pursuits. Industry and trade in Germany maintain directly a population of about 34¾ millions, or more than half the entire population of the German Empire.

Chief among the causes which have helped to place Germany into the front rank of industrial nations is its possession of valuable mineral wealth and of capital to develop them. It has the largest known reserves of coal of all European countries. Upon that foundation, its iron and steel industries have been built rapidly and efficiently. It has copper, lead, zinc and other minerals in fair quantity and great wealth in its salt mines. It has practically a monopoly of potash, and supplies the world with that product.

The industrial hub of the country is the district which stretches from Dusseldorf on the Rhine land to Hamm in Westphalia, and covers a large part of those provinces. Speaking of that district, the Cologne Gazette prophesied some time ago that before long the district between Duisburg and Hamm would form "one enormous settlement, a single expanse of houses from 45 to 50 miles long and from 15 to 20 miles broad."

While Germany is still lagging behind in shipbuilding—the Clyde yards alone turning out a larger tonnage than all the German yards together—good progress is being made nevertheless. That is in some measure due to the naval policy of Emperor William, which would have been well if confined to peaceful work, but directed partly to the building of a gigantic navy, it likely will prove disastrous in the comparatively near future.

Year by year, Germany has become more independent of other countries in industrial products. Comparing the statistics of 1897 with those of 1911, the value of Germany's imports increased in that period by 49 per cent. and that of the exports by 129 per cent., while the increase of population was 23 per cent. Although the country is still largely agricultural, it is no longer able to feed its population. About one-half of the agricultural land is divided into relatively small holdings, while one-quarter is held by large proprietors.

The railways have been State-owned for a generation. Four years ago the country had about 18 miles of railway to every hundred square miles of surface, a ratio exceeded in Europe only by Belgium, Holland, the United Kingdom and Switzerland, in the order named. In his striking picture of the growth of industrial Germany, Mr. W. H. Dawson, in a notable volume on the subject, states that the railway system of that country and the development of its natural and artificial waterways have helped to build up industry and commerce and economic efficiency each to an equal degree.

Another powerful factor in the industrial life of Germany has been the concentration of capital. For instance, ten industrial concerns and nine financial institutions have aggregate capital of $638,750,000, an average of over $33,000,000. Nearly all these large undertakings, including the Krupp gun and shipbuilding firm, with capital of $45,000,000, and the Deutsche and Dresdner Banks, each with $50,000,000 capital, have grown to their present size as a rule by amalgamation with rival enterprises. The firm of Krupp, in which Emperor William has a substantial financial interest, employs 70,000 persons. Now industrial Germany and its 35,000,000 workers, with the other half of that Empire's population, is thrown into war by Germany's military madmen.

UNITED STATES AND LOANS TO CANADA

President's Attitude on War Loans—Only Government Issues Meant—Statements of Secretary of State Bryan, and Morgans of New York, to *The Monetary Times.*

The Monetary Times this week asked Mr. William Jennings Bryan, secretary of state of the United States, whether the attitude of President Wilson and that of Mr. Bryan in opposing the flotation of loans by the United States for belligerent powers, includes Canada. Mr. Bryan has informed *The Monetary Times* "that the announcement made by the president disapproving the loaning of money by American bankers to belligerent governments would seem to include the colonies of such governments as well as the governments themselves."

This means that United States bankers will be unable to advance funds to the Canadian government or to any of the provincial governments, should that course have been thought necessary or desirable, without incurring the displeasure of President Wilson and his administration. Canada will have to raise in the near future several millions of dollars for war purposes, but the Dominion government will do that by issuing Dominion notes against gold in the treasury. Mr. Bryan's explanation of the president's attitude, we take it, does not embrace the financing of municipal and corporation loans for peaceful enterprises. Canada anticipates raising many more loans of that kind in the United States.

Will the United States become the world's leading banker during war time, or will the extremely cautious administrative policy at Washington prevent this? Financial authorities in Europe and America agree that the engagement of so many European countries in war will give an unique opportunity to United States bankers and financial houses. On the other hand, the desire of President Wilson is that his country shall not be drawn into the international dispute in any way. He sees apparently possible complications by the proposed financing of belligerent powers by United States bankers. The three lending countries of any great consequence are Great Britain, France, and the United States. Two are eliminated as lenders by the present situation. There are minor lending powers in Europe, but they also are in the war zone.

Is a Practical Issue.

The question has come to a practical issue in connection with the proposed war loan by the United States to France. Last week it was stated that the French government and Messrs. J. P. Morgan & Company, of New York, were engaged in preliminary negotiations regarding a loan. At the same time an unofficial expression of opinion was announced that President Wilson and Secretary Bryan were opposed to the floating of any loans in the United States for the benefit of any of the belligerent powers in Europe. *The Monetary Times* inquired of Messrs. J. P. Morgan & Company in New York as to this attitude. They replied, "We have no information that the president is opposed to the floating of loans for belligerent powers. At least neither he nor the secretary of state have given us any such intimation. As to ourselves, we have not declared any such attitude."

A few hours after the receipt of this message the following announcement was made at Washington by Mr. Bryan, secretary of state:—"Inquiry having been made as to the attitude of this government in case American bankers were asked to make loans to foreign governments during the war in Europe, the following announcement is made: There is no reason why loans should not be made to the governments of neutral nations, but in the judgment of this government loans by American bankers to any foreign nation which is at war are inconsistent with the true spirit of neutrality."

Another communication was addressed by *The Monetary Times* to Messrs. J. P. Morgan & Company of New York. They replied, "In view of the attitude of the president, we are unable to answer your previous inquiry, as we have no further information than the statement issued at Washington."

This message tends to confirm the Washington despatch that Mr. Bryan's announcement noted above was based on an inquiry made to the United States government by the Swiss government. Dr. Charles Paul Hubscher, secretary of the Swiss legation, called at the state department and asked Secretary Bryan what the attitude of the United States government would be if the government of Switzerland sought to negotiate a loan in the United States. Mr. Bryan's reply is outlined in his announcement above.

Money as War Instrument.

President Wilson is apparently in agreement with Mr. Oscar S. Straus, former secretary of commerce and labor in the United States. In a speech in 1908, Mr. Straus said:—"Everyone knows that the money advanced to belligerents signifies the giving to them of means for securing war instruments. Large Japanese loans were negotiated and obtained publicly in the United States and Great Britain, and Russian loans were advertised and obtained in France and in Germany during the Russo-Japanese war. Money is the most effective war instrument. It is simply sophistication to hold that a neutral cannot loan money to a belligerent without performing an unneutral act, and yet permit the subjects of a neutral nation to do this. The international authorities are practically agreed upon such a discrimination."

Statement of Morgans.

On Monday Messrs. J. P. Morgan & Company issued the following statement:—"We have not been asked by the French government to make a loan, but we have been approached by private interests to know whether we would entertain negotiating a loan for the French government, in case the government should desire such loan.

"It was stated to us that if the loan should be made, it would be for the purpose of creating a credit in the United States, the proceeds of which would be used to buy American products for the French people, and that no part of the credit would be used for gold export.

"Immediately upon receipt of this inquiry we communicated the fact to the State Department, saying, that we were not at all clear that, if asked, we should desire to negotiate the loan; but that, in any event, we would not give the matter consideration without first acquainting the department with the facts, and ascertaining their attitude in regard to foreign loans at this time.

Legal Rights to Loan.

"We advised them that irrespective of any legal right to loan to belligerents we should not care to consider the subject if the administration should have the slightest doubt in the matter. We have not as yet been advised of the attitude of the department and can quite understand that possibly they may desire to refrain from expressing any opinion.

"If they should not express an opinion, we shall be governed entirely by the interests of the general situation as we see them, should an application be made for the loan, which is not yet the case."

Since this statement was issued, the attitude of the department has been expressed.

On the same day, Dr. Paul Ritter, the Swiss minister, again made representations to the State Department at Washington in behalf of his government for a loan of gold from the United States. Switzerland, in a state of siege with practically her entire male population under arms, is facing a serious question in regard to feeding her army.

The imputation that his country might implicate the United States in a violation of neutrality by using the acquired money as a loan to belligerent nations was declared incorrect by Minister Ritter. He said that aside from the question of national honor, Switzerland's domestic financial stringency was such that she must have fluid currency to restore normal conditions at home.

Finally, as stated above, Canada comes within President Wilson's ban, so far at least, as loans to our federal and provincial governments are concerned.

◆

CANCELLING CALLS ON LOANS.

Negotiations are under way having for their objective the cancellation of future calls on oversea and Indian loans, issued on a substantial scale, for the outbreak of war, says a Canadian Associated Press cable. It is suggested that scripholders should receive an amount of stock proportional to the sum already paid up.

This would definitely dispose of a heavy liability that might seriously retard the resumption of stock exchange business on normal lines. Some of the colonial borrowers would be inconvenienced, but it is pointed out that, apart from the standpoint of Imperial patriotism, it would be in their own interests to avoid any spoiling of their own market by wholesale selling to avoid calls.

Pending any such arrangements, people who delay payment of their calls will be liable to pay 6 per cent. interest under moratorium.

◆

WESTERN TRUST COMPANY.

Net profits of $114,056 were made by the Western Trust Company during the year ended June 30th, 1914. There was a balance of $7,177 brought forward from the previous year, which gave a sum of $121,233 for distribution. Dividends absorbed $70,350, the disbursement being at the rate of 7 per cent. per annum. The reserve account was strengthened by the substantial sum of $50,000, making the reserve fund $200,000. This left a balance of $883 to be carried forward.

An analysis of the company's financial statement shows it to be in a strong position. While the balance carried forward this year is much less than previously, the reserve fund has been increased considerably and is equal to about one-fifth of the paid-up capital. The company has always followed a conservative policy and there is evidence that this is to be carried on. The subscribed capital is $1,005,000, all of which is paid up.

At the eighth annual meeting of shareholders, held in Winnipeg last week, the financial statement presented showed trust guaranteed and agency funds of $1,221,460. The assets of estates and agencies under administration by the company total $5,532,166. The company's capital account is made up of the following items:—Real estate mortgages, $1,148,288.47; stocks and bonds, $79,102.99; office furniture, $2,558.51; other assets, $17,466.89; cash in banks, $2,560.59; total, $1,249,977.45.

The trust guaranteed and agency funds are as follows:—Real estate mortgages, $1,098,536.58; cash in banks, $122,924.33; total, $1,221,460.91.

GERMAN INVESTMENTS IN CANADA.

The only authoritative information regarding German investments in Canada, at present compiled, appears in "Capital Investments in Canada," published by *The Monetary Times.* This information in part, has appeared recently in an article on the subject in an issue of the Manitoba Free Press, in an article by Robson Black in the Toronto Star Weekly of August 15th, and in an editorial of the Montreal Journal of Commerce, on August 14th. Mention of the source of information was omitted, inadvertently, in each case.

SOME CANADIAN INDUSTRIES BENEFIT

Effect of War on Rubber, Leather, and Textile Plants in Canada

Monetary Times Office,
Montreal, August 19th.

Events of recent weeks are beginning to have their effect upon prices, including those of foodstuffs, garments and many other lines of manufactures. The price of crude rubber has doubled. Because of this advance, it was assumed that all rubber goods including rubber footwear, would advance sharply. Mr. T. H. Reider, vice-president of the Canadian Consolidated Rubber Company, was asked as to this. His reply was that it would not, in the immediate future at any rate. The company was in business, he said, to make as much money as it legitimately could, but it was not, generally speaking, in sympathy with a trading policy by which advantage of an international calamity would be taken in order to line the company's pockets. It would be a hardship on many people if the price of rubbers were advanced to the extent that the cost of the crude might warrant. The public might rest assured that the company would not try to lessen the buying power of the Canadian dollar.

In the Leather Trade.

The war has also brought about an exceptional condition in the leather trade here. Hides are affected in price, and predictions from the United States are that leather will advance to compel advances in the price of boots. Advances already have taken place in a number of lines.

Mr. D. Lorne McGibbon, president and managing director of the Ames-Holden-McCready Company, said the company will not advance its prices until compelled. Such advances are under consideration and everything points to higher prices in the near future.

Mr. McGibbon also stated that while trade was in anything but an enviable condition at the moment, the company was in receipt of government orders for about 40,000 pairs of military boots, the cost of which will be $100,000. These orders were highly valued at present, not so much because of the profit in them as because they enabled the company to maintain its organization and thus keep itself in a position to execute orders of this or any other character which may be placed with it. He would not offer any opinion as to whether the negotiations between the company and the British war office representatives regarding the manufacture of boots for the British army, would result favorably or not.

Textiles and Cottons.

The textile industry, it is believed, is receiving stimulus from orders being placed by the government for army purposes. The Paton Manufacturing Company, of Sherbrooke, has closed a large order for goods, which it will not be able to complete before September 30th. This will be a welcome order under present conditions.

The Smart-Woods Company, which with many other manufacturing concerns, has felt the effect of hard times, has received orders for a large quantity of duck or twill goods such as tents, kit-bags, etc., for the government. In addition, the company is working actively on cotton bags, supplies of jute having been interfered with. The activity in the flour market, including the present of one million bags of flour to the British by the Canadian government, will be of assistance.

Whatever the cause for the stimulus in the cotton manufacturing trade, the statement is made that the Dominion Textile Company is now operating at 90 per cent. of capacity, as compared with about 75 per cent. a couple of weeks ago. Towards June 30th it was operating at only about 50 per cent. One of the Cornwall mills is busy on khaki cloth

Many other lines, such as canned meats and vegetables, foodstuffs and agricultural products generally probably will advance in price.

◆

There has been expended to date on the purchase and construction of the Panama Canal, $360,173,375.33. These expenditures have been classified to May 1 as follows:—Administration, $7,044,684; law, $60,169; sanitation, $17,208,152; construction, $206,117,831; general items, $90,167,566; fortifications, $6,200,505.

MORE ABOUT MORATORIA

Canada Has Passed Necessary Legislation—Text of English Declaration

Legislation was enacted in the present session of the Dominion parliament authorizing the government to declare a moratorium at any time while a state of war prevails. No such measure has been necessary yet, but it is thought well to have legislation in case of necessity.

"Absolutely no necessity exists for a moratorium in Canada at the present time," said a leading banker when interviewed this week. "We do not think that it will be necessary in the future. But these are troubled times in which predictions as to the course of events, political or financial, are idle, and the government is acting wisely in fortifying the position with every protective measure possible."

The clause of the Canadian bill referring to the moratorium authorizes the governor-in-council, in so far as the same may be within the legislative authority of the parliament of Canada, to proclaim the postponement of the payment of all or any debts, liabilities and obligations, however arising, to such extent, for such time and upon and subject to such terms, conditions, limitations and provisions as may be specified in the proclamation.

A cable from Hon. George H. Perley, acting Canadian High Commissioner in London, to Premier Borden, states in reply to the latter's request for information as to the effect of the British moratorium, that no debt due from outside the British Isles is postponed unless incurred in Great Britain by any person or company having a business establishment or branch business in the British Isles. This applies also to dividends or interest payable in respect of trustee stocks and to bank liabilities and government payments.

Text of English Declaration.

The following is the text of the moratorium declared by the English government on August 1st. The payment of all bills of exchange accepted prior to August 4 is extended one month at a rate of interest equal to the Bank of England rate current on the date of the original maturity of the bill:

"If on the presentation for payment of a bill of exchange, other than a cheque or bill on demand, which has been accepted before the beginning of the fourth day of August, nineteen hundred and fourteen, the acceptor reaccepts the bill by a declaration on the face of the bill in the form set out hereunder, that bill shall, for all purposes, including the liability of any drawer or endorser or any other party thereto, be deemed to be due and payable on a date one calendar month after the date of its original maturity, instead of on the date of its original maturity, and to be a bill for the original amount thereof increased by the amount of interest thereon calculated from the date of re-acceptance to the new date of payment at the Bank of England rate current on the date of the re-acceptance of the bill."

Form of Re-acceptance.

Re-accepted under proclamation for £ (insert increased sum).

Signature ....

Date ....

In England and France.

The most important moratorium declaration naturally is that of Great Britain. This will operate during the current month, but the suspension concerns only long bills. The banks are honoring cheques drawn on them, and depositors are not embarrassed by lack of cash. Cable transfers which are sold in New York on London are promptly met. The only difficulty is a scarcity of credits in that centre.

In France the prevailing moratorium affects cheques as well as long bills. The large credit banks in Paris have made the most of the privilege to suspend payments and are [illegible] to pay out cash to their depositors. Local bankers with credits in these banks are unable to sell cable transfers against them, and the only way they see out of their predicament is the establishment of new credits on the distinct understanding that they will be available. Trust companies [illegible] with branches in Paris are offering cables [illegible], which are prepared to meet them in cash. Difficulty is experienced in their sale, because the credits are tied up the moment they are transferred to the French banks which carry the account of the buyers of the cables.

CANADA'S TRADE TO JUNE

Exports During Twelve Months' Period Have Increased Greatly

The preliminary statement of the trade of Canada for June shows a decrease in the total imports from $46,000,000 as compared with $59,000,000 in June, 1913. The duty collections, consequently have dropped, the decline being about $2,000,000. Total exports show a decline from $35,000,000 to $31,000,000. The total trade for the month was $77,000,000 compared with $93,000,000 in June, 1913. Of that sum, merchandise accounts for $76,362,000 and coin and bullion for $877,000. The effects of war will not be reflected fully in the trade statistics until the August figures are published. Imports of coin and bullion should then prove an interesting item.

During the next few months, there will probably be heavy exports in certain lines, if the Atlantic shipping routes are in normal condition. The trade for the first three months of the current fiscal year to June 30th, shows a decline compared with the corresponding quarter of 1913 of about $40,000,000. The decrease in duty was $7,000,000. On the other hand, total exports have dropped only $5,000,000 as compared with the three months of last year. Total trade shows a decline for the period of $45,000,000, made up chiefly of imports.

Twelve Months' Figures.

Canada's trade for the 12 months ended June 30th, is shown in the following table:—

Imports for consumption.	Twelve months ended June 1912.	1913.	1914.
Dutiable goods ...	$363,370,524	$ 450,746,603	$ 379,827,670
Free goods	193,804,095	233,221,911	199,312,779
Total imports (merchandise)	$557,174,619	$ 683,978,514	$ 579,140,449
Coin and bullion .	21,906,486	6,021,821	14,642,803
Total imports ..	$579,081,105	$ 690,000,335	$ 593,783,252
Duty collected . ..	$ 94,841,332	$ 117,274,150	$ 100,182,715
Exports.			
Canadian Produce—			
The mine	$ 44,012,900	$ 57,857,228	$ 58,059,877
The fisheries	17,080,449	17,233,575	20,172,843
The forest	41,743,304	43,518,571	43,241,666
Animal produce . .	47,110,762	45,156,126	55,569,932
Agricultural produce	124,341,756	153,299,145	184,864,711
Manufactures	37,475,637	45,826,663	61,720,376
Miscellaneous	101,417	116,792	197,664
Total Canadian produce	$311,866,225	$ 363,008,100	$ 423,827,069
Foreign produce ..	17,359,443	21,762,174	25,707,387
Total exports (merchandise)	$329,225,668	$ 384,770,274	$ 449,534,456
Coin and bullion .	9,725,350	14,801,991	24,227,640
Total exports ..	$338,951,018	$ 399,572,265	$ 473,762,096
Aggregate trade.			
Merchandise . . .	$886,400,287	$1,068,748,788	$1,028,674,905
Coin and bullion .	31,631,836	20,823,812	38,870,443
Total trade	$918,032,123	$1,089,572,600	$1,067,545,348

Still a Billion Dollar Trade.

Compared with the corresponding 12 months of 1913, there is a decline of $96,000,000 in the total imports, although they are $14,000,000 greater than in 1912. The duty collected for the 12 months ended June was $100,000,000, compared with $117,000,000 in 1913 and $94,000,000 in 1912.

The exports have increased considerably. For the year ended June, 1914, they totalled $473,000,000 compared with $399,000,000 in the previous year. Agricultural produce contributes the largest share, and manufactured products the second largest. The total trade for the year was $1,067,000,000 compared with $1,089,000,000 in 1913 and $918,000,000 in 1912.

FIFTY MILLION DOLLAR WAR LOAN

Authority Granted at Ottawa to Raise It—Other Measures Passed

The first war session of the Canadian parliament in a hundred years was summoned at Ottawa on Tuesday. The speech from the throne was short and businesslike, referring to measures proposed and to the loyalty of and affairs in the British Empire.

Notice was given by Premier Borden of the resolution providing for an appropriation of $50,000,000 to be devoted to the defence and security of Canada, to the conduct of military or naval operations in or beyond Canada, for promoting the continuance of trade, industry and business communications, whether by means of insurance or indemnity against war risk or otherwise, and for the carrying out of any measures deemed necessary or advisable by the governor-in-council in consequence of the existence of a state of war.

May Raise Loan.

The government be empowered to raise by way of loan such sums of money as are required under the appropriations. It is thought that the government does not intend for the present to increase the revenue either by way of tariff adjustment or by way of imposing any war tax.

An order in council dealing with the action taken by the Dominion government on August 3 to insure the stability of banking credit was tabled in the Commons by the Prime Minister.

With the view to enabling the banks to maintain the volume of credit available to their customers and supply them with additional resources, the government, on the recommendation of the minister of finance, empowered the latter to advance to such banks as may be designated by him from the federal treasury such sums as he may deem reasonable and proper, to be used by the specified banks in the usual course of their business.

Advances to Banks.

Such advances to the banks were authorized upon such high-class securities as the minister of finance may approve, the rate of interest to be charged being not less than 5 per cent. per annum, repayment to be made to the government within a period not extending beyond May 1, 1915. For the purpose of holding in trust for the government the securities lodged by the banks the minister of finance was authorized to engage the Royal Trust Company.

Issue of Dominion Notes.

The order in council further provided that in view of the inadvisability of attempting at the present juncture to make an issue of Dominion securities in the London market the proposed advances to the banks be made by an issue of such amount of Dominion notes as may be necessary, such notes to be issued against the deposit by the banks of high-class securities approved by the minister of finance. This is a technical departure from the terms of the Dominion notes act, and a bill of indemnity conforming and sanctioning the steps taken was introduced in Parliament on Wednesday.

The finance minister's bill will also authorize the chartered banks to make payment in the bank notes issued by such banks instead of in gold or Dominion notes, the total amount of the notes of any chartered bank circulation at any time not, however, to exceed the amount of its notes issuable under the provisions of the bank act, including an emergency note issue exceeding 15 per cent. of the combined unimpaired capital and rest or reserve fund of the respective banks. A further important provision will suspend the redemption in gold of Dominion notes.

A moratorium was also authorized and is noted in this issue of *The Monetary Times* under the heading "More About Moratoria."

Money Already Spent.

Copies of an order in council passed since the outbreak of the war, and tabled in the Commons on Tuesday afternoon, show that the government paid $1,050,000 for the two submarines purchased from Chile; that an order was placed with the Ross Rifle Company for 30,000 rifles and bayonets at $33.25 for each rifle complete, aggregating approximately $1,000,000; and that a third war expenditure was an order to the Canada Tool and Specialty Company, Limited, of New Glasgow, for the conversion of 10,000 long Ross rifles and sights to correspond with the present Mark III. rifle, at $3.50 per rifle. This work is to be completed by April 1, 1915. The total expenditures on these three items is about $2,100,000.

CANADIAN NORTHERN FINANCING.

Sir William Mackenzie, president of the Canadian Northern Railway, has returned from London. He had succeeded in underwriting £3,000,000. Of this amount the public had subscribed for 21 per cent., a good proportion in stringent conditions. The remainder was safe with the underwriters until the declaration of war. "Now it is impossible to say what will become of the flotation," says Sir William. "The British moratorium which is now in force exempts both the underwriters and the subscribers from payment for a period extending at least until September 4th."

Much Canadian Northern Railway construction work consequently will be postponed.

WAR AND BUSINESS.

Whatever line of business you are in, the great European war affects you. *The Monetary Times*, as Canada's oldest and most reliable financial and business journal, is giving from week to week the best story of the war as it affects finance and business. In this issue, the following articles will be found on the pages noted:—

The Monetary Times was the only paper on the continent of America to receive a special statement from the United States government regarding its attitude on war loans so far as Canada is concerned. It is printed on page 8.

"The following is a list of approved ports in the British Isles: Dundee, Aberdeen, West Hartlepool, Hull, London, Folkestone, Falmouth, Bristol, Holyhead, Liverpool, Greenock; all other ports are prohibited ports; aliens, subjects or citizens of friendly powers can land or embark at the approved ports with the permission of the alien officer at the port; they can land or embark at the prohibited ports only with permission of the Secretary of State in London. Aliens, subjects of enemy powers, cannot land or embark at the prohibited ports; they can land or embark at the approved ports only with the permission of the Secretary of State. Permission to land by the Secretary of State in any case is to be obtained on arrival; aliens desiring permission from the Secretary to embark should be furnished with the proper papers of identity. The Secretary of State desires to restrict landing and embarking of all aliens to the approved ports as much as possible. Any port may, of course, be closed altogether to traffic if the naval authorities consider it necessary."

COMPANIES LICENSED.

The following companies have been licensed to do business in British Columbia:—

F. N. Burt Company, Limited, of Toronto. Wrought Iron Range Company of Canada, Limited, of Toronto. Hamilton Carhartt Manufacturer, Limited, of Toronto. Canadian General Fire Extinguisher Company, Limited, of Toronto. The Howell Creek Syndicate, Limited, of London, England.

The following companies have been licensed to do business in Ontario:—

Canadian General Fire Extinguisher Company, Limited (Dominion charter), capital, $100,000. Fashion Craft Manufacturers, Limited (Dominion charter), capital, $50,000. Canada Furniture Manufacturers, Limited (Dominion charter), $3,000,000.

◆

WILL ISSUE MORE DOMINION NOTES

An Ottawa dispatch says:—The minister of finance has given notice of an important resolution authorizing an increased issue of Dominion notes on the gold security now held in the treasury. This will enable the government to a considerable extent to finance the $50,000,000 appropriation for war purposes. The resolution provides that Dominion notes may be issued up to $50,000,000, with only 25 per cent. of this amount held in gold in the treasury. At present the act provides that a total issue of $30,000,000 only shall be made, against a treasury holding of 25 per cent. of this amount in gold. Above an issue of $50,000,000 of Dominion notes the amount held in gold must, under the amending bill, be equal to all such excess.

If parliament passes the bill the Dominion will be able to issue $20,000,000 in Dominion notes by placing $5,000,000 in gold in the treasury, and this will mean an extension of the government's credit by $15,000,000.

◆

JULY'S COBALT ORE SHIPMENTS.

The following are the shipments of ore from Cobalt during July:—

Mine.	Tons.
Beaver Consolidated Mine	32.2
Chambers Ferland Mine	30.0
City of Cobalt Mine	42.8
Cobalt Lake Mine	123.6
Cobalt Townsite Mine	210.0
Coniagas Mine	64.4
Crown Reserve Mine	41.4
Dominion Reduction Company	130.6
Hudson Bay Mine	119.3
La Rose Mine	131.4
McKinley-Darragh-Savage Mine	168.3
Nipissing Mining Company	130.2
O'Brien Mine	62.2
Penn-Canadian Mine	24.0
Peterson Lake Silver Company Mine	64.7
Temiskaming Mine	95.6
Trethewey Silver Company Mine	61.8
Total	1,533.4
Cold Ore—from Cobalt (originally ex Swastika)	
Tough Oakes Gold Mine	51.2
New Liskeard—	
Casey Cobalt Mine	88.6
Elk Lake—	
Miller Lake O'Brien Mine	27.7
Porquis Junction—	
Alexo Mine	653.7

◆

London Metal Exchange will be re-opened, but only for one hour in the morning each day, and then only for private business and adjustments. There will be no official resumption now.

The Canadian Northern Railway has signed an agreement with the Grand Trunk by which the Canadian Northern secures the right to use the Grand Trunk tracks into Ottawa, with the use of the Central Station as its terminus there.

HOW CANADA WILL RAISE FUNDS.

Upon coffee, sugar, spirits and tobacco will be placed an extra tax to meet partially Canada's special war expenditure. This was announced by Hon. W. T. White in the House at Ottawa yesterday. These taxes will raise, it is estimated, $7,000,000. There will be also $15,000,000 available from the increased issue of Dominion notes against a lessened gold reserve. Other minor tariff changes were announced.

◆

CHANCE FOR MORE TRADE.

With a view to stimulating and encouraging trade with the Dominions overseas, the war risks insurance committee have decided to fix the rate of cargo insurances, more especially those relating to food imports, at three guineas per cent. The alteration will take place from August 18, says a Canadian Associated Press cable.

The British Empire Industrial League appeals to overseas and home traders to make the most of the golden opportunity that is now afforded them of capturing for the Empire the millions hitherto snared by Germany and Austria-Hungary. The total value of German-Austrian exports are given as well over £530,000,000 sterling per year, the bulk of which is done with overseas countries. "This enormous trade," says the writer, "will now cease until peace is declared, and no better opportunity could be given to the British trader to seize it permanently. Our trade routes are free and safe, our manufacturers are not overburdened with orders; markets of the world are clear of our most unscrupulous competitors, whose vast commercial connection may now be easily secured by us."

◆

INDUSTRIES AND FARMERS FOR EDMONTON.

Good work has been accomplished by the industrial commissioner's department at Edmonton. The report of the capable and aggressive industrial commissioner, Mr. G. M. Hall, has been presented. It covers the seven months of the current year to August 1st. Industrially, the services of this department have been given principally to the establishment of a wallboard and building paper factory, a sweater factory, a factory for making automobile tires, rubber belting and garden hose, a factory for making flower pots and other pottery of like kind. Arrangements for starting all of these factories in Edmonton are being made as fast as possible and all should be producing goods within six months from date. These plants will cost $450,000 and will employ 200 hands at the start.

Several other industrial plants are prospective and reasonably certain, among them a plant for making high-class brick, building tile, drain tile, etc., and an artificial ice plant. Still another will make crockery, wall and floor tiles, etc. Satisfactory tests of clay have been made by the industrial department to determine values, and other tests in confirmation of crockery clay quality are now under way. This last line is to be made and handled by a British firm who will certainly make Edmonton the location of a chain of warehouses and factories that will cover Canada. This matter has been decided, but request has been made to keep the name of the firm from publication for a while.

The agricultural department of the department's work has been particularly successful. They have the names and addresses of 404 farmers who have called at their office since March 11th. All of these men were looking for farms. Many of these farmers have located fairly close to Edmonton. Others have gone to the Peace River district. Mr Hall's department has sent 58 into the St Paul de Metis district and it is known that all but two have located there.

The skill and labor of Mr Hall and his department is unusually effective, because it is recognized that there must be agricultural workers to make the factory remunerative. Edmonton is one of the few cities doing valuable combination work of this kind.

◆

Superintendent W. H. Biggert, of the International Harvester Company's Canadian works says dissolution order, of the United States government, will not affect the Dominion company, as it is under Canadian charter and entirely independent.

War, Finance and Commerce

Record Grain Loading

Four hundred and seventy thousand bushels of grain were loaded in one-half day last week at Montreal, a new record.

Bank of England Gold

The Bank of England completed arrangements for issuance of drafts against gold lodged for its benefit in Canada and South Africa.

Bank Uses Moratorium

The Civil Service Bank, a small institution in London, taking advantage of the moratorium, has suspended payment of cheques until September 4.

Half a Million for Defence

Mr. J. K. L. Ross, the Montreal financier, is the millionaire who has placed at the disposal of the government a contribution of $500,000 for defence purposes.

Printing Five-Pound Notes

The printing staff of the Bank of England was engaged in twelve-hour shifts in producing a vast quantity of £5 notes. It is forty years since there was such activity.

Welsh Tin Plate Trade

A big revival in the Welsh tin plate trade is commencing. Manufacturers are taking steps to secure all the export business hitherto supplied by Germany's 150 tin plate mills.

English Army Beef Supplies

Chicago packers say they expect orders from the English government for army supplies, but prefer to fill them with Argentine and Australian beef, as this can be had cheaper than United States stock.

Would Sell Ships

The Hamburg-American and the North German Lloyd steamship lines announce their willingness to sell those of their vessels confined in ports as a result of the war. The tonnage is heavy and value large.

Lloyds Bombardment Risks

Lloyds underwriters are said to be doing big business in householders' bombardment risks in England. General rate is 20 cents per $500 per annum, but premises in London can be insured for as little as 12 cents.

Ten Shilling Notes

The ten shilling Bank of England notes have helped the banks to conserve the gold while still supplying the people with legal currency. The printing on the new notes is red, rendering them easily distinguishable from pound notes.

Examine Stock Certificates

British Board of Trade has issued warning to holders of American and Canadian railroad shares to examine certificates and if registered owner is German or Austrian to take immediate steps to have stocks transferred into their own names.

Guarantee Railroad Earnings

The British government has guaranteed the same net earnings of the railroad companies during war time as during an equal preceding period, the government now operating the railways with an executive committee of general managers.

Government and Drug Supplies

The British government announces that certain drugs, the supply of which is limited, and the price of which has been raised in some instances fifty per cent. by the wholesale dealers, will be taken possession of if exorbitant prices are charged.

Dawn Curfew for Argentine

In order to economize in coal, the supply of which has been greatly restricted on account of the war, the train service in Argentina has been greatly decreased, and in the city electric power for lighting is furnished only until 3 o'clock in the morning.

World's Commerce Figures

World's commerce is estimated at $40,000,000,000, United States buying 10 per cent. of all exports of leading nations. Foreign trade of United Kingdom is $6,830,000,000, of Germany $5,059,000,000, France $2,884,000,000, United States $4,277,000,000.

Discounted Twelve Millions

Cable to New York Herald says that in two days of government guarantees, Bank of England has discounted paper amounting to at least £12,000,000. Negotiations for buying and selling of securities for cash are proceeding with greater freedom in London.

Spanish Tariff Suspended

The Spanish Government has suspended the tariff on flour, corn and coal in order to meet the situation arising from the scarcity of those commodities. The tariff on maize and rye has also been reduced. The Spanish Government also will advise the Bank of Spain to assist foreign banks.

Break in Mail Service.

The British Post Office advises that the mail service between the United Kingdom and Germany, German colonies, Austria-Hungary and Luxemburg is entirely suspended; that mails for other European countries can be received for despatch as opportunity offers; but that all services are irregular and uncertain.

German Money Measures

German Reichstag has passed seventy-seven emergency bills, one of which authorizes $1,325,000,000 loan. Another grants up to $400,000,000 loans on stocks and securities in connection with Imperial Bank. Special loan institutions will issue special paper having same status as bank notes. All paper money issued by Imperial Bank is made legal tender.

Finances of Brazil.

As the projected European loan of £200,000,000 to the Brazil government has been abandoned owing to the war, it is understood that Brazil will during the thirty days' moratorium period try to raise an internal loan of £19,000,000, two-thirds of which would be applied to satisfy foreign creditors and the balance to assist the general financial position of Brazil.

London's Investment Surplus

London is estimated to have a surplus of $2,000,000,000 for outside investment. Paris holds second place representing about a quarter of that amount, and is great factor in finances of Russia, Spain and Turkey. Germany requires most of its cash for home enterprises. Holland and Belgium have active bourses. The St. Petersburg Birsha deals only in Russian securities and is smaller than the exchanges in Glasgow, Manchester, or Liverpool.

May Prohibit Pulpwood Exports

Pulpwood producers may ask the provincial governments of Quebec, Ontario and New Brunswick to repeal the laws whereby export of pulpwood cut upon crown lands of these provinces is prohibited. The action will be taken in order to meet the unusual situation which has arisen out of the war. It is argued that the repeal of these laws will permit of much industrial activity taking place in Canada during the coming winter in connection with logging operations in the woods.

Finance in London

The British government's guarantee has caused the discounting at the Bank of England, in enormous amount, of bills accepted prior to August 4. This has led to a great abundance of funds. The government is taking advantage of treasury bills in anticipation of the war loan. The banks are showing great timidity in re-employing liquid funds, but some fresh business is being transacted. The discount rate is 5½ per cent., and the rate for loans 4 per cent.

Paish to Help Treasury

Sir George Paish has resigned as editor of The London Statist to assist the treasury during the period of war. The Chancellor of the Exchequer has appointed Sir George to assist the treasury in dealing with the economic and financial questions arising from the war. Sir George visited Canada last year. In Toronto, he prophesied the investment of £500,000,000 of British capital in Canada during the next fifteen years, a like amount having been invested here already.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Bedford, Que.—August 8—Twelve buildings, including 6 barns, 2 cottages and 1 house. Cause, lightning.

Knowlton, Que.—August 8—Farm house, owned by Hon. Sydney Fisher. Cause, lightning. Loss, $4,000. Insurance, house, $2,000; contents, $400.

Berlin, Ont.—August 14—Driving shed and garage, Scott Street, owned by H. A. Hietrich. Loss, $3,000, partly covered by insurance. Cause unknown.

St. John, N.B.—August 13—The Intercolonial Railway elevator, containing 750,000 bushels of grain; also No. 8 freight shed and train shed and three freight cars. Cause unknown. Loss, $1,000,000.

Langstaff, Ont.—August 12—Six freight cars and trestle bridge near the industrial farm. Cause, cars left rails at bridge, and there being a lot of combustible stuff on board, it is thought that the shock started the blaze.

Toronto, Ont.—August 11—Standard Foundry Company and storehouse of Grenadier Ice Company, foot of Jarvis Street. Cause, spark from foundry cupola igniting a quantity of tar; H. A. Marshall's lumber yard and planing mill, 507 Davenport Road. Cause incendiary. Loss, $12,000.

August 15—Canadian General Electric building, 14 King Street E. Loss, $25,000.

Kingston, Ont.—Fire Chief Armstrong's report for week ended August 11th, shows the following losses:—

August 9—Building, owned and occupied by A. Davis and Sons, Limited, tanners. Cause unknown. Loss, $100,000.

August 11—Dwelling, occupied by Sergt. Adams, owned by Mrs. Setro. Cause, children playing with matches. Loss, contents, $15; building, $10.

Montreal, Que.—August 10—J. H. McComb's tar paper manufacturing plant, 97 Shannon Street. Cause unknown. Damage covered by insurance; building at 23 Bleury Street, occupied by Jaffay Brothers Company, Griffiths, Griffiths and Varley, Auld Mucilage Company, William V. Benedict Company, Bush and Nunns, George Witowski, Montreal Plating Company, W. A. Wood and the Central Cafe. Cause unknown; Madrid Restaurant, owned by Joseph Ramis, 1716 St. Lawrence Boulevard. Cause, match or cigarette.

August 12—Building, West Notre Dame Street, occupied by the Brunswick Balke Collender Company of Canada. Cause unknown.

August 13—Bijou Theatre, 410 Ontario Street E. Loss, $5,000.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Hamilton, Ont.—Fire Chief Ten Eyck's report for June, shows the following losses:—

June 2—Sporting goods store, occupied by J. Nelson, 155 King E., owned by N. Bayless. Cause, overheated stove. Loss, contents, $88; building, $30. Insurance, contents, $5,000; building, $1,000 in Liverpool and London and Globe.

June 5—Dwelling occupied and owned by Harris Schmick, 257 York Street. Cause, gas plate. Loss, building, $23. Insurance, building, $2,750 in London and Lancashire; dwelling, occupied by G. Bargyne, 371 Victoria Avenue N., owned by Mrs. Avery. Cause, defective chimney. Loss, building, $18. Insurance, building, $1,500 in Norwich Union.

June 9—Bowling alley, occupied by F. Cooper, 112 James Street N., owned by H. Holden. Cause, spontaneous combustion. Loss, contents, $176; building, $99. Insurance, contents, $5,000; building, $10,000 in Atlas, Norwich Union, Phœnix, Law Union and Rock, Home, Alliance and Aetna.

June 13—Fence, used by J. Beveridge, 27 Oak Avenue, owned by J. Connors. Cause unknown. Loss, $10. Insurance, $1,000 in Liverpool and London and Globe; dwelling, occupied by J. Dickinson, 133 Kensington Avenue, owned by J. Hill. Cause, defective chimney. Loss, building, $20. Insurance, contents, $800; building, $2,000 in Hamilton Fire.

June 14—Apartment house, occupied by D. Towers, 148 Locke Street N., owned by E. Fauman. Cause, gas explosion. Loss, contents, $25; building, $24. Insurance, building, $2,500 in Alliance Insurance Company.

June 15—Furniture factory, owned and occupied by Alex. Thomson, Merrick and Bay Streets. Cause, spontaneous combustion. Loss, building $54. Loss, contents, $3,000; building, $3,000 in Liverpool and London and Globe, Mercantile and Atas; dwelling, occupied by Miss M. Mear, 223 Victoria Avenue N., owned by A. Blain. Cause, match. Loss, contents, $85; building, $200. Insurance, contents, $500; building, $2,000 in Manchester, Economical and Berlin.

June 16—Office and storeroom, owned and occupied by city corporation. Cause, spark. Loss, building, $10. Insurance, building, $500 in Liverpool and London and Globe.

June 18—Playhouse, occupied by W. Grant, 171 McNab N., owned by J. Fennough. Cause, children and matches. Loss, contents, $4; building, $10. Insurance, contents, $500; building, $1,000 in Royal and Dominion.

June 24—Frame roof over brick kiln, owned and occupied by Geo. Frie, Main Street W. Cause, from brick kiln. Loss, building, $425. Insurance, building, $600 in Phœnix, Union, Norwich Union, National Union, Providence, Washington, Springfield, Acadia.

June 25—Dwelling, occupied by T. Hood, 399 Victoria Avenue N., owned by Toronto Dwelling, Limited. Cause, spark. Loss, building, $75. Insurance, building, $1,000.

New Westminster, B.C.—Building of the Pacific Chocolate Company, Limited. Cause unknown. Loss, stock, $7,700; building, $6,200; plant, $4,300. Insured in following companies:—Hartford, New Zealand, North America, Liverpool and London and Globe, Connecticut, Fidelity Phœnix, Caledonian, Factories Insurance Company.

Florenceville, N.B.—Station and four warehouses, occupied by McCain Prime Company, Porter Manzer, Limited, and B. F. Smith Company, owned by same companies. Cause unknown. Loss, buildings, $8,000. Insurance, McCain Company, contents, $4,000; building, $2,000 in Royal, Westchester, Factories, National Benefit; Porter Manzer, Limited, building, $2,000; Smith Company, building, $1,800.

The following losses were adjusted by the E. A. Lilly Adjustment Agency, Edmonton, Alta.:—

Strome, Alta.—July 23—H. A. Andre's store. Total loss. Insurance, $1,000 in Caledonian.

Fort Saskatchewan, Alta.—July 30—Rev. W. J. Howard's dwelling. Total loss. Insurance, $800 in Winnipeg Fire.

Edmonton, Alta.—July 22—T. O. Carter's store. Loss, $151. Insurance, $2,000 in British North Western.

August 3—Gavin Spence's automobile. Insurance, $600 in Occidental; Mrs. Woods' store. Loss, $240. Insurance, $1,000 in Mercantile; O. J. MacPherson's grocery store. Loss, $500. Insurance, $2,000 in Anglo-American.

August 5—C. H. Webber's dwelling. Total loss. Insurance, $250 in Niagara Insurance Company.

The following losses were adjusted by Paterson and Waugh, 631 Tegler Block, Edmonton, Alta.:—

Bruce, Alta.—July 13—Barn, owned and occupied by W. H. Webb. Loss, building, $194. Cause, lantern igniting ceiling joist or exploding. Insurance, building, $300 in Commercial Union.

Compeer, Alta.—May 8—General country store, owned and occupied by Mason and Wulff. Loss, building, $509; contents, $1,215; fixtures, $73. Cause, supposed kerosene lamp. Insurance, building, $750; contents, $2,250; fixtures, $150 in Royal.

Edgerton, Alta.—May 3—Dwelling, owned and occupied by Thomas Dennett. Loss, building, $431; contents, $374. Cause unknown, supposed to have been caused by boy lighting matches. Insurance, contents, $400; building, $800 in Royal Insurance Company.

Edmonton, Alta.—July 22—Grocery store and ice cream parlor, occupied by Henry Lepointe. Loss, contents, $293; fixtures, $60. Cause unknown, supposed to have been matches. Insurance, contents, $900; fixtures, $200 in Commercial Union; dwelling, owned and occupied by G. ter Horst. Loss, building, $20; contents, $16. Cause, overheated stovepipe which passed through roof. Insurance, building, $250; contents, $750 in Insurance Company of the State of Penn.

CONSOLIDATING DEBTS

Now that loans in London are costing more than in former years and the public are not keen at present to respond to offers, many suggestions are being made to make various securities more attractive. Sir John Forrest, for instance, has proposed to consolidate the debts of the Australian States. He contends that if these debts are consolidated, borrowing will be effected upon easier terms, and the supervision of the Commonwealth Government, which will be responsible, will be of benefit to all concerned. The matter has been considered by the State Premiers, who could not come to any agreement, and referred the proposals to the State Treasurers. The latter are equally unable to agree.

There is considerable division of opinion, not only in Australia, but in financial circles generally. The Australian are "sovereign" States. The real difficulty arises when one of the big Australian States wishes to borrow. It may regard its needs as pressing, and may be able to show good cause, but if it has to compete for the attention of the central authority, there may be delays and inconveniences which will defeat the ends of the purposes of the new movement, and cause much irritation. On the other hand, say some of the critics, the central control may do much to check extravagance, and examination on merits will restrict unnecessary outlay. It seems unlikely that the idea will be adopted. So far as Canada is concerned, the provinces are not inclined for any further control by the federal government. Probably it would be better for Canada and its credit, were there more co-operation in several directions between the provinces and Ottawa.

What would happen if a poor, little new issue prospectus put out its head?

PANAMA CANAL OPENED

The opening to traffic of the Panama Canal on Saturday was a great event in the trade world. A project for the benefit of commerce, it comes into being when shipping is disorganized by war. It follows the opening of the Kiel Canal, which was built largely for war purposes. A peaceful vessel, the Panama Railway steamer Ancon, was the first to pass through the famous Canal from the Atlantic to the Pacific. The battleships of belligerent nations may be among the earliest visitors to the great waterway. Their passage through the Canal is governed by regulations which were formulated in times of peace. They may not remain in the Canal for more than twenty-four hours, unless specially permitted. A war vessel of one nation must not follow the exit, from the Canal, of one of another nation, until after the expiration of twenty-four hours. The Canal has been opened at an inauspicious time. Rival battle-fleets are intent on serious gunnery. Commercial fleets are idle, lame or stealthy. But better times are in store. They may have come when President Wilson, in March, 1915, presides at the international celebration which will mark the official opening of the Canal.

A boat can make in eleven hours a trip through the Canal which otherwise would have taken thirty days. That is something the world's shipping will appreciate in due course. Europe is engaged at present in work of destruction. America, in the meantime, has completed one of the greatest works of construction.

If H. Pollman Evans is in Europe, he will find a Union Life policy will not fizz on the Germans.

BRITISH TRADE IN CANADA

Just as the valuable report of Mr. C. Hamilton Wickes is being published, showing how Great Britain can obtain a large share of Canada's import trade, war has called a halt to much of that trade. The report compiled by Mr. Wickes, the British Trade Commissioner for Canada and Newfoundland, will now serve more than its original, and useful, purpose. The struggle in Europe will probably give the United States a still greater hold of Canadian trade, and the United States is Britain's chief competitor in many lines. The careful advice given to British traders by the commissioner indicates the way to obtain trade, which should have been got long ago, and to win back that which may be lost during the present war period. On the other hand, Germany, which has been making remarkable commercial headway in the Dominion, will be checked severely for some years to come, giving Great Britain some little advantage.

Mr. Wickes, who has had extensive experience in the commercial world, has travelled widely, and has been for many years a close student of trade and its statistics, has compiled a report which cannot be appreciated only by cursory examination. If read with the care it deserves, it will prove of permanent value and practical use to the British trader and manufacturer.

Mr. Wickes thinks that the outlook for an increasing share in Canada's trade in "competitive merchandise" being offered by manufacturers of the United Kingdom appears to be promising. He points out that the Dominion has grown within the last few years from a comparatively small community, mainly able to supply its own needs with a small import and export trade, to the Canada of to-day with a total export and import trade of over $1,000,000,000, railway mileage in operation of 27,145 miles, and a population which insists on the supply of all the necessities and luxuries enjoyed by the most modern and highly civilized states. It cannot be a matter for surprise, therefore, that in many directions facilities for the handling of this immensely increased trade, as well as due provision for the requirements of the population, have not kept up with the demands made upon them. Those acquainted with the existing methods which have been gradually evolved in the older countries for coping with such conditions realize that Canada might profit by taking toll of their experience, where necessary, modifying it to suit her particular necessities; for example, says Mr. Wickes, by:—

(a) The adoption of modern equipment for the rapid and economical handling of merchandise at the ports as well as at the terminals.

(b) The provision of further warehousing facilities, more particularly at the main distributing centres and terminals in the east.

(c) The provision of public markets to a greater extent for the sale of perishable produce in the larger cities and towns.

(d) Greater economy in marketing and distributing arrangements by the manufacturer and producer.

The detailed analysis of Canada's import trade, as given in the report, is the first of its kind, and is the result of considerable labor. To the British manufacturer who really wants to begin business or increase his trade with Canada, the analysis is invaluable. An important point made by Mr. Wickes is that only by the share of "competitive" trade of Canada which is secured should the efforts of the British manufacturer be judged, and only by these figures should the value of the Dominion market to the manufacturers of the United Kingdom be estimated.

◆

If every Canadian will get down to business, business will get down to every Canadian.

GOLD AT OTTAWA AND WHEAT

Bank of England's Arrangement Will Clear Atlantic Ports of Grain

Monetary Times Office,
Montreal, August 19th.

There is discussion here with regard to the effect upon the price of wheat, flour and food products generally, of the action of the Bank of England in establishing a gold reserve at Ottawa.

When war was first declared, the price of wheat received a decided upward impetus. This was fairly constant during the next two weeks, and early last week the price was 25 cents per bushel above the recent low level. Subsequently, the market has shown a disposition to sell off. This, it is claimed, is due to the accumulation of wheat at various ports, it having been impossible, until the arrangements noted above were made, to finance this wheat for export. There was a heavy war risk.

British Government's Action.

Then came a relief attempt by the Imperial government, the announcement being made that it would guarantee all war risks. This did not have the desired effect. There still remained the moratorium. Bankers insisted upon money being advanced and refused to finance the shipments. A few cargoes left Montreal port, but were not financed in the usual manner. Meantime, the elevators were filling to the brim and many ships were delayed in port. These conditions, so grain men declare, were responsible for the decline which occurred in prices. The price of wheat ran down several cents a bushel.

Will Clear Atlantic Ports.

No further difficulty need be anticipated on the score of finance. Millions of dollars in gold are now on their way to Ottawa from New York and other points. The Bank of England has instructed those who have gold for shipment to Europe, for the purpose of meeting obligations maturing there, that it will accept payment at Ottawa. These funds will be available for the purpose of financing the exports. Exporters think that this will clear quickly Atlantic ports of the grain which has been accumulating and that prices will resume their upward swing.

Last week the price of flour advanced 70 cents per barrel and even at that, millers will only sell in limited quantities. The effect has made buyers all the more anxious to obtain supplies.

BANKS IN MEXICO.

The banks of Mexico city which recently closed, probably will re-open soon. The question of a circulating medium is causing some uneasiness in business circles. At present, says a dispatch, four distinct issues of bank notes are being passed in ordinary business transactions.

There is a disposition on the part of the public not to accept the bank notes of the issue of July 25, which are guaranteed by 6 per cent. ten-year gold bonds, or the notes issued by the Huerta regime through state banks then located in territory controlled by the constitutionalist army. The paper of the constitutionalist army is being freely circulated and accepted.

A commission composed of representatives of the clearing house banks have asked General Carranza, chief of the constitutionalists, to define the attitude of his new government as to the present legal tender. It is believed a provisional ruling will be made, thus permitting a resumption of banking operations.

◆

RAILROAD EARNINGS

The following are the railway earnings for the week ended August 14th:—

	1914.	1913.	Decrease.
Canadian Pacific Railway.			
August 14	$2,162,000	$2,630,000	— $468,000
Grand Trunk Railway.			
August 14	$1,068,710	$1,150,198	— $ 81,488
Canadian Northern Railway.			
August 14	$ 319,500	$ 436,900	— $117,400

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 13th:—

Cobalt Townsite Mine, 69,680; Dominion Reduction Company, 84,400; Cobalt Lake Mining Company, 64,120; total, 218,200 pounds, or 109 tons. The total shipments since January 1st, 1914, are now 24,297,133 pounds, or 12,148 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Nipissing Mines Company.—Preliminary estimates place Nipissing's July net at $125,000, which is $25,000 in excess of dividend requirements for the period.

Crown Reserve Mining Company.—Mr. S. W. Cohen, general manager, states that a new vein of high-grade ore has been struck and there is every prospect from the work already done that the silver recovered will be valuable.

Dome Mines.—During July the production showed average grade was $4.19 on the treatment of 19,780 tons. The value of the gold produced was $82,983, and the mill ran 91 per cent. of the total monthly hours. The average grade in June was $4.51, in May it was $3.83, and in April $6.59

Bank of British North America.—The court of directors have resolved to declare, at a meeting of the proprietors to be held on September 7th, a dividend payable in the usual course on October 3rd, of 40s. per share, less income tax, making 8 per cent. for the year; carrying forward about £48,000 to the new account.

British Columbia Breweries.—The sales during June amounted to 9,628 barrels for $98,408, yielding net profits of $36,634 and showing in comparison with the month of June, 1913, decreases of 654 barrels and $4,504 respectively, with an increase in the net profits for the month of $816. For the first six months of the present year the aggregate net profits amount to $152,894, an increase of $1,564.

Granby Consolidated Mining and Smelting Company, Limited.—The directors announced the deferment of their payment of the regular quarterly dividend of $1.50. The company which has large mining properties in British Columbia, had paid 6 per cent. dividend since March, 1913. No reason is given by the directors for the suspension of dividends, but it is assumed that the European crisis is responsible for this action.

Winnipeg Paint and Glass Company, Limited.—In reply to an inquiry of *The Monetary Times*, Mr. R. W. Paterson, managing director of the company writes:—Generally speaking, conditions here are fairly satisfactory and although the war will probably prevent our making money this year, we do not think it will in any way affect our standing. We have very large reserves and do not borrow any money except for the purpose of carrying our customers.

Laurentide Company, Limited.—The directors of the Laurentide Company met in Montreal and passed the report for the year ended June 30th last. The annual meeting is next month. The statement, it is said, will show profits slightly less than in the previous year. The company has started the second month of its new year with much new business and rising prices.

Sir William Van Horne, president of the company, presided at the meeting of the board.

Canada Steamships Lines, Limited.—The directors have decided that in face of the unsettled business conditions produced by the war, the company should maintain itself in a strong financial position, and for such purposes husband its resources in every manner possible. The payment therefore of the quarterly instalment of dividend on the preferred shares of the company which dividend is cumulative, has been deferred until the outlook shall have cleared.

Ontario Steel Products Company, Limited.—Messrs. Molson and Robin, members of Montreal Stock Exchange, offer subject to prior sale, $40,000 Ontario Steel Products Company, Limited, 6 per cent. first mortgage sinking fund gold bonds, being the unsold balance of the company's issue of $600,000. The issue is being made at 95 and interest with a bonus of 25 per cent. in common stock.

An analysis of the company's latest annual report is printed on page 45 of *The Monetary Times* this week.

Laurentide Company, Limited.—A special meeting is being called for the purpose of obtaining the necessary authority to issue 6 per cent. bonds to enable the company to carry out the financial plans decided upon when the last issue of common stock was made.

The issue of bonds will be sufficient to provide for the taking up of the present issue, and also provide money for the additions to the paper plant and power development now under way, and leave a large sum in the treasury for future extensions. These bonds were practically placed, it is stated, but owing to the financial crisis it will now be necessary for the company to hold them over until the financial sky clears.

In the meantime, it is believed that the large profits now being made will enable the company to carry on the work for some time without borrowing to any large extent on the bonds.

The first mortgage as it exists is for $1,200,000, of which $300,101 have been retired. Some time ago it was reported that the new issue contemplated was $2,500,000.

Canadian Express Company.—The company reports to the Interstate Commerce Commission, for April and ten months, compared as follows:—

	1914.	1913.	Inc. or dec.
Total receipts from operation	$ 261,901	$ 276,922	— $ 15,020
Express privileges	113,178	121,473	— 8,294
Total operating revenue	148,722	155,448	— 6,726
Total operating expenses	129,504	130,814	— 1,309
Net operating revenue	19,218	24,634	— 5,416
Taxes	3,000	3,000	......
Operating income	16,218	21,634	— 5,416
Ten months:			
Total receipts from operation	$2,730,24[illegible]	$2,764,504	— $ 34,353
Express privileges	1,253,387	1,268,610	— 15,231
Total operating revenue	1,476,852	1,495,074	19,121
Total operating expenses	1,399,509	1,315,305	+ 84,203
Net operating revenue	77,343	180,668	— 103,324
Taxes	28,700	28,500	+ 200
Operating income	48,643	152,168	— 103,524

Hollinger Gold Mines.—For the period ended July 15 the gross profits of the Hollinger were $132,712, compared with $120,168 for the preceding four weeks, and $123,523 for the period ending April 22. The mills treated 16,343 tons, a record output, and were in operation for 94 per cent. of their possible running time.

The monthly report shows that the value of the ore mined is not falling off. The period to July 15 produced ore with a value of $1[illegible] a ton. The preceding four weeks it ran up to $14.5[illegible], but for the two periods before that it was approximately the same as last month, $13.10 and $13.69.

The installation of additional stamps and other changes resulted in a decrease in the percentage of possible extraction. About [illegible] per cent. of the gold in the period's tonnage was not taken out. This, however, will be extracted later on.

The mine manager states that No. 1 vein has been crosscut at the 675-ft. level. The workings are now at the [illegible]-ft. level. The report states that there is no change in width or values in the vein at the lower level. The ore formation remains the same. Vein No. 41 was crosscut at the [illegible]-ft. level, where it proved to be [illegible] feet wide and carrying good values.

With a larger output the mining cost per ton was reduced. The four weeks' rate was $1.52 per ton compared with $2.57 for the previous period. The surplus after allowing dividends of 15 cents a share for the period now amounts to $[illegible].

NEW INCORPORATIONS

War Has Little Effect on Charter-Getting—Many New Companies

Canada's new companies incorporated this week number 155. The head offices of these companies are located in six provinces. The total capitalization amounts to $79,406,975, the largest companies being:—

National Securities, Limited, Calgary....	$1,000,000
National Copper Company, Limited, Toronto	1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
New Brunswick	5	$ 258,975
Quebec	20	944,000
Ontario	28	3,695,000
Manitoba	4	870,000
Alberta	91	73,179,000
British Columbia	7	460,000
	155	$79,406,975

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Brownsburg, Que.—Brownsburg Furniture, Limited, $49,000. J. E. A. Decelles, P. Lepine, V. Bouchard.

Dorchester, N.B.—Eastern Linen Mills, Limited, $120,000. J. L. MacKinnon, W. M. McDonald, E. Hilton.

Nicolet, Que.—La Compagnie de Construction de Nicolet, Limited, $20,000. H. N. Biron, H. Bourk, N. Jutras.

Salisbury, N.B.—Salisbury Farms, Limited, $24,000. C. S. Bellhouse, W. G. Pin-Coffin, T. Wilson, E. A. Reilly.

Saint Cuthbert, Que.—Compagnie des Vins Canadiens de Saint-Cuthbert, $12,000. H. Lafontaine, R. Lanoie, G. Sylvestre.

Sault Ste. Marie, Ont.—Algoma Dredging Company, Limited, $100,000. B. C. Stuart, B. P. Lawson, G. W. Goodwin.

Kingsville, Ont.—The Ontario Tobacco Growers' Cooperative Association. H. D. Reynolds, A. McTavish Fraser, G. T. Coleman.

Parry Sound, Ont.—Parry Sound Barrel and Manufacturing Company, Limited, $500,000. C. L. Sanford, J. A. Johnson, J. P. McKelvie.

Rawdon, Que.—The Montcalm Electric Light and Manufacturing Company, Limited, $99,000. J. T. R. Gazelle, Jos. Amedee Fournier, E. Rowan.

Morrisburg, Ont.—Caloroxide Corporation, Limited, $50,000. G. F. Johnston, J. W. Allison, L. Laurin. International Fuel Saving Corporation, Limited, $50,000. G. F. Johnston, J. W. Allison, L. Laurin.

Ottawa, Ont.—The Ottawa New Edinburgh Clubhouse Company, Limited, $50,000. W. Johnston, R. M. Courtney, G. L. Snelling. Nuca Oil Company, Limited, $750,000. E. S. Leethem, H. E. Nunn, J. S. Hollinsworth.

Vancouver, B.C.—The Victoria Glass and Bottle Company, Limited, $25,000. Vancouver Theatres, Limited, $50,000. British Columbia Boundary Oil Wells, Limited, $300,000. Vancouver Underwriters, Limited, $10,000.

Walkerville, Ont.—The Robinson Cabinet Manufacturing Company, Limited, $40,000. H. S. Robinson, C. A. Rukamp, J. J. Rukamp. Canadian Coil Company, Limited, $40,000. S. Cuddy, C. McHugh, A. Klingensmith.

Edmonton, Alta.—Alberta Rivers Excursion Company, Limited, $20,000. The Pioneer Fire Clay Company, Limited, $250,000. The Fairview Hotel of Edmonton, Limited. Woodlawn Cemetery Company, Limited, $35,000. Chadwick Turner, Limited, $200,000.

Hamilton, Ont.—Waterdown Stock Farm, Limited, $40,000. J. H. Myers, G. A. Inksetter, J. A. L. Donaldson. The Hamilton Farm Products Company, Limited, $40,000. J. H. Brinker, J. R. Roberts. South American Products, Limited, $40,000. H. S. Lees, O. D. Peat, H. J. Baine.

Winnipeg, Man.—City Dairy Company, Limited, $250,000. A. G. Kemp, F. A. Wilson, C. N. Jamieson. The Interior Elevator Company, Limited, $100,000. N. McL. Paterson, J. S. Blair, G. Saunders. Macdonald's Consolidated, Limited, $500,000. J. C. Macdonald, P. Chapman, G. C. Rae. Western Woodenware, Limited, $20,000. H. F. Tench, J. F. Wallar, L. J. Carey.

Montreal, Que.—Le Magasin des Mutualistes, Limited, $20,000. A. Latour, L. A. Picard, J. A. Barrette. Lafetiere Hotel, Limited, $50,000. L. Lafetiere, O. Blais, L. Lafetiere, Jr. Strathcona Hotel, Limited, $20,000. U. Leclair, E. Marsolais, O. Lafleur. Oriental Hotel, Limited, $20,000. U. Leclair, E. Marsolais, O. Lafleur. Grand Central Hotel, Limited, $20,000. U. Leclair, E. Marsolais, O. Lafleur. Canadian Pacific Railway Exchange Hotel, Limited, $20,000. T. H. Vannalton, A. St. Onge, A. Lachapelle.

Montreal, Que. The Wintering Hills Ranching Company, Limited, $300,000. J. Barr, J. J. Trickey, T. Scott. Garden Homes, Limited, $75,000. J. C. Duhamel, A. Desroches, J. V. Fortier. Franco-American Chemical Company, Limited, $50,000. Hon. G. A. Sinard, A. Mignault, J. L. P. Lacasse. Olympic Club, Limited, $5,000. W. H. Moorhouse, M. S. Euzel, F. J. Laverty. La Compagnie Immobiliere Canadienne, Limited, $49,000. J. A. Gagne, L. A. Ouellette, A. Mullen. Compagnie Generale de Productions Artistiques, Limited, $45,000. U. Belair, M. Gariepy, E. Belair.

Calgary, Alta. The Calgary General Trust Company, Limited, $30,000. E. W. MacLean Company, Limited, $25,000. The Farmers' Meat Markets, Limited, $15,000. Peck, Daly, Golden, Limited, $10,000. Atlantic Holding Company, Limited, $90,000. Star Coal Mines, Limited, $50,000. McKibbon Brothers, Limited, $25,000. King George Stock Exchange, Limited, $50,000. The Great West Ukrainian Publishing Company, Limited, $20,000. The Melbourne Brokerage Company, Limited, $50,000. Clancey Brokerage Company, Limited, $10,000. National Securities, Limited, $1,000,000.

Toronto, Ont.—Allen General Supplies, Limited, $50,000. J. W. Bartlett, A. W. Smythe Roberts, N. R. Gooderham. Eastern Cities House Building Company, Limited, $100,000. F. C. L. Jones, H. K. Harris, W. F. C. Sellers, A. E. Weston. Hammell, Ryan and Harris, Limited, $40,000. J. Aitchison, D. McArthur, J. O. Buckley. Fairgrieve Metal and Stamping Company, Limited, $75,000. F. Watts, D. E. Dean, O. H. King. The Washington Burial Company, Limited, $40,000. J. R. Fleury, B. R. Rapier L. L. Washington. National Copper Company, Limited, $1,000,000. S. H. Allen, S. A. Murray, H. Dreany. Old Country Furniture Stores, Limited, $40,000. E. Islip, R. C. Hatfield, F. B. Edmunds. Armstrong and Paffard, Limited, $100,000. C. F. Ritchie, A. W. Ballantyne, G. H. Gausby. Woodbridge Saddlery Supply Company, Limited, $40,000. L. Sinclair, F. Campbell, F. Brown. The Kress Shirt Company, Limited, $50,000. E. H., Sr., E. W. Smith, R. Wherry. St. Vincent Investments, Limited, $100,000. C. E. H. Medhurst, W. F. Curran Sellers, A. E. Weston. Reid and Brown Structural Steel and Iron Works, Limited, $100,000. M. Macdonald, G. W. Adams, B. Williams. Schillers, Limited, $10,000. H. Schiller, A. Schiller, C. M. Garvey. Bassano Townsites Company, Limited, $100,000. D. R. Leask, F. H. Vanston, I. Rouse. The Toronto Automobile Trade Association, Limited, $10,000. M. A. Kennedy, C. M. Ricketts, A. M. Thompson.

Application is being made for letters patent for the following companies:—

Sackville, N.B.—Excelsior Fur Farm, Limited, $10,000. J. R. Taylor, C. S. Scott, A. D. Carter.

New Glasgow, P.E.I.—The Houston Fur Farms, Limited, $30,000. J. C. Houston, J. B. Coulson, G. Houston.

Freeland, P.E.I.—Economy Fox Farming Company, Limited, $100,000. A. Smith, H. D. Smith, W. J. Smith.

Shediac, N.B.—Shediac Fox and Fur Company, Limited, $65,000. Hon. Charles Dalton, Hon. D. V. Landry, D. J. Doiron.

Victoria West, P.E.I.—The Enmore Dark Patch Fox Company, Limited, $30,000. J. H. Yeo, L. M. Moore, W. A. Smith.

The following is a summary report of the new oil companies chartered in Alberta. There are 71 this week, with authorized capital of $71,185,000. Fourteen of these companies have capital of $1,000,000 each; 2, $1,500,000; 1, $10,000,000; and 1, $40,000,000. The remainder have authorized capital of less than $1,000,000 each.

HISTORY OF TREASURY BILLS

British Government Has Financed With Them—Only Big Borrowers Should Do So

(The British government has called for bids for an issue of $75,000,000 treasury bills. Mr. Edward Hoare, chairman of the court of directors of the Bank of British North America, gives some interesting facts below regarding the history of such bills).

BY EDWARD A. HOARE.

In January and February of the year 1877 it was rumored in the city of London that the government were contemplating the issue of a new form of exchequer bill, and in March of the same year the Chancellor of the Exchequer (the Right Hon. Sir Stafford H. Northcote, Bart.), introduced a bill entitled: "An Act to provide for the preparation, issue and payment of Treasury Bills, and make further provision respecting Exchequer Bills," which being shortly passed through all its stages received the Royal assent in the same month and can now be referred to as 40 Vic., cap. 2.

This act provides for the raising of money by treasury bills in lieu of exchequer bills at the option of the treasury, such treasury bills not to be of longer currency than 12 months, with clauses relating to the disposal of the funds so raised, the cancelling of the bills and for prevention of fraud. This act was followed by a treasury minute dated March 16th, 1877, which provides for the form of the bills and other matters of routine. The first issue was made on March 28th, 1877, and on that occasion and for some time afterwards they attracted but little notice and passed into few hands, the principal holders being the discount houses.

Banks Inclined to Hold Aloof.

At that time the banks were rather inclined to hold aloof. The security was excellent, but the rate, they said, was too fine. Moreover, it did not suit them to have such large maturities on one day and they preferred to have the higher rates and the scattered maturities of good commercial paper. Some of the London banks are still of this opinion and seldom tender for the treasury bills, but others frequently apply for large amounts, and during recent years one foreign bank has on several occasions purchased by tender large amounts of these bills, sometimes even an entire issue, on behalf of the government which it represents.

With the discount houses, this form of security became popular, although to obtain the bills it was always necessary to tender at an extremely fine rate, the principal attraction being that they were accepted at the Bank of England as security for short loans. They were also preferred to the old exchequer bills by others seeking a temporary investment, and competition for them was generally keen.

The Only Big Borrowers.

Nothing speeds the flight of time like the maturity of a bill and to float this form of security in anticipation of providing the necessary funds for payment by the issue of stocks and bonds must always be dangerous. It has been demonstrated that a method of finance which is convenient and inexpensive for the British Government, the Government of India, the Dominion of Canada, and a few of the principal cities of the United Kingdom, may become both costly and dangerous when adopted by others who, excellent as their securities undoubtedly are, have not yet attained to the front rank in international credit.

◆

It is evident that the impoverished apple crop of Great Britain will create a big demand for Canadian fruit during the coming season, reports Canadian trade commissioner Ray from Birmingham. Firms in his district are already inquiring for reliable exporters in order to make arrangements for periodic consignments next winter. Correspondence is invited with shippers anxious to open up or to extend their sales in the midland counties.

GERMANY'S WAR ON CANADA

It Was a Tariff Engagement Lasting Seven Years and Canada Won

In 1903 Germany declared war on Canada. It was a trade war and was characterized by the bitterness and determination which have been revealed in the present international struggle of arms. Canada accepted the challenge and seven years later took the honors of victory. This is the story. When Canada decided to grant a preferential tariff to the United Kingdom and various British possessions, the German government asked the Dominion for similar tariff treatment. This was refused, the preference having been given to Great Britain and its dependencies because of the strong commercial and sentimental relations which exist between the units of the British Empire.

Taking Canada's reply in bad form, Germany announced that imports from Canada would be treated less favorably than those from other countries. Germany then placed Canada in the least favorable tariff position. Canada retaliated by placing upon German imports to the Dominion a surtax of one-third of the duty specified in the general tariff. In other words, Germany had to pay a duty 33⅓ per cent. higher than that paid by any other country shipping goods to Canada.

How Trade Declined.

One would have thought this action would have induced the trade department at Berlin to seek commercial peace, especially as Germany's share of Canada's import trade had risen from $5,872,000 in 1894 to $12,127,000 in 1903, when the trade war was declared. Its effects were striking. The total imports of merchandise from Germany, which in 1903 were $12,000,000, dropped to $8,000,000 in 1904, to $6,642,000 in 1905, and to $6,000,000 in 1909. Germany's exports to Canada were halved in six years, which proves that commercial sulkiness is not remunerative.

In 1910, the German government stated that Canada would be given again favorable tariff treatment. The Canadian surtax on German imports then automatically ceased. This had once more an astonishing effect on German trade. The imports from Germany increased from $6,000,000 in 1909 to $14,473,000 in 1913.

Trade Year by Year.

The details of the Dominion's trade with Germany, set forth below, are interesting:—

Fiscal Years.	Imports—(Merchandise). Total.	Exports—(Merchandise). Total.	Totals, Imports and Exports.
1894	$ 5,872,085	$2,046,052	$ 7,918,137
1895	4,983,369	626,976	5,610,345
1896	6,454,705	757,531	7,212,236
1897	5,785,546	1,045,432	6,830,978
1898	5,763,784	1,837,448	7,601,232
1899	7,381,149	2,219,569	9,602,068
1900	8,706,641	1,715,903	10,422,544
1901	6,677,959	2,141,552	8,820,816
1902	10,919,994	2,692,578	13,612,572
1903	12,127,867	2,097,699	14,225,566
1904	8,028,544	1,819,223	9,847,767
1905	6,642,095	1,146,654	7,788,793
1906	7,040,091	1,872,557	8,912,648
1907 9 months	5,483,207	1,066,605	6,549,812
1908	8,250,745	2,374,607	10,625,352
1909	6,001,446	1,477,550	7,478,006
1910	7,958,264	2,501,191	10,459,455
1911	10,087,199	2,663,017	12,750,216
1912	11,146,746	3,814,914	14,961,660
1913	14,473,923	3,402,304	17,876,227

Relations Completely Severed.

The present war severs completely trade relations with Germany. According to Royal proclamation issued by the Dominion government last week, Canada is not to supply to or obtain from Germany any merchandise whatever, nor is it to contract to do so or to carry goods between the countries. The prohibition is absolute. Canadian German trade statistics thus will suffer further fluctuations of a serious nature.

TRADE WITH THE ORIENT

Market of 500,000,000 People Faces Western Shores of Canada

In concluding his special report on the trade of China and Japan, Mr. Richard Grigg, chief Canadian trade commissioner, hopes that it may be considered as full of promise with regard to the magnitude of the coming trade on the Pacific. It must be remembered that a population of nearly 500,000,000 people in the Orient face the western shores of Canada, and that signs are not wanting of a movement in this vast population which, for weal or woe, will profoundly affect the interests of the nations, Canada among them, perhaps in special degree because of her Pacific seaboard. That democratic influences will increase the purchasing power of both the Chinese and Japanese and will, thereby, create a great market for all kinds of commodities does not appear open to question and is an article of faith among men resident in the East or engaged in eastern commerce. How far or how quickly industrial activity will develop in the western provinces of Canada depends upon problems now in course of solution. That cost of production will increase in the Orient appears to be certain. Whether the labor costs in the Canadian west will render manufacture possible is not so clear. Ultimately it would seem that the west must either submit to the importation of a greatly increased volume of manufactured goods or to a condition which would render competition possible. There is no escape from the law of supply and demand, and growth of wealth and population must of necessity depend in British Columbia, as elsewhere, upon successful competition.

Vested Monopoly in West.

The emergence of Japan, her marvellously rapid transformation from a medieval and feudal into a modern state, equipped with all the material implements of western civilization, has raised, for the first time, the question whether the supremacy of the white races is as indisputable as public writers have hitherto imagined it to be, or in other words, whether the white races can rely upon the continuance of a vested monopoly in the civilization which they have built up during the course of so many laborious centuries. In The Times Japanese edition, 1910, from which the above has been extracted, there appears a letter from Count Okuma, who says in part:—

Japan, during the last half century has been confronted with abrupt changes in almost all her social affairs and she is still undergoing change. In comparing old Japan as it existed to the middle of the nineteenth century and the new Japan of the present day, nobody can help marvelling at the suddenness of this change. The feudal system which had grown up during hundreds of years was abolished in a single day. The benefits of education are now extended to the whole nation; new trades have sprung up out of contact with the new civilization; new enterprises have been developed, and in this domain changes have been almost revolutionary.

Looking to the Future.

What future changes will yet overtake us as we move forward to our national destiny? This is a subject which deserves and engages our deepest attention. That Anglo-Saxon civilization founded on justice and humanity should easily have influenced the life of Japan is something more than a mere chance coincidence. The expansion and development of new Japan has been achieved by absorbing western civilization. Japan has already opened wide her door to trade and commerce, and not only is she welcoming foreigners, but she is ready to welcome also the civilization of Europe and America, and her settled policy is to accomplish her national destiny by assuming a fair and impartial attitude toward her competitors. I am, as yet, only partially satisfied in my own mind with the present state of our progress, and I fully recognize how much is yet to be done and how great is still the need for us to quicken our exertions and direct them in the line of comparative studies. Moreover, as a sequel to early expansion prices have risen, and there are signs that our people may encounter grave difficulties in the cost of living. Sooner or later the nation may have to grapple with the social problems known as the

"labour question," with which Europe and America are already so painfully familiar.

The closing lines of this communication from one of the leading authorities of Japan confirms the expression of opinion found on page 32 of the report, and is interesting from the Canadian point of view because it indicates a limitation of the power of Japanese competition and at the same time suggests a greatly enlarged consumption of Canadian commodities. Just as the growth of population in Canada will provide a market for Japanese commodities not produced in Canada, trade will be built up by eastward cargoes of Canadian products. The same remark applies to China, more particularly in regard to flour and lumber, with the addition of the numberless commodities which follow the establishment of trade exchanges.

The department of trade and commerce at Ottawa has just issued Mr. Grigg's report in a pamphlet of 50 pages. Owing to the absorbing interest of matters in Europe, it has not had the attention it deserves. Mr. Grigg recently made a lengthy trip of investigation to China and Japan and this valuable report is the result.

◆

CURRENCY IN EUROPE

Issue of One Pound and Ten Shilling Notes in England

Considering the magnitude of the crisis in Europe, the currency situation in Great Britain has been handled with exceptional ability. The impression given by the British government, the governors of the Bank of England and of British bankers as a group, was that there existed no reason for financial alarm. Runs upon banks did not occur. Some of the banks paid out fairly large sums, but others received deposits in greater volume than withdrawals.

In view of the difficulty of making ordinary payments with the available currency, there are being issued through the British government one pound and ten shilling notes, put out by the banks, subject to a certain tax proportionate to the total issued. These notes will constitute a first lien on the assets of joint stock banks until redeemed.

As for the increase in the Bank of England's fiduciary issue, under suspension of the bank act, this does not mean suspension of specie payments.

Followed Continent's Example.

In deciding to issue such notes, England has only followed the continental powers in an effort to supply the deficiency of small currency which has been caused by the disappearance of gold. Already, as the Wall Street Journal points out, long before the present war flurry, the governments of Russia, Germany, Italy and Belgium had adopted the system of small notes, and France and Switzerland have been driven to it by the events of the past ten days. In the first-named group of countries, the policy of issuing small notes has been in force for several years. It was a part of the policy discussed at the German Bank Inquiry of 1908 to draw gold out of circulation and store it in the vaults of the Reichsbank.

Russia's Specie Payments.

Russia, when she first resumed specie payments in 1897, endeavored to create a gold circulation like that of England: but after the war with Japan she reversed this policy, and in recent years notes for ten roubles ($5.15) or less have come to constitute nearly half of the note circulation. France and Switzerland, weighted down as they were with legal tender silver, preferred to reserve the power to issue small notes for a war measure, and their prescience in this respect has been vindicated by the events of the last few days.

The immediate occasion of the issue of small notes in England is to meet the demand for currency of small denominations to replace the sovereigns and half sovereigns which are being hoarded or exported. Not since the recovery from the Napoleonic wars have notes been issued in England for less than £5.

After the experience of the past few weeks, some American authorities are suggesting that gold as an actual medium of exchange has seen its last days in England.

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

CANADIAN RAILWAY SITUATION

Analysis of the Financial Aspects—More Expenditure Ahead

The discussion which has taken place in press and Parliament regarding Canadian Northern affairs has given a timely fillip to public interest in two important matters, namely, railway capitalization and railway aid, writes Mr. J. L. Payne, in the journal of the Canadian Bankers' Association. Mr. Payne is statistician of the department of railways and canals, and has frequently contributed to *The Monetary Times.* The urgent need for transportation facilities in Canada, together with the plans growing out of that need, have to some extent excluded the proper consideration of details. The financial aspect seems to have come under that head. The application of Mackenzie and Mann for assistance to the extent of $45,000,000 has, however, caused the Canadian people to take a new view of the railway situation, and they are now disposed to use the interrogation point in a way that may lead to salutary enlightenment.

Dealing in Millions.

For the inertness which has prevailed there is, of course, an explanation. The facts with respect to railway accounts necessarily lead to the digestion of very big figures, and ninety-nine people out of a hundred are lost when they get beyond sums that are expressed in thousands. The difference between eleven millions and ten millions is really a very substantial amount; but it seems to be the natural thing for most men to say "ten or fifteen millions" rather than "ten or eleven millions." When it comes to hundreds of millions, the average mind loses all sense of proportion, and, be it remembered, it is the average mind which creates what we call public opinion. We should not be surprised, therefore, that the money side of our railway problems, as represented by capital liability, assets, aid, earnings, operating expenses, and so on, has been understood by only a few, while more than ninety-nine per cent. of the people at large have been both ignorant of the facts, and, being busy, indisposed to see them.

Capital Liability of Railways.

It would seem to be opportune, in view of what has transpired during the past two or three months in particular, to summarize the rather bulky mass of data relating to the capital liability of Canadian railways, and calmly see what it means. On 30th June last, the capitalization of operative lines stood at $1,369,992,574, divided as follows: Stocks, $729,374,516; bonds, $477,290,834, and consolidated debenture stock, $163,257,224. Strictly speaking, stocks do not constitute a liability. It is the bonds that count, since they are in the nature of mortgages, and carry with them the right to take possession of physical property in the event of default. The consolidated debenture stock in the account attaches wholly to the Canadian Pacific, and is unique in the sense that it is perpetual and provides a lien only for interest. In addition to the funded debt of operating roads, there were $148,063,722 of bonds outstanding in the name of railways officially regarded as being under construction. Among these railways was the Grand Trunk Pacific. The account as a whole has been considerably swollen in the interim. In fact, it has for some time been growing at the rate of about $60,000,000 a year.

Ability to Pay.

Adding together the two foregoing items of funded debt, we have a total of $625,354,556, which, joined to the consolidated debenture stock, creates an aggregate of $788,611,780 upon which interest charges must be met annually. The rate of interest varies from 3.50 to 5 per cent. The average would be about 4.25. At that rate we have a fixed charge of $33,516,000 per annum, which must be met out of net earnings before a penny is available for dividends on stocks. Now, let it be observed that the bond indebtedness of Canadian railways, while large as a whole, is relatively low.

It amounted to precisely an average of $18,209 per mile in 1913 for the railways concerned. The average of American railways last year was a little over $41,000 per mile, and for British lines it ran beyond $200,000. In the last analysis, the standard by which all financial obligations are properly measured is the ability to pay. In 1913 all the railways of

Canada had a difference between gross earnings and operating expenses of $74,691,013, which, it will be seen, was ample for the purposes of meeting fixed charges. As a matter of fact, it provided for the payment of interest on funded debt, as well as consolidated debenture stock, provided for taxes, enabled $27,333,373 to be paid in dividends, and left a snug balance to the good. There is the further significant fact that gross earnings rose from $96,064,526 in 1903 to $256,702,703 in 1913.

Soundness and Strength.

If the account of capital liability be considered, as a whole, it suggests soundness and strength. The emphasis here is on the words "as a whole." When reviewing the Canadian railway situation, however, it must always be borne in mind that both capitalization and operations are very much centralized. That is to say, an overwhelming proportion of the railway interests of the Dominion is controlled by a few corporations. Let a short statement of facts be put in tabular form:—

Railway.	Mileage.	Bonds.	Net Earnings.
Algoma Central	135	$ 10,758,000	$ 206,051
Canadian Pacific	12,238	29,747,299	43,815,669
Grand Trunk	3,560	182,847,214	12,572,932
Grand Trunk Pacific..	1,396	121,967,161	......
Canadian Northern	6,488	188,144,648	7,716,826
Canada Southern	380	22,630,000	5,318,482
Pere Marquette	199	5,870,000	996,515
Total	224,396	$561,934,275	$70,626,475

Controlled by Seven Corporations.

Included with the Canadian Northern are all the lines operated by Messrs. Mackenzie and Mann, with the exception of the Inverness and Richmond, the capitalization of which is wrapped up with a coal mining company. The Canadian Pacific also embraces the Dominion Atlantic and the Quebec Central. These seven railways are all that have a capitalization of $5,000,000 and over. The Dominion Government and Ontario Government systems are excluded, as being without capitalization and standing by themselves. The net earnings, as given above, represent merely the difference between gross revenue and operating expenses, without deductions whatever.

Here we have 24,396 miles of railway out of 29,304 in operation on 30th June last, or a little over 83 per cent. of the total, under the control of seven corporations. If the Grand Trunk Pacific be regarded as a Grand Trunk enterprise, which it really is, then the number would be reduced to six. The funded debt of the group amounts to over 91 per cent. of the aggregate for all railways. The net earnings of five out of the six—excluding the Grand Trunk Pacific for the reason that the earnings in 1913 applied to only part of the system—make up over 94 per cent. of the total, or $70,626,475 out of $74,691,013. These facts will make clear the centralization to which allusion has been made.

Stocks and Bonds.

It is not worth while going analytically into the account with respect to stocks. The amount outstanding last year was $918,573,740, including $163,257,224 of consolidated debenture stock; but much of it was without market value. Dividends in 1913 aggregated $33,670,561, including the Canadian Pacific Railway debenture stock, as compared with $12,760,435 in 1907; but there were only seven railways concerned. The names and amounts were: British Yukon $97,956; Canada Southern, $450,000; Canadian Pacific, $28,144,477; Grand Trunk, $4,705,864; Hereford, $32,000; Quebec Central, $135,264, and Toronto, Hamilton and Buffalo, $105,000. It will be observed that the Canadian Pacific contributed 83 per cent. of the total. Stocks to the amount of $320,862,552, including $109,363,053 of the Grand Trunk common, and $105,659,500 attached to Mackenzie and Mann roads did not pay anything.

Turning back to the matter of bonds, there is an aspect of the matter which merits special attention, and that is the Government guarantees. Up to the 30th June last, these guarantees amounted to the respectable sum of $274,960,374, of which $95,486,590 was in the name of the Dominion. The account has since been increased by more than $50,000,000. Of the existing total, $235,000,000 has been given to Mackenzie and Mann roads, although it should be added that not

THE EMPIRE LOAN COMPANY

WINNIPEG, CANADA

all of it has been earned. When these Mackenzie & Mann roads are completed, within the next two or three years, they will have a large bond liability—not less than $350,000,000. The fixed charges thereon will amount to at least $14,000,000. As has been shown in a preceding paragraph, the net earnings of all the Mackenzie and Mann lines last year was less than $8,000,000. New mileage is very seldom productive, and, when the influx of capital ceases, the situation will call for exceedingly capable administration and profitable traffic conditions in order to protect the guarantors. The whole matter, in all its bearings, suggests gravity.

Have Passed Timidity.

Few people realize what Canada has done to secure transportation facilities. It was in tremulous faith the Canadian people took up the matter of aiding the construction of the Canadian Pacific in 1881. Many regarded the burden as insupportable and the project as unpromising. We have got bravely over our timidity. The account of aid as it stands to-day makes the Canadian Pacific Railway enterprise appear insignificant, although, be it remembered, it is largely identified with the foundation of Canada's present marvellous prosperity. By rail and water, directly and indirectly, the Dominion has expended more than a billion and a quarter dollars to provide means of transportation. No other people have done so much. Within ten years the Dominion Government alone has given $50,000,000 in cash aid, has provided $150,000,000 in guarantees, and built the eastern section of the Transcontinental-at a cost of $180,000,000—an average of $38,000,000 per annum. It has done much more. It has spent tens of millions for harbors, channels, and lighthouses, and has commenced the Hudson Bay Railway and the new Welland Canal at a probable cost of at least $100,000,000 before both works are completed for operation.

Two Hundred Millions More.

Big railway enterprises are under way. Last year there were 18,648 miles of new line under construction, chiefly in the western provinces. It will take a great deal of money to carry out this vast work. Assuming that 10,000 miles will be built and equipped during the next four years—a reasonably low estimate—and that the bond liability will average $20,000 per mile, it will be seen that $200,000,000 will be needed to finance these undertakings. Since there were a trifle over six employees per mile of line in 1913, the addition of 10,000 miles to operate mileage would involve a largely increased distribution of wages. In one way and another, it would represent the livelihood of more than 300,000 souls. In fact, transportation ranks next to agriculture among the industries of the Dominion, and it is expanding rapidly.

◆

ABOUT THE KIEL CANAL

The original Kiel canal, which is 61 miles long, had a depth of 29½ feet and bottom width of 72 feet and a surface width of 219 feet. The improvements which have been in process for five years and have been carried on without interrupting traffic were designed to give the canal a draft of 45 feet, a top width of 400 feet and a bottom width of 150 feet.

The new locks which are bigger than the locks of Panama are 1,082 feet long, 147½ feet wide and have a mean depth of 45 feet of water over the sill. The new locks, one on each end of the canal, were built beside the older and smaller ones.

With this canal completed Germany is able to transfer the largest warships or merchant ships as well between the Baltic and the North Sea.

The canal was originally built in 1895 at a cost of $40,000,000. The improvements just finished have cost an additional $55,000,000.

◆

Toy manufacturing in Canada and the United States will receive an impetus as the result of the war in Europe since Germany, the chief source of supply in the past, is cut off from all overseas trade. Canada has been a large purchaser of German toys, as $579,547 of the total, $1,037,137 worth, of dolls and toys imported during the year ending March, 1914, came from Germany. Next to Germany the chief source of supply was the United States.

WORLD'S COMMERCE AND SHIPPING

Great Britain is First and Germany Has Eleven Per Cent. of Total Tonnage

Within a week of the declaration by Germany of war upon England, British battleships had seized 75 German merchant vessels. That was the Admiralty's announcement. Since then, many more have been taken. In recent years, Germany has made much progress in shipbuilding and in extending her trade fleet. The world's carrying power now includes approximately 31,000 vessels with an aggregate capacity of 47 million gross tons and has nearly doubled in capacity during the last 20 years. In number, however, this commerce fleet has decreased slightly, thus showing a tendency toward larger carrying units. These figures are based upon the tonnage of all vessels of over 100 tons engaged in trade, whether domestic or foreign, on ocean, river and lake.

Great Britain is First.

Great Britain ranks first and the United States second in number and tonnage of vessels engaged in commerce, but this is due to the vast number engaged in lake and ocean coastwise trade, since the number of United States vessels engaged in foreign trade, according to reports received by the bureau of foreign and domestic commerce, department of commerce, is less than that of Great Britain, Germany, France, Italy or Norway.

According to a recent statement of Lloyd's, out of an aggregate tonnage of 47 million gross tons in 1913-1914, 40 per cent. were credited to Great Britain, 11 per cent. to the United States, 11 per cent. to Germany, about 5 per cent. each to Norway and France, 3 per cent. each to Holland, Italy and Japan, and from 2¾ to 1¾ per cent. to Russia, Sweden, Austria-Hungary, Denmark and Spain.

Carrying Trade of United States.

The carrying trade of the United States shows a marked growth in coastwise and lake traffic and a striking decline on the ocean. While the gross tonnage of United States vessels engaged in lake and coastwise trade was increasing from 3,657,304 tons in 1883 to 9,798,561 tons in 1913, that of their vessels in the foreign trade was decreasing from 1,302,095 tons to 1,027,776 tons, an increase in one case of 168 per cent. and a decrease in the other of 21 per cent. during a 30-year period in which the value of their foreign trade rose from 1½ billion to 4¼ billion dollars.

The volume of the over-sea commerce served by the world's merchant marine cannot be definitely stated. It is known, however, that a considerable portion of the 40 billion dollars' worth of merchandise imported and exported annually by the various nations is carried by vessel. The United Kingdom, being an island community, necessarily imports and exports all its merchandise by vessel. The United States sends about four-fifths of its exports to South America and over-sea countries. Brazil sends 95 per cent. of her exports to extra-South American communities. Nearly half the goods shipped from countries in Asia is destined for extra-Asiatic communities, and practically all of Africa's trade staples find markets outside the Dark Continent. While trade between the European nations is considerable, those countries ship a large part of their surplus products to other parts of the world.

German Merchant Tonnage.

At the beginning of 1912, 14 German seaports had each a fleet of merchant steamships with a registered tonnage exceeding 20,000, and four seaports had a steamship tonnage of over 100,000—viz., Hamburg, with 706 steamships and a tonnage of 2,263,000 (besides 520 sailing vessels and towing boats with a tonnage of 294,000); Bremen, with 378 steamships and a tonnage of 1,179,000 (besides 210 sailing vessels and towing boats with a tonnage of 139,000); Stettin, with 118 steamships and a tonnage of 144,000; and Flensburg, with 88 steamships and a tonnage of 115,000. The entire sea-going merchant service comprised 2,009 steamships with a tonnage of 4,144,000 and 61,000 seamen; 2,401 sailing vessels with a tonnage of 463,000, and 13,000 seamen; and 322 towing boats with a tonnage of 104,000, and 1,000 men.

VANCOUVER AS GREAT PORT

It is Open all the Year, Has Ample Anchorage and Miles of Waterfront

That the United States Consul at Vancouver, Mr. R. E. Mansfield, has proper appreciation of that point as a great shipping port, is shown in his report just made to his government at Washington. He says:—One of the principal features and an important asset of Vancouver, as the transportation, commercial and industrial centre of British Columbia, is the splendid harbor on which it is situated. Nature is the important factor in the creation of great harbors, and has highly favored Vancouver.

Burrard Inlet, the harbor proper, extends for 12 miles from the Narrows, as the entrance is called, eastward to Port Moody at the head of the inlet, which was first selected as the location for the terminal wharves and docks of the Canadian Pacific Railway, the first of the transcontinental lines to reach the British Columbia coast in 1886. Later when the Canadian Pacific Railway extended its lines farther west and decided to construct its terminals on the south shore of Burrard Inlet, on the site where Vancouver stands now, the foundations were laid for the greatest seaport and shipping centre in the Canadian west. The inlet, 12 miles long, and two miles wide on the average, forms an area of about 24 square miles. Extending northwesterly from a point about seven miles from the entrance up the north shore is what is known as the North Arm, an extension longer than the main inlet, and averaging two miles wide.

All the Year Round.

The favorable features of Vancouver Harbor are an all-the-year-round open port, ample anchorage, many miles of water front with depth sufficient for the largest vessels, perfect security from weather conditions, and accessibility to the open sea and to the coast waters of British Columbia. The waters of the harbor are of a great depth in mid-channel, more than 30 fathoms in places, while near the shore there is a depth of water in most places of more than 25 feet. In some instances deep water extends so close in that large vessels can anchor within a few rods of the shore.

The shipping facilities of Vancouver Harbor have so far been confined generally to the south shore of the inlet, where much of the water front is occupied by sawmills and other industries. But the growing shipping interest will soon require practically all the south shore, and is already extending to the north shore, where large docks, wharves and shipbuilding plants are being constructed. Within a few years the factories along the inlet within the corporation limits will give way to wharfage and docks, as the sites are becoming too valuable for manufacturing purposes.

Extension of Wharfage.

Extensive improvements are being made to accommodate the increasing business of the port, for which several million dollars will be spent this year, and when the new government and private docks, wharves and dredging schemes planned and under construction are completed, the facilities of the harbor will be greatly increased, making the Vancouver Harbor one of the best on the Pacific coast.

In addition to the deep-water harbor of Burrard Inlet the needs of smaller craft have also been provided for in the shallow waters of False Creek, a small inlet running just south of and parallel with the main body of water. False Creek, the shores of which are mostly tide flats, is the rendezvous and furnishes a harbor for Vancouver's "mosquito fleet," where there is usually a congestion of small-craft traffic, especially of tug-boats, scows and launches. It is also used as a storage basin for log booms for the various sawmills that line its shores.

Shipping and Railway Companies.

Five transcontinental railways, the Canadian Pacific, Grand Trunk Pacific and Canadian Northern Pacific—all Canadian lines—the Great Northern and the Chicago, Milwaukee and St. Paul—American lines—have their terminals in Vancouver, in addition to which the following steamship companies have headquarters and agencies in this port:

The Canadian Pacific Railway operates a line of fast-mail steamers between Vancouver and China and Japan; also a line between Montreal and Liverpool and from Liverpool to Hongkong and Yokohama, in connection with the fast trains on the Canadian Pacific Railway, making a round-the-world

circuit of transportation under the management of one company. This company also operates a line of coast steamers, carrying passengers and cargo from Vancouver to various British Columbia, Alaskan and Puget Sound ports.

The Canadian-Australian Royal Mail Steamship Line operates a monthly service from Vancouver to Hawaii, New Zealand, Fiji Islands and Australian ports.

The Ocean Steamship Company (Limited), the China Steamship Company (Limited), and the Blue Funnel Line, from London, Glasgow and Liverpool to Vancouver, will use the Panama Canal route when that waterway is opened. Other lines are:—

Harrison Direct Line, from Glasgow, Antwerp, London and Liverpool to Vancouver.

Pacific Coast Steamship Company, Vancouver to San Francisco.

Grand Trunk Pacific Steamship Company, weekly service to Prince Rupert, Granby Bay, British Columbia, Stewart, Alaska and Victoria and Seattle.

Union Steamship Company, Vancouver to other British Columbia ports.

Terminal Steamship Company (Limited), British Columbia coast service.

Northern Steamship Company, British Columbia coast and Alaskan service.

Hamburg-American Line, from Hamburg and Antwerp to Vancouver, via the Orient.

East Asiatic Line, from Hamburg, Rotterdam and Antwerp, via Magellan Strait to Vancouver. This line and others with headquarters in Europe, will use the Panama Canal route when the canal is opened.

Royal Mail Steam Packet Company, operating a service between Great Britain and the Pacific coast, via the Orient.

Fleet of Tramps.

Included in the port business are several ferries, which operate a regular service between Vancouver and the suburban municipalities situated on the inlet.

In addition to the regular service of the above-named companies, many tramp steamers and sailing vessels visit this port monthly which, added to the number of fishing boats, tugs, barges, etc., used in handling the traffic of the port, present always a scene of great activity in Vancouver Harbor.

◆

Mr. James Carruthers and his colleagues on the directorate of the Canada Steamship Lines, Limited, has placed at the Dominion government's disposal the company's fleet of grain carriers. Mr. Carruthers and Mr. J. W. Norcross, a fellow director, are lending the government valuable advice. This grain fleet and Britain's battle fleet should help the food situation in the United Kingdom.

Mr. R. H. Sperling, who is retiring from the general managership of the British Columbia Electric in British Columbia, was given a luncheon by the business men of New Westminster. Mr. Sperling had proposed to leave immediately for London to take a seat on the company's board of directors. Mr. Sperling pointed out that the New Westminster line was the biggest central wheel of interurban railways in the Dominion, that 460 trains ran in and out of the city every day, that 150 miles of line radiated from the Royal City depot, and that New Westminster was the fifth city on the American continent in point of terminal street car traffic. Mr. Sperling is well liked on the coast and will make a valuable member of the company's directorate.

It is reported that timber limits extending over 115 square miles along the foreshore of Seymour Inlet and adjacent waters in British Columbia, including 3,000,000,000 feet of high-grade cedar, were recently transferred to a syndicate of capitalists from the United States. It is said to be the intention of the purchasers to begin logging operations on the limits in the near future, and the plans contemplate placing several sawmills on the property. The scarcity of cedar and the increasing price of high-grade timber in the United States have caused American millmen to turn their attention to British Columbia, which has the largest compact area of merchantable timber on the continent. The abolition of the duty on Canadian shingles and other forest products has encouraged and given impetus to the shingle industry, which has made great progress in the province recently.

MUST HAVE AN AGENT

British Commissioner in Canada Gives Manufacturers of Old Land Some Hints on Trading

Discussing Great Britain's trade with the Dominion, in his report to the Imperial Government, just published, Mr. C. Hamilton Wickes, British trade commissioner for Canada and Newfoundland, says:—

There are not many British firms of whose manufactures the Canadian market takes sufficient volume at the present time to support an office and staff of their own.

Many difficulties to direct marketing present themselves in the Dominion without the intervention of a representative or agent; of course, there are Canadian firms who visit England to make purchases, but there are few who have offices of their own in the United Kingdom.

Agent is Necessary.

In order to develop business an agent in some form or other is, in practice, necessary. While there are British manufacturers operating on this market through their own office, and others through agents who are unexcelled in the thoroughness of their marketing arrangements, the greater number are less fortunately situated. It will be understood that in the ordinary course of the duties attaching to this office a very large number of merchants, importers and agents engaged in handling a variety of classes of merchandise have been seen and interviewed in connection with the enquiries received from the United Kingdom, as well as other firms who have sought our services in order to be put into touch with British firms and sources of supply. In this way a great deal of experience has been gained of the views that these firms have formed relative to British methods which, in their opinion, hamper or hinder the position of British trade with the Dominion.

Manufacturer is Criticized.

In many instances the British manufacturer is criticized for failing to appreciate that conditions here may vary from those met with by him in other countries with which he has been accustomed for many years to conduct business. Particularly is this the case where importers of British goods here refer to the necessity for a closer study and a more accurate knowledge of the tariff and the customs law and regulations as modified by orders in council and memoranda issued by the customs department. Our informants state that a cursory knowledge of these appears to satisfy British firms trading with Canada, while, in their opinion, they are matters which it would pay him well to study. In this I am inclined to agree; my experience gained from interviews with British firms at home is that they are inclined to look upon tariffs as an unmitigated nuisance, instead of studying the provisions with a view to trying to make use of them in efforts to displace competitive goods coming from foreign countries whose traders are compelled to meet a heavier impost.

Some Important Points.

I will now proceed to set out some of the more important points which have been brought to my notice:—

(1) The necessity for a closer study of the technicalities of the export trade—e.g., freights, insurance, exchange, packing and casing of goods.

(2) The requirements necessary to obtain the advantages of the preferential section of the tariff. Knowledge of the leading features of the intermediate tariff in favor of France, Belgium, Italy and the Netherlands. Intimate acquaintance with the customs laws and regulations as compiled from the Customs Act, orders in council and memoranda issued by the customs department.

(3) A better knowledge of the terms and credits customarily given on this market to Canadian buyers.

(4) The importance of fixing such a "selling cost price," whether "ex warehouse," or "f.o.b., U.K. port," as will adequately cover the agent's commission and other incidental expenses. In many instances also more attention should be paid to the price at which the articles are retailed.

(5) The necessity for the selection of suitable agents or representatives. In particular, the terms on which they ought to be employed, taking into consideration the prevailing custom.

UNCERTAIN MARKET CONDITIONS

illustrate the advantage of conservative investments. The Debentures of Ontario Municipalities are particularly attractive in this respect and offer good yields.

HOARDING GOLD IN EUROPE

A notable fact is the preparation which the State central banks of the Continent of Europe have been making to meet the stress and strain of any situation that may arise, writes the Paris correspondent of the New York Journal of Commerce. At this end of July, 1914, these banks—including the Bank of England, which has done little or nothing—have run up their gold holdings to the unprecedented sum of $3,223,600,000. Of this, France and Russia hold each an entire quarter; Germany a tenth, Austria a twelfth, Italy a fifteenth, England a sixteenth, and so on down to Greece, with less than a fifteenth part of this official gold reserve of Europe.

The Bank of France, which is steadily buying, shortly will have $160,000,000 more gold actually in its vaults than it had at the same date last year. Russia will have $94,000,000 more gold and Germany perhaps $60,000,000 more than a year ago. These three nations, through their central banks, have been the great buyers of gold during the year; and Germany has bought much more than appears in the figure of her present holding, for she has not been able to protect her acquisitions to the same degree as France and Russia. It may be said that these three nations buy gold to keep—until that unlikely day when peace among nations shall be secured.

The total increase of the gold held by all the State central banks of Europe since July, 1913, is more than $350,000,000, of which the immense part, $314,000,000, has been gained by France, Russia and Germany. The total increase since the American "panic" of 1907 is not far from $1,000,000,000. At that time—and not until the German demonstration at Agadir over Morocco in 1910, and particularly not till the beginning of the Balkan wars in October, 1912—there was no continuous fears that a general European war might easily break out. These later war scares, indeed, are mainly responsible for that "hoarding" by individuals which, in Germany and France at least, has resulted in withdrawing more gold from the world's circulation than has been done by the increase in bank holdings.

◆

Owing to the war the president and directors of the Canadian Forestry Association have decided to cancel the arrangements for the forestry convention which was to have been held in Halifax next month, and to postpone the convention indefinitely.

Mr. F. T. Stanford, of Toronto, who was elected treasurer of the Canadian Life Underwriters' Association at the Halifax convention, is associated with the Imperial Life Assurance Company. He was an indomitable worker as secretary of the association for several years and will maintain the standard in his new appointment. His is always a smiling countenance.

Hon. Philippe Kay, is Canada's trade commissioner in France. Others holding similar positions in the war zone are:—C. F. Just, Hamburg; J. T. Lithgow, Holland; C. E. Sontum, Norway; and in the United Kingdom, E. de B. Arnaud, Bristol; J. E. Ray, Birmingham; F. A. C. Bickerdike, Manchester; Fred Dane, Glasgow; and Harrison Watson, London.

MANITOBA FIRES AND CAUSES

Financial Waste Was One Million—Commissioner Lindback Speaks Strongly but not too Severely

Manitoba's fire losses aggregate $1,070,521, for the year ended November 30th, 1913. Presuming the population to be 600,000, this represents a per capita loss of $1.78.

The greatest losses occurred in the province at large, outside the city of Winnipeg, and while the per capita loss for these 11 months has been somewhat reduced from other years, when it has been as high as $3 for the province, and even $5 in Winnipeg, it is, of course, still out of all proportion to what it ought to be, suggests Fire Commissioner Lindback in his annual report.

In his comments the fire commissioner makes these pointed remarks:—"Matches, defective stoves and chimneys, as well as sparks from locomotives where conditions should have called for special care, caused several of the losses of $10,000 and over. This is all due to what may be called 'tempermental' hazard. Habitual recklessness in the use of volative and combustible substances and such conditions favorable to the outbreak of fires through lack of care in the cleanliness of premises, unsafe flues, etc. This condition of mind in contact with the element of fire despises preventive measures, and looks upon fire when it has occurred as a mere accident in life, calling for neither excuse nor condemnation. It will take a long, continuous process of education, beginning with the young children, to cure the effects of this natural disposition, and to produce a fitting respect for the value of both life and property.

Factors in Prevention Work.

"Elimination of hazardous buildings is another factor in the fire prevention work. During the year, Commissioner Lindback ordered demolished about 80 dilapidated or non-revenue-bearing structures thereby preventing fires which otherwise would have endangered the neighborhood. Such buildings, too, incite to incendiarism, as proved by some exploits in Winnipeg, and the epidemic of fires started in Brandon during the summer fair.

"Inspection of premises before the fire is one of the greatest needs for a quick reduction of these heavy losses, and can be best conducted by the fire department, guided by printed inspection blanks in duplicate, to be filed with the chiefs of the respective halls, and at the fire commissioner's department. In addition to this, we should enlist the public schools in this work through proper text-books in the hands of the teacher, or by practical short talks by men experienced and versed in fire prevention work."

Financial Losses were Million.

The financial loss reported to the commissioner's office was:—

Winnipeg	$ 276,814
Rest of province	793,707
Non-reported losses	50,000
Total	$1,120,521

The following figures show the monthly fire loss:—

	Winnipeg.		Province.	
1913.	Fires.	Loss.	Fires.	Loss.
January	32	$ 17,926	18	$213,500
February	26	116,744	10	53,966
March	53	6,532	28	65,578
April	24	30,014	19	154,833
May	20	19,739	16	18,021
June	24	38,149	20	144,261
July	17	7,072	16	35,430
August	12	2,038	14	23,562
September	15	7,485	21	53,588
October	16	28,134	18	13,038
November	8	2,981	9	17,930
Total	247	$276,814	189	$793,707

What Causes Show.

Winnipeg citizens who were careless with matches are shown to have created a monetary loss of $44,418 in 35 fires. Careless smokers started 20 fires causing a loss of $7,936. Electric wiring, and there is again carelessness here, caused five fires with a loss of $100,974. Other instances of this

element is seen in many of the following list of causes with number of fires caused and the loss respectively:—

Bearing overheated, 1, $150; boys playing around buildings, 7, $7,606; careless handling paint, 1, $5; candle, 1, $40; clothes too near stove and radiator, 2, $16; coal oil lamp explosion, 5, $993; crucible for melting brass too near wood, 1, $1,424; curtains caught fire, 2, $13; coal oil stove, 5, $1,014; defective boiler, 1, $1,000; defective chimney, 20, $2,072; defective stovepipes, 4, $654; dust explosion, 1, $10; electric iron, 2, $235; film caught fire, 1, $10; fireworks, 2, $845; fumigating room—sulphur took fire, 2, $30; gas explosion from coal, 5, $2,180; gas stove explosion, 5, $1,943; gas jet, 2, $33; gasoline explosion, 6, $791; gunpowder explosion, 1, $150; grease boiling over on stove, 1, $809; hot ashes, 3, $64; incendiary, 9, $1,515; matches (children with), 11, $490; matches (supposed to be mice), 1, $500; overheated stovepipes, 16, $4,754; oily waste, 1, $2,500; plumbers' torch, 3, $3,270; refuse, 5, $3,044; spark from chimney, 14, $789; spark from stove, 4, $655; spark from locomotive, 2, $40,798; stove too close to woodwork, 2, $40; spontaneous combustion, 1, $5; suspicious, 6, $4,989; temporary heating defective, 3, $1,200; thawing out water pipes, 10, $672; tramps, 5, $2,992; unknown, 13, $33,186.

The causes of fires and losses in the province, outside the city of Winnipeg, during 1913 were respectively:—Bush fires, 2, $1,178; careless smoker, 6, $11,343; coal oil stove explosion, 3, $2,159; defective chimney, 6, $4,303; defective stoves and stovepipes, 4, $1,326; electric iron, 1, $2,900; electric wires, 6, $6,143; gas explosion from coal, 2, $67,975; gasoline explosion, 1, $15; heated box in elevator, 1, $3,000; incendiary, 7, $46,229; lamp explosion, 4, $555; matches (children with), 7, $128,470; matches (careless with), 2, $10,277; matches (mice gnawing), 2, $215; overheated furnace, 3, $4,312; overheated stoves and stovepipes, 33, $60,382; rubbish pile, 4, $637; sparks from furnace, 2, $1,830; sparks from stove, 7, $30,495; sparks from locomotive, 2, $130,100; sparks from chimney, 8, $6,293; suspicious, 9, $31,131; tramps, 2, $850; unknown, 65, $241,589.

◆

LIFE INSURANCE AND WAR

Regarding war risks and life insurance, the bulletin of the Mutual Life Assurance Company of Canada, says:—"The British officers during the Boer war of 1899-1902 showed that about eight per cent. of those soldiers who carried insurances and engaged in active service became claims on the companies. It would thus appear that if the Canadian offices are adequately to protect themselves, that a heavy extra should be added to the premiums of those policyholders who engage in active service in the present war. Indeed this conflict is likely to be much more fatal than any former war has been. However it would be a terrible hardship if having made the supreme sacrifice our soldiers were obliged to pay a large additional premium for the protection of those they leave at home. The probability is that the class of men principally involved would consist of those who could not possibly pay such an extra. Thus they would be, so to speak, penalized for their patriotism. Taking this view of the matter the company has decided through the executive to waive the extra on existing policies. The cost though considerable, we know will be cheerfully borne by all our members.

"Not all of our policies contain any conditions in regard to military service and it is only such policies as contain what is known as the Military Clause that will be affected. This clause provides that in the event of the policyholder entering active service in time of war, the payment of an extra premium becomes necessary in order to maintain the policy in force. Notwithstanding this provision the company has decided that in the present emergency, no extra premium will be charged for active service in the defence of the Empire, whether at home or abroad. This ruling applies to existing policies. So far as new insurances go, the decision is that for the present policies will not be written on any terms on the lives of those entering or intending to enter upon active military service."

◆

A policy of life insurance is always an evidence of prudent forethought, and no man with a dependent family is free from reproach if his life is not insured.—Lord Lyndhurst.

ONTARIO STEEL PRODUCTS

Company Presents Satisfactory Report—Organization Expenses Written Off

The profit and loss account of the Ontario Steel Products Company, Limited, shows net profits for the year ended June 30th, of $106,437. This amount is after providing for depreciation of properties, reduced market value of securities and the entire cost of organization. Deducting bond interest of $36,000 and preferred dividends of $52,500 there remained a sum of $17,937. The company's fixed assets including real estate plant, power rights and goodwill total $1,785,451. The current assets, amounting to $2,259,689 are divided as follows:—Cash, $3,351.94; bills and accounts receivable, $96,459.33; inventories, $346,107.45; securities (at market price), $26,144; deferred charges to operations, $2,175.

On the other hand the company has current liabilities of $118,913, made up as follows:—Bank overdraft, $14,881.27; bills and accounts payable, $72,907.14; bond interest due July 2nd, 1914, $18,000; preferred dividend payable August 15th, 1914, $13,125. The reserve for depreciation, etc., is $22,838.94.

Shared Unfavorable Conditions.

In discussing the company's report, Mr. W. Wallace Jones, the president, states:—"The company shared in the generally unfavorable conditions which existed during the past 12 months, and consequently all the plants were not run to their full capacity. Furthermore, a disastrous fire at the Gananoque Spring and Axle plant seriously interfered with operations, at a most inconvenient time; and while the direct loss was fully covered by insurance, the disorganized conditions that obtained during rebuilding operations seriously affected profits from these works. This fire, which completely gutted the spring works and damaged the axle works at Gananoque, occurred on October 1st, 1913. Rebuilding operations were commenced on October 15th, the building being completed on December 20th, and manufacturing operations resumed on January 2nd. The new building, which is larger than the one destroyed, is strictly fireproof construction, and the insurance rate has been substantially reduced in consequence.

Windsor Plant Postponed.

"During the year large extensions and improvements at the shovel plant have been satisfactorily completed, but owing to trade conditions are not being operated at the present time. In view of the development in the auto spring business, the directors recently purchased the property of the Canadian Malleable Range Company, at Chatham. This property is very conveniently situated, and the price paid was reasonable. The directors also have purchased from the Thousand Islands Railway Company a piece of land which later on will be used for an extension to the shovel plant. The McNee property, adjoining the spring and axle warehouse at Gananoque, has also been purchased at a reasonable price, and will give additional and badly-needed storage capacity for springs and axles. The directors have not deemed it prudent to proceed with the suggested factory at Windsor at the present time.

Written Off Organization Expenses.

"During the year the plants have all been put in a state of high efficiency, and several new lines of goods have been put on the market. Contrary to the usual custom, the company has written off all organization expenses this, the first year; and have also set up a substantial reserve for future bad debts."

The company has first mortgage 6 per cent. bonds of $600,000. These are due on July 2nd, 1933. It has authorized capital stock of $1,500,000 of which $750,000 are 7 per cent. cumulative preferred shares and $750,000 ordinary shares. All this is paid up.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—Dividend Changes—New Stock Exchange Listings

CANADIAN FLOTATIONS IN LONDON.

The following flotations, amounting to £5,123,287 of interest to Canadians, were made in London during July:—

South Vancouver.—£223,287 5 per cent. consolidated stock at 91.

Imperial Tobacco Company of Canada.—500,000 £1 shares at 19 shillings.

Canadian Northern Railway.—£3,000,000 4 per cent. guaranteed debenture stock at 94.

Winnipeg.—Greater Winnipeg District Water Board issued £400,000 4½ per cents. at 95.

Ontario Province.—£1,000,000 4½ per cent. registered stock at par. Left with the underwriters 90 per cent.

Canadian flotations in London now are stopped entirely by the war.

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during July:—

Wright Hotel Company, Limited.—$150,000 capital stock at par.

Northern Navigation Company, Limited.—$275,000 first mortgage 5 per cent. gold bonds.

Ontario Power Company of Niagara Falls.—$2,000,000 2-year 6 per cent. collateral notes.

Canadian Tube and Iron Company.—One thousand new shares at par to the company's shareholders.

Howe Sound and Northern Development Company, Limited.—$100,000 6 per cent. debentures at 95 and accrued interest.

Montreal Amusement Company, Limited.—$200,000 7 per cent. cumulative preferred stock at par and bonus of 50 per cent. common stock.

Abitibi Power and Paper Company, Limited.—$250,000 7 per cent. cumulative preferred stock at $945 a share, with 50 per cent. bonus common stock. (This issue was announced but later was postponed.)

George and Barker Salmon Packing Company.—$150,000 first mortgage 6 per cent. 15-year sinking fund gold bonds at 98 and interest. The bonds are guaranteed by the British Columbia Packers Association.

JULY DIVIDEND CHANGES.

Tooke Brothers, Montreal, deferred its dividend of 7 per cent. on their preferred stock.

Mortgage Corporation of Nova Scotia.—Declared a dividend of 1½ per cent. on the paid-up capital for three months, ending June 30th, 1914, payable August 1st.

NEW STOCK EXCHANGE LISTING.

The following security issue was listed during July:—

National Breweries, Limited.—22,543 shares common, 27,750 shares preferred and $2,000,000 bonds on Montreal Stock Exchange.

REPAYMENT OF MUNICIPAL LOANS

Administration of Sinking Funds—Mortgage Not as Safe an Investment as Municipal Bond

BY S. P. GROSCH.

(Conclusion).

In investing sinking funds it should always be remembered that they are trust funds and should be administered as such. The keynote to all investments should be security rather than large returns. It is really money set aside for the holder of the debentures in order that he may rest assured that when the time for repayment arrives there will be sufficient money ready and waiting to retire the loan. It is a fund that when invested should be in securities of like safety to the original loan itself.

The investments should not be restricted to one kind of security, but should be in different kinds of securities not centred in one locality, but spread over as large an area as possible. Personally, I am very much in favor of investing in the debentures of other municipalities, school districts, and government securities, rather than in mortgages. If mortgages are taken at all they should be taken on only gilt-edge revenue producing properties, with a limit of approximately one-third of the appraised value of the property. The mortgages should be taken preferably on lands outside the limits of the local authority making the investment, in order that the investing area may be extended and all local feeling removed.

Mortgage Not As Safe.

Generally speaking a mortgage is not as safe an investment as a municipal bond, which has all the taxing powers behind it, and is a first charge on all rateable property, and is therefore prior to the mortgage itself. If taxes are not paid the mortgagee must advance or cause to be advanced the amount of such taxes to protect his security, and in making payment of taxes the mortgagee is in part assisting the municipality in paying its bond indebtedness. Moreover, although there are occasional delinquents who have not paid their debenture coupons as promptly as might be desired, since the inception of the province of Saskatchewan, there has not been a single municipal or school bond repudiated. The same statement cannot be made in respect to mortgage investments.

When investments are made in such a manner as to spread over an area, little less in extent than provincial, the security then becomes, in respect to area, an almost provincial security; and if loss were sustained in any particular locality it would not wipe out the fund, as would be the case if all were invested in that particular locality.

Small Amounts Handled.

In Saskatchewan a large portion of the indebtedness of local authorities has been incurred during the last decade. Sinking funds have been accumulating for a comparatively short period. Local authorities have not as yet been called upon to handle large amounts for investment; these amounts will increase from year to year, and will bring with them more difficult problems for solution in respect to their administration. Up to the present, no mistakes have been made which are insurmountable, but sinking funds generally have been administered with care and with a view to safety; let us not forget, however, that like the credit of individuals, municipal credit rests upon confidence and such confidence rests upon the performance by local authorities of the obligations which they have undertaken, the businesslike manner in which they consider the repayment of their loans, the method in which they administer their sinking funds and conduct their affairs at large.

GRANBY SMELTER SHUT

First Serious Effect of War on Pacific Coast—Trade With Australia

(Staff Correspondence).

Vancouver, August 15th.

The first serious effect of war on the Pacific coast is the shutting down of the Granby Company's works at Grand Forks. The Granby has its smelter, the largest in the British empire, there, bringing the ore from its mines at Phoenix. It has been operating full capacity, but with the order forbidding the export of certain products, it will not be able to sell its output. The works up the Coast, started not long ago, and which have proved profitable, have not closed yet. The Britannia mine on Howe Sound, close to Vancouver, treats about the same kind of ore as the Granby, but no announcement has been made by that concern yet. It was getting ready to work on a larger scale. Any cessation as a result of the war will be only temporary.

Mining Conditions Were Good.

Reports from the interior are that conditions were never better in the mining districts, and it will be regrettable if any setback is received. A recent visitor to the Kootenay lake country told *The Monetary Times* that the old Ainsworth camp is taking on new life. There are 500 people there now, with three hotels and three stores. The Consolidated Mining and Smelting Company is working the No. 1, the Highland and the Maestro, while three other propositions are being operated by other parties. The success of the Consolidated throughout the whole district has been an incentive to more active operations. At Sandon, the Surprise mine is prophesied to become another Standard, one of the big silver producers on the continent.

Notwithstanding momentous current events, the big fairs on the Coast will be held as usual. Vancouver's fall exhibition is booked for September 3-12, and preparations are in hand to make it the largest yet. At Victoria, the Dominion exhibition will be held this year, and as conditions are good on Vancouver Island the fair should be successful. Then there is the usual provincial fair at New Westminster.

Trade With Australia.

During the past two or three weeks there have been two or three indications of efforts to increase trade relations with Australia. Mr. G. Gunnersen, principal of the firm of Gunnersen and Company, of Melbourne, was here a few days ago, before proceeding south. He is trying to arrange for direct shipments of British Columbia lumber to Australia. That country consumes 170,000,000 feet annually, the chief exporter being the United States, with Norway and Sweden second. British Columbia has shipped considerable lumber through agents in San Francisco. This week a representative of a San Francisco firm was here arranging for the shipment of a couple of cargoes from a local mill to Australia about the end of the year.

Another visitor is Mr. P. E. Quinn, trade representative at San Francisco of New South Wales. Although the time is not altogether auspicious, he will establish a trade office for his government at this port. New South Wales is at a disadvantage in the Canadian markets compared with New Zealand which has a reciprocal tariff, but Mr. Quinn thinks when election matters are settled in Australia, tariff negotiations will be commenced again.

Grain Growers at Kamloops.

Mr. A. W. Switzer, organizer for British Columbia for the Grain Growers Company, of Winnipeg, states that the company will build an elevator, feed mill and a cleaning and sacking plant at Kamloops if reasonable support is forthcoming. The location of the plant has not been decided, but if the ranchers of the Kamloops district will support the association sufficiently to cover the fixed investment necessary, the company will provide the capital for carrying the stock, buying grain and transacting general business.

The Imperial Oil Company, a Standard Oil concern, is active at the head of Burrard Inlet. About $750,000 are being spent there, and the company will have a wharf 750 feet long, with slips for the smaller craft. Three hundred and fifty men are at work at the site.

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, but the situation today justifies our conservative yet progressive policy.

TRADE AND SEA MASTERY

Keep the Ship Lanes Clear—What British Authorities Say

The man of commerce the world over has been able to appreciate in the past two weeks what the quiet presence of the British navy has meant to commerce in past years. The British Admiralty has said to the trawlers of England's east coast, "You may resume your fishing operations," and they sailed the North Sea. When the Admiralty gave other news the ships remained in port. "The ocean route is clear from Montreal to Liverpool and any ship can sail when she pleases in perfect safety." That was the announcement of the collector of customs at Montreal last week. The navy was patrolling the beat. A week after England and France became engaged in the struggle, an investment of approximately $700,000,000 in shipping trembled and stood still. Exporters would not do business until the financial horizon was cleared and even then they would not ship until they knew the navy was doing its quiet work in a more grim manner than usual.

The United States, the only great commercial country not engaged in the war, is just as anxious as other countries for the maintenance of trade routes by the British navy.

Mastery of the Sea.

Says a Boston writer:—"An open ocean is now the vital need. It should come soon—somehow. Until there is sea security, the world's commerce will shrink from salt water. Physically there will be few ships available; and, financially, relatively still less exchange. An end to that deadlock is devoutly to be wished by buyer and seller, non-combatant and belligerent. Mastery of the sea would be to Germany as invaluable as it is improbable. But save for a miracle, or a series of them, it will unquestionably fall to England, supported by her allies. And to the rest of the world this outcome would work vastly to the more advantage. The plain if brutal economic as well as military truth is that the best thing for everybody save Germany would be the speediest possibly crippling or bottling up of the German war fleets."

Foodstuff Prices Rise.

A representative of the London Financier has gathered the views of English firms connected with the import corn and shipping trades, and the following expressions of opinion have been elicited:—

"In the event of our being at war with any naval Power it would inevitably follow that the prices of all foodstuffs in the United Kingdom, whether imported or not, would rise considerably.

"The British government is at least in as good a position regarding the importation of foodstuffs as any other belligerent would be. Perhaps better, as we should certainly be far stronger at sea than any other country. Concerning insurance, it is quite impossible to make any sort of forecast as to how things might go, as the rates would change from day to day according to the circumstances, and the insurance rates would have a very direct bearing on the course of prices; but, there again, the importers of foodstuffs into other European countries would, in all probability, be in a worse position than the British importers, simply for the reason that the British Navy would be able more effectually to look after our mercantile marine than would be the case with Continental nations."

As to Transatlantic Supplies.

Another authority remarked: "Even during war the financial considerations would to a large extent dominate the situation—if we could offer higher prices for wheat, for example, than other belligerents, or if the market here was regarded as safer and surer, we should get the wheat in preference to anybody else. Then, again, assuming that the British and French navies, would be able to dominate the Mediterranean, which no doubt they would, India would be a great strength for us in the matter of wheat. There would be, I suppose, no question at all of any interference with British commercial vessels anywhere east of Suez, so that both France and England would have little to fear as regards importations from the East.

"On the other hand, Germany, if at war, might have to depend very largely upon the Hungarian supplies of grain, and, as she would be in a position of very great difficulty with respect to over-seas supplies, the German food prices would be likely to rise quite as much, and more quickly, than ours. Looking at the prospect of very heavy wheat imports from the United States after the next harvest, it is obvious that our Transatlantic supplies—from the United States and Canada—might be heavier than usual, and a moderate increase in the price of wheat in the British market would undoubtedly attract every available sack of wheat that could be had from those sources, and on the Atlantic it seems very improbable that there could be any effective interference on the part of the enemy's vessels. Meat supplies from the Argentine, again, would incur hardly any risks, and if prices rose much, it would be a matter of sentiment rather than danger.

Regarding the Hostile Navies.

"It is practically certain that the hostile navies would be quickly placed on the defensive, if they were not altogether bottled up in their ports. Another advantage we should have would be this, that, owing to the vast superiority of the British Navy in the matter of numbers, we should have far less difficulty in providing convoys, if necessary, than any other nation, and this would naturally have the effect of moderating the insurance rates. It appears to me that it is more than likely that, so far as prices do rise in this country, whether we go to war or not, that it will be more the effect of sentiment and the eagerness of merchants to take every advantage of every excuse for a profit than any real risk of interference with our oversea trade."

COMPANIES CHANGING NAMES.

The following companies in Alberta have changed their names:—

The Producers Petroleum Company, Limited, to the Soo Pacific Oils, Limited. The North-West Lumber Company, Limited, to Alberta North-West Lumber Company, Limited.

COMPANIES REGISTERED.

The following companies have been registered to do business in Alberta:—

The North British Canadian Investment Company, Limited, of Glasgow, Scotland. Regina Oil and Gas Company, Limited. Saskatchewan Petroleum Company, Limited. Winnipeg Insurance and Vessel Agency, Limited, of Winnipeg. W. D. Head Drilling Company, of Los Angeles, Cal. Norris Commission Company, Limited, of Winnipeg. Coomac Oil Fields, Limited, of Toronto.

The following company has been registered to do business in British Columbia:—

Usca Investment and Securities Company of Indianapolis, Indiana.

COMPANIES INCREASING CAPITAL.

The following companies in Alberta have increased their capital stock:—

The Eagle Oil Company of Calgary, Limited, from $10,000 to $500,000. The Dominion Oil Company, Limited, from $10,000 to $1,500,000. The Press Publishing Company, Limited, from $100,000 to $150,000.

The following company in Prince Edward Island has increased its capital stock:—

The Magic Silver Black Fox Company, Limited, from $190,000 to $500,000.

The following companies in Ontario have increased their capital stock:—

Gilson Manufacturing Company, Limited, from $50,000 to $100,000. The Ives Modern Bedstead Company, Limited, from $150,000 to $250,000.

The following companies with Dominion charters have increased their capital stock:—

The Robert White Company, Limited, from $250,000 to $300,000. Wilt Twist Drill Company, of Canada, Limited, from $150,000 to $200,000.

Good Times Ahead

THE sudden breaking out of war caused many to "run to cover." Like the chicken on whom the rose leaf fell, some of us became a prey to fear and were ready to declare "the sky is falling."

Now our vision is clearing, our alarm has fled, we have recovered our poise and our courage. We are seeing, also, our opportunity. Swiftly and almost overwhelmingly has come to us the perception of the fact that the competition of Continental Europe has been taken away. We are faced with a condition and an opportunity both tending to our advantage as a country of industry, agriculture and trade. Good times are ahead, if Canada and Canadians see and seize the present opportunity for enlarging their industries and trading.

We must be careful **We must have courage**

OF THE CLOSED STOCK EXCHANGES

New York Trading for Cash — No Panic in London

The special committee of five of the New York Stock Exchange have ruled that members of the Exchange desiring to buy securities for cash may send a list of the same to the committee on clearing house, giving the amount of securities wanted and the prices they are willing to pay. No offers to buy at less than the closing prices of Thursday, July 30, will be considered. Members of the Exchange desiring to sell securities but only in order to relieve the necessities of themselves, or their customers, may send a list of the same to the committee giving the amounts of securities for sale. No price less than the closing prices of Thursday, July 30, will be considered.

A somewhat similar arrangement is under consideration by the authorities of the Montreal and Toronto exchanges.

Cash Basis in London?

London brokers are said to be favorable to a resumption of cash business in a limited list of securities on the lines of Paris Parpuet. In the meantime brokers are increasingly active. Bankers have not relaxed pressure upon the Stock Exchange committee to restart limited cash dealings. Brokers have been circularizing clients, giving lists of securities for which buyers and sellers are available, and there has been a good response.

Canadian Pacifics have been sold privately, it is said, at 162, consols at 70.

No Panic Overseas.

That the London Stock Exchange was free of panic up to the Friday on which business was ordered to be suspended entirely by the committee, is the statement of the correspondent of the London Economist, who says:

"The announcement of Friday morning, made soon after 10 o'clock, that the Stock Exchange would be closed until further notice came as a final thunderclap in the ears of members. Excited crowds thronged Throgmorton Street, and the committee's action was said to be due to the fact that the postponement of the Paris settlement, already announced, would have caused the hammering of dozens of London firms having accounts open with that centre. So the committee stepped in, closed the House sine die.

"The Stock Exchange insist that up to Friday there was no panic in the real sense of the word. Nor was there, because to the House eye there were none of the scenes associated by tradition (as well as by the dictionary) with that word."

◆

CANADIAN BANKER ON DUTY.

Mr. H. A. Richardson, general manager of the Bank of Nova Scotia, and Mr. W. P. Hunt, manager of the Montreal office, have returned to Canada after a two months' trip abroad, partly in connection with the proposed branch of the bank in London. Owing to the present situation, arrangements in regard to this branch have been postponed.

In an interview, Mr. Richardson said: "There is not unlikely to be considerable distress in Great Britain, through unemployment, and the calling of wage earners to the front, indeed we may have some troubles of our own in that connection, and it is only fair and human that we in Canada, who can afford it, should assume some part of the responsibility of assisting the families of the men who are literally fighting our battles. The press throughout the whole Dominion may well bend its energies to persistently emphasizing the duty of our citizens; that they should do nothing that might tend to hamper the normal working of our financial and commercial machinery, but rather make any sacrifices to keep conditions healthy and sound, thus enabling us to do our full share in assisting the Mother Country to come through this crisis with flying colors."

◆

The war risks insurance office reduced the rate on cargo insurance from 4 to 3 guineas per cent. on Tuesday.

EVENTS AND PHASES OF THE BOND MARKET

United States' Opportunity as Banker—Saskatchewan Mortgage Bonds Cannot Be Floated—Montreal's Issue.

CANADIAN municipalities are looking to the United States for funds. With the prevailing conditions in Europe, it is impossible to raise loans in Great Britain. The last municipal flotation overseas was that of South Vancouver early in July. The amount was £223,287 5 per cent. consolidated stock, at 91. In June, the city of Moose Jaw made a private sale in London of $465,000 5 per cent. debentures. This week a bond house of Montreal has offered to market a loan of $7,300,000 for that city in New York. The price is 96.

Despite the attitude of the United States government respecting loans to European governments engaged in warfare, it seems improbable that Washington will frown upon the bankers who undertake to help to finance Canada's peaceful enterprises. In the early part of last century the United States depended on Europe, and especially on Great Britain, for most of the new capital needed for its development. To-day the accumulations of the United States people are greater than those of any other nation. It is true that additional amounts of foreign capital are still invested in the United States, but the amount is insignificant in comparison with the country's own savings. The wealth of the United States is growing, according to Sir George Paish, at the rate of about $7,000,000,000 per annum, whereas the investments of Europe in the country rarely exceed $300,000,000 in a single year.

The annual growth of banking deposits in the United States in normal years is about $1,000,000,000; the issues of new capital by subscription, so far as the amounts are ascertainable, are about $3,000,000,000; and the sums spent on buildings in the leading cities of the country alone reach $1,000,000,000. Allowing for a certain amount of duplication in these totals on the one hand and on the other for the large sums spent in buildings in all the small cities and villages, upon farm improvements, new factories, mines, lumber propositions, additional stock and machinery, etc., the rapidity with which the wealth of the United States is growing will be evident. There is an excellent opportunity for the United States to strengthen financial relations with the Dominion. Canadian banks and bond houses will continue to do their share of the business as in the past, but obviously the temporary loss of Great Britain as a buyer of Canadian securities should benefit the United States.

NEARLY SEVEN MILLIONS AUTHORIZED

Saskatchewan's Local Government Board Has Been Busy—Some Municipalities Lax

Municipal officials are fully aware that in many respects, especially as to the successful financing of municipal enterprises, announces the Saskatchewan local government board, their interests are closely interwoven with those of the dealer in municipal securities. To protect those interests it is necessary to maintain a high standard of credit, and the greater the efforts to show that the administration of the affairs of the municipality are carried on in a systematic, economical and business-like manner, the more favorably will it be regarded when looking for loans for carrying out such improvements and enterprises as are necessary and legitimate.

The Saskatchewan local government board stands in a way as the intermediary between the municipality and the bond buyer. It therefore behoves the municipality to assist the board, and thereby assist themselves, by keeping it posted as to their position in every respect, at the same time sparing no pains in their efforts to keep their affairs in such condition as to reflect credit upon those responsible, and then use every means available to exhibit them, thus enhancing their credit by establishing public confidence in such debentures or other securities as they may have to offer.

Municipal Officials Must Help.

The board has now been operating for a period of seven months, and during that time many problems have come before it, some of them of a most perplexing nature. In dealing with them it is frequently hampered by an apparent disposition on the part of some officials in submitting their requirements, to furnish such information only as they consider necessary for the accomplishment of their object. It is not believed that this is done deliberately, but rather from a lack of comprehension of the methods of the board, and in some instances from a failure on the part of officials to post themselves on the legislation governing the various local authorities. On account of this municipalities contemplating the borrowing of money by way of debenture often encounter delays which are attributable solely to their failure to accompany their applications with such information as will enable them to be dealt with promptly and intelligently. It is, therefore, desirable that when a debenture loan is in contemplation by a municipality that the first step be to apply to the local government board for instructions as to what information should be submitted with the application. These instructions will be given in every case and without doubt will result invariably in expediting the matters to which they relate.

Must Provide Funds First.

It has come to the notice of the board that many municipalities, more particularly villages, are in the habit of doing work on capital account without first providing the necessary funds for the purpose.

Up to the present the board has been indulgent in dealing with cases of this kind, the irregularities in most instances having occurred previous to the commencement of its financial supervision. In future municipalities should bear in mind that when works are decided upon to be paid for by way of the issue of debentures, that it is absolutely necessary to procure the sanction of the proper authority before beginning operations, and further that moneys raised by this means for a particular purpose must be applied to that purpose and positively to no other.

Loans Authorized by Board.

The following is a summary of loan applications which have been dealt with by the Saskatchewan local government board from January 1st to July 31st, 1914:—

	Applications received.	Amount.	Loans authorized.
Cities	67	$5,189,263	$4,359,657
Towns	51	947,848	387,850
Villages	39	113,100	81,300
Rural municipalities	29	208,290	133,500
School districts	291	1,130,100	1,008,850
Rural telephone companies	145	833,400	831,200
	622	$8,422,001	$6,802,357

There can be no mitigating circumstances to excuse the diverting of debenture funds from the purpose for which they were raised, and the board will be compelled to deal with cases of this kind, with the sole view of enforcing proper methods of financing, without favor to any particular municipality.

SASKATCHEWAN'S MORTGAGE BONDS.

Premier Scott of Saskatchewan has written a letter to the Grain Growers' Association at Pinkham, regarding the Saskatchewan co-operative farm mortgage act. Mr. Scott says that the total demoralization of the money situation by the present trouble in Europe practically destroys all possibility of hope of the act being brought into operation this year.

The act contemplates the procuring of most of the necessary moneys by the sale of the co-operative company's bonds in London. "Our home savings available for investment in those bonds," says Mr. Scott, "cannot be expected to supply beyond a very limited amount of the total moneys required. Most of the bonds for a time at least must be disposed of to the same investors who buy our government and railway company bonds. These investors are on the far side of the Atlantic. Everyone in any degree conversant with such matters will readily see how important it is, keeping an eye open to the future success of the co-operative money scheme, that it shall not be damaged at the start by having its first bond issue floated when the market is unfavorable.

"The success of subsequent issues will certainly depend considerably on the fate of the first issue. For months past the market conditions have been so bad that both governments and railway companies have hesitated to offer bonds for sale, bonds which are a regular and well-known article to the Old Country subscriber. The co-operative company's bond will at first be of necessity a new and unknown article, and in comparison will, therefore, need an unusually favorable market at the outset. It follows that it would be a fatal mistake to bring the scheme into force at a time like the present when the market is in the worst possible condition."

MONTREAL IS OFFERED NINETY-SIX.

The firm of St. Cyr, Gonthier and Frigon, Montreal, have submitted an offer to the board of control to place the proposed loan of $7,300,000 in New York. The offer is 96 net to the city. Comptroller Hebert stated that this price was conditional, but he thought it would be realized. He stated that the board of control at once accepted the offer as in their opinion, as well as that of Montreal bankers, it was useless to think of going to the London market this year for any kind of a loan. The bank commission is to be one-tenth instead of one-eighth of 1 per cent. If the terms of the loan are accepted in New York, the sum of $3,000,000 would be paid now, and the balance in 30 days.

The loan of $7,300,000 is the second half of the city's borrowing power of about $13,000,000 for the current year. The rate is 4½ per cent. for 40 years.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Edmonton.—The city's short term issues this year amount to $2,000,000. They are six months notes discounted at 6 per cent. by the bank and are against taxes.

Galt.—The ratepayers have passed two by-laws, one for a loan of $12,000 to the Galt Machine Screw Company, and the other for $20,000 to be spent on roads and machinery.

Saskatoon.—Over $600,000 of this year's taxes have been paid. During last month alone, the amount received totalled $310,000. Thus, the larger portion of 1914 taxes have already been collected.

Hamilton.—Four money by-laws were defeated this week. They were to raise $175,000 for trunk sewers in the eastern part of the city, $50,000 for east and west end branches of the library, $125,000 for improvements to the city hospital and $75,000 for purchase of a stone quarry.

New Toronto.—The contract for a waterworks system has been signed. The estimated cost is $41,000. Bonds to the extent of $7,800 have been taken by the Roberts Filter Company, of Philadelphia and the balance by private interests in New York.

Montreal.—The board of control will recommend the postponement of certain public works. Comptroller Hebert has stated that by [illegible] [illegible] and by means of temporary loans the city can meet its obligations until the financial conditions are improved sufficiently for the completing of the loan of $7,300,000. He added that he is opposed to going into the money market at present as, with each point lost on the loan, the city would be deprived of $73,000.

Alberta.—The following school districts have been authorized to borrow money: Glenmore, No. 114, $5,000. Milton Williams, Box 1658, Calgary; New Home, No. 2911, $350. Frank Loos, Minda; Austro-Ruthenian, No. 2954, $1,000. C. V. Larson, Landonville; Garth, No. 3039, $1,200. John L. Webster, Garth; Miquelon, No. 3067, $1,000. S. H. Dunham, Tofield; Battle Heights, No. 3090, $1,500. Geo. W. Madder, Wainwright; Chilmark, No. 3102, $1,000. Bert Kelso, Chilmark, via Clemens; Ryerson, No. 3113, $1,500. D. H. Campbell, Youngstown; Portobello, No. 3146, $1,000. John Elder, Millet.

Calgary.—In a statement prepared by acting city clerk Barnes in connection with the sale of bonds by the city, it is shown that the council has on hand for disposal, bonds to the amount of $1,452,000, made up as follows:—Exhibition buildings, $360,000; waterworks extensions, $250,000; bridges, $452,000; electric light and power extension, $300,000; street railway sub-base, $90,000. The general debenture debt of the city is $13,395,310, from which is deducted the following items:—Sinking fund, $1,252,826; waterworks debentures, $3,335,200; electric light debentures, $2,227,000 and street railway debentures, $2,280,510, leaving the net debenture debt, $4,299,774.

Calgary.—The offer of the city to furnish for active service, a military unit, preferably of mounted men, probably will necessitate a vote of the ratepayers on a by-law to borrow sufficient to make, with public subscriptions, the $500,000 required. As soon as arrangements are completed, this will be done. Mayor Sinnott is advised that the city is likely to receive shortly the proceeds of half a million dollars worth of debentures which were sold in London before the declaration of war, and of which sale he has just heard. This means less stringency than was anticipated. The commissioners will, however, adhere to their policy of conservatism.

Toronto.—City treasurer Patterson has issued his annual statement for 1913, showing receipts amounting to $47,564,155.28, and disbursements of $42,758,383.39. The amount of cash on hand and in the banks at the end of last year was $4,805,771.89. City auditor Sterling, reporting on the audit of the treasurer's books, gives the following figures to show the magnitude of the city's gross financial transactions:—Debits, $106,532,606; credits, $106,533,736; bank deposits, $43,163,724; bank withdrawals, $41,033,342. Regarding the hydro-electric finances, he says that the hydro electric system, apart from the sinking fund rates, owes the city, for interest due and accrued to 31st December, 1913, $274,126. In reference to the hydro report that the city maintained the sinking funds and that these obligations, totalling $289,211.16, were properly charged against and assumed by the hydro, the auditor says that the hydro system should pay over to the city that amount so that the fund can be reported as existing either in cash or high-grade investments. The summary of the current assets and liabilities is as follows:—Liabilities, $31,508,346.23; assets, $31,061,410.23; deficit, $446,936. The balance sheet of December 31, 1913, however, gives the city a surplus as shown by the following figures:—Assets, $86,558,014.90; liabilities, $76,853,743.62; surplus, $9,705,171.28.

Regina.—The following is a list of debenture applications granted by the Saskatchewan local government board and the applying treasurers:—

School Districts.—Cupar S.D., No. 972, $11,000. Geo. Penfold, Cupar.

Rural Telephone Companies.—Rainton, $6,300. J. W. Smith, Rainton; Cedoux, $5,000. C. Bierma, Cedoux.

Cities.—Swift Current, $112,005.30. Geo. D. Arnott, Swift Current; Swift Current, $15,124.37. Geo. D. Arnott, Swift Current.

Regina, Sask.—The following is a summary of applications for borrowing powers for authorization by the local government board of Saskatchewan from August 7th to August 13th, 1914:—

	Received.		Authorized.	
	No.	Amount.	No.	Amount.
School districts	4	$ 31,000	1	$ 11,000
Rural telephones	2	11,300	2	11,300
Towns	3	43,306.50	..	....
Cities	1	127,129.67	1	127,129.67

DIVIDENDS AND NOTICES

THE CANADIAN BANK OF COMMERCE

DIVIDEND NO. 110

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 1st September, 1914.

The Transfer Books of the Bank will be closed from the 17th to the 31st day of August next, both days inclusive.

By order of the Board.

ALEXANDER LAIRD,
General Manager.

Toronto, July 17th, 1914.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-half per cent. upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1914, and that the same will be payable at its Banking House in this City, and at its Branches, on and after Tuesday, the First day of September next, to Shareholders of record of 31st July, 1914.

By order of the Board,

FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 21st July, 1914.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 108.

Notice is hereby given that a dividend of Three per Cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the 1st day of September next, to shareholders of record of 15th August.

By order of the Board.

E. L. PEASE,
General Manager.

Montreal, P.Q., July 21, 1914.

CROWN-RESERVE MINING COMPANY, LIMITED.

Dividend No. 55.

Notice is hereby given that a dividend of 2 per cent. for the month of August has been declared, payable the 15th September, 1914, to shareholders of record the 31st August.

Transfer books will not be closed.

Dividend cheques will be mailed on the 14th September by our Transfer Agents, "The Crown Trust Company."

By order of the Board.

JAMES COOPER,
Secretary-Treasurer.

Montreal, August 17th, 1914.

CANADIAN PACIFIC RAILWAY COMPANY

Notice to Shareholders

The Thirty-third Annual General Meeting of the Shareholders of this Company for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the seventh day of October next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

Special Meeting.

The meeting will be made special for the purpose of considering and, if approved, of authorizing an increase of the present authorized Ordinary Capital Stock of the Company by the amount of $75,000,000, that is, from $260,000,000 to $335,000,000, in order to make it accord with the amount for which the Company has the sanction of Government, no portion of such additional stock to be issued however until the authority of the shareholders has been obtained at a Special General Meeting called for the purpose.

The common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Friday, the twenty-first day of August. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the fifteenth day of October.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, August 10th, 1914.

UNION BANK OF CANADA

DIVIDEND 110

Notice is hereby given that a dividend at the rate of 8 per cent. per annum on the paid-up Capital Stock of this Institution has been declared for the current quarter, and that the same will be payable at its Banking House in this city, and also at its branches, on and after Tuesday, the first day of September next, to Shareholders of record of August 17th, 1914.

By order of the Board.

G. H. BALFOUR,
General Manager.

Winnipeg, July 15th, 1914.

LAKE OF THE WOODS MILLING COMPANY, LIMITED

Dividend Notice

Notice is hereby given that quarterly dividends of 1¾% on the Preferred Stock and of 2% on the Common Stock of LAKE OF THE WOODS MILLING COMPANY, LIMITED, have been declared, payable on Tuesday, September 1st, 1914, to Shareholders of record at the close of business on Saturday, August 22nd.

By order of the Board.

R. NEILSON,
Assistant-Secretary.

OPPORTUNITY FOR UNITED STATES TRADE.

Mr. William H. Maxwell, Jr., representative of the London Times in North America, in an interview with the Central News Agency, said:—

"The consensus of opinion throughout Great Britain seems to be that this war is, as they term it, America's opportunity. The supplies of manufactured goods, for instance, hosiery, from Chemnitz and other German points has absolutely stopped and the American manufacturers being relieved of this low-priced competition will immediately feel the benefits of the whole British demand. The same condition applies to all lines of manufactures in which American producers have had to meet continental competition.

"Financial conditions in London began to improve the minute the London Stock Exchange was closed. The important failures were occasioned by the failure of continental remittances to meet the various London firms. This condition taken together with the slump in prices of securities of weaker countries has thrown the stability and intrinsic value of American securities into high relief. The disposition seems to be to regard American securities as the safest and soundest in which European investors can put their funds. Even when this present war is over it is feared that in several of the continental countries there will be severe internal disturbances which will make it absolutely necessary for continental investors to put their securities and funds in some safe harbor. This will mean the aggrandizement of London and New York and the safest financial centres in the world. Every advantage should be taken of this opportunity by American corporations and bankers to push their propaganda for the sale of American securities in Europe."

GRENFELL'S DEBTS.

At a meeting in London of the creditors in bankruptcy of Arthur Grenfell, chairman of the Canadian agency, he estimated his unsettled liabilities at £160,000, and returned Canadian Agency, Limited, as an unsecured creditor for £140,000 of that amount. In connection with the claim of the Canadian Agency, Limited, proof of debt had been lodged for £1,009,121, less securities valued at £153,083, thus reducing the net claims to £856,038.

The debtor disclosed as assets cash at bankers, £100; personal book debts, £300; household furniture, £12,000; equity of redemption in Roehampton house, value uncertain, and various share certificates.

He attributed his present position to the failure of the Canadian Agency, Limited, and to the present political crisis.

Grenfell intends to propose a composition, and the meeting was adjourned until November.

◆

SOME REAL ESTATE PRICES.

Settlements with owners of property taken for the Erie Terrace widening were reported to the Toronto board of control by assessment commissioner Forman as follows:—

Miss Margaret Pantalau, $42.10 for 210.5 square feet.

John E. Love, Erie Terrace, $39.66, for 198.3 square feet.

John Greenless, Ashdale Avenue, $42.82, for 214.1 square feet.

Edward Knott, Ashdale Avenue, $88.64, for 443.2 square feet.

Harry Long, Ashdale Avenue, $71.32, for 356.3 square feet.

Samuel McComb, Ashdale Avenue, $102.70, for 513.5 square feet.

Greenwood Hargreaves, Ashdale Avenue, $105.70, for 528 square feet.

Thomas E. Crisp, 307 Ashdale Avenue, $110.92, for 179.6 square feet.

Mrs. Mary Mulvaney, Ashdale Avenue, $373.70, for 1,413.5 square feet.

◆

ISSUE OF ONE POUND NOTES.

Notes of one pound sterling ceased to be legal in England in 1826. These and ten shilling notes are now being issued again. In the 18th century it was open to any person almost to issue notes for any amount, however small. Thousands of tradesmen issued them, for instance, and they became at last an intolerable nuisance. All this small paper currency was originally abolished in 1775. The preamble of the act gives an idea of the existing conditions:—

"Whereas various notes, bills of exchange, and draughts for very small sums have for some time past been circulated or negotiated in lieu of cash within that part of Great Britain called England, to the great prejudice of trade and public credit, and many of such bills and draughts being payable under certain restrictions, which the poorer sort of manufacturers [i.e., hand workers: the word had not yet reached its modern sense], artificers, laborers, and others cannot comply with, otherwise than by being subject to great extortion and abuse: be it therefore enacted that all promissory or other notes, bills of exchange, or draughts or undertakings in writing for the payment of any sum or sums in money less than the sum of 20s. in the whole which shall be made or issued at any time from and after the 24th day of June, 1775, shall be, and the same are hereby declared to be absolutely void."

An act of 1777 abolished all notes under £5. When specie payments were suspended in the later years of the great war the £1 notes were allowed from year to year until 1826, when there was a re-abolition of notes under £5. Since then they have been illegal in England, though their re-issue has often been proposed, and it must be admitted that many of the objections to them, which were quite valid in the reign of George III., have now no force whatever. On the Continent and in the United States paper currency is used to an immensely greater extent than in Great Britain. Gold coin is rarely encountered in Canada, for instance.

CONDENSED ADVERTISEMENTS

DEBENTURES FOR SALE

TENDERS FOR WATERWORKS AND SEWER DEBENTURES.

TOWN OF NEEPAWA, MAN.

Tenders, addressed to the undersigned, will be received up to Thursday, August 27th, 1914, for the purchase of $7,500 waterworks and sewer debentures of Town of Neepawa as follows:—

Extension of waterworks system	$2,609.34
Frontage tax sewers	4,890.76
Total	$7,500.00

The debentures bear interest at the rate of SIX per cent. per annum, payable half-yearly on the first days of May and November, repayable thirty years from date of issue, and have Interest Coupons attached.

The highest or any tender not necessarily accepted.

J. W. BRADLEY,
Secretary-Treasurer.

Neepawa, Manitoba.

Calgary oil exchanges are open and doing business again, though trading is light. With few exceptions all stocks are down and public interest is so taken up with the war that were it not that 15 wells are actually drilling, some of them day and night, oil developments might be thought at a standstill, which is far from being the case. The Herron Elder Company, whose smaller shareholders were adverse to amalgamation with the Consolidated, and at whose request an independent investigation was made into the company's financing, has emerged victorious from the inquiry.

FOOD AND WAR PRICES

Getting the Stuff Here and Length of War, are Important Factors.

The effect of the war on Canadian food trades is interesting. According to the current issue of the Canadian Grocer: "If the war does not actually interfere with the production of certain foods, the advance in others will cause such a sympathetic feeling that at least a great many of them will also be affected similarly."

"Foodstuffs," it says, "may be divided into two parts for the purpose of analysis here—imports and exports. While it is undoubtedly true that all foodstuffs coming from the Mediterranean will advance to a certain extent, the advance will be measured by the possibilities of getting the stuff to this country and the length of the war.

War Risks and Freight Rates.

"Apart from that altogether, the increase in rate of exchange, the rise in war risks and freight rates will have a tendency to advance prices all along the line. This advance alone equals 8 to 10 per cent. Should, however, the ocean routes be kept continually open, prices of products from countries not actually engaged in the struggle may not go very high, and especially those foods not actually required for the maintenance of life.

"But all foods that come to us from within the war zone will go up.

"As a direct result of the European war the following advances have already occurred on the Canadian wholesale market:—Sugar, 10 cents per cwt.; flour, 30 cents per barrel; rolled oats, 20 cents per cwt.; oatmeal, about 25 cents per cwt.; rice, 50 cents per cwt.; beans, 40 cents per bushel.

"Advances have also occurred in canned meats, future prunes, nuts, cream of tartar and other are possible in Mediterranean foodstuffs. English goods generally are up some 20 per cent. and French goods practically doubled.

Question of Transportation.

"If safe transportation is guaranteed vessels bound for Canada, products of countries not actually engaged in the war may recede. At time of writing cessation of transportation is having tendency to hold prices on this continent down and to cause prices in the East to be withdrawn or to advance.

"The tea market is unsettled. Three advances of 2 cents each are announced on London cables, and this applies to Ceylons and Indias particularly. In Canada opinions are divided as to whether importations can be made via Vancouver. In any event we should be able to get supplies from Japan either direct to Vancouver or through the United States. Coffee and spices should not be affected except by outside influences, but in all the markets there should be taken into consideration prospects for higher costs of transportation, increased rates of ocean insurance, higher exchange, etc.

Outlook is Not Serious.

"Generally speaking, the outlook is not a serious one in Canada so far as supply is concerned. There is little need for anxiety as regards staples, for this country produces much more than is consumed and there is an open border to the south. The United States will probably be the clearing house for food supplies in the event of a big European war, and Canada should have no trouble in getting what she needs even with England involved. This should apply to many imported lines as well. However, we may have to pay the price, not only for the foreign commodities, but for the home-grown as well, if England begins to call upon us for supplies."

◆

Mr. W. B. Bierce, formerly connected with the defunct Ontario Fire Insurance Company in Ontario, and with other Canadian insurance companies at Vancouver, has returned to Detroit, Mich., to become manager of the agency founded by his father 46 years ago.

A meeting of shareholders in A. and F. Pears, Limited, will shortly be held to consider a proposal for amalgamation with Lever Brothers, Limited. By the directors' scheme, the present ordinary shareholders in Messrs. Pears, who have been receiving a 10 per cent. ordinary dividend, will become holders of preferred ordinary stock, yielding 12 per cent. The business will be carried on under the same name as hitherto.

BANK OF ENGLAND GOLD

New York Financiers Talk of the Arrangement Made with Ottawa

The arrangement of the Bank of England to deposit gold at Ottawa, described fully in *The Monetary Times* last week, has aroused great interest.

One of the most important dealers in foreign exchange in New York city says: "The deposit of Bank of England gold at Ottawa in preventing the transfer of gold across the high seas will preserve the world's stock of gold. If gold were shipped and sunk, it could not be replaced, but would be a total loss. If the gold on the Kronprinzessin Cecilie had been sunk, it would have swamped Lloyds or any other insurance concern, and there would have been nothing in place of the metal. The preservation of the gold supply is therefore of the utmost importance.

"A fall in exchange as soon as commodities and grain are purchased in quantity through the deposit of gold at Ottawa is absolutely certain. There has never in history existed foreign exchange favorable to a country at war, and as soon as present balances are satisfied, exchange must become unfavorable to England. How soon the bottom will drop out of the exchange market, I cannot predict, but all wise managers are protecting themselves against the contingency."

Much Gold to Ottawa.

Mr. A. J. Hemphill, president of the Guaranty Trust Company, says that $5,000,000 gold shipped by the company on the Kronprinzessin Cecilie and returned to it last week, ultimately will be forwarded to Ottawa in accordance with the arrangement whereby deposits with the treasurer of the Dominion of Canada may be credited to the Bank of England.

"The Bank of England has a moral claim upon the gold," Mr. Hemphill added, "notwithstanding the inability of the steamship company to deliver it in London. The Bank made commitments against it as soon as the gold was engaged in New York. In my opinion all of the $10,600,000 gold returned by the Kronprinzessin Cecilie will be sent to Ottawa."

Will Pay Debts.

A well-known international banker in New York stated that the arrangement would allow the shipping of gold to the credit of the Bank of England without paying exorbitant rates of insurance or running the risk of a confiscation of the gold as contraband.

"As far as I know, no New York banker has availed himself of this new facility. It is a problem whether or not we should take advantage of it. What we are all working for is the establishment of such international exchange relations as will permit us to export our products, to find a market for our grain, cotton, steel, copper and merchandise. Assume that we send gold to Ottawa, we derive no future benefit from it. We will have depleted already inadequate bank reserves and have simply paid out money which will bring us no return in the future. We must, of course, pay what we owe. We always have. But since England has declared a moratorium, we can certainly take a little time now, time enough in any event to endeavor to perfect a plan whereby our obligations may be met in products we have for sale."

A London despatch says $100,000,000 in gold may go to Ottawa, as a result of the Bank of England arrangement. Authorities here are sceptical regarding the probability of such a large sum being shipped.

BUY MUNICIPAL DEBENTURES NOW.

In issuing a list of odd amounts of Canadian municipal debentures, the Dominion Securities Corporation, of Toronto, says: "For the person seeking a safe investment, one which will give relief from the anxiety and care of such times of stress as are prevailing now, municipal debentures provide a splendid medium. Government and municipal obligations have a record for safety surpassing that of any other form of investment." The prices quoted are lower than usual and present an opportunity, particularly to the man of small or moderate means, to obtain safe investments at advantageous rates.

How the Facts Compel Confidence

THE instinct of knowing when the inevitable will come around the corner is one half of success. That being the privilege of only a few, the art of accepting the inevitable is nearly as valuable. During the first week of war Canada, like other countries, dropped pen and tools and order books to read war bulletins. Later the country realized that this international struggle is not an affair of days. The next phase was a patriotic stand to assist Great Britain in the fight. Then came business self examination. Up to that point, the inevitable had been accepted in good spirit. Then there appeared a disposition for the business mind to make lengthy trips to meet trouble. So long have been these mental journeys that some have foretold even what disastrous days may come after war. Obviously that is the wrong attitude for business in Canada. Having accepted the inevitable, there are many substantial facts of consolation.

First, the British Empire has gone into a fight for good cause, and with excellent chances of victory. Second, Canada never before has had to face a crisis like this. It therefore gives an opportunity to show that the national business steel is well tempered. Third, the Dominion not being at the actual seat of war, some benefits come as a result.

The closing of one factory is taken as a conversational text and talked to distraction. Of the factories that have been given orders as a result of the war, making wheels revolve for many months to come, little is said. Too much business conversation is on that basis and this places business itself on the same unfortunate foundation. That is a mistake. The sooner every man will allow the brighter facts to attend him, and his business to be given the best possible impetus, the better will it be for the community.

It is right to exercise economy, but mistaken economy is out of place. The nation is made up of individuals. National business is made up of individual business and the national welfare of individual welfare. If five thousand people lack faith in the economic strength of Canada, that in the aggregate is a town's lack of confidence. Every individual who makes the problem of living more difficult for another, makes the problem still more difficult for a group. They in turn make it harder for the whole community. Sentiment plays a goodly part in business. If sentiment is poor, business will suffer. Waving a flag with one hand and closing the factory gate with the other does not help. Cutting the wages of the workman is just as disastrous to him as the withdrawal of a business man's bank credit at a critical moment.

Every employer should do his best to keep the labor situation as nearly normal as possible. An army of unemployed is a dangerous wound in the economic body. Unemployment creates extensive dissatisfaction and suffering. Further, it eats into the savings now placed in the post office, government and chartered banks in hundreds of millions of dollars. That money, where it is, helps to carry on business. If the individual does his part and makes even the so-called sacrifice, the entire community is doing its part automatically. The benefit is universal. That is what Great Britain is doing. Radical measures to assist are being taken in the British Isles by individual firms and by the government. Britain is following the policy outlined by Sir George Paish, who says:—

"Orders should be given, factories should be run, and everything should be arranged to maintain, as far as possible, the productive power and the income of the country.

"At such a time it is of the greatest importance that everyone should endeavor to act as if great events were not impending. Were confidence seriously disturbed business would come practically to an end, and our ability to face the difficulties that may be in front of us would be seriously impaired.

"Therefore, it is of vital importance that, as far as possible, the events that are now taking place should not interfere with the daily life and the daily work of the nation.

"It cannot be too clearly realized that the nation's income is dependent upon its daily work and its daily production, and that at a time such as the present it is desirable that every one should work harder and be more productive, in order that we may have the income, and therefore the money with which to meet any expenditure and any burden that may be placed upon us.

"Every one according to his ability must endeavor to work hard in order that individual incomes, and therefore the income of the whole nation, may be maintained at the highest possible level."

Some may contend that this is all very well as sentiment and talk, but that the facts speak otherwise. An analysis shows that many facts confirm cheerful business sentiment and encourage the policy outlined. The outstanding feature is the notable strength of the banking and financial situation in Canada. The banks had already prepared for a process of readjustment, which was due anyway after the recent active era of construction and speculative period. They were, at the outbreak of war, in an excellent position to cope with the situation. Since then, strong measures have been taken to make the financial position impregnable. The banks have been authorized to issue Dominion notes to such an amount as may be necessary against such securities as may be deposited by the banks and approved by the minister of finance and his expert advisers. The banks also have authority to make payment in bank notes instead of in gold or Dominion notes until further notice, and to make use of the crop movement emergency circulation from now until further notice.

The confidence in the national financial situation is strengthened by the fact that the Bank of England has established a depository for its gold at Ottawa with Canada's minister of finance as trustee. The Dominion's first war loan of $50,000,000 will be raised with comparatively little difficulty. The methods were outlined in the special budget speech of the finance minister last week. He is given authority by parliament to hold gold to the amount of 25 per cent. of Dominion notes issued up to a total issue of $50,000,000 instead of $30,000,000 as previously, and as respects Dominion notes issued in excess of $50,000,000, equal to such excess. The result of this provision will be an increase of $15,000,000 in the issue of free Dominion notes. By the special taxes on sugar, coffee, spirits and tobacco, an estimated revenue of $7,200,000 will be raised. That is a good beginning. It copes with the situation for some months to come and it is not a burden upon the people. Later the government may float a loan in the Dominion. The comparative ease with which subscriptions have been raised in campaigns throughout the country for various purposes, indicates that Canadians would oversubscribe any loan which the Dominion government deems wise to issue here. The British government's first war loan of $75,000,000 was oversubscribed by more than $135,000,000, the total subscriptions being about $210,000,000.

In the industrial world, one expects to find the same activity among executives as is being shown in Great Britain. There they recognize the prevalence of entirely new trade conditions. They are studying these without delay and their government is helping. They realize that trade obtained during war time is likely to be retained in times of peace. The manufacturers of Canada should co-operate with the Dominion government so as to keep machinery running as much as possible and to keep operators employed. Already, war has given an impetus to several industries. One firm has a government order for 40,000 pairs of military boots. Another firm is making a large quantity of goods such as tents, kit bags and cotton bags. An order for 35,000 military shirts has been placed in Toronto. The flour mills of Canada are working overtime grinding Canadian wheat into 96,000,000 pounds of flour, the Dominion's gift to Great Britain. The pulp and paper companies are unusually busy and during the past week or so have received large orders for shipment to England, South Africa and South America. There will be a good demand for the wheat, grain and fruit crops of the country, and good prices too. The factories, forests, mines, fisheries and agricultural lands will continue to supply their share of national revenue. Last year the value of their production was $2,500,000,000.

Instead of boasting of a population of 8,000,000, as in the past, there is cause for satisfaction in the fact that the population is considerably less. During the past eighteen months, while the world-wide trade depression has been in evidence, many thousands left Canada, returning to Great Britain and to the United States. Both those countries have stronger financial resources than has Canada, in this critical period, to support those numbers. The cessation of immigration is fortunate too at this time. It relieves the labor situation to that extent. Again, the number of men who are leaving productive employment here for military service is comparatively small; a great advantage compared to the situation in Europe.

While trade has ceased with Germany, the British navy has managed with little difficulty to keep open the shipping routes on the Atlantic and Pacific. The United States and British markets are still open to Canada. In those two markets is the Dominion's biggest trade, and to them may be added what was once German business, although some allowance must be made for reduced purchasing power in this country. For the twelve months ended June, 1914, Canada exported produce from its mines, fisheries, forests, factories and herds, valued at $423,827,000 compared with $363,000,000 in the corresponding twelve months in 1913 and $311,000,000 in 1912.

It is unfair to compare conditions to-day with those of last year, with those of 1907 or with those of any previous year. The year 1914 presents to Canada an entirely new situation. The government, bankers and business men legitimately may take radical measures to deal with a position that is not likely to occur for another half century and maybe never again. It is unreasonable to expect conditions like those of 1912 and the few years previous. If the governments of the Dominion and business men everywhere will do their part to meet the unique case of nineteen fourteen, there will be reason for congratulation in after years, because such action means the maintenance of the national workshop, national credit and national satisfaction. The country had previously accepted the fact that a readjustment of conditions was due. The war is aggravating the process to some extent, but the final result of the readjustment will be wholesome. Favorable facts, confidence and good business sentiment may trip together without trepidation.

GERMANY AND ITS COLONIES

Prince Bismarck was never an enthusiast in the German colonial movement. Great Britain's "colonies," many of which have grown to the rank, dignity and strength of overseas empires, always have been an object of envy by German expansionists. They managed to draw Bismarck into their sphere of thought, but he was frank in his opinion that the German colonial movement had come too late to be successful. Kaiser Wilhelm thinks otherwise.

Germany has 1,000,000 square miles (excluding Congo) of colonial empire. Twenty thousand of its sons people that area, with over 14,000,000 natives. Ten thousand of them are soldiers, police and civil servants from the Fatherland. Their colonies, generally speaking, are unfortunate mixtures of climate and fertility. Where the climate suits Europe, the natural resources are insignificant. Where the natural resources are of value, the climate is fatal to settlement by whites. Taking the colonies as a whole, there is, according to Mr. W. H. Dawson, a close student and writer of German affairs, one German to every fifty square miles of territory. The native of Togoland, which was surrendered to the British this week, is lazy. Even if he is forced to sow seed, he may refuse to garner the crop. Togoland's value to Great Britain just now is the possession of an extensive and far-reaching wireless station there.

Kiau-chau, a German protectorate in China, has received considerable German attention in recent years, probably because it is a naval and military station. Since the German occupation, this dependency is said to have been converted "into a veritable pearl," but it has been a costly one, and shows a deficit of $2,000,000 a year. Japan is now making history in that neighborhood.

A study of the German colonial movement brings one to the conclusion that after thirty years it is a failure.

Canada's War Financing is Done Well

HELPING to finance a war is a new experience for Canada. It comes when North America is celebrating a century of peace. The Dominion government, the minister of finance, and bankers, have dealt with an entirely new situation in a highly creditable manner. Signs of panic have not been in evidence. Special financial measures had to be devised to cope effectively with a unique position, one which arose with startling suddenness. These within a few days have been placed upon the statute books, and will make impregnable the national finances. Last week a war appropriation of $50,000,000 was voted for the following purposes:—

(a) The defence and security of Canada; (b) The conduct of naval or military operations in or beyond Canada; (c) Promoting the continuance of trade, industry and business communications, whether by means of insurance or indemnity against war risk or otherwise; and (d) The carrying out of any measures deemed necessary or advisable by the Governor-in-Council in consequence of the existence of a state of war.

Parliament has also given authority to make advances to the chartered banks by the issue of Dominion notes upon the pledge of securities, deposited with the minister of finance, of such kind and amount as may be approved by the Treasury Board, such advance to be repayable at such times as the board may determine with interest at a rate likewise determined by the board of not less than five per cent. per annum;

(b) to allow the chartered banks to make payments in the bank notes issued by such banks instead of in gold or Dominion notes, the total amount of the notes of any chartered bank circulation at any time not, however, to exceed the amount of its notes issuable under the provisions of the Bank Act, and of an enactment founded upon the next succeeding clause of this resolution;

(c) to authorize the banks to issue excess circulation, from and including the first day of March in any year to and including the last day of August next ensuing or during any part of such period, to amounts not exceeding fifteen per cent. of the combined unimpaired capital and rest or reserve fund of the respective banks, interest to be payable on such excess circulation at a rate not less than five per cent. per annum;

(d) to suspend the redemption in gold of Dominion notes;

(e) to authorize a moratorium, if necessary.

Further, the following resolution has been passed. 1. Resolved, that it is expedient to increase the power of issue of Dominion notes by providing that the minister of finance shall hold gold: (a) to the amount of twenty-five per cent. of the Dominion notes issued up to a total issue of fifty million dollars (instead of up to a total issue of thirty million dollars as heretofore); (b) as respects Dominion notes issued in excess of fifty million dollars, equal to such excess; and further, that Assistant Receivers General's offices be established at Regina and Calgary.

Every one of these measures may not be utilized. There is some doubt, for instance, as to whether the declaration of a moratorium is necessary. Still, the legislation is on record if it is needed during the crisis.

The raising of Canada's war loan presents interesting phases. The government is authorized to use an appropriation not exceeding $50,000,000. The details of the expected expenditure of $30,000,000 between now and the end of the fiscal year ended March 31st, 1915, for military purposes, as given by Premier Borden, include the following:—

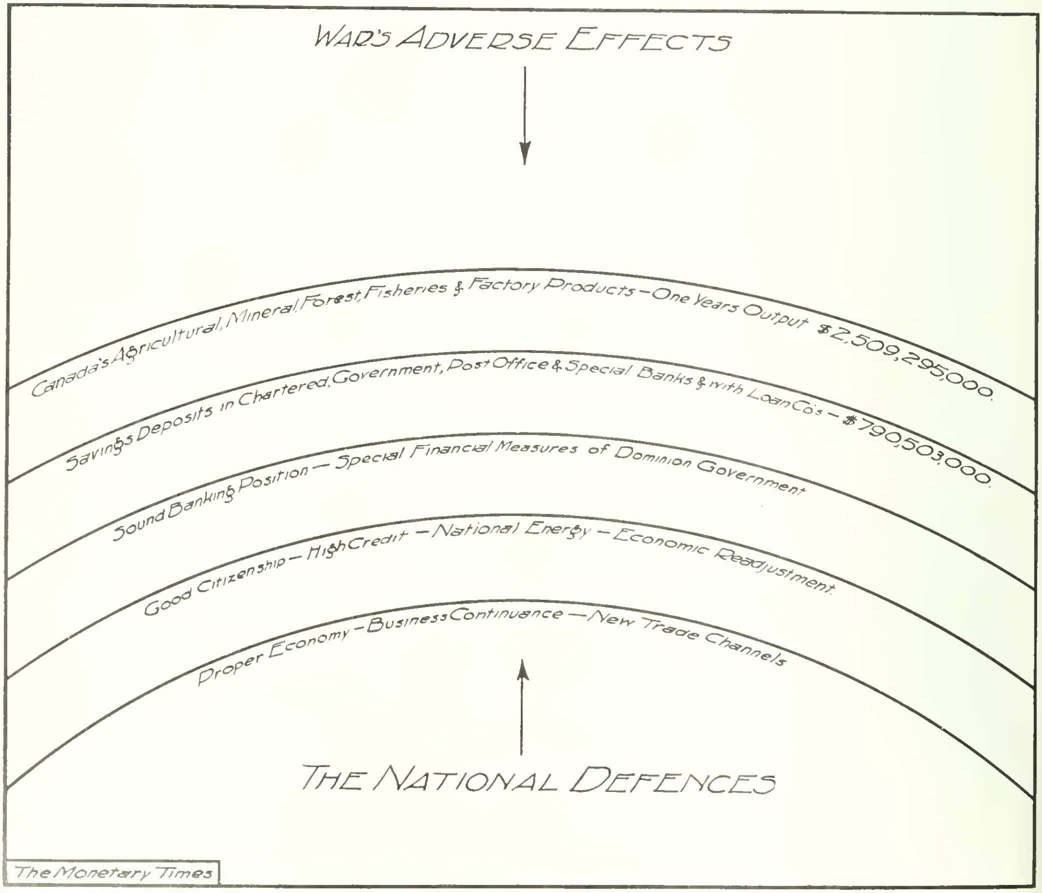
Pay of 25,000 officers and men for seven months, $6,100,000; rations at 40 cents per man, $2,100,000; purchase of 5,000 horses at $200 per horse, $1,000,000, transport to Quebec, $450,000; ocean transport, $1,000,000; transport abroad, $300,000; return transport to Canada, $1,450,000; engineers' services at Halifax, Quebec and elsewhere, $500,000; equipment, $2,400,000; clothing, $300,000; ammunition from Dominion arsenal, $660,000; censorship, $150,000; pay and maintenance of troops on guard in Canada, $2,000,000; for additional troops and unforeseen expenditure, $7,015,000.

The special war taxes, which will not fall heavily upon the people, will bring an extra revenue estimated at $7,200,000. The new legislation regarding Dominion notes will give the government, $15,000,000. In explaining this legislation, Hon. W. T. White, finance minister, has stated that the present gold holding, both by the Dominion and by the chartered banks, as security against the note issue, is approximately $120,000,000. The gold now held in the treasury against Dominion notes totals $91,735,584. Under the new legislation, whereby there may be a note issue up to $50,000,000 against a holding of 25 per cent. in gold, the percentage is 81. The reduced percentage will still be larger than that held by the Dominion prior to 1899.

Other sums will be raised by way of loans. Where the money will be obtained has provoked discussion. In his statement to *The Monetary Times* last week, Mr. Bryan, secretary of state at Washington, makes it clear that the Canadian government should not be financed by United States bankers. No occasion, by the way, has arisen in past years to raise a government loan there. President Wilson's disapproval of United States bankers making loans to belligerent governments leaves two courses, the raising of loans in Great Britain, or in Canada. The first seems somewhat impracticable, although Great Britain's loan of $50,000,000 to Belgium seems to admit of the possibility. That loan indicates that the British investment market for war purposes is not confined to the requirements of the British government. If Great Britain intends, to some extent, to act as banker to the countries outside the Empire, but fighting with Britain, there is a hope that England may subscribe some part of the loans required to make up Canada's war appropriation. Sir George Paish has stated that if the occasion should arise, the British people should be able, without any serious difficulty, to raise loans amounting to $1,000,000,000 a year. This is in addition to any sums they may derive from the sale to the United States of a part of the great quantity of American securities they now possess. If the London market is not available for such a Canadian loan, either permanent or temporary, the funds probably will be raised in Canada, and without difficulty. But it would not surprise *The Monetary Times* to see a loan of, say, $8,000,000 raised in Canada and one of $20,000,000 in England in connection with the Dominion's war financing. The Canadian Associated Press dispatch from London suggesting that the loan will be raised chiefly in the United States is obviously far from the mark.

Some of the Lines of Canada's Defence

CANADA is in an extraordinarily strong position in this time of crisis. One justly may feel pride in the manner in which the countries of the British Empire have handled the situation in financial and commercial spheres. This Dominion is young, as nations count years, but it has followed British traditions with admirable skill and spirit. The financial house has been placed in order, rapidly and effectively. The governments of Great Britain and Canada have taken strong measures to keep the national wheels moving. German commerce is paralyzed, British commerce soon will be working on schedule. Germany's financial measures are creating for it a terrible strain. Great Britain can raise loans of a billion dollars a year, with little trouble. Germany is being cut off from the world. Britain is welding more strongly than ever, the sentimental and commercial links of Empire. Canada is the larder of the Empire and Canada's citizens must keep the shelves well filled for those at home and overseas. If borrowing powers are reduced for the present, the Dominion may concentrate energy upon production. Last year, Canada produced $2,509,000,000 of wealth in its fields, factories, fisheries and forests. Now that capital is harder to borrow, more attention may be paid to its creation. The possibilities are here. With these satisfactory conditions at home, naturally one looks next to Germany, many of whose industrial workers are being placed in the line of battle. Germany, the London Times tells us, "is making an astounding drain upon her financial reserves and her credit system and creating a situation which may be tolerable in victory, but will be appalling in defeat."



War's Adverse Effects
Canada's Agricultural, Mineral, Forest, Fisheries & Factory Products—One Years Output $2,509,295,000.

Who will get Germany's lost trade the world over?

Canada won the last trade war with Germany and has good opportunities to win this one.

"Made in Canada" looks better, too.

There is the business map to study as well as the war map.

"PRONOUNCED STIMULATION AND ACTIVITY"

Canada's Finance Minister Says There are Many Bright Spots in the Situation—Special Budget Speech.

"TO many of our industries, and notably to agriculture, there should be pronounced stimulation and quickening of activity. Trade between Canada and the Motherland will undoubtedly receive an impetus, the importance of which to our future relations it would be difficult to overstate. If I have any general advice to offer, it is that the people of Canada will, as I am sure they will, continue to maintain the calm, sane judgment for which they have always been noted. Above all, confidence is a supreme patriotic duty—confidence in one another, confidence in our country and its institutions, in the Empire, in the righteousness of our cause, and, under Providence, in the certain ultimate triumph of our arms."—Hon. W. T. White, minister of finance, in the course of his special budget speech at Ottawa.

Canada's first war budget in a hundred years has made the finance minister's speech at Ottawa last week an historic utterance. In introducing the special fiscal measures, Mr. White made a brief statement of the financial position of the Dominion and of the new situation as it presented itself to him. Not the least interesting was his appeal to the country, quoted above, for a maintenance of their confidence in their country's strength.

"Owing to widespread financial and economic conditions, to which I referred at length in my budget speech of April," said Mr. White, "our revenues since September last have shown a marked decline. During the first four months of the present fiscal year, April, May, June and July, we have experienced a reduction, as compared with the same four months of the previous year, of over ten million dollars.

"In consequence of a general increase in commercial activity, due to easier money conditions, a marked improvement became perceptible about the end of July. The extent of this improvement is reflected in the returns of the first ten days of August, the loss of revenue being $500,000, or at the rate of say $1,500,000 for the month, as compared with an average decline of $2,700,000 for each of the four preceding months.

"As the decline in revenue for the last fiscal year had begun in October, we had calculated that during the remainder of the calendar year we would gradually overtake the revenues of the corresponding months of the previous year and could look forward to gains in January, February and March which would have recouped in some measure our earlier losses. This outlook has been wholly changed by the war.

"Before the outbreak of war we had calculated upon a revenue of $145,000,000 and an expenditure of about $175,000,000, of which $135,000,000 would have been upon Consolidated Fund Account and $40,000,000 upon capital, special and investment accounts.

"In June last we floated a loan of £5,000,000, the proceeds of which with our expected revenues would have carried us into next fall when a further loan of say £3,000,000 would have sufficed for our requirements until the end of the fiscal year, including the retirement of £1,700,000 treasury bills maturing in November next. Our present cash position is normal, our bank balances both in Canada and in London having been well maintained.

"I proceed now to deal with the situation as changed by the war. As to revenues for the remainder of the year it is with much hesitation that I venture upon an estimate. For some time past I have had the tariff experts of my department and of the customs department considering the question. That we shall experience a sharp decline in customs revenue due to decreased importations seems certain.

"The war itself shuts off automatically our trade with the enemy. The increased risk of ocean traffic must have a most serious effect upon our seaborne commerce. Above all the temporary cessation of the stream of our borrowings in Great Britain will diminish our capital and other expenditures and express itself in a marked diminution in our imports. On the other hand we shall probably increase our imports from the United States, through whose ports goods from Europe will no doubt find their way. The enhanced prices of our grain, food and other products will give us greater buying power than we should have otherwise possessed from this source. After careful consideration of all these aspects of the question we are of the view that our revenues from present sources for the year should reach from $130,000,000 to $135,000,000.

"With regard to expenditures it will be the policy of the government so far as possible to maintain the existing programme of public works under construction. New works will not, however, be undertaken until the financial situation clears, and in this connection we must ask the forbearance and co-operation of members of both sides of the House. On the one hand we do not desire to shut down construction now under way with the consequent resulting unemployment, and on the other we must have in mind existing financial conditions and embark upon new expenditure only when we have in view the source of funds with which it may be defrayed. Under this policy I estimate that our revenue will just about suffice to meet our ordinary running expenditure; at least I am hopeful that it will do so.

"This leaves to be otherwise provided for capital, special and investment expenditure a sum totalling probably $30,000,000, together with such special expenditure as we may make for the common defence of Canada and the empire. We are asking parliament for a vote of $50,000,000. What portion of this may be expended during the remainder of the fiscal year is problematical, but we must assume at least the greater part. With the world at war and our national existence at stake, it is not the part of patriotism to spare either blood or treasure, and the government may be depended upon to continue to uphold to the utmost of its power the arm of Britain in the fateful contest in which she is now engaged for the preservation of the empire and the freedom of the world.

"Assuming a capital and special war expenditure of, say, $60,000,000, we must further provide $8,500,000 for the retirement of treasury bills maturing in November, making a total of $68,500,000, which must be met by the proceeds of horrowing or special taxation. We have already borrowed $25,000,000 by the issue of June. This leaves a balance of $43,500,000 which we must now devise ways and means to meet.

"To partially meet the special war expenditure I have to propose certain increases in customs and excise duties upon articles and commodities to the taxation of which resort is usually had in the emergency of war. The special war taxation which I have to propose to the House will affect the rates of duties of customs and of excise upon coffee, sugar, spirits and tobacco. (The duties are detailed on another page of *The Monetary Times.*)

"These special war taxes, representing only a small fraction of our increase in military and naval expenditure, due to the critical situation which has arisen, will fall upon the entire community. In paying them each citizen will feel that the amount he pays is a direct contribution to the defence of Canada and the empire.

"From these special war taxes I estimate we shall derive additional revenue of about $7,000,000 during the remainder of the fiscal year. This leaves a sum of over $36,000,000 to be provided by borrowing. We shall, as opportunity offers, issue further loans, but I must state to the House that the amount upon which we can rely from this source is conjectural and dependent upon the course of events.

"In these circumstances I am taking authority, by legislation amending the Dominion Notes Act, to increase the amount of notes which may be issued against a 25 per cent. margin of gold from 30 to 50 million dollars. This will give us an additional $15,000,000 free money borrowed from our own people upon the Dominion's credit. We shall avail ourselves of this emergency measure to the extent that it may be found necessary to supplement our borrowings otherwise. I have already given notice of the legislation in that behalf.

"As to the effect of the war upon industrial and commercial conditions in Canada, I do not regard it necessary that I should upon this occasion make any special pronouncement. Injury there will no doubt be to some of our enterprises, but such injury may be most marked at the beginning and not of long duration. In the circumstances I feel that I can confidently appeal to all employers of labor to continue to carry on their operations to such extent as may be feasible to them in order that the distress of unemployment may be minimized as much as possible, and that the first brunt of the war may not fall too heavily upon the working community."

"MADE IN GERMANY"

The following public bodies in Canada have decided not to purchase goods made in Germany:—

City of Winnipeg.
London board of control.
London public utilities commission.

DO NOT HOARD MONEY.

First and foremost.—Keep your heads. Be calm. Go about your ordinary business quietly and soberly. Do not indulge in excitement or foolish demonstrations.

Secondly.—Think of others more than you are wont to do. Think of your duty to your neighbour. Think of the common weal.

Try to contribute your share by doing your duty in your own place and your own sphere. Be abstemious and economical. Avoid waste.

Do not hoard money. Let it circulate. Try to make things easier, not more difficult.

Remember those who are worse off than yourself. Pay punctually what you owe, especially to your poorest creditors.

If you are an employer think of your employed. Give them work and wages as long as you can, and work short time rather than close down.

If you are employed remember the difficulties of your employer. Instead of dwelling on your own privations think of the infinitely worse state of those who live at the seat of war and are not only thrown out of work but deprived of all they possess.

Do what you can to cheer and encourage our soldiers. Gladly help any organization for their comfort and welfare.

Explain to the young and the ignorant what war is, and why we are forced to wage it. From the London Times.

Shipping item says, "German bark safe," but only the bark

Sentiment counts a whole lot. Let it be good because the facts justify.

Favorite beverage of the finance minister is the Ottawa Mint julep.

As a Bank of England director may have remarked, Ottawa is taking the gold cure.

A practical move towards economy of money and effort is being made by the Calgary oil exchanges, five of which have agreed to amalgamate as the Calgary General Stock Exchange. Thus thirteen exchanges have become four. Commissions have been cut also. For a $10 purchase the buyer pays 25 cents, the seller nothing. For a $100 transaction or over the terms are one per cent. This is subject to change when the exchange amalgamation is properly working. An advance from the low point of ten days ago is noticeable in practically all stocks, although no further reports of any consequence have come from the field. The number of working drills has increased this week by two.

CANADA AND THE FRANCO-GERMAN WAR

What The Monetary Times Said in 1870—Some Benefits from Struggle

The following editorial appeared in an issue of *The Monetary Times*, dated August, 1870, just after the Franco-German War broke out:

"The present war in Europe began so suddenly that none of the nations not engaged in it had the opportunity to forecast proceedings to protect their respective revenues from the results that have invariably followed expensive and continued wars, nor had the commercial world time to prepare for probable contingencies. In the condition of the world, with its numerous and powerful facilities for communication and transportation, as compared with those of the time of the first Napoleon, war is more destructive and more fatal, and trade and commerce are more certainly and more ruinously affected than in any former time. Armies are greater, more efficient, and more rapid in their movements, and consequently more fatal in their effects to both life and property.

Soldier is Hungry.

"The armies now in the field, and the non-combatants employed to provide for their sustenance and support, comprise not less than two millions of men, who have been removed from their usual avocations of peace—changed from producers to mere consumers. They are the pick of their countrymen, most of them in the prime of life, and, as producers, much more effective than their fellows who remain at home. As consumers, they will be at least twice as costly now as before the war. A soldier during a campaign is a hungry animal. In his own country he becomes voracious, in an enemy's country destructive. The Prussian soldiery, in the vaults at Epernay, probably destroyed as much champagne as would at home have bought a twelvemonths' supply of their common daily food. If we suppose the war to continue only six months, it is certain that the unnatural consumption of stocks of all kinds will have reduced them to so low an ebb that they could not be replaced by the hands that made them in less than twelve months. But the hands that made them will not be found when the war shall cease. Dead, disabled and demoralized, the population of both France and Prussia will return to their ploughs, their mines, their looms and their wine-presses, reduced in numbers, weak and unwilling to resume their inglorious labors.

Europe's Productive Powers.

"Other causes are at work that will seriously affect the productive powers of both Germany and France. Every successful manufactory, has had its struggle to achieve a remunerative position. Its workpeople have to be educated, and time is required to obtain cohesive power. Its channels of commerce have been disturbed and blocked up, and they cannot be re-occupied instantaneously. In some cases they will be changed, in others re-opened. All these preparatory proceedings will occasion more or less delay to the resumption of trade and commerce, on a scale like that held before the war.

"It is not, however, the belligerent countries alone that will be affected. Uncertainty is almost as prejudicial to production as absolute decay. Supply and demand are never commensurate. Accumulated stocks affect both; and stocks will not be accumulated when those who would hold them, cannot tell whether they may be able to sell them in six, twelve, or twenty months, if at all. Therefore the great depots for the continent of Europe, that exist in England, for woolen and cotton, for iron and coal, will be gradually reduced.

More for Imports.

"If the war cease as suddenly as it began—indeed, whether it cease suddenly or not—importers in British America, and especially in the Dominion of Canada, must be prepared to pay increased prices for the goods they import. Yet good and evil are so inevitably mixed in all earthly matters, that Canada may be greatly benefited by the war. Her exports being of raw produce, would be first to rise in value, and under the benign influence of peace, they ought to be increased materially. The war will certainly increase emigration, add to our population, and tend to enhance the value of our lands."

CANADA'S SPECIAL TAXES NOT BURDENSOME

Tariff Changes to Help Finance War Are Well Planned

The tariff changes announced by the minister of finance at Ottawa last week and made in connection with Canada's war budget, are as follow:—

Article	Present Tariff		New Duties	
	Brit. Pref.	Gen.	Brit. Pref.	Gen.
Cocoa paste, sweetened	3½c.	4c.	4c.	4½c.
Cocoa powder	20 p.c.	25 p. c.	22½ p c.	27½ p.c.
Cocoa and chocolate preparations	22½ p.c. and ½c. per lb.	35 p.c. and ½c. per lb.	22½ p c. and 1c. per lb.	35 p.c. and 1c per lb.
Coffee extract	2c.	3c.	5c.	6c.
Coffee, roasted, N.O.P	1½c.	2½c	4c.	3c.
Coffee, roasted, indirect	10 p.c and 1½c.	10 p.c. and 1¾c.	10 p.c. and 2c.	10 p c. and 5c.
Coffee, green, indirect	Free	Free	2¼c	3c.
Coffee, green, N O.P.	10 p.c.	10 p c.	10 p.c. and 3c.	10 p c. and 3c.
Condensed milk	2c.	3¼c.	2½c.	3¾c.
Condensed coffee and milk	20 p.c.	30 p c.	25 p c.	35 p.c.
Milk food, N.O.P.	17½ p c.	25 p.c	20 p.c.	27½ p.c.
Biscuits, sweetened	17½ p.c.	27½ p.c.	20 p c.	30 p.c.
Fruits, preserved in brandy not exceeding 40 p c	50 p c.	50 p.c.	60 p c.	60 p c
Fruits, preserved in brandy exceeding 40 p.c.	2.40 gal. and 30 p c.	same	3 00 and 30 p c.	same
Fruits, canned	1½c.	2¼c.	1¾c.	2[illegible]c.
Jellies, jams, etc.	2¼c.	3¼c.	2[illegible]	3[illegible]c.
Preserved ginger	20 p.c.	30 p c.	25 p c.	35 p.c.
Cocoa desiccated	3c	4c	3½c	4[illegible]c.
Sugar, refined, 99 degrees	83c per 100 lbs.	1.07 2-3 per 100 lbs.	1.63 per 100 lbs.	2 07 2-3 per 100 lbs.
Sugar, raw	40¼c	57½c.	1.03[illegible]	1.37[illegible]
Confectionery	22½ p.c.	35 p.c.	22½ p.c. and ½c.	35 p.c. and ½c.
Cigars and cigarettes	3.00 per lb. and 25 p.c.	same	3.50 per lb and 25 p c.	same
Other tobaccos	50 and 55c.	same	60 and 65c.	same
Ales, beers and porters, in casks, per gal.	16c.	same	30c.	same
Ales, etc., in bottles, gal.	24c.	same	42c.	same

Lime and fruit juices having not more than 25 per cent. of proof spirits are placed under a duty of 75 cents instead of 60 cents per gallon. If the proof spirit is more than 25 per cent., the specific duty is raised from $2.40 to $3 per gallon, the ad valorem duty remaining unchanged at [illegible] per cent. Lime juice and fruit juice, N.O.P., are increased from 20 to 22½ per cent. under the general tariff and from 15 to 17½ per cent. under the British preference.

Alcohol is increased from $2.40 to $3 per gallon.

On alcoholic perfumes in small bottles the duty is raised from 50 to 60 per cent.; in larger bottles the specific duty is raised from $2.40 to $3, the ad valorem duty to remain unchanged.

On spirits of nitre the duty is also raised from $2.40 to $3 per gallon.

On medicated wines the increase is from 50 to 60 per cent.

On malt flour a special war tax of [illegible] cents per pound is imposed in addition to the existing ad valorem duty of [illegible]5 per cent.

Chemical preparations, including patent medicines, when dry, remain unchanged; but on all others the duty is raised from 50 to 60 per cent. If they contain more than 40 per cent. of proof spirit the specific duty is increased from $2.40 to $3 per gallon.

Paints and colors, ground in spirits, are increased from $1 to $1.25 per gallon.

The excise duties on spirits and tobacco are increased as follows:—Malt liquor from 10 to 15 cents per gallon. Malt from 1½ to 3 cents per pound. Spirits from $1.90 to $2.40 per gallon. Cigars, $2 to $3 per thousand. Manufactured tobacco from 5 to 10 cents per pound.

The percentage of increase in rates of duty and excise on the principal items in the war budget are as follows:—

Customs.

Raw sugar, 147 per cent.; refined sugar, 93 per cent.; canned fruits, 25 per cent.; condensed milk, 15⅓ per cent.; desiccated cocoanut, 12½ per cent.; bottled beer, 87½ per cent.; beer in casks, 75 per cent.; spirits, 25 per cent.; manufactured tobacco, 20 per cent.; cigars and cigarettes, 16⅔ per cent.

Excise on Domestic Products.

Spirits, 25 per cent.; beer, cigars, tobacco, 50 per cent.

The percentage of customs increase on imports exclusive of raw sugar is reckoned on the intermediate tariff in view of the fact that the increase will at the present juncture affect principally imports from the United States under the intermediate tariff. In the case of raw sugar which comes from the British West Indies the increase is reckoned on the British preferential rate.

◆

NEW TRADE OPPORTUNITIES

Stoppage of German Trade the World Over Gives Canada Advantages

Evidence has come before the department of trade at Ottawa in the remarks of several United States publications to show that the people of that country are realizing the opportunity that is presented for enlarging their export trade, now that active competition in the world's markets on the part of several European countries has been withdrawn as a result of the present war.

"To a certain extent," says a bulletin issued by the department, "the arguments put forth by these publications are applicable also to Canada. While it is generally pointed out that an extended European conflict will prove of great benefit to Canada as a supplier of foodstuffs, the opportunity that is given to Canadian manufacturers to develop their export trade, through the temporary withdrawal from the sphere of world trade of such countries as Germany and Austria-Hungary does not appear to be generally realized."

Austrian and German Trade.

The bulletin then deals with trade opportunities open to Canada. "First of all," it states, "as a result of the war Canada's direct trade with Germany and Austria-Hungary must necessarily suffer. In 1913 Canada imported from Germany goods worth $14,47[illegible] and she exported to Germany goods to the value of $[illegible], a total trade of $[illegible],227. With Austria-Hungary, Canada conducted a total trade to the value of $1,[illegible]20,543, of which $[illegible] consisted of imports and $154,504 of exports. It is thus seen that these countries, especially the former, had obtained a foothold on the Canadian market which will be lost during the progress of the present war. An opportunity is presented for other countries to increase their trade with Canada and for Canadian producers to make up a part of the deficiency thus created."

The foremost market of which Germany will be deprived as a result of the war is the United Kingdom, which has been buying goods from Germany at the rate of about $145,[illegible],000 a year. Germany's exports of agricultural machinery to Great Britain in 1913 were $[illegible],180, as compared with $[illegible]7,000 from Canada; of sewing machines, $[illegible], as compared with Canada's $2,2[illegible].

Big Machinery Trade.

Under the head of machinery Germany has exported to Great Britain to the value of over $5,[illegible] a year; of electrical machinery, over $3,000,000 a year; of electrical goods and apparatus, $[illegible] a year; hardware, $4,000,000; boots and shoes, $2,[illegible]; brooms and brushes, $[illegible],000, as compared with an export from Canada of only $7,117; of paper, $2,017,5[illegible], as compared with an import from Canada of $587,010.

Germany's trade with various British dominions has also been large and here also is an opportunity for Canadian manufacturers. Australia's purchases from Germany amount to over $[illegible] a year, as compared with [illegible] $[illegible],587 from Canada. South Africa imports $[illegible] worth of German goods annually, as compared with [illegible] $4,[illegible],000 from Canada.

◆

Confidence is a business asset that helps to pay dividends.

Leave the Kaiser alone and get some of his country's orders.

Canada's production last year, valued at $2,500,000,000, will give us a little pin money anyway.

If every man takes a plank out of the business bridge, all will tumble. Leave your plank where it is.

War, Finance and Commerce

Brazil Renews Treasury Bills.

Brazil, being unable to repay £1,400,000 treasury bills expiring this week, has renewed the issue for a year at 17 per cent.

German Patents Taken.

The British patent office is taking steps to nullify German blocking of patents, which have been preventing British competition in certain branches of chemical manufacture.

British Treasury Bills.

The issue of $75,000,000 treasury bills in Great Britain, four times oversubscribed, were in amounts of £1,000, £5,000, or £10,000. They are dated August 22nd, and will be payable at six months after date, namely:—on February 22nd, 1915.

Japan is Financed.

The Japanese Minister of Finance says he will obtain war funds from the surplus and special funds on the treasury of last year, and no new loans will be floated. He added that Japan has an advantage in the situation since China is a silver country.

Moratorium for Denmark.

Official telegrams from Denmark announce that the Danish Parliament has voted a three months' moratorium covering all debts except civil law debts and coupons until October 10. No suit is possible for a debt contracted after August 1, abroad or toward a foreigner.

Big Loan to Belgium.

A despatch to the Havas Agency from Paris says that France and Great Britain have agreed to advance Belgium five hundred million francs ($100,000,000) to enable her to face the necessities arising from the war. France and Great Britain will each provide one-half of this sum.

Bank of Montreal Gift.

The directors of the Bank of Montreal will set aside an appropriation of $100,000, half to be given unconditionally to the Canadian Patriotic Fund, and the remaining $50,000, if required, will be given to the same fund or to other national funds, according to later decision of the directors.

Special Financing in Peru.

The Peruvian Congress has authorized the banks to issue $5,000,000 bank checks guaranteed as to 35 per cent. by gold. The remainder is guaranteed by mortgages. As gold circulation is paralyzed the public welcomes the bank checks which are considered as necessary for commerce.

Financing in Italy.

In a despatch from Rome the correspondent of the Havas Agency says an issue of new paper notes has been authorized by Royal decree. The notes are to be five and ten lire ($1 and $2) to the amount of 350,000,000 lire ($70,000,000) entirely covered by silver in the treasury. Bills of one and two lire (20 and 40 cents) also will be issued.

Marine Insurance Down.

The British Colonial Secretary has notified the Canadian government that Lloyds and other marine insurance companies are now insuring cargoes across the north Atlantic at two per cent., and cargoes from the United Kingdom to the far east at three per cent. The British Government rate of war insurance has been lowered from four to three per cent.

Clever German Finance Checked.

The London Statist states that German banks have been trying to finance German trade with British money. In a clever way they get German bills accepted in Amsterdam and other neutral markets in large amounts. These bills are sent to London with the hope that they may be dealt with there. The banks have unanimously refused them, however, and the bills have been returned to the senders.

Fighting With Finance.

A warning was issued by the Stock Exchange Committee to brokers holding balances and securities of alien enemies to retain the same during the war, unless to satisfy German legal obligations to British subjects incurred before the war. This initial step is to insure the stock exchange participation in any clearing scheme for German debts and credits. Berlin and Frankfort banks endeavored unsuccessfully in the middle of the week to dispose of English bill holdings in Rotterdam. Dutch bankers, after tracing the source of the bills, refused to take the risk.

To Buy German Boats.

The United States senate commerce committee has received from the treasury department the draft of a bill providing for the creation of a corporation to purchase and operate merchant vessels to carry American products abroad during the war. The majority of the stock is to be owned by the government. The bill was drafted by officials of the treasury department and a committee of business men. The president has approved the plan. The capital stock of the corporation is to be $10,000,000, a majority of which is to be owned by the government, the remainder to be sold to the public. The bill provides for the issue of $30,000,000 of Panama Canal bonds to finance the corporation and its operation.

◆

THESE CONSIDERATIONS WILL HELP.

"The prompt action of the Dominion government in increasing the note circulation of the banks has prevented any tension in domestic financial operations," says the council of the Vancouver board of trade, "and we have ascertained from leading bankers of the city that there is no intention to curtail legitimate business credits. We point out, however, that money hoarded, and not deposited as usual, and so withdrawn from circulation, to that extent restricts financial operations and is consequently detrimental to general business.

"The pronouncement of the Dominion government that public works are to be proceeded with will continue supplies and employment in that channel, without interruption.

"We have no reason to contemplate any curtailment in the expenditure by the provincial government or public bodies controlling government funds.

"We must not forget that there will be heavy outlays by the British government in purchasing our grain and other necessary commodities, and also that there will be heavy expenditure with the Dominion and province, in connection with mobilizing and equipping forces for service and defence, and in the general administration of the military and naval departments.

"In our opinion these expenditures should largely offset any falling off in general business."

◆

Confidence is friendly according to individual treatment

Canada's motto:—"Business as usual during alterations."

"If each would nobly do his part,"—Shakespeare knew the value of individual help.

Don't make the other man pay while you get behind a moratorium of your own making.

War and economy do not mean that everything is wrong and there is no future. Look around.

Canada has about $790,000,000 savings in its banks. That ought to keep us in lunches for a while.

Every moratorium has a meaning of its own, but Canada has not found the necessity to declare one yet.

If you cease drinking coffee and leave your tea unsweetened, some one else may have to stop buying bread.

It makes little difference how you pronounce the war names so long as you read the Canadian business situation correctly.

Dispatches from Berlin, regarding excellent financial conditions there, should be taken with Windsor salt and German potash.

"After all," said Premier Asquith, in the British House of Commons, "the question of credit depends upon what we believe is going to be the effect of the war upon our trade and industries. I hope the house will not think I am too optimistic, but I think there is a danger of our taking too gloomy a view of what the effect will be, and by doing so we help to bring about the very state of things which we fear."

PERSONAL NOTES

The late Mr. Kappele, the Toronto official referee, left $56,000 life insurance of an estate of $108,000.

Mr. Richard Grigg, Canada's chief trade commissioner, was in Europe when war broke out. He sailed on the Olympic on Saturday for New York.

Mr. W. Sanford Evans, of Winnipeg, who often gives his countrymen valuable advice, is telling a good story about the German emperor. Ask him.

Mr. Ben. H. Morgan, the well-known English writer and economist, has given England a business motto for war time:—"Business as Usual." We have adopted it this week for Canada. It might read, suggests a correspondent, "Business in Canada as usual, during alterations in Europe."

Mr. P. N. Stanford, the Pacific Coast Fire Insurance Company's western inspector, has resigned his position to join his regiment, the 72nd Highlanders of Vancouver, who are being sent to Quebec as a unit. The entire field force of this well-known western company and his other friends, will wish Mr. Stanford a safe return after the war to the country of his adoption..

Mr. W. S. Dinnick, managing director of the Dovercourt Land, Building and Savings Company, Toronto, is an energetic business man. He has exhibited, too, the greatest faith in the Canadian situation throughout the trade depression, and even now, his supply of optimism shows no signs of reduction. His energies for the better part of this week were thrown into the whirlwind campaign to raise half a million dollars for the Toronto and York Relief Fund. His offices and staff were placed at the disposal of the Fund for the purpose.

Mr. A. E. Moulds, manager for Manitoba and Saskatchewan of the Gresham Life Assurance Society, Limited, of London, England, with headquarters in Winnipeg, has received orders to join his regiment, he being one of the English reserves. He left Winnipeg on August 18th en route for England via Quebec. Mr. Moulds is well known throughout the west, and has been connected with the scout movement. Having travelled considerably throughout the western country on business his many friends will no doubt miss him and his regular visits to their cities.

Professor Johnson's summary of the advantages and drawbacks likely to come to the United States and Canada as a result of the war, has been quoted widely. Professor Johnson is dean of the New York University school of commerce and finance, and is also the head of the Alexander Hamilton Institute which gives an excellent course to business men. He prepared for the United States Monetary Commission some years ago an exhaustive report of the Canadian banking system, a lengthy summary in advance of which *The Monetary Times* was able to publish.

Mr. Harold Begbie, one of the most picturesque of English writers, has issued some excellent verses appealing to the business man to keep his head. This is one of them:—"Let the foe who strikes at England hear her wheels of commerce turn, Let the ships that war with England see her factory furnace burn; For the foe most fears the cannon, and his heart most quails with dread, When behind the man in khaki is the man who keeps his head." Mr. Begbie was a visitor to Canada with a party of English newspapermen a few years ago.

Mr. William Jennings Bryan, secretary of state at Washington, who gave to *The Monetary Times* last week a statement regarding the attitude of the United States regarding loans by United States bankers to Canada's governments, is a strong peace advocate. He was depicted by an American cartoonist last week as awaiting modestly the receipt of the Nobel peace prize. Mr. Bryan is a fairly frequent visitor to Canada, and has been a guest of the Toronto Press Club. He accorded *The Monetary Times* a special interview at Washington in 1911, during the heat of the reciprocity campaign.

Mr. John T. P. Knight who died at Montreal last week was born in Kent county, England, in October, 1851, and came to Canada when twenty years of age. He studied law in Nova Scotia, but later gave that up to enter the service of the Bank of Nova Scotia. Mr. Knight was subsequently appointed inspector of the Merchants' Bank of Halifax, and later cashier of the People's Bank of the same city. Mr. Knight went to Montreal about twenty years ago, where he became editor of The Insurance Chronicle. In 1900 he was appointed manager of the Montreal Clearing House and editor of the Canadian Bankers' Journal, also secretary of the Canadian Bankers' Association. Mr. Knight was author of a number of publications on banking matters.

Mr. T. F. Dobbin, whose portrait appears elsewhere in this issue, was recently appointed to manage the Canadian business of the Phenix of France. Mr. Dobbin entered the office of the Imperial Insurance Company in 1885, and remained there seventeen years. He was inspector at the time that company was taken over by the Alliance in 1902. He then went to the London and Lancashire, and managed their province of Quebec branch for eleven years. On February 1 he resigned that position to take over the managership of the British America, for the province of Quebec, which he will continue, and manage also the Phenix of France in Canada. His record as an underwriter was made with the London and Lancashire, for which company he has done very well, but then, the London and Lancashire men always do well. Mr. Dobbin has a circle of good friends and he is regarded as one of the best underwriters in Canada.

◆

BANK OF ENGLAND GOLD AT OTTAWA.

The official announcement of the Bank of England regarding its depository for gold at Ottawa is as follows:—

The minister of finance and receiver-general of Canada having agreed to receive on behalf of the Bank of England deposits of gold at Ottawa, the Bank of England are willing to purchase gold bars at 77s. 6d. per ounce standard and eagles at 76s. 0½d. per ounce when deposited as above.

Deposits must be made free of expense, including all telegraphic charges, and the Bank will accept the assay of the American Mint, subject to the usual guarantee from the parties claiming payment in London.

The minister of finance has undertaken to advise the Bank of England by cable through the high commissioner in London of any deposit made, and depositors should furnish him with the name of the person or persons to whom the proceeds are to be paid in London.

Payment will be made by the Bank of England only on receipt of advice from the high commissioner.

These conditions are subject to any minor alterations or additions which the minister of finance at Ottawa may desire

◆

RAILROAD EARNINGS.

The following are the railway earnings for the week ended August 21st:—

Canadian Pacific Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$2,154,000	$2,506,000	— $352,000

Grand Trunk Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$1,006,476	$1,048,536	— $47,040

Canadian Northern Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$307,600	$396,200	— $88,600

Canadian Northern Railway.—The statement of operating expenses and earnings for July is as follows:—

	1914.	1913.	Increase or decrease.
Gross earnings	$1,594,300	$1,928,800	— $334,500
Expenses	1,163,800	1,414,500	— 250,700
Net earnings	430,500	514,300	— 83,800
Mileage in operation	4,670	4,316	+ 354

Twin City Rapid Transit Company.—For the first two weeks of August, the passenger earnings were:—

	1914.	1913.	Increase or decrease.
First week	$183,414.22	$173,141.25	+ $10,272.97
Second week	172,640.27	168,136.04	+ 4,504.23

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Castleton, Ont.—August 20—Cheese factory. Loss and cause unknown.

Woodland, Ont.—August 21—Cheese factory. Loss and cause unknown.

Edgeley, Ont.—August 21—Mr. J. Smith's barn. Loss $5,000. Cause, lightning.

Blenheim, Ont.—August 23—Mr. G. Lawrence's barn. Loss $4,000. Cause, lightning.

Beaverton, Ont.—August 21 Mr. W. Fountaine's barn. Loss unknown. Cause, lightning.

Brussels, Ont.—August 24—Mr. A. G. McKillop's barn. Loss unknown. Cause, lightning.

Queenston, Ont.—August 20—Barn on Larkin farm. Loss $30,000 Insured. Cause unknown.

St. John, N.B.—August 22 Sample room Dufferin Hotel. Loss slight. Cause, dropped cigarette.

Peterboro, Ont.—August 18—Mr. A. Ward's barns, Villiers. Loss $3,500. Cause, lightning.

Phelpston, Ont.—August 17—Mr. H. Loftus' barns and stables. Loss unknown. Cause, lightning.

Exeter, Ont.—August 18—Mr. W. Sanders' barn, 3rd concession of Stephen. Loss and cause unknown.

St. Catharines, Ont.—August 21—Mansion House, Homer. Loss $10,000. Cause, supposed dropped cigarette.

Newcastle, N.B.—August 21—Mr. E. Dalton's livery stable and thirteen horses. Loss and cause unknown.

Campbellton, N.B.—August 25—Two million feet lumber at Richard's mill near the town. Loss and cause unknown.

London, Ont.—August 18 Beck Box Manufacturing Company's motor. Two barns. Loss unknown. Cause, lightning.

Montreal, Que.—August 25—4615-30 Hector Soulegny Street. Loss and cause unknown.

August 14—Mr. H. C. Werner's residence, 220 Laval Avenue. Loss $1,000. Cause unknown.

August 16—Mr. P. Angelovitch's store, 480 Moreau Street. Loss and cause unknown.

Ottawa, Ont.—August 21—Mrs. J. B. Roy's store and three other stores, William and George Streets. Losses, Mrs. R. Kaminsky, loss on stock and buildings, 51-53½ William Street, $3,700. No insurance. Messrs. George Labelle and Jos. Riopelle, loss on building at north-east corner of George and William Streets, $3,200. Insurance, $3,000. Mrs. J. B. Roy, 57-61 William Street. Loss, $1,000. No insurance. William Ginsburg, 55 William Street. Loss, $800. No insurance. B. Haram, 53 and 53½ William St. Loss on stock, $800. No insurance. Mr. Thomas Sheridan. Loss, $500. No insurance. Mrs. Chas. Loux. Loss, $400. No insurance. East End Social Club. Loss, about $200. Partly insured. Total loss, $10,600; total insurance, $3,000.

Toronto, Ont.—Fire Chief Thompson's report for the week ended August 18th, shows the following losses:—

August 12—Planing mill of H. A. Marshall, 507 Davenport Road. Cause unknown. Dwelling of W. Patterson, 27 Goodwood Avenue. Cause, rags on gas stove became ignited. Loss, building, $25.

August 14—Store and dwelling of Mrs. Maud Hughes, 586 Bloor West. Cause unknown. Loss, $150.

August 15—Building of King Street Cafeterias, Limited, 14 King Street East, owned by R. T. Dodds. Loss and cause unknown. Dwelling of E. J. Hinch, 356 Brunswick Avenue. Cause, electric iron ignited woodwork. Loss, contents, $200; building, $75. Building of Toronto Dairy Company, 75 Osborne Street. Cause, overheated boiler. Loss, contents, $300; building, $500. Gasoline launch Victor of Royal Canadian Yacht Club. Cause, ignition of gasoline. Loss, $1,350.

August 16—Store and dwelling, 808 Bathurst Street, of Mrs. K. Devaney, 387 Keele Street. Cause, incendiary. Loss $800.

August 17—Building of Fairweathers', Limited, 84-86 Yonge Street. Cause, Lightning and electric wires.

August 18—Dwelling of Wm. Malcolm, 2183 Gerrard East, owned by Miss Heron. Cause, struck by lightning. Loss, $25.

Toronto, Ont.—Fire Chief Thompson's report for week ended August 12th, shows the following losses:—

August 6—Two frame buildings and three brick buildings, occupied by Adams Leather Goods Company, 5-9 Agnes Street, owned by East and Company. Cause unknown. Loss, contents, $5,000; buildings, $1,500; dwelling, owned by Robins, Limited. Loss, building, $75; three buildings, occupied by Dickenson, Jos. H. Dempsey and others, 10-12 Alice Street, owned by Dickenson. Loss, contents, $50; buildings, $100.

August 7—Dwelling, occupied by Wm. Padget, 89 Berkeley Street, owned by Christie Brown and Company. Cause unknown. Loss, contents, $50; buildings, $10.

August 8—Dwelling, occupied by J. O. Hanley, 1 Brant Place, owned by S. Batterman. Cause unknown. Loss, contents, $25; building, $10; automobile, No. 3070, owned by H. Stanyon, 537 Yonge Street. Cause, backfiring engine. Loss, $50.

August 9—Automobile, No. 2406, owned by Toronto News. Cause unknown. Loss, $200.

August 10—Store and dwelling, vacant, 866 Queen Street E., owned by J. Barrett. Cause unknown. Loss, $25.

August 11—F. I. C. Foundry, owned and occupied by Standard Foundry Company, Esplanade Street E. Cause unknown. Loss, contents, $1,000; building, $2,000; F. I. C. ice house, owned and occupied by Belle Ewart Ice Company. Loss, building, $1,000.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

The following fires were adjusted by Paterson and Waugh, Edmonton.

Edmonton, Alta.—August 5 Mr. J. Rusk's dwelling. Loss, contents, $520. Cause, kerosene oil stove. Insurance, Germania, contents, $400.

South Edmonton, Alta.—August 10—Jas H. McGuire's Dominion Hotel and [illegible] and Fisher's barber shop. Loss, contents, $50. Cause, jacket hot water heater igniting wood floor underneath. Insurance, Phœnix of Hartford, contents, $1,000.

Vancouver, B.C.—The city's fire loss for the month of July was $3[illegible]72, the insurance paid was $10,740, leaving the property loss above insurance, $12,623. The value of property involved was $105,450, according to Mr. N. Lee's report to the council. There was a total of 63 alarms during the month as follows:—Chimney fires, 2; false alarms, 2; fires outside city limits, 2; smoke scares, 3; fires where damage occurred, 24; fires where no damage occurred, 30.

A complete list of alarms where the damage exceeded $50 follows:

July 2—Telephone alarm at 9.20 a.m. to A. Cotton's shingle mill, False Creek, at the foot of Birch Street. The fire started in the dry kiln from some unknown cause, being a mass of flames when the fire apparatus arrived, the blaze having also spread to the planing mill and storage shed on the south side of the railway track, the three buildings with contents being a total loss. The pattern shop of the Empire Manufacturing Company was also destroyed while considerable damage was done to a Canadian Pacific Railway freight car which was alongside the dry kiln. A second alarm was turned in for this fire. Damage, $15,050, partly covered by insurance.

July 5—Telephone alarm at 10.38 a.m. to 1447 Harwood Street, owned and occupied by E. B. Ross. Fire on shingle roof caused by sparks from chimney, the contents also being slightly damaged. Damage, $87, covered by insurance; telephone alarm at 12.05 p.m. to 547 Burrard Street, owned by Thorne and Wilmot and occupied by Miss Sullivan as a rooming house. Fire on roof caused by sparks from chimney, the contents also being slightly damaged. Damage, $350, partly covered by insurance; telephone alarm at 1.21 p.m. to 4 Eighth Avenue W., owned by Mrs. C. McLean and occupied by A. C. Campbell. Fire started on roof from sparks from the chimney, the roof being destroyed and slight damage resulting to contents before being extinguished. Damage, $060, partly covered by insurance.

July 6—Alarm from Box 814 at 11.27 a.m. Fire in frame dwelling at 200 Nineteenth Avenue E., owned and occupied by A. R. Burns. The blaze originated in the kitchen from an overheated stove pipe setting fire to curtains and woodwork, burning up through first floor to roof which was badly damaged. The contents were also considerably damaged. Damage, $688, covered by insurance.

July 7—Verbal alarm at 3.05 a.m. Fire in two-story frame building at 338 Main Street, owned by McArthur and Harpur and occupied by Damasks and Damas and used as a restaurant. The blaze was caused by grease boiling over on to range, setting fire to wall and ceiling, considerable damage being done to the contents. Damage, $575, covered by insurance; alarm from Box 529 at 7.05 p.m. Fire in frame building at 1908 Commercial Drive, owned by A. H. Keepings and occupied by Stuart and Company and used as a dry-goods store. The fire was in rear of the building and was caused by spontaneous combustion, considerable damage being done to the stock before the fire was extinguished. Damage, $2,332, partly covered by insurance.

July 8—Alarm from Box 843 at 2.53 p.m. Fire in partition of kitchen at 749 Fifteenth Avenue E., caused by a defective plug in an electric iron and which was placed in a cabinet in wall. Building owned and occupied by J. F. Johnson. Damage, $55, covered by insurance; telephone alarm at 9.30 p.m. to 442 Eighth Avenue W., owned by James Erskine and occupied by Mrs. Helmerson. Fire apparently started in kitchen, and spread to bedroom and living room, from some cause unknown, considerable damage resulting to both building and contents. Damage, $1,440, partly covered by insurance.

July 11—Telephone alarm at 10.48 p.m. to 740 Denman Street, owned by A. Hoy and occupied by Shelly Brothers, Bake Ovens. Fire in partition of bake shop caused by leak in gas tube. Damage, $55, covered by insurance.

July 13—Telephone alarm at 3.40 p.m. to 2255 Eaton Street, a two-story frame building, owned and occupied by P. C. Gibbens. Fire apparently started in hall upstairs and burnt its way up through the roof. Damage, $482, covered by insurance.

July 15—Telephone alarm at 10.30 a.m. to the 3400 Block, Twenty-Seventh Avenue E., where three dwellings were destroyed. The blaze apparently started in 3404 from some unknown cause and spread to the adjoining houses on the east and west, 3401 and 3378 respectively, the three buildings with contents being a total loss. The houses were owned and occupied by William Foreman, J. F. Mitchell and Geo. MacFarlane. Owing to the distance from the nearest fire station all three houses were practically a total loss before the apparatus arrived on the scene. Damage, $7,297, partly covered by insurance; telephone alarm at 3.32 p.m. to 2058 Eighth Avenue W., owned and occupied by G. W. Newton. Fire in partition caused by furnace pipes becoming overheated when burning rubbish. Damage, $95, covered by insurance.

July 24—Telephone alarm at 7.15 p.m. Gasolene launch on fire at the foot of Denman Street, Coal Harbour, caused by spark plug wire coming in contact with carburetter. Boat owned by P. M. Pascoe. Damage, $150.

July 26—Alarm from Box 36 at 12.25 a.m. Fire in one-story brick building at 157-159 Powell Street, owned by P. Welsh and occupied by Hugh Bailie, asbestos and engineers' supplies. The blaze apparently started in some oakum in the rear of the store from some cause unknown and worked its way through the partition before being extinguished, considerable damage resulting to the contents. Damage, $3,260, covered by insurance.

July 29—Telephone alarm at 11.51 a.m. to 911 Howe Street, owned by J. G. Hutchinson and occupied by Mrs. A. Marriott as a dwelling. The blaze started from sparks from chimney on shingle roof, considerable damage resulting before the fire was brought under control. Damage, $484, partly covered by insurance.

Keep business in the Empire.

Canada, the Larder of Empire.

Do not be color blind to the best facts.

Don't buy German goods. Look around at home.

Kiel Canal, first; Panama, second; Georgian Bay, left at the post.

What about a military campaign on the lines of Union Life finance?

From the hull of the SS. Empress of Ireland, $250,000 silver bullion has been raised.

At the Ogden Canadian Pacific Railway car shops most of the men are on full time this month.

MORE MONEY COMING TO CANADA.

President Wilson's ban on loans by the United States to belligerent governments includes Canada, but only its government. It is in excellent position to meet the situation here. The Dominion government never has had occasion to market a loan in the United States anyway. The Washington attitude does not apply to Canadian corporation municipal loans which probably will be raised in the United States to a considerable extent. Indeed, *The Monetary Times* knows of negotiations to that end in several quarters, negotiations which are likely to be crowned with good success. The opinion of a leading Canadian banker is that the ban would not apply to our provincial governments.

GERMANY AND CANADIAN PACIFIC STOCK.

As an instance of the organized attempt that the German government made to create a money panic in London, three London German banks, the Deutsche Bank, the Dresdner Bank and the Disconto Gesel'schaft beared Canadian Pacific Railway stock from 180 downwards before the declaration of war. They were compelled to suspend operations, says a cable message.

These banks are now allowed to reopen under government control for the purpose of adjusting accounts. There has been purchasing of Canadian Pacific for bear covering at prices ranging from 157 to 164. The government is confiscating the huge profits so made.

The Monetary Times described two weeks ago some interesting phases of these incidents.

WHEN WAR QUICKENS INDUSTRY

Whatever business you are in the war affects you. If you study the situation closely, it will be found to present many new trade and business opportunities, as the result of the disturbed conditions in Europe. *The Monetary Times* is printing from week to week the best story of the war from the viewpoint of the financier and business man of Canada. This week the following articles will be found on the pages noted:—

Page.

Some Good Advice 53

Featuring reliability and enterprise for forty-seven years, *The Monetary Times* has given the business world the business story of Canada from week to week.

◆

It is safe to say that in no other country of the world would or could the banking system have been managed during an unprecedented crisis in the able manner which obtains at the present moment in the British Isles. In foreign centres, following the financial upheaval at the outbreak of war between the great European powers, the conditions are more or less chaotic. Owing to the state of war the actual condition of affairs in the financial world on the continent is impossible to gauge with accuracy, but from all accounts the confusion is ten times more serious than that which has been experienced in this country.—London Financier.

GRAND TRUNK DIVIDENDS.

A Canadian Associated dispatch says that a considerable amount of speculation has been aroused there over the absence of the usual half-yearly declarations of dividends on Grand Trunk preferences, having regard to the fact that the second week in August is the usual time for such announcements to be made. There is, however, no need for alarm, as the principal reason for this new departure is that the company some time ago adopted a policy of publishing its accounts annually instead of twice yearly, and consequently there is no urgency in arriving at a decision, especially in view of the abnormal conditions now prevailing. It is stated that the dividend question will be the first item on the agenda, at the company's meeting, which has been convened for September 4th.

◆

MR. THOMAS F. DOBBIN,

Manager in Quebec Province for the British America Assurance Company, who now adds the Canadian management of the Phenix of France to his duties.

◆

Are there any countries in which you have greater confidence than in Great Britain and Canada?

They say, "We must cut our business suit according to the financial cloth." By all means, but don't make it a nude study.

The largest and finest chewing gum factory in the British Empire will be built by Wm. Wrigley, Jr., Company, Limited, on Carlaw Avenue, Toronto.

Mr. E. G. Henderson, president of the Canadian Manufacturers' Association, states that every manufacturer in the Dominion will keep as many employees as possible working during the present crisis.

In the harvest fields the grain is being harvested most satisfactorily. Central Alberta has probably the best paying yield it ever had. Hogs are bringing about $8.50 at the Calgary yards and cattle around $6.50.

"It is hardly conceivable that the Canadian railways can increase their earnings during the present war, but if Canadians keep their heads and the banks keep business floating it is not improbable that the end of 1914 will find us in an unimpaired position," says a high official of one of the great Canadian railway systems.

Sir Donald Mann expects a quick movement of the crops this year, with a fairly good yield at all points along the line. He considers that business conditions are, notwithstanding the effects of the war, wonderfully good, but just so soon as the situation clears up a little in Europe Canada will enjoy normal trade conditions.

JULY BANK STATEMENT.

The statement of the chartered banks for July was issued from Ottawa this week too late to be printed here in detail. After notice deposits, call loans at home and abroad and current loans in Canada have increased. Circulation, demand deposits and outside deposits have decreased. The following are the principal items of the statement, compared with the previous month:—

Liabilities.

	June, 1914.	July, 1914.
Circulation	$ 99,138,029	$ 94,815,561
Reserve fund	113,368,898	113,381,526
Demand deposits	355,006,229	346,854,051
Notice deposits	663,650,230	671,214,125
Deposits outside Canada	103,061,603	95,873,092
Total liabilities	$1,330,488.767	$1,323,252,452

Assets.

	June, 1914.	July, 1914.
Current coin	$ 46,108,956	$ 51,412,353

The banks have called about $11,500,000 of the loans outside Canada.

◆

Any biscuits to spare this week go to Mr. Louis Abrahams, who told the Montreal fire commissioner that at the time of the fire he was asleep in bed and a cockroach crept into his ear tickling him so that he woke up and found the place in flames. He had no idea how the fire could have started. P.S.—The insurance amounted to $1,000.

As soon as trade finds its bearing doubtless Canada will turn to the United States for various articles which she has been accustomed to buy in Europe. It is expected in Canada that United States manufacturers will seize the opportunity to establish a number of new industries on this side of the Atlantic—industries in case of which Germany or some other European country has had a practical monopoly.—H. M. P. Eckardt.

July was a good month for the Calgary municipal street railway, and if the present volume of traffic is maintained, the deficit of $50,000 allowed for in the estimates will not be reached. For seven months the revenue of the system was $418,196 and the expenditure $462,307. Seven months of the Electric Light and Power operation shows a profit of $23,445, and the Waterworks department should, under the new rates put into effect this quarter, soon show a profit.

"I know of various articles that business men have been trying to buy in England and the United States that they cannot obtain with the result that local factories get the orders and are increasing their output. What is true in a few lines will also be true in scores of other lines, and it will cause a great deal of local activity. British manufacturers at the moment are not able to increase their output so as to take the place of the German products no longer obtainable, and that again will work to the advantage of this country."—Mr. F. P. Smith, Canada Steamship Lines, Montreal.

Mr. W. McRae, Inspector of the Bank of New South Wales, Sydney, Australia, has been in Vancouver looking over the situation with a view to extending the business of the bank there. He reported trade in a flourishing condition in Australia, with a great deal of building going on. The rise in the price of meats has brought a large increase of profit to the cattlemen, while on the other hand raising the price to the Australian consumer. Sheep has shared the advance with cattle, and the exportation of meat products is now one of the largest items in the Australian trade. The steadily increasing demand for the high-grade Australian wool by the large European and American manufacturers is also a contributing feature to the export trade. The uniformly favorable crops have brought great wealth to the land owner, and the price of land has risen steadily for the past five years.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Iron and Steel Company.—The company, even under the present conditions of curtailed operations, is giving employment to upwards of 1,600 men.

City of Cobalt Mining Company.—The stockholders have voted for the voluntary winding-up of the company. The mine becomes the property of the Mining Corporation of Canada, and eventually the shareholders will receive new certificates in exchange for their present holding.

Monterey Railway, Light and Power Company.—The annual report for the year 1913 shows total net revenue of $444,251, compared with $518,428 in 1912, a decrease of $74,177. After meeting fixed charges, interest on debenture stock, and providing for the 5 per cent. dividend on the preferred, a balance of $127,251 was shown, which increased the surplus carried forward to $601,098. From this $150,00 was placed to reserve for contingency, increasing that fund to $450,000. This left a balance to profit and loss account of $451,098.

Canadian Western Natural Gas, Light, Heat and Power Company.—The directors have placed the shares on a dividend-paying basis by the declaration of an interim dividend of 1 per cent., payable August 31. Books will close from August 25 to August 31 inclusive.

The company, which owns a number of natural gas wells in southern Alberta, supplies gas to Calgary and Lethbridge, with branch lines to other towns. The gas bearing territory controlled covers over one and a half million acres. The authorized capital is $8,000,000 in common and an issue of $3,950,000 in 5 per cent. debenture stock was made in London a couple of years ago.

Shawinigan Water and Power Company.—The earnings for July equalled the high record attained in June, the returns for both months being the same at $141,992. That represented an increase of $6,726 over the same month a year ago and $37,892 over the same month two years ago. As compared with the corresponding period a year ago, seven months' earnings show a gain of $57,835 or 6.2 per cent., while the gain over the corresponding period two years ago is $274,308 or 38.3 per cent.

The Canada Carbide Company, Limited, an enterprise which is closely associated with Shawinigan Water and Power, is reported to have received large orders for export business.

Mexico Companies.—The net earnings of the Mexican Light and Power and Mexico Tramway Companies show decreases for July. The Mexico Tramways Company reports an increase of $17,604 for the month of July, but an increase of $44,408 in operating costs produced a decline in net earnings of $26,804. The net earnings for the first seven months of the year are, therefore, decreased by $6,418, all of these figures representing, of course, Mexican currency. In the currency of the country the Mexican Light and Power Company reports a decrease for July of $60,951 in net earnings. The gain for the earlier part of the year has not been entirely wiped out, and at the end of July the net increase for the seven months was $32,570.

Laurentide Pulp and Paper Company.—A special general meeting of shareholders of the Laurentide Company has been called for September 23 to authorize an issue of $4,000,000 6 per cent. bonds. The circular sent to stockholders explaining the object of the bond issue is as follows:

"In reference to the proposal to create a new bond issue, it may be stated that a portion of the funds required for the purpose of your new power development and the extension of your paper plant now proceeding at Grand Mere was provided by the last issue of share capital of the company, but your board has decided that it would be in the interests of the company that the balance of the funds required in this connection should be provided by the creation and sale of a new bond issue. The amount proposed—namely, $4,000,000, should be sufficient to provide not only the additional funds required for the completion of the work now under way and for the redemption at maturity, of the outstanding portion of the existing bond issue, but at the same time leave in the treasury a considerable amount of the issue for future requirements of the company.

"Under existing conditions your directors feel that this method of providing for the requirements of the company is preferable to an issue of new stock." The proposed issue will be 6 per cent. 30-year consolidated mortgage bonds.

(For additional notes "Investments and the Market," see page 49.)

Canadian Gold Fields Syndicate, Limited.—The reason for the proposed voluntary winding-up of the company, *The Monetary Times* understands is that the only tangible assets held by it are the 4,270 shares of Consolidated Mining and Smelting Company stock. The legal advisers of the company were of opinion that the only way that a division of these 4,270 shares could be made would be under a winding-up order. The mining properties of this company and other assets in British Columbia, have been sold to the Consolidated Mining and Smelting Company and as soon as the deeds of sale are passed the directors of this company will meet to order the application for the voluntary winding-up order. At a special meeting of shareholders held on July 28th, at which five-sixths in number of the shares were represented, the decision of the directors to liquidate, was unanimously approved. It is intended to ask the court to authorize the liquidator to divide 4,000 shares of Smelter's stock among the shareholders of the Canadian Gold Fields Syndicate, Limited, on the basis of one share of Smelters to 1,500 shares of Canadian Gold Fields Syndicate stock. Shareholders of the company should buy or sell shares so as to hold a number divisable by 1,500, as the certificates for fractional parts will be valid only when produced with other fractions to make a full share, and they will not earn any dividend as long as held as fractions.

North Saskatchewan Land Company.—The committee appointed at the meeting of bondholders held in London on June 19, have issued from 2 Suffolk-lane, E.C., an interim report to the bondholders.

The committee, who are in communication with the holders of over £200,000 of bonds, state that they have satisfied themselves that the proper course was for the trustee to enter into possession and management of the properties included in the bond mortgage. The National Trust Company in Toronto had signified their willingness to act as trustee on certain conditions. Difficulties having arisen in complying with those conditions, the bondholders were in the position of having no acting trustee whom the committee could move to take the necessary steps for the protection of their interests. Owing, also to the delays which had taken place, and which exposed the bondholders to the risk of actions against the company by other creditors, the committee were forced to the conclusion that the only safe course was to have a receiver appointed. The National Trust Company has accordingly been appointed receiver.

The committee have had produced to them a balance sheet of the company, as at March 31 last, certified by the company's auditors at Winnipeg, in which it is shown that at that date cash on hand and in bank amounted to $2[illegible],655, against accounts payable (including directors' fees) $24,03[illegible], while the assets, consisting chiefly of agreements of sale and [illegible] acres of land, stood at $[illegible],404,5[illegible], against liabilities for bonds, interest, unpaid balance on lands purchased, etc., amounting to $[illegible],8[illegible]1,650. On June [illegible] the cash in hand was reduced to $[illegible] against accounts payable $1,530 excluding directors' fees $[illegible]1,520. The balances payable on lands purchased and interest thereon amounted to $4[illegible]4,-3[illegible]5, of which $[illegible] [illegible] overdue, and these are almost entirely in respect of the [illegible] lands, not forming part of the specific security for the bonds. It is these liabilities that were giving the committee anxiety, and led them to urge forward the [illegible]. The company's circular of May 2[illegible] last stated there was every reason to believe that sales of land then on hand to the extent of 2,720 acres would be carried through at prices ranging from $22.50 to $24 per acre; but the committee are not yet fully informed to what extent the proceeds of these sales will be reduced by the commission and other expenses of selling the land, which appear to be very heavy.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Halifax.—The council has passed a resolution to borrow $55,000 at 4½ per cent.

Merridale S.D., Man.—A money by-law will probably be voted on at the end of August.

Quebec.—The civic finance committee has voted $60,000 for the reconstruction of Dufferin Terrace.

Maisonneuve.—The council will proceed with the paving of Adam Street, if the banks will accept city bonds.

Montreal.—The city is preparing to float a loan in Canada, the proposal to issue one in the United States having been postponed.

Burlington.—Tenders will be received up to Friday, August 28, at 7 p.m., for the purchase of $42,333.84 of 5 per cent. and 6 per cent. annual instalment debentures. Jas. S. Allen, clerk.

Regina, Sask.—The following is a summary of applications for authorization by Saskatchewan local government board, August 14th to August 20th: School districts, 1, $1,000; villages, 1, $4,500; towns, 1, $12,000; cities, 1, $20,150.

St. Catharines.—A by-law has been passed to authorize the construction of a steel bridge over the old Welland Canal at an estimated cost of $220,000, of which the Grand Trunk will contribute $20,000, and the Dominion Government $50,000, on condition that the city assume control and maintenance of the old swing bridge over the canal.

Calgary.—Nearly $2,000,000 of the year's appropriation is unexpended, ($1,807,665), and as the total was within $50,000 of $3,000,000, more than one-half remains to be spent. The bank has undertaken to advance $700,000 on the taxes to be collected later and with half a million coming from some bonds previously sold, the situation is most promising. An inquiry comes from a bond house asking if the city will give them the privilege of trying to sell $1,500,000 worth of bonds in the United States, as well as offering to advance $500,000 on 6 per cent. treasury bills at 97½. The offer was as follows:—"After exhaustive efforts I have succeeded in interesting a strong group with some chance of doing business on the following lines: The city to issue $500,000 worth of treasury certificates bearing 6 per cent. interest, to run not less than six months nor more than ten months, price 97½, payment Toronto. One million four hundred thousand five per cent. bonds to be lodged as collateral with trustee, probably Canadian Bank of Commerce, Calgary, legality of collateral to be investigated by our solicitor at city's expense, and option on all or in part at 90 and interest, Toronto payment, to be given us to run during life of notes. Bonds realizable upon deposit of bonds with trustees, said funds to be held for payment of notes at maturity. Before we can go any further must have complete statement showing city's present financial condition regarding all unsold bonds, temporary loans, treasury bills outstanding, etc. Our clients will accept as collateral only debentures on which work completed or practically so, and must have city's assurance that no new work will be commenced except absolutely necessary. Must act quickly, as we know of other municipalities who have to do immediate heavy financing, and finances extremely limited markets are bound to go still lower." The city's reply was: "City willing to accept certificates price 97½ six per cent. one year and deposit bonds million dollars as collateral security without option."

◆

CALLS ON CANADIAN LOANS.

Under the English moratorium investors may suspend payment of calls until September 4th, if such a course is imperative. But it is only postponing liability, as the London press says, and if it is possible to pay immediately, such a course is to the benefit of all concerned.

Calls on Canadian loans in London, due recently, included the following:

Date.	Borrower.	Call %.	Amount.
Aug. 10	Ontario government	35	£1,000,000
Aug. 12	South Vancouver	30	223,287
Aug. 14	Imperial Tobacco Co.	7	500,000

DO BUSINESS WITH CANADA; ACCOUNTS WILL BE PAID.

"As a matter of fact," says Mr. F. P. Smith, of the Canada Steamship Lines, at Montreal, "a moratorium only refers to people within the country, and has no reference to obligations between a resident of a foreign country and one living in this. If it can be made clear that a debt will be valid and will have to be paid in spite of a moratorium in such a case it would ease certain business relations considerably. Obviously, Canada cannot legislate away a debt owed to residents of another and a friendly nation."

Canada has obtained legislative authority to declare a moratorium if necessary, but no declaration has been made. Canada will pay its debts in any event

WORLD'S CROPS AND WAR

Returns From Eleven Countries — Canada's Crops

The 11 countries which produce two-thirds of the world's wheat crop will probably have a crop this year of 2,455,376,000 bushels, compared with a crop last year of 2,557,499,000 bushels. These figures do not include Canada's wheat crop, which for the entire Dominion in 1913 was 231,717,000 bushels grown upon 11,015,000 acres, the wheat having an estimated value of $156,462,000.

The Canadian Commissioner of the International Institute of Agriculture has forwarded to the department of trade at Ottawa, the following table containing the official estimates of production of wheat in 1914, as compared with that in 1913, in the countries so far reported to the institute:—

Country.	1914. Bushels.	1913. Bushels.
England and Wales	56,448,000	53,137,000
Belgium	13,973,000	14,769,000
Hungary	133,504,000	168,249,000
Spain	120,314,000	112,402,000
Italy	172,697,000	214,407,000
Luxembourg	654,000	644,000
Russia-in-Europe	687,434,000	837,795,000
Switzerland	3,469,000	3,509,000
United States	930,000,000	763,380,000
India	313,040,000	364,000,000
Japan	23,843,000	25,207,000
Totals	2,455,376,000	2,557,499,000

Two-Thirds of Crop.

The above countries produce about two-thirds of the world's wheat crop. The chief producing countries yet to report, outside of Canada, with the final estimates of their wheat production last year are:—Germany, 171,077,000 bushels; Austria, 59,626,000; France, 319,373,000; Roumania, 84,192,000; Russia-in-Asia, 189,864,000; and Algeria, 36,848,000 bushels. The crops of the countries of the Southern Hemisphere cannot yet be considered.

The chief features in this year's crop are the great increase of 166,000,000 bushels in the United States, and the decrease of 150,000,000 in the crop of Russia-in-Europe. Most of the other European countries also show large decreases. Reports from official and private sources point to decreases in the crops of Austria, Germany, France and Roumania. Judging from the reports now available, the total world's crop of 1914 will probably be smaller than that of 1913.

Imports of Europe.

Great Britain, France and Germany import about 350,000,000 bushels of wheat and flour every year. Great Britain depends on her imports for about 250,000,000 bushels and Germany's average is somewhat under 90,000,000 bushels a year. The French imports vary from 20,000,000 to 80,000,000 bushels according to the harvest garnered in France. The main sources of supplies for these countries are the United States, Russia, Canada and India, which in better years supply about an equal quantity each. Last year Canada shipped 115,000,000 bushels largely to English ports. Russia's supply, which is likely to be cut off for the time being, ranges from 100,000,000 to 130,000,000 bushels a year. The Argentine wheat supply is practically disposed of.

Wheat Production in Europe.

The wheat production of these belligerent countries credits Germany with an average of about 160,000,000 bushels or about two-thirds of her total requirements. Russia is best supplied of all by an average wheat yield of from 500,000,000 to nearly 1,000,000,000 bushels of wheat in addition to a rye crop of 1,000,000,000 bushels, being the largest producer in the world for this staple foodstuff. Austria-Hungary has a wheat yield of from 200,000,000 to 250,000,000 bushels and a rye production averaging about 160,000,000 bushels.

Demand for Oats.

In war time there is a big demand for oats and corn needed for the maintenance of cavalry and artillery horses. Russia's oats crop of 1,136,000,000 bushels is her mainstay in this respect, and as that country produces little corn. Austria-Hungary averages 250,000,000 bushels of oats and 200,000,000 or more bushels of corn. Germany's oats supply averages nearly 600,000,000 bushels.

Canada's oat crop last year was 404,669,000 bushels, with a value of $128,893,000, the biggest oat crop on record in the Dominion. Corn is a small crop in Canada, but a large one in the United States. The value of Canada's principal field crops last year computed at average local market prices was $552,771,500. The wheat crop in the Dominion this year undoubtedly will be smaller than that of 1913, as may also some other crops, but the value should be greater, if it is possible to ship the crops, which is altogether likely.

◆

A resolution requesting the United States government to establish a bureau of war risk insurance, to be administered under the direction of the secretary of treasury by a board of three members, was adopted by the New York Chamber of Commerce. The chamber also decided to appeal to Congress "to make it possible for our citizens, without discrimination, to buy and operate ships under American register." The proposed bureau of war risk insurance, in the opinion of the chamber, should assume the risks of war on American vessels and cargoes, and should be invested with power to fix rates of premiums subject to change to each country, or for each class of cargo. A committee of five was appointed to consider and report on methods of restoring an American mercantile marine.

READY REFERENCE TABLE SHOWING STATUS OF CARGO UNDER INTERNATIONAL MARITIME AND NEUTRALITY LAWS.

"Enemy" signifies belligerent nation.

Table is based on the assumption that the destination is the final destination of the cargo.

In theory and long-established historical maritime practice commerce is free at sea so long as you carry neutral cargo under a neutral flag, even to a belligerent's port.

Hence it follows as the leading principle that a vessel of a neutral flag can carry neutral cargo to a belligerent's port without ultimate loss.

	Vessel owned by	Destination of vessel and cargo	Cargo owned by at time of capture of vessel.	Cargo whether liable to confiscation.
1.	Enemy	Enemy's port	Enemy	Yes, whether contraband or not
2.	Enemy	Neutral port	Enemy	Yes, whether contraband or not
3.	Enemy	Neutral port	Neutral	No, whether contraband or not
4.	Enemy	Enemy's port	Neutral	Yes, if contraband; no, if not
5.	Neutral	Enemy's port	Enemy	Yes, if contraband; no, if not
6.	Neutral	Neutral port	Enemy	No, whether contraband or not

Prepared in reply to hypothetical questions on marine insurance complications that have arisen since the war broke out, by Messrs. Willcox, Peck and Hughes, New York.

WAR AND AMERICAN BUSINESS

Opportunity to Increase and Banking Connections of This Continent

Authorities are unanimous in the opinion that America will benefit in various ways as the result of the war. They admit that all nations will pay a share of the cost, but generally speaking, they think that the United States, and Canada to a lesser degree, will receive benefits. Professor Joseph French Johnson, dean of New York University School of Commerce, has written for the Alexander Hamilton Institute an article on "War and American Business."

Profit and Loss.

He summarizes the profit and loss items as follows:—

Loss.

(1) Tendency to drain gold from this country, which must be offset by accumulating reserves, restricting credits and avoiding inflation by currency.

(2) Closure of European market to American securities and sale at low prices in this country, resulting in checking all permanent financing and stopping new projects and construction that has not been financed; probable permanent diversion from the United States and Canada of large amounts of European capital which would otherwise have come to us.

(3) Cutting off certain raw materials (chiefly chemicals), which are essential in some lines of manufacture; great reduction in European demand for raw materials, partly manufactured and manufactured goods, resulting in partial readjustments and in losses.

(4) Increase in the cost of living.

Profit.

(1) Opportunity to increase the prestige and banking connections of America in international financing.

(2) Opportunity to enter South American and Oriental markets and secure a larger share of this trade.

(3) Sale of food-stuffs and military supplies at high prices in European markets, resulting in prosperity for producers of these goods and for industries which cater to these producers.

Will Help Mining.

Mr. Franklin K. Lane, secretary of the interior at Washington, predicts greater industrial expansion and especially greater mining activity in the United States as a result of the struggle. He says:—"Of importance second only to that of food supply is the supply of mineral products. We have cause for self-congratulation that we are able to feed ourselves. What we possibly have not so fully realized is that we are nearly as independent in the possession of essential mineral resources and that interference with manufacturing caused by interruption of flow of importations of many necessary raw materials, because of the war, may be overcome almost wholly by development of neglected resources in our country."

He added that these resources will be developed if formative legislation be passed and there would be no reason for high prices because of this change in source of supply.

The views of Sir George Paish on this subject were printed in *The Monetary Times* last week.

◆

At the offices of J. P. Morgan and Company the report that $6,000,000 additional French gold has been deposited with that firm's Paris house, Morgan, Harjes & Company, is confirmed. The deposit was made in accordance with the arrangement concluded last week and raises the amount of French money already handled by the Morgan firms to $12,000,000. The firm announces: "The French government today materially increased its deposits with J. P. Morgan and Company, and they are prepared to sell checks and cable transfers on Paris in liberal amounts."

MORE OPTIMISM ON WAR EFFECTS

Professor Irving Fisher Sees Some Good Coming to America

The war in Europe will offer a wonderful opportunity for American bankers to make New York take the place of London as the banking centre of the world, says Professor Irving Fisher. During the war, he pointed out, the United States will become a lending instead of a borrowing nation, and when the war is over it should still hold this position.

In other respects Professor Fisher thought that the United States will feel the effects of the war but slightly.

The foreign trade of the United States, he said, is small compared with the vast volume of internal trade, being only 1 per cent. of the total trade. The internal trade now amounts to $450,000,000,000 a year.

Individual Firms and Security Markets.

The chief effects of the war in the United States will be those felt by individual firms who furnish supplies to the warring nations and by the security market in the probable dumping of foreign and American securities upon the United States to pay for these supplies.

According to Professor Fisher, the danger of a panic from the unloading of securities on the American market is greatest at present and will not increase. Should a panic occur it will be localized in New York and will not affect the country as a whole.

Burden of Warring Nations.

The burden of the war, he said, will be borne by those nations taking part in it. Prices in these countries will, of course, rise enormously, and this rise will have some effect in the United States, causing prices to advance because of the export of large amounts of foodstuffs to Europe, but this rise should not be great.

When the decrease in the amount of revenue to the United States government from import duties is felt, Professor Fisher said, the government will have to take steps to add to its revenue by some other means, probably by internal revenue duties on sugar, tea, coffee and other commodities.

Those optimists who predict a great industrial boom in the United States as a result of the industrial anarchy in Europe and those pessimists who see a huge rise in prices in the United States because of the war were called extremists by Professor Fisher. In his opinion there will be neither a great industrial boom nor a great rise in prices.

◆

GEORGE BURY'S WORD TO THE WEST.

(Special Correspondence.)

Calgary, August 15th.

In a message to the people of western Canada, Mr. George Bury, vice-president of the Canadian Pacific Railway, says:—"My personal advice is that this is a time when people should above all things hold their heads. Through life our greatest sufferings are through anticipating troubles that never come. The west this year will receive more for its crops, cattle, etc., than last year. Foreign capital will not come in until the war is over, but I do not know that this is an unmixed evil. It may hold back some development, but we have been borrowing recklessly, and it had to come to an end anyway. I believe legitimate business will not suffer on account of the war, and that the effective steps taken by the government will make a monetary crisis impossible. The empire's existence is at stake, and every one must present a bold and cheerful front and be prepared for every sacrifice should the worst come, which at present appears impossible."—J.P.R.

◆

On October 24, 1870, J. S. Morgan, grandfather of the present head of the Morgan house, took an issue of 250,000,000 francs, or $50,000,000, of 6 per cent. bonds, through his London office after English bankers had refused to deal with the new French government on the ground that they were still belligerents. Mr. Morgan raised the money in the English market, which was willing enough to participate if he would take the responsibility. The bonds taken at 85 returned a profit of $5,000,000 to the underwriters. All told, the French raised $975,000,000 through loans to pay war bills.

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

GREAT BRITAIN AS LENDER

How War Will Affect the Borrowing of the Overseas Empires

The effect upon borrowing countries in the event of Great Britain being drawn into war was recently discussed in the Round Table. "It is clear that every country having commercial or economic relations with Great Britain would suffer seriously in the general welter of confusion brought on by a collapse of credit in London. The closer their relations, and the more dependent they were on London for capital, the worse would be their state. No countries would suffer more than the British Dominions beyond the Seas. This hard fact, of which there can be no doubt, runs counter to some comfortable doctrines, somewhat widely held in those countries.

New Capital Canada's Life Blood.

"The large supply of new capital which London gives them yearly is to Canada its life-blood and to all of them of great importance. The majority of them have few resources of their own to fall back upon. It is not indeed necessary to presuppose any such disaster as the defeat of our navy," says the English writer, "to see that the Dominions must suffer with us in time of war. They must suffer with us whatever our fortunes.

If victorious, their troubles may not last long. But they will grow more acute the more uncertain become our prospects. A first class war is bound to bring with it, at best, a great dislocation of trade, a great restriction of credit, and a great destruction of capital. The worse matters go for us, the worse will the machinery be thrown out of gear. Not only will the dislocation of our trade and our financial system dislocate those of the Dominions, too, but the springs of capital will dry up. London will have no money to spare them and it is doubtful whether at such a moment, other countries, not excluding even the United States, would be able to fill London's place. New countries which are rapidly expanding always suffer from trade and monetary depression more than old ones, just as an unfinished house is bound to suffer if the money gives out before the roof is on.

Why Capital is Needed in the Dominions.

"Capital in a new and expanding country is not spent to provide for the population that is already there, but for the population that will be there. Railways and roads are built, shops and stores opened, townships laid out, and factories equipped far beyond the needs of the existing inhabitants. Prices for land rise quickly. A general optimism prevails and the future is gaily discounted. But the whole structure depends on a constant supply of capital. Unless the expenditure of capital goes on, great numbers of men will soon be out of work. And if there is no work to do, the expected immigrants will certainly not come. Naturally the Dominions would not all suffer equally. Australia is more self-supporting in the matter of capital than Canada, and for reasons which do not concern us here, her rate of progress is markedly slower. South Africa and New Zealand have given fewer hostages to fortune. In the last three years Great Britain has raised, by means of public issues in London, irrespective of capital employed privately, for Canada, £103,000,000; for Australia, £29,000,000; for New Zealand, over £7,000,000; and for South Africa, £30,000,000. Great Britain has invested in the Empire no less than £1,652,000,000 of which Australasia has taken £391,000,000 and Canada £365,000,000.

Financial Preference in London.

"This is probably a conservative estimate. And Great Britain has not only provided this mass of capital, but provided it on more generous terms than she has afforded to any other borrower. Sentiment has led the British people to supply their own fellow-subjects oversea with money at least 1 per cent. cheaper than foreign countries, and Sir Edgar Speyer calculated recently that the annual interest saving to the Dominions and Dependencies is at least £10,000,000, a very handsome preference. Moreover, to the detriment, be it said, of Consols, Great Britain had added to her list of Trustee Stocks about £650,000,000 of Colonial and Indian Stocks and thus enabled the Dominion, Provincial, and State Governments of the Empire to raise money on far more favorable terms than would otherwise have been possible.

LOANS TO BELLIGERENTS

Question of Financial Neutrality—What James Speyer Thinks

The attitude of the United States government regarding loans to belligerent powers, as expressed in a communication by that government to *The Monetary Times* last week, has renewed interest in the subject. When Mr. James Speyer was asked by the Wall Street Journal his opinion of the proposed loans by United States bankers to European nations at war, and of the attitude of the United States state department, he referred to an address that he made three years ago. He said at that time:—

"While in the excitement of the moment, patriotic feeling may carry a nation into a war, relying on its own resources, history shows that but very few nations in modern times can carry on any prolonged foreign war with their own resources only. How long, for instance, would the war between Russia and Japan have lasted, or how soon would it have ended, if neither of the belligerents had received financial assistance from so-called 'neutral' powers? Indeed, it might be asked whether Japan would have embarked in that war if her statesmen had not known that they could rely on the financial assistance of England.

Helped with Money.

"These great powers, France and England, who so scrupulously preserved neutrality as laid down by international law, and who saw to it that such neutrality was maintained by their citizens, did not hesitate to assist the belligerents in the most efficient way to carry on the conflict—with money. It certainly does not seem logical that neutral powers should be allowed to send money when international agreements will not allow them to send the ships and war materials which the money buys.

"We find in Europe that in times of peace certain governments will not allow their bankers to take and place foreign loans in the home market unless the purposes for which the loan is to be used are known and approved, and at least part of the proceeds are used by the borrowing nation for expenditures in such home markets for the benefit of the lending nation.

Maintain Financial Neutrality.

"Now, if such supervision and control of the bankers already exists in time of peace, it does not seem a wide flight of imagination to suggest that the great powers might agree to exercise such control in times of war between the third parties, and to maintain, in future, what, for want of a better term, might be called 'Financial Neutrality.' In case two nations went to war without first submitting their grievances and differences to arbitration or judicial settlement at The Hague, why should the other neutral powers not bind themselves not to assist either of the belligerents financially, but to see to it that real neutrality was observed by their banks and bankers? There is little doubt that this could be done.

"If no financial assistance could be obtained from the outside, few nations would, in the face of this most effective neutrality of the other powers, incur the peril of bankruptcy. Some wars would probably not take place at all, and those that could not be avoided, would certainly last a much shorter time."

◆

The enlistment of 30,000 special policemen for London has begun. University men, brokers, bank clerks, actors—men of all classes—are joining. Cyril Maude, Sir Herbert Beerbohm Tree and Sir George Alexander are organizing the actors, while Viscount Goschen heads the bankers. They will guard the waterworks, railways, tunnels, etc., relieving the territorials for more important work. Each man will be on duty four hours each day. A special patrol of motor-boats which have been loaned by owners will police the Thames.

The water power branch of the interior department of the Canadian government is arranging to put in the Canadian building at the Panama Exhibition at San Francisco an exhibit, showing the vast power resources of the Dominion. The exhibit is to include a series of models of typical power plants from the Atlantic to the Pacific. They will be arranged in a semi-circle in front of an enormous landscape painting of the Dominion, which is now being executed by Gibson Catlett, Toronto. The painting will be 75 feet long by 9 feet high.

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-nine years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Ten and One quarter Million Dollars of Shareholders' Money are a further pledge of their security.

These bonds may be had in sums of One Hundred Dollars and upwards.

CAN GOLD MOVEMENTS BE LESSENED?

Difficulties of Shipments During Wartime Has Raised Question Again

The transfer of gold during war times has proved a difficult problem during the present crisis. While the Bank of England's arrangement to establish a depository for gold at Ottawa, has helped matters, there are authorities who still think gold shipments are a clumsy financial arrangement. The late Major Thomas B. Kirby, who was for many years money editor of the Wall Street Journal, and the late Cope Whitehouse, who was an international authority on gold, were once discussing the heavy export of the yellow metal from the United States during 1909. Major Kirby said:—

"Mr. Whitehouse, the only way that we can ever settle this problem of the shipment of gold to Europe, foreign exchange, the risk and the incident worries and details, would be to have an international congress of the world's powers agree to load the world's hoard of gold on worn-out ships. Against this gold the international congress should issue negotiable certificates to the various powers representing the amount of the gold each owned on these vessels.

Would Sink the Gold.

"Then on a given day all of these gold-laden vessels should set sail for the middle of the Atlantic Ocean. When the vessels met, their holds should be loaded with dynamite, a time-fuse set and the crews withdraw. The explosion would send the gold to the bottom, and settle for all time to come this nonsensical performance of carting the stuff back and forth across the ocean."

Again, when secretary of the United States treasury, Mr. Cortelyou wrote in his annual report on the national finances:—

"The advantage of reducing to a minimum the transfer of gold between the financial centres of the world has been often discussed, but has not yet been the subject of official action. Economy in such transfers has come about automatically from time to time by the extension of the system of bills of exchange and of the use of international credits.

Mechanism of Exchange.

"Distrust of these resources in times of crisis—the very moment at which they are most needed—invokes the demand for physical gold. Even under ordinary conditions, the interval between the outward crop movement from the United States and the payment for foreign merchandise imported in the spring is often marked by shipments of gold in both directions, which the mechanism of international exchange has not yet found the means of entirely avoiding.

"It would seem that means might be devised to diminish the transfer of physical gold under these conditions. That credits or loans of gold might be extended more generously than at present by one nation to another in times of stress was proposed soon after the crisis of a year ago.

There might be considered the creation of an international gold certificate, which would represent for all practical purposes the transfer of gold coin or bullion without the necessity of transferring the metal itself.

Could Reach an Agreement.

"In the present advanced state of public faith and of financial responsibility there is apparently no serious obstacle to reaching such an agreement if measures are once set on foot by those capable of carrying it out. The issue of such international certificates, payable on demand, like the gold certificate of the United States, would not prevent the transfer of the physical gold when desired.

"Actual transfer might be advisable where there was reason to believe that the movement was more or less permanent in character, but it would seem that such transfers might be reduced to the minimum where it seemed probable that the metal would be recalled by the normal movement of trade within the space of a few months. It is suggested that the secretary of the treasury might be authorized to receive hospitably any suggestion on this subject from abroad and to appoint through the proper channels delegates on behalf of the United States to any conference which might be assembled having the subject within the scope of its deliberations."

NEW YORK AS BANKER

Authority Says To-Day that City is the Financial Capital of the World

Discussing the opportunity of United States financiers in the present European crisis, Professor Johnson, of New York, says:—

"New York is to-day the financial capital of the world. Up to the outbreak of the war the current of international trade flowed through London, and the London bill of exchange was the accepted standard of payment the world over. But the terrible finger of war has been laid upon the imposing financial structures of Europe and they have shriveled under its touch.

New York in London's Place.

"It is likely that the bankers of South America and the Orient will increase their deposits in New York—the only safe haven for the moment—and the New York bill of exchange will temporarily take the place of the London bill.

"New York bankers have no desire to take advantage of the difficulties of their English brethren, and in the long run it is to be hoped that London will regain her financial strength and prestige. Yet there is likely to be a residue of permanent gain for American bankers and exporters. Enduring financial and trade relations with many countries now almost closed to American products will be established.

"For the present, however, we are confronted by a closed market for securities with no definite prospect of its being reopened. Broadly speaking, only hand-to-mouth financing is possible.

New Projects Postponed.

"New projects, therefore, or any other large capital expenditures are out of the question. Construction that has already been financed may be carried on and there may be isolated cases of new financing, but they will be exceptional."

United States and Canadian banking conditions, in Dean Johnson's opinion, are sound. He says:—"Fortunately the war broke out toward the close of a period of liquidation. American and Canadian craft in the financial seas were already steering cautiously and with shortened sail. If the storm had burst in a period of expansion its effect would have been far worse."

◆

GERMAN SHIPS FOR SALE.

United States secretary of war Garrison said the government is waiting for assurances from the European governments that they will treat as neutrals German ships carrying the United States flag before the offer of the Hamburg-American line for the sale of their ships will be considered by American investors.

It is understood that while the North German Lloyd Steamship Company is not seeking to sell their ships on account of the war, they have placed the following valuations on their vessels at which figures they would entertain a sale:—Kronprinzessin Cecilie, $4,500,000; Kaiser Wilhelm II., $4,000,000; Kronprinz Wilhelm, $3,500,000; George Washington, $5,500,000; Princess Irene, $1,000,000; Grosser Kurfuerst, $1,000,000; Barbarossa, $1,000,000; Friedrich der Grosse, $1,000,000; Brandenburg, $750,000; Koln, $750,000; Wittiken, $500,000; and Willehad, $500,000.

◆

Professor Johnson, of New York, believes that Germany has long been anticipating and preparing for the war. He calls attention to the increase in the gold holdings of the Imperial Bank of Germany, from $194,000,000 at the beginning of 1913 to $336,000,000 on July 17, 1914. "Following the lead of Germany, the banks of France and Russia also piled up vast stocks of gold. The extraordinary pressure for gold on the part of the great governmental banks of Europe beginning early in 1913, is regarded as highly significant by those who believe that one of the world powers deliberately planned and promoted this war."

EFFECTS OF MORATORIUM

Explanation of Lloyd George "Studiously Vague"—How Ontario Felt It

Legislation was enacted at Ottawa last week providing for the declaration of a moratorium, if necessary.

Canadian cabinet ministers, like most other people in Canada, were not quite clear as to the scope and effects of the moratorium in England. Mr. Borden therefore cabled the acting high commissioner in London for information and on August 7, Mr. Perley cabled the Premier as follows:—"Proclamation date August 6 extends postponement to all payments due before this date or payable before September 4 in respect of any bill of exchange being a cheque or bill, on demand, on or before August 4, or in respect of any negotiable instrument not being a bill of exchange dated before that time or in respect of any contract made before that time for one calendar month after day on which payment originally due, or to September 4, whichever is the later date, but payments so postponed shall, if not otherwise carrying interest, and if specific demand is made for payment and payment is refused, carry interest until payment, as from August 4, if they become due before that day, or as from date on which they become due, if after that day at Bank of England rate current August 7.

Wages are Exempt.

"Proclamation does not apply to wages, amounts under five pounds, rates or taxes, maritime freights, any debt from residents outside British Isles, or where principal place of business is outside the British Isles, nor to dividends or interest payable in respect of trustees' stocks, nor bank liability in respect of bank notes, nor government payments, nor national insurance, nor workmen's compensation payments, nor trustee savings bank. Bill of exchange under previous proclamations not affected."

On August 10 Mr. Perley cabled as follows:—"Directors of Bank of England think my interpretation of moratorium correct. No debt due from outside British Isles is postponed unless incurred here by person, firm, company, or institution having business establishment or branch business in British Isles. No doubt further alterations in moratorium may come later on. Subject hurriedly discussed and arranged and it is really wonderful how quiet everything is here and how much the financial situation has improved. Bank directors say arrangements to finance food shipments from Canada and United States are being considered and no doubt satisfactory way will be found."

Government is Lending Credit.

Commenting on the moratorium, the London Economist says:—"The government, in reality, is lending its own credit in the case of those firms whose obligations cannot be met because of the inability of foreign customers to remit, just as the Bank of England lent its credit to Baring's in 1890. The ultimate result must depend upon the amount of final loss sustained over foreign transactions. The position is admittedly without parallel, because international transactions have never before in modern times been brought even to a temporary standstill. Relief will come when the seas are clear of German cruisers, and the situation should be improved by the government's arrangements for bearing 80 per cent. of the war risk insurance on hulls and cargoes, as ships will no longer be deterred from sailing through mere impossibility of securing insurance cover."

Mr. Lloyd George, English chancellor of the Exchequer, in the House of Commons said that the government had issued a proclamation for a limited moratorium. It was limited because they had to deal with one special emergency. But they took full powers for a wider moratorium. It had been felt by the traders, as well as by the bankers, that the moratorium ought to be a more extended one, otherwise it would be relieving a certain section of the community of their liability to discharge their debts for the time being, while at the same time people who depended upon the payment of these debts would be penalized.

There must be exceptions to the moratorium. For instance, the government must be excepted; they must discharge their debts—old-age pensions and insurance—and discharge liabilities of that kind. Wages, too, must be paid. It was felt that the moratorium should be widened so as to leave ample margin to enable trade to adapt itself to its present conditions and resume its ordinary course.

Bills and cheques presented to the clearing-house would be dealt with as usual, subject to the exceptional cases. Crossed cheques should be used in the ordinary way wherever possible. This meant that banks considered themselves in a position to resume the ordinary course of business, but they wanted discretion in exceptional cases with regard to cheques passing through the clearing-house. It must not be used for the purpose of defeating the moratorium.

As to Wages and Salaries.

Ordinary transactions would be treated exactly in the same way as they were before the moratorium. The banks were making arrangements whereby cash and legal tender would be available for wages, salaries and the normal requirements of daily life. These decisions were taken with a view to restoring normal business as quickly as possible. They were confident that if these steps were taken, and with the patriotic assistance of the public—because that was really essential—business would be resumed in a few days, and, what was of the utmost importance, there would not be the necessity that might otherwise have arisen of closing mills and factories and throwing hundreds of thousands of people out of employment. It might be necessary to-day to introduce a bill with regard to the issue of notes, and one or two other matters which might be decided upon in the course of further conference.

One London authority describes Mr. Lloyd George's words as "studiously vague."

A practical case of temporary deprivation of funds in Canada as a result of the British moratorium is probably that of the Ontario treasury. Before war broke out Hon. I. B Lucas, provincial treasurer, had, through the Bank of Montreal, placed about $5,000,000 of bonds on the London market. When the moratorium went into effect the underwriters escaped the necessity of paying a balance due the province of about $3,500,000. So far efforts to secure this money have proved unavailing. Discussing the financial situation of the province, Hon. Mr. Lucas admitted the possibility of the government issuing a form of treasury note in payment to contractors for government work, but was satisfied that the necessity was still some distance.

◆

FINANCING OUR EXPORTS.

Monetary Times Office,
Montreal, August 19th.

Unsatisfactory arrangements exist in Montreal with respect to the financing of the export grain movement. After considerable negotiations between this side of the Atlantic and the other, some exporters here at last have made arrangements with importers on the other side and their respective bankers. This is placing the export trade on a better basis. There is still considerable inconvenience and difficulty and it is having an adverse effect upon the export trade.

The agreement with the finance minister of Canada to act as agent of the Bank of England and to receive gold in trust for that institution, it was generally assumed, would make easy the work of financing exports of grain, flour and other produce from this side, inasmuch as it now should be an easy matter—with the Bank of England guaranteeing the risk on the shipments—for the exporter to sell his goods as formerly and receive the money here immediately. This would be the effect, it was announced.

But the arrangement at Ottawa has had no effect yet, so far as exporters are concerned. One exporter questioned, knows nothing officially of the matter. When he introduced the subject to his bank, he was informed that the bank had not been advised in any way of the working of the arrangement and was unable to make use of it at present to facilitate its financing with the other side of the Atlantic. Asked if export was not proceeding, and, if so, how it was being financed, he said:—

"Yes, export is proceeding. We have begun shipping freely during the past few days, but the financing is of our own arrangement The method we follow is to arrange with the importer on the other side to guarantee payment of the value of the export to his bank. His bank then cables guarantee to its agent here, and this agent notifies our bank. Our bank then gives us the money. It is a roundabout and expensive method, but it is the best we have been able to do as yet. We are hoping that the arrangement made at Ottawa by the Bank of England may come into operation shortly and be of assistance to us."

PANAMA CANAL AND CANADA'S WEST

Waterway Will Have Important and Favorable Influence on Pacific Slope Trade

In his valuable report on the trade of China and Japan, Mr. Richard Grigg, commissioner of commerce at Ottawa, discusses the probable effect of the Panama Canal on western Canada. The canal was opened a week ago. Men at the head of great commercial houses conducting the trade of the Pacific slope, and interviewed by Mr. Grigg, were unanimous only in one particular—viz., that the canal would have a most important and favorable influence upon the trade of the district with which they are associated, though it was impossible for any one of them to forecast exactly how the use of the canal would operate to produce that result. In full confidence, however, of such a result, large sums of money are being spent in preparing Pacific ports for greatly increased trade, and ships are being built with a special view to navigation through the canal.

Large Tonnage to Pacific.

The factors involved are numerous and complicated, but it appears to be certain that if the new waterway brings a large tonnage in shipping to the Pacific ports of the United States and Canada, as it will almost certainly do, that tonnage will be utilized for export cargo, provided always that reasonably competitive conditions are permitted to operate in regard to it. Wheat exporters differ widely as to the effect of carrying a cargo grown in northern latitudes through tropical waters and it is held that the safe export of Australian and Argentine wheat through the tropics is not a complete answer to the question, which can only be given when the first and experimental cargoes undertake the journey through the canal. The importance of a satisfactory answer may be judged from the fact that the distance from Vancouver to Europe via the present route is roughly 15,000 miles, and by the Panama route 9,000 miles. The use of the canal will obviously affect material economy in view of a reduction of 6,000 miles in navigation as compared with the present route round the Horn, or by the Suez Canal. If it is found in working out the problem of transportation that steamers after reaching the coast and discharging cargo there desire to proceed to the Orient, then rates of freight may be expected to favor such trade because of increased competition, and this is an essential matter in the Chinese market where the first consideration is price.

Value of Ice-Free Ports.

Enough has been said to indicate the importance of the subject and some of the difficulties surrounding it. The value of ice-free ports, such as those on the Pacific slope, for shipment of grain is obvious in view of the congestion which occurs prior to the close of navigation on the Great Lakes. Ultimately manufactured goods dealing at first with specialized lines will develop in the west, but this much desired condition cannot be reached until industries are located and immigration provides a population from which operatives may be drawn, and this touches the question as to how far emigrants to British Columbia will avail themselves of an all-sea route in preference to sea and rail. Nothing but experience can settle such a point, but on general lines it is well understood that water transport is so much cheaper than carriage by rail that competition will not be confined to the three Canadian trans-continental lines, but that they will have to face competition by water, and although the distance is much greater, it is believed that considerable effect upon the adjustment of freight rates will result.

◆

The report which was distributed by the international joint commission appointed by the governments of the United States and Canada to investigate the pollution of the international waterways along the boundaries, dealt exhaustively with the sources of water supply and the contamination of these supplies by sewage. It pointed out that steamboats crossing the lakes take drinking water from contaminated areas 16 miles from land, that the water supply at Detroit and Windsor, and the western frontier of Ontario is not only exceedingly bad, but dangerous, and that some deaths are undoubtedly due to the infected water service for drinking purposes on the ferries plying between Windsor and Detroit.

PROFITABLE INVESTING FORESIGHT

is not reckless speculation based on guess work or imagination, as a means of endeavoring to make profits.

IT IS

the art of carefully weighing past and present world-wide monetary conditions, comparative prices of securities, etc., etc., and of purchasing when supply is greater than the demand, then awaiting future changed conditions.

Many shrewd investors who secured large profits during the panic of 1907, are now in market for present attractive offerings.

We are in communication with several "Bargain Lots" of Conservative Securities, which can be purchased now to excellent advantage.

CANADA'S CANNED GOODS PRICES

They are Likely to Rise — Analysis of the Position

Monetary Times Office,
Montreal, August 26th.

Local financial circles are interested in discussions here in regard to the canning companies. An amalgamation of practically all the canning concerns recently was carried out. It became known as the Dominion Canners, Limited, with authorized capital of $5,000,000 of common and $5,000,000 preferred, $2,148,600 of common being issued and $2,170,000 of preferred, besides about $1,000,000 bonds. The company for a period was successful, and although it later fell upon evil times and was compelled to pass the dividend on the common stock during the past season, it was understood to have had a moderately successful year.

Some time after the formation of the Dominion Canners, the British Canadian Canners, Limited, was organized with an issued capital of $750,000 and $500,000 bonds. The period of adversity also hit this company hard and an adjustment became necessary in connection with bond obligations. Because of these unfortunate results following a period of prosperity, the canning business has been the subject of much discussion.

Low Prices of Last Year.

The Monetary Times has interviewed some of the canning men to ascertain the position of the industry at present. The period of depression seems to have been brought about largely by low prices. These, in turn, were partly the result of competition. Whether or not the smaller men carried the war to the Dominion Canners is hard to say, but the smaller companies put forward the claim that the big company certainly carried the war to them, as instanced in the fact that, from a price of $1.35, tomatoes were reduced last year to 90 cents. Other goods also came down in price. In addition to this, the season 1913 was productive of a number of shortages, including the vegetable crop of Western Ontario, thus making it next to impossible for the companies to fill all their contracts.

At the beginning of this year prices of canned goods were advanced about 2½ cents all around, and on August 1st, another 2½ cents was added, making the average price 5 cents higher than the latter part of 1913.

At present, the trade is in a curious situation. Prices should have been made some time since, but up to the present they have not been made for the coming season. It is assumed that the delay is due almost entirely to the war situation. The crops of most vegetables and fruits were good. The outlook for corn is good. The pack of raspberries was a good average. There was a slight shortage of strawberries, and peas are to be on the short side. Peaches were largely a failure. Otherwise crops have been good. There is no doubt that the price of all canned goods will be higher than a year ago, if for no other reasons than that last year's prices were unusually low and that the war has introduced new factors.

Tin and Solder Prices.

In addition, the price of tin has advanced practically 100 per cent., and the same is true of solder. The price of sugar also has advanced and from present appearances may continue to advance. The cost of these three factors in the business is greater than that of the fruit or vegetables themselves—in any case, it is a consideration of prime importance.

The bulk of the fruit and vegetables has been canned, so that alterations in price in the articles alluded to could have but small influence in the cost of the goods this year. This contention was admitted and furthermore it was stated that it would probably have no effect whatsoever on the price of the pack for 1914 inasmuch as all the supplies were bought some time ago. The canning companies, however, were placed in a position of great uncertainty concerning the purchase of supplies for 1915, and there was a possibility that it might be the part of prudence to make the 1914 pack carry a proportion of the largely enhanced cost of the articles for 1915.

CANADA'S WHEAT SITUATION

Estimates by an Expert — Capacity of the Flour Mills

Monetary Times Office,
Montreal, August 26th.

What will be Canada's position in case of continued deterioration of the wheat crops? One of the best posted millers in Canada gave *The Monetary Times* an estimate of the requirements of the country and the possibilities of the size of the present crop. The figures are as follows:—

		Bushels.
Wheat crop of western provinces		135,000,000
Wheat crop of Ontario and other parts of Canada		20,000,000
Total Canadian wheat crop		155,000,000
Average consumption over population of say eight million at rate of 5 bushels per year	40,000,000	
Required for seeding purposes	20,000,000	
Required for feeding	5,000,000	
		65,000,000
Exportable surplus		90,000,000

Average Per Capita Consumption.

The miller remarked, when questioned as to the apparently low estimate of 5 bushels per annum per capita, for consumption, that he knew of no authoritative figures relating to Canada, but that the United States estimates were about 5½ bushels per head, while in some places it was estimated that the consumption of flour per head per annum was one barrel of flour. As one barrel of flour was the equivalent of about 4½ bushels of wheat, it was his practice to figure an average of five bushels and this he thought is correct. He said:—

"I know it seems almost impossible that the average consumption of flour should be no more than one barrel per annum, particularly when bread is called the staff of life. The staff of life can be purchased for $6 or $7 per annum and yet one would have hard work making that amount pay for his meals for a week."

Citizens Cellaring Supplies.

Asked if it were true that many citizens were putting in supplies of flour for six months in advance to provide against possible war contingencies, he replied:—

"Six months? Some of them have laid in supplies for six years! Many families have bought five barrels of flour and stored it in their cellars; many have bought ten barrels. There is no possibility of them using all this flour. It will go bad and prove a loss. Meantime, it tends to increase the price of flour to others, because it takes very few families purchasing five and ten barrels at a time to decrease millers' supplies. Millers calculate to supply only current demand, not a demand for four or five years in advance."

"But the capacity of the Canadian mills is much greater than the consumption?"

Capacity of Mills.

"The capacity of the Canadian mills has been placed at 125,000 barrels per day. With 300 days to the year, this would give a capacity of 37,500,000 barrels. At the rate mentioned above, the consumption would be only 8,000,000 barrels, or at the outside 10,000,000 barrels, so that if the mills were all running at capacity they could supply practically four times the consumption of Canada. This is, feeding a population of eight millions. They could feed a population of over thirty million—which is nearly one-third as many as the population of the United States, and about three-quarters of the population of the United Kingdom, or one-half that of Germany. But the mills are never running to capacity for more than a short period."

JULY CROP REPORT

Full Crop Measured by Standard of 100, Shows Fall Wheat 71.5 and Spring 77.4

The usual monthly bulletin of the census and statistics office on field crops in Canada on July 31st showed that the condition of grain crops has undergone a marked change since the last reports for June 30, due to excessive heat and continuous drought during the month of July, especially in the Northwest provinces where the bulk of the grain crops is produced.

Measured by a standard of 100 representing the promise of a full crop the average condition for the whole of Canada is returned for fall wheat as 71.5, compared with 78 on June 30th and 77.7 on July 31st, 1913, for spring wheat at 77.4 against 86.3 last month and 87.6 a year ago, for oats as 77.9 against 87.3 last month and 87.4 in 1913, for barley as 77.4 against 86.2 last month and 87.5 last year, and for rye as 78.5 against 84.7 and 85.

In the maritime provinces conditions show excellent, and in Quebec and Ontario, though drought is reported as having shortened the straw, the grain was said to be filling well and the figures of condition, which for most of the grain crops exceed or approach 90 are not greatly different from those of a month ago.

In the Western Provinces.

For spring wheat in Manitoba the condition is 68.2 against 82.4 a month ago, for oats it is 62 against 87.6, for barley 62 against 79.8 and for rye 68.5 against 100. In Saskatchewan the figures are on July 31st for spring wheat 66 against 90 on June 30th, for oats 57.8 against 88.9, for barley 59.6 against 89.4, and for rye 74.4 against 92. In Alberta the condition is represented by 68 for fall wheat against 73 last month, 75.4 for spring wheat against 84.3, 71.5 for oats against 85, 71.5 for barley against 85.9, and 77 for rye against 83.7.

In some cases western correspondents state that there was still time for rains to effect an improvement before harvest which would begin about the end of the first week in August. Crops after summer fallows are distinctly superior to those prepared by fall or spring ploughing. Converting the figures of the standard condition at July 31st into those of a scale wherein 100 represents the average condition at July 31st for the six years 1908 to 1913 the condition for fall wheat is 90, for spring wheat 93, for oats 89, for barley 92, and for rye 94. That is to say the yield per acre this year is expected to be for fall wheat 10, for spring wheat 7, for oats 11, for barley 8, and for rye 6 per cent. below the six-year average.

Potatoes in the Maritime provinces give an excellent promise with figures of condition ranging from 93 to 96.

Some Preliminary Estimates.

A preliminary estimate of the yield per acre of fall wheat gives 20.95 bushels as compared with 23.29 bushels in 1913. For the harvested area of fall wheat in the five provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, amounting to 973,300 acres the estimated total yield is 20,394,000 bushels as compared with 22,592,000 bushels, the final estimate of 1913. The drought has naturally affected the yield of hay and clover, the yield per acre of which for all Canada is, according to the preliminary estimate, 1.15 ton as against 1.33 ton, the final estimate of 1913. The estimated total yield is 9,206,000 tons as compared with 10,859,000 tons, the final estimate of 1913. The yield of alfalfa is placed at 129,780 tons against 237,770 tons last year.

◆

Professor Irving Fisher of Yale says war in Europe offers opportunity for United States bankers to replace London as the banking centre of the world. We will become a lending nation during the war and may hold that position after the war. In other respects, he believes effect here will be slight as our foreign commerce is but 1 per cent. of our $450,000,000,000 internal trade. Danger of a local panic in New York from unloading of foreign securities is greatest at present and will not increase. He says there will be neither an industrial boom nor a great rise in prices.

INSURANCE IN ALBERTA

Department at Edmonton Issues Its First Report—New Companies in the Field

The first annual report of the Alberta insurance department covers the period from July 1st, 1913, to December 31st, 1913.

On this date there were 22 provincial and foreign companies (not Dominion licensees) licensed under the Alberta Insurance Act, classified as follows:—

Fire insurance companies	6
Life insurance companies	1
Hail insurance companies	4
Accident insurance companies	3
Mutual fire insurance companies	3
Fraternal societies	5
Total	22

The following companies holding a provincial license have ceased to do business since July 1st, 1913:—Alberta Canadian Insurance Company, Edmonton, Alberta, policies reinsured with the Central Canada Insurance Company, of Brandon, Man.; Saskatchewan Insurance Company, Regina, Saskatchewan, policies reinsured with the Central Canada Insurance Company, of Brandon, Man.; Security National Insurance Company, of Winnipeg, policies reinsured with the British Northwestern Fire Insurance Company, of Winnipeg, Man.

Some Deposit Withdrawals.

The deposit withdrawals are as follows:—Alberta Canadian Insurance Company, $10,000; Saskatchewan Insurance Company, $20,000; Security National Insurance Company, $20,000; Merchants Casualty Company, $20,000.

New companies admitted to Alberta by provincial license since December, 31st 1913, are:—St. Paul Mutual Hail and Cyclone Insurance Company, Farmers Mutual Hail Insurance Association of Iowa, Century Insurance Company, Limited, Excess Insurance Company, Limited, Brotherhood of American Yeomen, Ladies of the Maccabees.

The Merchants' Casuality Company of Winnipeg, has changed from a provincial to a Dominion license, and its deposit has been released by Alberta.

The following special brokers have been licensed by Alberta since July 1st, 1913:—Messrs. James B. Creagan, W. N. Poole, Chas. J. Campbell, Hal. E. Middleton.

Many Companies Doing Business.

On December 31st, 1913, there were 130 insurance companies (Dominion licensees) registered under the Alberta Insurance Act, classified as follows:—

Fire insurance companies	73
Fire and life insurance companies	2
Guarantee accident and plate glass insurance companies	20
Life insurance companies	30
Fraternal societies	1
Live stock insurance companies	1
Plate glass insurance companies	2
Hail insurance companies	1
Total	130

The following companies holding a Dominion license, have ceased business since July 1st, 1913:—Sovereign Fire Insurance Company, reinsured with the Phœnix, of Hartford; Nova Scotia Fire Insurance Company, reinsured with the Home Insurance Company, of New York; Rimouski Fire Insurance Company, in liquidation.

Admitted to Province.

The following new companies holding a Dominion license have been admitted for provincial registration in Alberta since December 31st, 1913:—Provincial Insurance Company, Limited, Beaver Fire Insurance Company, National Provincial Plate Glass and General Insurance Company, Boiler Inspection and Insurance Company, Glens Falls Insurance Company, National Fire Insurance Company, of Paris, Globe and Rutgers Fire Insurance Company.

The financial statements of companies licensed since January 1st, 1914, are on file at Edmonton, and may be inspected at the office of the superintendent of insurance.

FRUIT CROPS ARE FAIR

Apples and Pears Medium, Plums Poor, Peaches Failure, Grapes Heavy

The average over the whole Dominion for early apples is 79 per cent., for fall apples 76 per cent., and for winter apples 75 per cent., giving a total crop of 77 per cent., according to Dominion government reports. This is an increase of 28 per cent. over the total crop of 1913.

There has been no decided change in the pear crop. Prospects in southern Ontario point to a yield a shade above medium. Bartletts are generally light with Duchess and Winter Nelis more productive than other varieties. In all other sections of Ontario the crop is practically a failure, with a few scattered exceptions in the inland counties north of Lake Erie. Nova Scotia and British Columbia both report a crop between medium and full, although considerable damage has been done in the latter province by fire blight.

Plums Failure in Ontario.

The contrast in Ontario between the plum crop this year and that produced in 1913, is a marked one. In hardly any section of the province is the yield likely to be even medium, and in the section along the north shore of Lake Ontario the crop is almost a total failure. In the province of Quebec, east of Quebec city, there is a large crop of native varieties grown. These are mostly of the Reine Claude Montmorency type and until quite recently no very organized effort had been made to derive profitable returns from them. During the past two seasons, owing to the success of a local co-operative association, this fruit has been very profitably marketed, and this year in addition to marketing the green fruit many of these plums will be canned locally. British Columbia reports a full crop of plums in the Okanagan valley with prospects only slightly less favorable in the Kootenay district where the dropping has been particularly heavy. In this latter valley Burbanks are generally light.

Some Peaches Coming.

In spite of the fact that the peach crop in the Niagara district is practically a failure, some Triumphs are now upon the market, and at least in one instance these were purchased at 55 cents for six quart baskets f.o.b. shipping point and are retailing in Ottawa at 75 cents. At figures such as these, the few growers who are fortunate enough to have hardy clingstone varieties in their orchards, will be in an enviable position, at least in the eyes of their less fortunate neighbors. The prices should also be good for the peaches of Essex, Kent and Lambton counties. In British Columbia the apricot season was ended by the first of August, which is two weeks earlier than in the ordinary year. All peaches are reported a good crop.

The long spell of hot, dry weather has very seriously affected the tomato crop in all parts of Ontario, and the chances now are that in spite of the very heavy acreage the total crop will not greatly exceed that of previous years. Fruit is ripening quickly and if the weather conditions remain as at present, the crop will be harvested considerably earlier than usual. The crop in British Columbia is in practically the same condition as in Ontario, except, of course, in irrigated sections where the effects of drought have been largely prevented. In other sections, however, the lack of rain has resulted in a falling off in prospects, and much of the fruit produced, while abundant in quality, will be of small size.

Reports still point to an almost exceptionally heavy crop of grapes in the Niagara peninsula. The average for the district is 85 per cent. and from practically no sections have any adverse reports been received. The red varieties are not so promising as some of the others.

Marketing Fruit in Europe.

Owing to affairs in Europe, the wisest attitude for fruit growers to adopt is to wait until the crop is ready to handle, to harvest and pack it, and if at that time the facilities for marketing abroad are inadequate, and the demand at home is not sufficiently keen to keep prices at a satisfactory level, then the only logical alternative will be to hold what remains of the crop in storage for later distribution, and hope for the best.

F. D. WILLIAMS, *Managing Director.*

The Great-West Life has recently arranged an important extension of the automatic paid-up feature applying under participating Policies.

By this means the insured can secure himself against any possibility of life-long premium payments, while at the same time securing protection at a low rate.

The matter is well worth investigation. Ask for descriptive printed matter, stating age.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Penmans, Limited.—Notices have been sent to the holders of preferred shares, announcing that at a special meeting of the directors, held several weeks ago, it was decided to change the par value of the company's preferred stock from $5 to $100 and requesting preferred shareholders to forthwith deposit their certificates with the Royal Trust Company for transfer to the new scrip.

Each holder of 20 shares of the old will be entitled to one share of the new consolidated 6 per cent. preferred stock. Fractional certificates in twentieths will be issued for any number of shares less than 20.

There is now $1,075,000 of preferred stock outstanding. This amount is not to be changed, the only difference being that in future there will be 10,750 shares of $100 each instead of 215,000 shares of $5 each.

Canada Bread Company.—The profits for the year ended June 30th, were $254, 96, compared with manufacturing profits of $142,499, an increase of 78 per cent. in the gross earnings. The company's statement which will be presented at the annual meeting of the shareholders on August 27th, shows that at the close of the year there was $429,955.22 cash on deposit in the banks. This is made up of $185,347.83 current account and the balance $244,607.39 capital account, so that the company's president says, "when we realize on certain properties, which we are holding for sale, and add the proceeds to our capital account it will leave us with about $500,000 for the purchase of new business or the extension of our present plants."

The credit of the profit and loss account has increased from $1,180 at the close of the 1913 year to $55,173 on June 30, 1914. Moreover, two charges against the profits of the business which do not appear in the accounts of the previous year, $50,000 reserve for depreciation and $2,000 for organization expenses written off, decrease the balance to be carried forward to the amount named. The profits of the company from its operations were before depreciation charges well in excess of 14 per cent. upon the preferred issue.

In his report, Mr. Mark Bredin, vice-president and general manager, says:—"Not only have we added considerably to our output, but also through our purchases and other economies that we have put into practice, we have been enabled to show a much improved net return on our operations, and while accomplishing this we have also, in the short term of three years, placed our company in that enviable position that to-day Canada Bread, wherever spoken of, means 'Best Bread.' The outlook for the coming year is good notwithstanding the general recession that has taken place in most industries."

Further extensions in the company's Montreal factory are to be made. In Winnipeg small extensions already have been made and blacksmith shops are being added to all the factories, so that the company may do its own horseshoeing and wagon repairs. One of the Toronto branches has installed a paint shop for painting the company's wagons. "In Toronto," says Mr. Bredin, "business has shown good growth during the year at both our factories. We have added to our output here the manufacture of a 'health biscuit,' starting on June 10th, which has been the means of giving us a very nice increase to our trade at a very small cost in equipment. We still have on hand the bakery and stable properties, corner Soho and Phoebe Streets, Toronto; also a frontage of 205 feet of vacant land on Portage Avenue, Winnipeg, and while there is no sale for those properties at the present time, we still expect to realize, when sold, about $260,000. We have the Soho and Phoebe Street property rented to a good tenant."

CHEESE AND APPLES FOR TROOPS.

The British Columbia Fruit Growers' Association will give 100,000 barrels of apples for the British troops in the field.

At a special session of the Quebec provincial cabinet, the government decided to offer the Imperial military authorities four million pounds of Canadian cheese for the use of the armies.

The Ontario government's war gift is a donation of $500,000, this sum to be tendered through the Dominion government to the Imperial Government to be used in whatever way is thought best.

Another gift is in the form of 100,000 tons of coal from the province of Nova Scotia for the use of the British Admiralty. Half the amount of the coal probably will be placed in Halifax for the use of the British ships coaling there, and the other half sent either to the West Indies or South Africa, where Great Britain has a naval base. It might be sent to the Pacific coast, where Great Britain and Japan have naval bases.

◆

COMMISSION GOVERNMENT AT EDMONTON.

Following are a number of the clauses adopted by Edmonton as a part of their new commission form of government charter:—

1. That by a two-thirds vote of the electors the charter may be amended without reference to the legislature; except in matters affecting franchises and the borrowing powers of the city.
2. That the commission council shall consist of five commissioners elected at large.
3. That commissioners shall be elected to duties, so that there will be elections to fill the office of commissioner of finance, commissioner of public works, commissioner of utilities, commissioner of safety and health, and commissioner of parks and markets.
4. Commissioners shall be elected for four-year terms.
5. There will no longer be any election for mayor, the commissioners after each annual election selecting their chairman, who is to be called "mayor" from among their own number.
6. Anyone who is qualified to be a candidate for commissioner who is a British subject, is 21 years of age and can read and write English. Commissioners at the time of their election do not have to be residents of the city.

◆

A sum of $75,000,000 in six months treasury bills, required for war purposes, was offered to the public in London and met with a hearty welcome, says a cable message. The amount applied for was over $210,000,000. Tenders at £98 1s. 8d get about 48 per cent of their applications; those above this figure were allotted in full. The average rate per cent. was about £3 12s.

London cable to New York Journal of Commerce says that opening of London Stock Exchange is not imminent, and that it will be necessary again to postpone settlements. Settlement for Consols has been postponed already until September, and the fortnightly settlement, which should have begun Tuesday, has been omitted altogether. The next settlement is due August 25, with pay day, August 27. It is the opinion that consol settlement will be carried forward a full month, and that usual end-August account will be carried until September 10.

The announcement of the British government regarding the capturing of Germany's export trade has been received with great enthusiasm by British traders, says a cable message. With the view to replacing some of the larger markets in hardware and metals, a syndicate of British merchants are sending to Canada by the SS. Lake Manitoba, a direct representative, Mr. P. G. Donald, who will act in the general interests of obtaining orders for some goods hitherto supplied by Germany for the whole of the English markets. "That Canada is alive to opportunities presenting themselves is obvious," says Mr. Donald, "from the prompt and courteous assistance given to us by the Canadian representatives on this side. It now merely remains for the Canadian government and manufacturers to grasp the opportunities for the large trade to spring up between us."

NEW INCORPORATIONS

Building and Construction Activities are Indicated in this Week's List

Canada's new companies incorporated this week number 74. The head offices of these companies are located in seven provinces. The total capitalization amounts to $18,834,000. Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	6	$ 110,000
Alberta	35	14,525,000
Saskatchewan	10	1,084,000
Manitoba	2	600,000
Ontario	17	1,912,000
Quebec	13	528,000
Prince Edward Island	1	75,000
	74	$18,834,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Vidora, Sask.—Orr Hardware Company, Limited, $5,000.

Osage, Sask.—Osage Telephone Company, Limited, $4,000.

Prince Rupert, B.C.—The Knott Clifton Bakery, Limited, $10,000.

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, but the situation today justifies our conservative yet progressive policy.

Montreal, Que.—Laurentic Hotel, Limited, $20,000. C. Aronson, M. Gross, M. Gross. Wilfrid Methot, Limited, $20,000. W. Methot, Sr., W. Methot, Jr., S. Jobin. Club du Palais, Limited, $99,000. P. Bonhomme, J. B. Bonhomme, J. Bonhomme. Manetti Fils, Limited, $20,000. A. Manetti, M. Manetti, L. D'Onofrio. The Excel Carbon Paper Manufacturing Company, $10,000. S E. Dixon, W. Taylor, A. C. Calder. Estates and Collection, Limited, $10,000. A. Menager, J. Lavoie, A. Blain. Instalment Investment Company, Limited, $50,000. E. A. Mumford, G. A. Mattinson, S. W. Hicks. La Compagnie de Construction de Maisons d'Habitation Salubres, Limited, $100,000. L. A. Rivet, L. G. Glass, J. A. Sullivan. The United Garment Company, Limited, $20,000. A. N. DeTilly, H. Korenberg, D. Rose. Hotel Le Patrie, Limited, $20,000. U. Leclair, E. Marsolais, O. Lafleur.

Toronto, Ont. Port Dover Canning Company, Limited, $200,000. T. J. Medland, R. J Muirhead, J. Medland. Direct

Sales Company, Limited, $4[illegible]. H. M. Van Gorder, A. E. Fleming, F. S. Brown. Austin Press, Limited, $40,000. A. H. Austin, F. P. Higgins, R. Whirry. Canadian Journal of Music, Limited, $50,000. L. von Kunits, C. R. A. Gladman, V. L. Gladman. Canada Yeast and Manufacturing Company, Limited, $100,000. O. E. Morrison, A. Pratt, F. S. Brown. Lime and Agencies, Limited, $40,000. J. Stewart, A. Hand, W. H. Latimer. Hermann Johnston Motors, Limited. G. Ritchie, H. Quigley, J. G. Spears. Fibred-Asphalt Paving Company, Limited, $500,000. M. T. Matthews, R. C. LeVesconte, V. J. Cullen. Dartmoor, Limited, $162,000. L. F. Black, H. A. Hall, W. B. Henderson. Canadian Pure-O-Phone Company, Limited, $100,000. J. E. Day, E. F. McDonald, K. Wallace. South Kensington Land Company, Limited, $200,000. D. R. Leask, F. H. Vanston, R. A. Stephen. The Marten-Freeman Company, Limited, $200,000. T. H. O. Marten, A. E. Freeman, J. L. Thorne.

Application is being made for letters patent for the following companies:—

Hopewell Cape, N.B.—Hopewell Silver Black Foxes, Limited, $49,000. G. M. Russell, C. M. Pye, W. Downey.

Montague, P.E.I.—The Paragon Silver Black Fox Company, Limited, $150,000. A. C. Jardine, R. M. Rive, R. A. Taylor.

Summerside, P.E.I.—Strathern-Connaught Silver Black Fox Company, Limited. A. MacNeill, J. S. Allen, A. C. Saunders.

The following is a summary report of the new oil companies chartered in Alberta. There are 16 this week, with authorized capital of $13,050,000. Six of these companies have capital of $1,000,000 each; and 2, $1,500,000.

◆

SOME GOOD ADVICE.

Every man can help the city by being the man for his emergency, is the advice of the bureau of municipal research at Toronto. In a circular just issued, it continues:—

"The Dominion, provincial and city governments are being called upon not to curtail public work. This is good. The private employer of labor is being called upon to keep his establishment going. This is good.

"Private consumers, particularly those of means, are asked also to maintain their confidence in the future of the country and show it by not unnecessarily curtailing consumption of staple articles, mostly manufactured in Canada. This is essential. With all doing their share, the city will not only be able to contribute her share, but will be able to continue contributions indefinitely. Prompt payment of taxes will help the city do its share. Not more alms, but more clear thinking as to means of preventing unemployment is the crying present need."

◆

NATURAL RESOURCES OF CANADA.

Canada's natural resources are so varied in character and so scattered of location that even the most inveterate traveller is hardly able to secure a comprehensive idea of their extent. But the information is furnished to the visitor to the Canadian National Exhibition at Toronto in a very suggestive way. The federal and provincial exhibits comprise a series of displays that give at a glance a wonderful insight into the sources of the country's wealth. It is constant delight to the patriotic Canadian and a revelation to the visitor from another land, and should certainly prove one of the greatest of educational features, giving the sightseer a finer idea of the capabilities of the country in a few minutes than he could otherwise acquire in years. In the government building will be seen a complete range of the edible inhabitants of the oceans and the inland waters, shown by the Dominion government, while the provinces display their special resources, such as grain, fruits and ores from Ontario; grains from the west; timber, fruit and minerals from British Columbia, and fish and minerals from the Maritime Provinces. "The combined display can only be termed magnificent," said an American visitor last year.

DEBENTURES FOR SALE

TENDERS

Sealed tenders will be received by the undersigned up to noon, Monday the 7th day of September, 1914, for the purchase of $22,152.27 2[illegible]-year 5½ per cent. annual payment Village of Weston Sewerage Debentures. The lowest or any tender not necessarily accepted.

J. H. TAYLOR,
Clerk, Weston.

BANK BRANCHES OPENED AND CLOSED.

During July 11 branches of Canadian chartered banks were opened and two closed. Since January 1st, 1914, there have been 185 branches opened and 53 closed. Houston's Bank Directory gives the following particulars for July:—

Branches Opened—11.

Bonne Bay, Newfoundland .	Bank of Nova Scotia
Grimsby, Ont.	Canadian Bank of Commerce
North Battleford, Sask.	Bank of Montreal
Prince George, B.C.	Royal Bank of Canada
Quebec, Que., Upper Town	Molsons Bank
St. Catharines, Ont., Page and Queenston Streets ...	Canadian Bank of Commerce
St. Damien, Co. Bellechasse, Que.	La Banque Nationale
St. Luce Station, Que.	La Banque Nationale
South Durham, Que.	Banque d'Hochelaga
Victoria, B.C., Douglas St.	Imperial Bank of Canada
[illegible], Ont.	Merchants Bank of Canada

Branches Closed—2.

Churchbridge, Sask.	Bank of Toronto
St. Dominique Station, Que.	La Banque Nationale

The Bank of Ottawa [illegible] from Fort George, B.C., to Prince George.

If every Canadian will get down to business, business will get down to every Canadian.

One hundred years of peace in America may be celebrated by the British Empire skimming the cream of German commerce and taking a little of the milk, too.

COMPANIES LICENSED.

The following companies have been licensed to do business in British Columbia:—

The Scottish Pacific Mortgage Company, Limited, of Edinburgh, Scotland. The Great Western Garment Company, Limited, of Edmonton.

The following company has been licensed to do business in Ontario:—

Wilt Twist Drill Company of Canada, Limited (Dominion charter), capital, $144,000.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 21st:—

Cobalt Townsite Mining Company, 86,260 pounds, or 43 tons. The total shipments since January 1st, 1914, are 24,383,393 pounds, or 12,191 tons.

Week ended August 21st, 1914:—

New Liskeard—

Casey Cobalt Silver Company Mine, 16,107 pounds.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,500 tons; in 1913, 20,261 tons.

◆

COMPANIES INCREASING CAPITAL.

The following companies in Prince Edward Island have increased their capital stock:—

Seal River Black Fox Company, Limited, from $190,000 to $350,000. Belmont Black Fox Company, Limited, from $125,000 to $250,000.

The following company in Saskatchewan has increased its capital stock:—

Hanson Rural Telephone Company, Limited, from $90 to $150.

The following company in Ontario has increased its capital stock:—

The Renfrew Machinery Company, Limited, from $250,000 to $1,000,000.

◆

CONFIDENCE AT MEDICINE HAT.

Mr. Willcox, the industrial commissioner at Medicine Hat, writes *The Monetary Times* as follows:—Mr. John H. Tabor, managing director of the J. H. Tabor Candy Company, Limited, has returned from a month's trip to eastern Canada and United States points, whither he went for the purpose of purchasing machinery and other equipment for the factory, having travelled 6,000 miles on this trip. During his absence the company's new factory building has been completed, having 12,000 square feet of floor space, and it is undoubtedly one of the most complete and modern factory buildings in Alberta, as well as being erected specially for the manufacture of chocolates and confectionery of all kinds.

Mr. Tabor states that the company now has a carload of modern candy-making machinery on the way to Medicine Hat, which will be installed on its arrival and the industry will then begin turning out its high-grade products for shipment all over the prairie provinces. Mr. Tabor was not a little pleased to learn, on his return, that payments to the company had been steadily coming in while he was absent, notwithstanding the prevalence of war conditions—this he thinks speaks well for the confidence of those interested in Medicine Hat and the enterprise and its outlook for business

◆

This is a good time to put into practice all that talk about "a great country."

Three or four plants have closed, but not all of the 19,218 industrial establishments of Canada, with their $1,247,583,000 employment of capital, and $1,165,075,000 worth of output are shut.

RURAL TELEPHONE COMPANIES INCORPORATED.

The following is a list of rural telephone companies incorporated in Saskatchewan, together with their capital and head office:—

Luton Rural Telephone Co., Limited, $150. Dubuc.
Glenford Rural Telephone Co., Limited, $300. Glenside.
Schneider Rural Telephone Co., Limited, $120. Weyburn.
Kingsley Rural Telephone Co., Limited, $80. Windthorst.

◆

CANADIAN NORTHERN FINANCES.

Senator Kerr drew the government's attention last week to the fact that in the emergency financial legislation passed this session there is no provision made for the issuing of Dominion notes to banks upon approved securities. In the Commons the finance minister had stated previously that these approved securities would be "Dominion and provincial guaranteed securities and other high-class listed securities, bonds and stocks and commercial paper."

Senator Kerr asked the government leader if that would not include the Canadian Northern bonds, guaranteed by the Dominion to the amount of $45,000,000, and which are now unrealizable in London.

Hon. Mr. Lougheed replied that the question of issuing Dominion notes to banks on deposit of such bonds would have to be decided "on its merits" by the minister of finance and the treasury board under the new legislation.

An Ottawa dispatch says that it is apparent that the power to issue Dominion notes against Canadian Northern guaranteed bonds has been conferred upon the treasury board. If these bonds are deposited with any bank, and that bank applies for Dominion notes on such security, these notes may be given up to any amount determined upon by the government.

◆

ONTARIO CROP STATISTICS.

The following statistics of the principal field crops of Ontario for 1914, show the acreage as compiled from individual returns made by farmers to the Ontario Bureau of Industries and the yields as estimated by a large and experienced staff of correspondents, who give probable yields according to conditions on August 10th, 1914:—

Fall wheat—685,692 acres will produce 13,932,023 bushels, or 20.3 per acre, as against 646,533 acres 15,945,717 bushels and 24.7 in 1913. The annual average for 32 years, 1882-1913, was 21.1.

Spring wheat—118,607 acres 2, 215,526 bushels, or 18.7 per acre, as against 116,581 acres 2,068,951 bushels and 17.7 in 1913. Average 16.0.

Barley—579,473 acres 17,937,345 bushels, or 31.0 per acre, as against 623,658 acres 18,255,958 bushels and 29.3 in 1913. Average 27.8.

Oats—2,776,883 acres 103,313,252 bushels, or 37.2 per acre, as against 2,699,459 acres 98,426,902 bushels and 36.5 in 1913. Average 35.7.

Rye—138,913 acres 2,342,752 bushels or 16.9 per acre, as against 118,429 acres 1,979,775 bushels and 16.7 in 1913 Average 16.5.

Peas—177,856 acres 2,900,607 bushels, or 16.3 per acre, as against 177,303 acres 3,108,263 bushels and 17.5 in 1913. Average 19.2.

Beans—51,149 acres 879,635 bushels, or 17.2 per acre, as against 66,639 acres 1,021,243 bushels and 15.3 in 1913. Average 17.1.

Hay and clover (not including alfalfa)—3,251,799 acres 3,469,795 tons or 1.07 per acre, as against 3,261,139 acres 3,543,957 tons and 1.09 in 1913. Average 1.45.

The acreages in other crops for which no estimates as to yield have been made at this date are as follows:—Buckwheat, 177,227, against 228,279 in 1913; corn for husking, 290,817 and 299,871; corn for silo, 418,105 and 388,138; potatoes, 167,591 and 159,661; mangel wurzels, 50,663 and 54,568; sugar beets, 18,534 and 19,083; carrots, 2,448 and 2,400; turnips, 95,371 and 97,572; mixed grains, 456,631 and 414,517; alfalfa, 163,685 and 167,707.

There are 3,302,503 acres of cleared land devoted to pasture; 268,714 in summer fallow; 298,627 in orchard; 23,863 in small fruits; 10,850 in vineyard; 58,167 in farm gardens; 42,375 in rape; 6,025 in flax; 6,281 in tobacco (Essex 4,231, Kent 1,582).

Financing the Nations at War

OPINIONS are divided as to the policy of the United States administration with regard to bankers of that country making loans to belligerent powers. President Wilson always has held the opinion that money being an instrument of war, neutral countries should withhold that instrument. As indicated in the statement of Mr. Bryan, his secretary of state, to *The Monetary Times*, this ban includes loans to Canada's governments. It will not prevent, however, the financing of municipal and corporation loans in the United States.

Several Canadian bankers, discussing the question with *The Monetary Times*, held the view that the presidential ban would not apply to Canada's provincial governments. But evidently it does. An attempt to prepare the way for a flotation of Ontario's provincial government bonds in the United States met with a positive declaration that the Ontario government, under a strict interpretation of the obligations of neutrality, was a "government at war." Naturally, the gifts which the various provinces of Canada are making to help the Imperial government, have emphasized the fact that the governments of the British Empire are at war.

President Wilson's view was expressed in 1900 by Mr. Oscar Strauss, former secretary of commerce and labor in the United States. In a speech in 1908, Mr. Strauss said: "Everyone knows that the money advanced to belligerents signifies the giving to them of means for securing war instruments. Money is the most effective war instrument."

The press of the United States think it is practically certain, in view of the stand taken at Washington, that no loans will be made to the European powers at war or to their colonies. The Wall Street Journal expresses one view of the matter in saying: "It seems rather to be regretted that the administration at Washington has discouraged the raising of a French loan of $100,000,000 by New York bankers, or in fact, any loans to the belligerents in the present war. Such loans are really in the nature of money market operations, and there is no reason why New York should not be the money market for Germany or any other of the belligerent nations."

Later, the same journal took even a stronger stand, saying: "In order that there may be no possible misunderstanding, some expert on international law should convey to Mr. Bryan, and even to the president, the information that their consent is not requisite to the making of loans to belligerents in time of war. Why J. P. Morgan and Company should consult with the state department at all is their own business. It is not beyond the bounds of conjecture that they may have desired a polite way of saying 'No' to the French government; and preferred the secretary of state should perform that distasteful task. It is difficult to see otherwise why the matter was referred to Washington.

"Mr. Bryan's statement to *The Monetary Times* that loans to Canada at this time would be improper, is simply silly. There is no breach of neutrality involved. If J. P. Morgan and Company lend directly to a belligerent, not even through colonies, transferring the loan not in cash, but in $100,000,000 of American produce, they perform a patriotic act.

"What is the difference, in fact, and which is the more proper, if the United States government should relieve embarrassed German companies with $30,000,000, on the security of ships which cannot keep the seas? There can be only one answer. A straightforward loan to a belligerent is sound in international law and common morals. The relief to the steamship companies is vicious, morally and economically.

"That the belligerents will borrow money here when our financiers can see their way to make a reasonable profit on good security, there can be no manner of doubt. It will be a pity if the war is thereby prolonged. If nations could agree to make loans to belligerents absolute contraband, the question would take on an entirely different aspect. As it stands now, it is merely a question of the international movement of credit—with which the department of state, and even the president himself, may with advantage meddle as little as possible."

Senator Lodge of the United States is reported in London as saying that the administration's policy of preventing loans to belligerents is inconsistent with plan to pay Germany $25,000,000 outright for ships she cannot use. This purchase, Mr. Lodge claims, would check exports from the United States, because individuals, who otherwise might purchase vessels in large numbers, would fear government competition.

On the other hand, the London Statist thinks that the people of the United States are doing a service to themselves and to mankind in general, even including all the belligerents, if they extend their neutrality so far as to refuse to lend to any of those engaged in the war while it lasts. "The sooner it is brought to an end," it adds, "the better it will be for all the parties engaged. Therefore, those who refuse supplies that may be used for warlike purposes will really be rendering a service, even to those to whom they deny assistance."

There is also consolation in the fact that if the belligerents are to do without United States loans, Great Britain and her allies are in better position to meet that situation than is the enemy. It is agreed that the war must be fought to a finish. Consequently it must be financed. Great Britain's fight, with the sword as weapon, is for the principle which is backed by President Wilson's fight, with finance as weapon.

HOW LONG WILL IT LAST?

ESTIMATES of the war's duration vary from a few weeks to three years. The minimum guess is that of the thoughtless. The maximum is that of military men. Financiers and economists generally are not indulging in estimates. Their guesses probably would be always "Less than twelve months." In the House of Lords the other day, Earl Kitchener said: "The terms on which I am serving are the same as those under which some of the finest portions of our manhood, now so willingly stepping forward to join the colors, are engaging, that is to say, my term of office is for the duration of the war, or for three years if the war should last longer than that. It has been asked why this period has been limited. It is because if this disastrous war be prolonged —and no one can foretell for a certainty its duration— that after three years of war others will take our places and see this matter through."

One expects such stern stuff from Kitchener. His statement will have at least three marked effects. It will impress upon British people that this war is not an affair of days. It will impress upon the British Empire the immediate necessity for men and money. It will be an unmistakable hint to Germany that we are in this fight to stay. But after all, Kitchener's suggestion of a three years' war is that of a military man. He makes no calculations for publication regarding finance and food.

Sir Arthur Conan Doyle thinks that a year will be the limit. "There will be vast efforts," he says, "and occasional disappointments will await us. But it will be not long. It seems to me absolutely impossible that it should be long. The temper of the times will not brook slow measures, nor will the enormous financial strain upon Germany be tolerated indefinitely. How dangerous is prophecy, and these very words may come back to mock me. But I cannot make myself see how it can be over in less than six months, or how it could extend for more than twelve."

The Monetary Times, while hesitating to prophesy, is inclined to take the view that twelve months at the outside will see the end of the war. Little financial and economic news is allowed to come out of Germany. The few official bulletins of that nature obviously are incorrect and have an inspired touch. Those who left Germany just after the outbreak of war describe some extraordinary financial and commercial measures there which are making an astounding drain upon that country's financial reserves and her credit system, "creating a situation which may be tolerable in victory but will be appalling in defeat."

At the same time, Great Britain's commercial trade, navigation, food and financial problems are being solved in the same cool and effective manner as are its military and naval problems. Germany is being cut off from the world, while Great Britain is making practical use of its Empire links. The Wall Street Journal thinks that what is likely to stop this war, and in the not far distant future, is not bayonets but bankruptcy; hunger and not horse artillery. This, we think, is the correct view. Every week of the war sees nations and their supplies more exhausted.

◆

Do not stop money circulating,—because money circulates.

Be like the British bull dog—hang on to the business you have and take an extra bite at the enemy's.

COMPANIES PAID FOURTEEN MILLIONS

That was Result of Fire's Toll in One Year in Canada

During the year 1913 the business of fire insurance in Canada was carried on by 84 companies; of these 29 were Canadian, 24 British, 29 United States and 2 French.

During the year two Canadian companies, the Beaver and the Imperial Underwriters (the business of the former being confined to organization), one British company, the Marine, which during the year received a license for fire insurance in addition to its previous powers, but did not actually transact fire business, and two United States companies, the Equitable Fire and Marine and the Glens Falls, were added to those transacting business in Canada.

The Ottawa Assurance Company having reinsured its business in 1912 did not transact business in 1913 and has been wound up. Three Canadian companies, the Central Canada Manufacturers, the Nova Scotia, and the Sovereign discontinued business during the year, and having reinsured or cancelled their policies, are being wound up. The insurance department withdrew the license of the Ontario Fire and this company is now in liquidation. Since the beginning of 1914 the license of the Rimouski Fire has been cancelled and the company is being liquidated.

The Nationale Fire Insurance Company of Paris, France, the Globe and Rutgers and the National-Ben Franklin have received licenses for fire business.

Premium Total Was Larger.

Cash received for premiums during the year in Canada amounted to $25,745,947, being greater than that received in 1912 by $2,551,429, and the amount paid for losses was $14,003,759, which is greater than that paid in 1912 by $1,884,178. The ratio of losses paid to premiums received is shown in the following table:—

Companies.	Paid for losses.	Received for premiums.	Rate of losses paid per cent. of premiums. received.	The same for 1912.
	$	$		
Canadian	3,020,551	5,099,298	59.23	53.95
British	6,939,451	13,138,597	52.82	52.26
United States and other	4,043,757	7,508,052	53.86	50.82
Totals	14,003,759	25,745,947	54.39	52.25

Taking the totals for the same forty-five years, 1869-1913, according to the nationalities of the companies, the following are the results—

Companies.	Premiums received.	Losses paid.	Rate of losses paid per cent. of premiums received.
	$	$	
Canadian	81,654,059	51,601,983	63.21
British	225,693,037	140,758,700	62.37
United States and other	61,633,801	35,257,966	57.21
Totals	368,981,717	227,618,649	61.69

Shows Incurred Loss Rate.

The loss rate for 1913 (54.39) is 7.30 below the average for the forty-five years over which the insurance department's records extend.

Obtaining an approximation to the losses incurred during the year, by excluding the estimates for losses outstanding at the beginning of the year, and including the amounts estimated for those of the year still unsettled, the ratio of the losses incurred to premiums received comes out 56.71 per cent., which is 5.59 per cent. greater than the 51.12 of the previous year, and is 3.17 per cent. less than the average for the last fifteen years (59.88). The following are the rates of incurred losses from 1899:—

Companies.	1913.	1912.	1911.	1910.
Canadian	61.31	52.59	53.08	60.41
British	54.78	50.95	53.80	57.01
United States and other	56.96	50.21	48.95	59.72
Totals	56.71	51.12	52.54	58.40

"Business as Usual"

BUY LIFE INSURANCE NOW

In spite of the present situation, the Toronto office of the Sun Life Assurance Company made a gain of $10,000 in new business over the record of August, 1913.

TOO MANY ORDERS TO FILL

A cement dealer tells *The Monetary Times* that during the past month he has shipped 120,000 barrels of cement to fill orders. He could have sold twice as much had the mills supplying the cement been of greater capacity.

WORK AND CONFIDENCE IN BRITISH COLUMBIA

Premier McBride says that public works in the province will not be stopped, that construction will proceed on the railways in different sections, and that every effort will be made to sustain that confidence which has generally marked the people of British Columbia.

POPULATION AND UNEMPLOYMENT

Unemployment will not be as serious in Canada as many appear to anticipate. During the past two years many thousands have left Canada for Great Britain and the United States. In the past eighteen months, immigration to the Dominion has been cut by more than half, and now has ceased entirely. The stern call to the front will take from 25,000 to 100,000 men from Canada. In addition, arrangements are being made everywhere to handle the situation effectively.

BANK CREDIT FOR BUSINESS

At a conference held at Victoria between the members of the provincial administration and prominent business men and officials in British Columbia, Mr. Campbell Sweeny, superintendent of the Bank of Montreal in British Columbia, stated that credit for legitimate business enterprises would not be curtailed any more than it had been before the war. There will be a little more conservatism in advancing money for new enterprises and there will not be any loans for speculative purposes.

CANDA'S MUNICIPAL BONDS ARE COOD

The Bank of Montreal has loaned $6,000,000 to the city of Montreal. Mr. W. H. Southam, of Hamilton, has offered to purchase $250,000 debentures to provide funds for local improvement work. The people of Berlin, Ontario, are buying their city's debentures, and so are the people of Peterborough. Canadian municipal debentures have an unbroken record of security. A municipality of Canada never has defaulted in payments of principal or interest. Buy a few municipal bonds.

SASKATCHEWAN TO KEEP BUSINESS MOVING

"There is no semblance of panic over the conditions engendered by the war, so far as Saskatchewan is concerned," said Hon. Walter Scott, premier of that province, in an interview at Ottawa. "We are all, Canadian and foreign-born alike, of one mind, and everybody is determined to meet the situation with confidence, and to keep business moving in the same old way."

Premier Scott declared that conferences had been held by the Government with representatives of all branches of business and finance, with the result that all were determined that there should be as little as possible cessation of any industry or business. "It is expected that the high prices for wheat will more than compensate for the poorer crops this year," he said.

PRODUCE MORE FOOD

There will be a shortage of food next year. Canada is one of the chief larders for the world's consumers. It must stock the shelves for the heavy demand in 1915. For instance, little jam is being made in England this year. The fruit is being eaten raw.

Lord Milner points out this week that, although the present harvest is abundant, an immense decrease in wheat in 1915 must result from the fact that all the able-bodied males in France, Germany, Austria and Russia are now engaged in fighting.

Of the 650,000,000 quarters of wheat and rye annually produced throughout the world, 350,000,000 come from these countries, and the other producing countries cannot possibly make up the deficiency. Lord Milner predicts that in the latter half of next year, if not before, all nations which live on wheat will be competing fiercely for a share in the diminishing supply.

WESTERN CANADA AS FOOD PRODUCER

The sudden, unwarned outbreak of hostilities involving the British empire, has awakened western people, and as nothing else could, to a clearer appreciation of their country and of her place and purpose, not merely in the empire, but in a truly cosmic sense. It may be that formerly she was too largely a fertile field for the speculative exploitation of non-producers; nevertheless, the fact remains that to-day's stressful exigencies have compelled for her a clear and unquestioned recognition as the one land chosen of all others and inevitably destined to become the world's greatest fountain of food, states Mr. F. M. Sclanders, commissioner, Saskatoon. As for the non-producer, nothing is more certain than that he has had his day and ceased to be. The new era upon the threshold of which we now stand is one of extraordinary productive activity with its attendant prosperity and populous development. We have successfully emerged from the whole gamut of infantile maladies invariably affecting young countries. Even our growing pains which formerly disquieted, have found their panacea. We are now ready and able for real business—ready with the fresh, full, strenuous energy of youth that has taken farewell of error—ready and anxious to grapple with the innumerable crude potentialities of our marvellous heritage, so that we may subdue and transform them to magnificent actualities for the benefit of the world. A deep sense of their responsibilities now obsesses the people of these fertile plains, and with it an earnest purpose to be faithful thereunto. Such is the silver lining which, with characteristic optimism, the west discerns in the present lowering clouds.

Stick to business and business will stick to you.

Canada is a great country, when each man does his part.

The auto as a luxury may go—as a necessity to the front.

Business faith is only that when it stands firm in time of crisis.

Germany planned a war on British finance and trade. Do not surrender your share.

If you must have a bonfire to celebrate, shove on some made-in-Germany goods and replace them in Canada.

Go about your business. If you stand in the road, looking with open mouth at the war, someone will run you down.

Two national holidays to come—Labor and Thanksgiving. Work and be grateful you live in the British Empire.

Let the "prospect" talk war by all means, but sell him a life insurance policy to protect him against all those terrible things he cites.

In many respects Canada will feel the effect of the war. London has been acting as "uncle," in a very generous way, for years, supplying money whenever asked. The source of supply is now temporarily cut off, and that is where Canada will feel the pinch. On the other hand, the Dominion will get better prices for her grain. Russia's crop was not good, and in any case it is not available in the world's markets: while Canada and the United States will find the seas open and protected for their exports.—London Financier.

War, Finance and Commerce

Money for Neutrality.

The Dutch Chamber has passed a credit of five million florins ($2,000,000) for the purpose of maintaining neutrality.

May be State Bank.

The British treasury department contemplates the formation of a state bank to finance industrial activities unless certain joint stock banks relax their attitude of holding aloof and declining to help.

War Risks Insurance Lower.

The War Risks Insurance Committee announced a reduction in the rate of ship cargo insurance to two guineas per cent. from the prevailing three guineas per cent., beginning September 1st.

British Moratorium Extended.

Mr. David Lloyd George, British chancellor of the exchequer, has announced that the moratorium will be extended for a month to October 4th. It would be too risky, he said, to bring it to an end at once.

United States Buys Silver.

United States director of the mint Roberts has announced that the president paid 53.10 cents an ounce for the 200,000 ounces of silver for which offers were asked a few days ago. This silver is to be delivered at San Francisco.

Decline in Securities.

The London Bankers' Magazine says from July 20 to 30 the depreciation in 387 representative securities dealt in on the London Stock Exchange amounted to £188,000,000, the fall being the greatest in British and foreign funds.

Bank of England Gold at Ottawa.

The Bank of England says that the arrangement regarding the gold from Ottawa is working extremely well. About £1,750,000 had been remitted from Ottawa up to August 25th. A similar arrangement has been made at Cape Colony.

Heavy Cable Mileage.

The total cable mileage of the world is 322,000. The following gives the mileage controlled by companies of the various nations:—British, 144,000; American, 63,653; French, 27,000; German, 27,000; Danish, 10,800; Japanese, 5,600.

Few British Ships Taken.

Chancellor of the exchequer Lloyd George announced in the House of Commons that German men-of-war on all the seas have captured 20,000 tons of British shipping. "There remain 20,000,000 tons to be taken," said the Chancellor.

Ontario Paper Company.

The creditors of the Battle Island Paper Company, on August 10, 1914, voted to sell the Canadian property to the Ontario Paper Company, of Thorold, Ont., for $300,000. The appraised valuation of the property and rights was $385,000.

Sugar from Barbados.

The legislature of Barbados having voted $100,000 as a contribution to "the expenses of the righteous war being waged by the Mother Country," the British Colonial Office has suggested that the gift would be most acceptable in the form of sugar.

Captured German Ships.

The London Times publishes a list of 225 German ships captured by British cruisers in all parts of the world since the war began, giving the names, tonnage, home port and disposition of each ship. More than 200 ships are now held in various ports in all seas, from London to Rangoon and Colombo.

May Issue Money Orders.

The Canadian post-office department has decided that money orders may now be safely issued at a premium of 4 cents per pound sterling or fraction of a pound. The old rate was $4.87. In order to prevent speculation in exchange by unscrupulous persons, no person will be permitted to purchase money orders exceeding $100 on any one day.

Will Hold Back Dividends.

In the British House of Commons the Prime Minister was asked whether, seeing that a large number of alien subjects were shareholders in companies registered in Britain and in the overseas dominions, he would prevent them from receiving their dividends during war time. In reply, the president of the Board of Trade said he was directing joint stock companies not to pay any dividends that became due after the outbreak of war to persons resident in the enemy's territory, or in accordance with their instructions.

Effect on Panama Canal.

As a direct result of war in Europe receipts from the operation of the Panama Canal have failed to pay the expenses of the great waterway. Tolls during the first week of traffic in the canal amounted to only about $15,000. That was not enough to pay operating expenses, much less meet the interest payment on the vast capital invested. Professor Emory Johnson estimated that the receipts from tolls at the end of the first two years would be about $24,000,000 or $25,000,000.

Russia Has Moratorium.

With regard to the moratorium in Russia, Reuter's Agency is informed that the following official statement has been issued in St. Petersburg:—"In virtue of the moratorium (1) all commercial bills issued prior to July 17, all protests, and all proceedings relating thereto are suspended for two months as from July 25, 1914. This measure relates to bills the places of issue or payment of which are situated in the provinces of Poland and the provinces of Kieff, Volhynia, Tchernigoff, Mohileff, Kholmsk, Kherson, Taurida, Bessarabia, Podolia, Vilna, Kovno, Grodno, Minsk, St. Petersburg, Pskoff, Novgorod, Vitebsk, Livonia, Esthonia, Courland and Olonetz. (2) The minister of finance is empowered, if need should arise, to extend the above-mentioned privileges to other parts of the empire, likewise for a period of two months."

◆

ANOTHER WAR ORDER

Fifty thousand pairs of heavy grey socks is the order the Kingston Hosiery Company has received from the Dominion government, and the order will be filled within a month. The socks will be sent to Valcartier, and will be for winter use.

◆

FREDERICTON REDUCED FIRE WASTE

The fire loss of Fredericton, N.B., for 1913, was $5,726, which is $9,177 less than the year 1912—the losses on buildings being $4,328 and on contents $1,397; the total insurance risk, where losses have occurred, being on buildings $28,325 and on contents $8,700, according to the annual report of Fire Chief Rutter, which also shows that the average annual fire loss for 30 years is $7,296.

◆

EMERGENCY CURRENCY IN ENGLAND

The emergency currency in England, is not in the form of Bank of England notes, but is in Government notes or fiat notes. The wording on the notes is as follows:—

"These notes are a legal tender for a payment of any amount.

"Issued by the Lord's Commissioners of His Majesty's Treasury, under Authority of Act of Parliament.

"One Pound (£1)

"(Serial number) (Signed)

"JOHN BRADBURY,

"Secretary to the Treasury."

The notes are printed in black on white water-marked paper and the size is about 2½ inches by 5 inches. The notes are not Bank of England notes and apparently are not secured on Bank of England gold, although the chancellor of the exchequer has said that they can be changed for gold at the bank. They are secured on the credit of the British government.

MANY TRADE OPPORTUNITIES

Commissioner Grigg Tells How Canada May Benefit—Two Striking Effects

That the Dominion will benefit by the war in two ways, is the opinion of Mr. Richard Grigg, chief Canadian trade commissioner, who has returned to Ottawa from a business mission to Europe. The German imports will be cut off in Canada, and the home manufacturers will reap the benefit. In addition, the Canadian shippers will take away largely from the German trade in the Far East.

"While the European war is a terrible thing, it will in the long run, prove a commercial benefit to the Dominion," Mr. Grigg said. "Whether Germany is eventually victorious or is defeated by the allies, her commerce during the progress of the war is bound to be paralysed.

Blow to German Industry.

"Germany has mobilized all of her able-bodied men under 45 years of age. Naturally, that will cripple every branch of industry in Germany during the duration of the war, and doubtless for a long period after the cessation of hostilities. That state of affairs is bound to benefit the commerce of the rest of the world, and in the shift of trade conditions, Canada will surely get her share.

"Firstly, the people of the Dominion have for years been importing hundreds of thousands of dollars' worth of German products annually. With the war on this importation has ceased from a two-fold cause; through patriotism, the loyal Canadian would not use German-made goods while the two countries are at war, and with all German shipping tied up on both sides of the Atlantic, there are no German exports reaching Canada.

Stimulate Home Trade.

"The international war will in this way greatly stimulate Canadian trade at home, by inducing people to use home-made products in place of the German articles they have been buying. I expect this state of affairs to increase our manufactures to a considerable extent.

"But, in addition, there is a tremendous general field now open to the Canadian manufacturers and exporters which they have in the past neglected. Particularly in South America and Central America have the German traders had the advantage. In Brazil, Peru, Mexico, the Argentine Republic and other countries in that part of the world the Germans have led in trade. They have had the bulk of the commerce of Central and South America. Because of the war they will no longer have that advantage. German merchant ships are not running.

South American Trade.

"The Central and South American trade, therefore, will be at a standstill until other exporters get after it. Before the end of this conflict, that trade will be in the possession of Britain, the United States and Canada. There is no reason why the Canadian manufacturers and exporters should not get a big share of this commerce. Certainly they will get after it on a large scale, if I can influence them to do so.

"The same will be true in the Far East. For several years Germany has done a large trade with China, some with Japan, and to a considerable extent with the islands of the Southern Pacific. That trade naturally will be nullified by the war. With the British warships in the Far East on the watch for German vessels, and with the entire Japanese fleet on the job, it is certain that German trade in eastern waters will be entirely neutralized. As in the case of Central and South America, that trade will be taken over by Britain, the United States and Canada.

"With record-breaking crops in the Dominion this year, Canada is ready to do a big business exporting foodstuffs to all parts of the world. Of course, a large part of what we have to ship is in the provision line, and will go to Britain, but there will be plenty left, and that will be exported to France and Russia, then to any other parts of the world where there may be a demand.

◆

Proceed with caution—and with energy.

Anybody can have faith when the sun is shining.

More production in Canada and business as usual.

CANADA NEEDS ONLY CONFIDENCE

London Says So, and London Has Loaned Canada the Money

The outbreak of war almost throughout the whole of Europe, has naturally caused some misgivings in trade circles in Canada, says the London Financial News. The Dominion has only recently emerged from a period of strain and stress, owing to the tightness of money and the set-back after a long term of abounding prosperity, coupled with a certain measure of unwise speculation, especially in real estate. All eyes have been fixed upon the crops, and as these promise to give splendid results, the commercial outlook of the Dominion appeared most encouraging in every direction. Now traders have to decide what will be the effect of the war on Canadian finance and industry, and they must make their arrangements accordingly.

Must Have Confidence.

In the opinion of men in London who have to study Canadian affairs very closely in the ordinary course of their business, all that Canada needs at the present time is confidence, and anybody who knows Canada and her people is aware that there will be no lack thereof in that land of boundless natural resources.

"Canada now has the finest opportunity of her history," said a Canadian banker in London. "You have seen how splendidly Canada has come forward with assistance to the Mother Country in defending the honor of the Empire. The offers of aid, readily accepted by the Government, have been of a very practical and sensible character—men, sacks of flour, wheat, oats, apples, and horses have been freely offered; and all honor to the men who have arranged these magnificent plans and are carrying them into effect.

"At the same time Canada has other opportunities for showing her prowess. Many of the goods, manufactured and part manufactured material, which Great Britain used to buy from the Continent can be produced in Canada and supplied in high quality and at reasonable prices. The continental markets are now cut off, and are likely to be cut off for months.

Some Practical Considerations.

"Meanwhile, I know that United States manufacturers are making arrangements to seize the markets for these manufactures. Now, I say that what the United States can produce Canada can produce just as cheaply and just as well. It may take time to organize matters in order to be able to supply the English and Scottish markets with stuff that they have been getting from the Continent; but there is a big trade to be got now, and it is well worth Canada's time, money, and energy to try to secure that trade, or a good proportion of it.

"I know many men here who are looking for fresh sources of supplies of goods that have been cut off by the war. They think they will have to go to the United States for them; but in every case I have advised them to see what they can do in Canada first, and I have found, without exception, a desire to trade with Canada if Canada can supply the goods. It's up to Canada to show what she can do."

◆

ANOTHER INSURANCE COMPANY FOR CANADA

The Car and General Insurance Company, of London, England, may transact business in Canada shortly. Mr. F. Thoresby, the company's managing director, visited the Dominion about three years ago.

◆

The Kaiser cannot help us but we can.

Blue pencil, blue talk and talk business.

Some dividends are cut and dried; others, cut and deferred.

"Made-in-Canada" means bread and butter for the Canadian worker.

Every five cent piece spent in Canada or in the empire helps Canada and the empire. Boycott German and Austrian goods.

The Berlin bourse may reopen, says a cable message—a stock exchange welcome to the John bulls and the Russian bears.

PERSONAL NOTES

Mr. William Fitzgerald has retired as Dominion superintendent of insurance. Mr. G. D. Finlayson succeeds him.

Sir Rodolphe Forget's prediction of last year that Canadian Pacific stock would go below 200 has come true, with a big margin. But it is noticeable that Sir Rodolphe is not in the prophecy business just now.

Mr. George Wegenast, managing director of the Mutual Life Insurance Company of Canada, is touring Manitoba and Saskatchewan. He is inspecting properties on which loans have been made by the company.

Mr. H. S. Holt, president of the Royal Bank, has two sons with the colors. One of them a graduate of Kingston, holds a commission in an Imperial regiment, while the other, who is on the staff of the firm of McDougall and Cowans, Montreal, is at Valcartier as lieutenant in the Montreal Grenadier Guards.

Mr. Cecil Lubbock, director of the Bank of England, and of the Northern Assurance Company, and managing director of Whitebread's Brewery Company, has been appointed a director of the Hudson's Bay Company, filling the vacancy created by the appointment of Sir Thomas Skinner to the governorship, vice Lord Strathcona.

Mr. Maurice Ferrand, manager for Canada of the Union of Paris, has left Montreal to join his regiment in France. Mr. Ferrand is a French reservist. During his absence the company will be in charge of Mr. W. A. Wilson, superintendent of agencies, who will have the advice and assistance of the company's Canadian director, Mr. Lansing Lewis.

Sir Frederick Williams Taylor, general manager of the Bank of Montreal, for two years quietly has been urging his countrymen to get into a less vulnerable position in the matter of borrowing heavily and producing lightly. The adverse effect of the war upon Canada certainly would have been less marked had his advice been followed more generally. Instead, he was labelled pessimistic.

Mr. James Addison Halsted died at Toronto last week. Born near Whitby, in 1841, Mr. Halsted, after being in mercantile business in Listowel, moved in 1877 to Mount Forest. There, he and Mr. J. W. Scott, conducted a private banking business, from which branches developed under the name of J. A. Halsted and Company, in Shelburne, Arthur, Wingham and Durham. Selling his business in 1904, he came to Toronto in 1911, being engaged since then in financial and brokerage business here.

Mr. T. L. Armstrong, of the firm of Reed, Shaw and McNaught, Toronto, arrived in British Columbia last week. This is Mr. Armstrong's first trip to the west, and he speaks in glowing terms of the vast resources and splendid prospects of the Canadian west. He was agreeably surprised with the progressive spirit evidenced in Vancouver, which he believes is destined to become one of the greatest cities on the Pacific coast. While in Vancouver Mr. Armstrong paid a visit to the Pacific Coast Fire home office, which company is represented in Ontario by Messrs. Reed, Shaw and McNaught. Mr. Armstrong is now on his way east again and will visit points of interest in the mountains before returning to Toronto.

Mr. Fred G. Hearne, the enterprising general agent in Toronto, of the Glens Falls Insurance Company, sends *The Monetary Times* a newspaper clipping which his head office has issued. It deals with the warning by the Marshall Field store to its employees and says in part:—"It is the duty of every assured, be he a householder or an employee, to take every wise precaution to prevent fire and its dire results at all times, particularly so at the present time. Consequently we call upon every employee in every department in all parts of our business to be more than watchful and careful in this regard, and every department head will be expected to make this a personal matter with those under him, to see that this is carried out."

Mr. H. N. Dickinson, present secretary of the Glens Falls Insurance Company, was a civil engineer by profession, but many years ago "side lined" an insurance agency which finally brought him wholly into the business. He served a couple of other companies for several years in the Pennsylvania and West Virginia field as special agent, and came to the Glens Falls 12 years ago, serving as special agent in Pennsylvania and southern and western New Jersey. In 1912 he was made assistant secretary. Like the other officers of the company he has experience in the field and office and is well seasoned for his present duties. He already has a large acquaintance with the company's agents, and as he is liked by these so will he be liked by others when they know him, for he is a friend making and friend deserving man. The Glens Falls Company has agencies now throughout Canada as well as the United States.

Mr. John Howard Hunter, the Toronto barrister, who died last week, was one of Canada's leading citizens. Only 37 years old, he had won already a prominent place in the legal profession and had become an expert in insurance practice and law. His father was the late Dr. J. Howard Hunter, superintendent of insurance for Ontario and the son in early years had absorbed much of the parent's knowledge of underwriting and its fine technical points. Mr. Hunter was a keen young man, and had exceptional ability. He impressed everyone with his businesslike ways. After a notable course at Osgoode Hall, Toronto, he graduated in 1902, and became associated with his brothers in the well-known legal firm of Hunter and Hunter, Temple Building, Toronto. Shortly afterwards he accepted the appointment as solicitor for the Western Assurance Company, and for several years was in charge of its legal department at the head office. Besides looking after the legal business of the Western, he was also associated with the management of its foreign department, and was enabled to obtain an extensive and thorough grasp of insurance from the practical as well as from the legal standpoint. Having thus equipped himself, he opened an office for the practice of the law. His advice was much sought by insurance men with legal questions to solve or administrative situations to handle. Among the insurance companies for which he acted as legal adviser were the following: Western Assurance Company, British America Assurance Company, London Mutual Fire Insurance Company, Imperial Guarantee and Accident Insurance Company, Firemen's Fund Insurance Company and the American Central, of St. Louis.

◆

WESTERN CROP ESTIMATE

The Manitoba Free Press publishes its annual estimate of the crop yield of the three prairie provinces, the feature of which is the total wheat yield of 134,500,000 bushels, and a selling value of all grains of $100,000,000. The report is an encouraging one in view of the many adverse conditions from which the crop has suffered. Drought, frost, black rust, and in some districts cut worms have all taken their toll, little or big, of the 1914 crop. The following are the figures:—

	Acres.	Average yield.	Total bushels.
	Wheat.		
Manitoba	3,841,428	13	49,938,564
Saskatchewan	6,003,522	12	72,042,264
Alberta	779,050	16	12,464,800
Totals	10,624,000		134,445,628
	Oats.		
Manitoba	2,064,114	20	41,282,280
Saskatchewan	2,792,611	20	55,852,220
Alberta	1,778,000	30	53,340,000

BUSINESS AFTER THE WAR

There is a future for business and it will be good. War affects every business, but slowly we are realizing that there are many favorable phases of the present situation. *The Monetary Times* is printing the best story of the war, from financial and business viewpoints, from week to week. The following are the chief articles appearing in this issue on the pages noted:—

	Page.
Financing the Nations at War	5
How Long Will It Last?	6
Notes of War, Commerce and Finance	8
Canada Needs Only Confidence	9
Many Trade Opportunities	9
Spots on the Moratorium	17
Canada Pushing Exports	38
Buy Gold and Pay Gold	42
War and Magnesia Output	49
Canada's Help in the Fight	50
Movements of Moratoria	50

The Monetary Times has half a century's reputation for reliability, enterprise and optimism in its proper place.

◆

NOW IS THE TIME TO BUY BONDS

Bond buying should be thought about when everybody else is saying the bond market is dull and slow, when everybody is saying that prices are low and when everybody is wondering when there will ever be another bond market again. The same principle that holds often in buying of stocks holds to the same extent in buying of funded obligations, says Mr. F. Lowenhaupt, in the Magazine of Wall Street.

On large purchases you sometimes have money left over. If you have a few dollars left over from a large purchase make it up by buying some small bonds, possibly one hundred dollar pieces.

Never let idle balances stand in the broker's office. Buy bonds yielding a good rate of return, and then these bonds can be used for collateral. This in the form of a bond is drawing money and helping to pay for the interest charges.

Since one really wants a big income, get into the market when bonds generally are low. If one insists on it when bonds are generally on a high level of prices one soon will be watching a loss that will offset a larger income, since the first decline will carry the bonds along with it inevitably.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Indian Head, Sask.—An issue of debentures has been withdrawn.

Prince Rupert, B.C.—The city is endeavoring to [illegible] in London.

Calgary, Alta.—A Toronto bond house has asked [illegible] option of $500,000 treasury notes.

Brantford Township, Ont.—A by-law has been passed providing for an issue of $[illegible] debentures.

Hamiota S.D., Man.—Bids are desired for an issue of $[illegible] per cent. debentures for school additions.

Tuxedo, Man.—Ratepayers vote on September 5th on a by-law to issue $[illegible] 7 per cent. 20-year debentures.

Virden and Wallace R.M., Man.—Neither of these municipalities received bids for their recent issues of debentures.

Point-Aux-Trembles, Que.—An issue of $15,000 6 per cent. 40-year school board debentures for erection of college remains unsold.

South Vancouver, B.C.—At a meeting of the council the Victoria Road local improvement by-law, authorizing the construction of a bitulithic pavement, was read three times.

St. Catharines, Ont.—A by-law to assist the Marathon Rubber Company, of Akron, Ohio, to establish a $50,000 factory here, by the gift of a site of five acres and a fixed assessment of $10,000 for ten years, has been passed.

Redcliff, Alta.—The council has fixed the tax rate for the year 1914 at 17 mills, 12½ general tax, 3½ debenture tax and one mill school tax. This is three mills less than 1913. The assessed valuation of the town for 1914 is $5,000,000. It was $3,000,000 in 1913.

Richmond, B.C.—Two dyking by-laws, one for $40,000 to encircle Sea Island, and the other for $24,500 to fill in the gap along the North Arm of the Fraser River, were passed at a special meeting of the council. The debentures are for forty years at 5 per cent., and have been sold.

St. Thomas, Ont.—City solicitor Doherty has advised the members of the different committees that they must retrench as much as possible for the time being, and only make necessary disbursements. For this reason the board of health will cease the sewer construction work.

Calgary, Alta.—In lieu of all cash in payment of future accounts, the city council is considering settlement of part cash and balance in treasury notes. This applies only to improvement work for which there is an urgent demand, and would be effective only in case the money was not to be had readily.

Montreal, Que.—The Bank of Montreal will loan $[illegible],000,000 to the city. Included in the conditions of the loan is that the city agrees to appoint the bank its financial agent for a period of five years with the right of extending the term, if the corporation does not give a 12 months' notice to the contrary. The rate of interest will be 4½ per cent., which is the legal rate authorized by the city charter, plus commission and other charges, making a total of just under 5 per cent. As the Bank of Montreal has been for several years acting in the capacity of financial agent in the London market, the new arrangement is an extension of the understanding which already exists.

◆

COMPANIES LICENSED

The following companies have been licensed to do business in British Columbia:—

Canadian Mining and Exploration Company, Limited, of Toronto. Wrought Iron Range Company of Canada, Limited, of Toronto. Hamilton Carhartt Manufacturer, Limited, of Toronto. Howell Creek Syndicate, Limited, of London, England.

The following companies have been licensed to do business in Ontario:—

Algoma Timber and Lumber Company, of Michigan, U.S.A., capital, $120,000. Canadian Universal Film Company, Limited (Dominion charter), capital, $4[illegible],000.

NEW INCORPORATIONS

Company Promoters are Not Busy—Twenty Charters Granted

Canada's new companies incorporated this week number 20. The head offices of these companies are located in five provinces. The total capitalization amounts to $1,618,000.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
New Brunswick	3	$ 143,000
Prince Edward Island	3	120,000
Quebec	4	710,000
Ontario	3	175,000
British Columbia	7	470,000
	20	$1,618,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kamloops, B.C.—Kamloops Press, Limited, $50,000.

Woodstock, N.B.—Burtt Hardware Company, Limited, $20,000. H. E. Burtt, D. Stewart, F. B. Armour.

Oak Point, N.B.—The Island Fox Company, Limited, $24,000. R. B. Slipp, C. H. McGee, H. E. Palmer.

Granby, Que.—N. Mitchell and Company, Limited, $90,000. N. Mitchell, E. Dextradeur, J. E. Tetreault.

Quebec, Que.—Dominion Iron and Wrecking Company, Limited, $20,000. W. H. Millican, F. O. Drouin, P. Drouin.

Morrisburg, Ont.—Commercial Coal-Saving Company, Limited, $50,000. I. Hilliard, F. H. Broder, J. N. Eastman.

Victoria, B.C.—The Victoria General Motor Bus Company, Limited, $50,000. Oswald F. Paint Company, Limited, $10,000.

Richibucto, N.B.—Richibucto Silver Black Fox and Fur Company, Limited, $99,000. W. E. Forbes, J. L. Hutchinson, G. A. Hutchinson.

Montreal, Que.—James Strachan, Limited, $500,000. J. F. Strachan, W. S. Strachan, E. G. Place. Cazen Cigarette Machine Company, Limited, $100,000. J. A. Labonte, J. A. Daigneault, G. J. Jarjour.

Toronto, Ont.—Campanello Steamships, Limited, $100,000. S. P. Biggs, W. W. Evans, W. L. Pinkney. International Royalties Company, Limited, $25,000. W. G. Lumsden, P. Stokes, E. E. Sutherland.

Prince Edward Island.—Lot Twelve Fox Company, Limited, 60,000. F. England, L. Hayes, R. C. Hayes. Canada Fur Farms, Limited, $30,000. W. J. McLean, B. G. Rogers, A. C. Saunders. The Enmore Dark Patch Fox Company, Limited, $30,000. J. H. Yeo, L. W. Moore, W. A. Smith.

Vancouver, B.C.—Defiance Packing Company, Limited, $50,000. Western Cloak and Suit Company, Limited, $50,000. Burrard Inlet Gravel and Dredging Company, Limited, $10,000. Queen Charlotte Petroleum Company, Limited, $250,000.

Application is being made for letters patent for the following company:

Summerside, P.E.I. Inter-Provincial Silver Black Fox Company, Limited, $125,000. U. R. Gillis, W. B. McNeill, A. E. Bennet.

◆

DOW FRASER TRUST COMPANY

The Dow Fraser Trust Company, Vancouver, has moved into its new offices on Hastings Street West. The company was incorporated in the year 1909, carries on business in accordance with the new Trust Companies Act, and has the necessary deposit, some $[illegible], in the charge of the government. The firm is empowered to carry on all the functions allowed by the act as executors, trustees, liquidators, etc., as well as a general real estate and brokerage business and fire indemnity insurance.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

South Wellington, B.C.—Alexandra Hotel. Loss, $40,000. Cause unknown.

Baysville, Ont.—August 30—Pulford House. Loss and cause unknown.

Fernridge, B.C.—Fernridge Lumber Company. Loss, $150,000. Cause unknown.

Crafton, Ont.—August 30—Public school. Loss unknown. Cause, supposed incendiary.

Redcliff, Alta.—August 28—Northern Hotel. Loss, $1,500. Insured. Cause unknown.

Guelph, Ont.—August 26—Victoria Rink, Baker Street. Loss, $25,000. Cause, electrical defects.

Trenton, Ont.—August 29—Trenton garage. Loss, $30,000. Cause, supposed ignition of gasoline.

Vancouver, B.C.—August 28—Arbuthnot Brothers' sash and door factory. Loss, $10,000. Cause unknown.

Sydney Mines, N.S.—August 22—Mr. J. C. McAuley's store. Loss, $2,500. Cause, supposed dropped cigarette.

Cochrane, Ont.—August 24—Mr. W. S. Carter's residence, 7th Avenue. Loss, $1,000. Cause, electrical defects.

North Battleford, Sask.—August 24—North Battleford Manufacturing Company's sash and door factory. Loss, $25,000. Cause unknown.

Montreal, Que.—August 25—Mr. J. W. Gingrais' store. Loss and cause unknown.

August 26—61-73 Marie Street. Loss unknown. Cause, supposed lamp explosion.

Ontario.—Mr. P. Spring's barn Innisfil, Mr. J. Reed's barn, Innisfil; Mr. J. McLaughlin's barn, Hendrie; Mr. H. Loftus' barn, Hendrie; Mr. H. Minty's barn, Craighurst; Mr. J. Goddard's barn, Flos. Cause, lightning.

Toronto, Ont.—Fire Chief Thompson's report for the week ended August 25th, shows the following losses:—

August 21—Building of Brunswick Balke Collender Company, Hanna Street. Cause, ignition of shavings by unknown cause. Loss, contents, $50; dwelling of N. Soloman, 210 Gerrard Street East. Cause, lamp upset in clothes closet. Loss, contents, $50; building, $5.

August 22—Dwelling of A. F. Gibson, 37 Spruce Street, owned by Thos. Self. Cause, match dropped on lounge. Loss, contents, $65; building, $25.

August 23—Dwelling of J. Ramsden, 45 Yorkville Avenue. Cause, children with matches. Loss, contents, $50; building, $25.

August 25—Dwelling of S. Williams, 491 Wellington Street, owned by Mrs. A Moriarity. Cause, charcoal furnace on roof ignited roof. Loss, building, $75; dwelling of M. Swartz, 7 Larch Street, owned by Mr. Oldstein. Cause unknown. Loss, contents, $25; building, $25; building of H. Wells, 98-102 Jarvis Street. Cause, electric dynamo burnt out. Loss, contents, $150; dwelling of E. Matthews, 512 Bathurst Street, owned by F. Pease. Cause, papers in furnace register became ignited setting fire to bed. Loss, contents, $200; building, $50.

TWO MILLION DOLLARS OF DIVIDENDS

Dividend declarations on securities in Montreal and Toronto call for a disbursement of $2,201,914 in the first two weeks of September.

◆

KEEP UP THE WAGES

The suggestion that the rate of wages should be reduced as a war measure is one which ought to have no support. It is well meant, and designed to keep as many persons as possible employed. But its results upon the community would be bad.—Toronto Star.

AUGUST FIRE LOSSES

Month's Total Shows Decrease—Fewer Deaths Reported

The Monetary Times' estimate of Canada's fire loss during August amounted to $2,021,379, compared with July loss of $2,033,139 and $3,034,775 for the corresponding period of last year. The following is the estimate for the August losses:—

Fires exceeding $10,000	$1,527,000
Small fires	254,197
Estimates for unreported fires	240,182
	$2,021,379

The fire waste in each province for the first eight months of 1913 and 1914 has been estimated by *The Monetary Times* as follows:—

	1914.	1913.
Ontario	$6,518,801	$6,067,461
Quebec	3,659,969	3,201,576
New Brunswick	2,176,037	909,230
British Columbia	1,449,464	768,234
Alberta	961,328	3,357,028
Saskatchewan	693,035	1,867,065
Manitoba	685,574	1,057,112
Nova Scotia	458,549	1,364,654
Prince Edward Island	32,529	447,567
	$16,634,286	$19,939,936

The following are the monthly totals of the losses by fire for 1914, compared with the three previous years' losses:—

	1911.	1912.	1913.	1914.
January	$2,250,550	$3,002,650	$3,913,385	$2,796,312
February	941,045	1,640,153	2,037,386	2,920,749
March	852,380	2,261,414	1,710,756	2,139,552
April	1,317,900	1,355,055	1,470,622	1,916,238
May	2,504,500	2,251,815	2,123,868	1,539,502
June	1,151,150	4,229,412	3,069,446	1,267,416
July	5,384,300	1,741,371	2,579,698	2,033,139
August	920,000	1,164,760	3,034,775	2,021,379
September ...	1,123,550	883,940	1,468,324	....
October	580,750	1,416,218	1,383,572	.....
November .	1,506,500	1,184,010	2,200,486	. .
December .	2,866,950	1,769,905	1,354,300	.. .. ..
Totals ...	$21,459,575	$22,900,712	$26,346,618	$16,634,286

The fires at which the loss was estimated at $10,000 and over were as follow:—

Ridgeville, Man., August 3..	Warehouse stores, etc.	$45,000
Montreal, Que., August 7....	Icehouse, etc.	10,000
Grimsby Beach, Ont, Aug. 8.	Cottages	10,000
Kingston, Ont., August 19 ..	Tannery	100,000
Toronto, Ont., August 11...	Lumber yard	12,000
St. John, N.B., August 13 .	Elevator	1,000,000
Toronto, Ont., August 15....	Office building	20,000
Queenston, Ont., August 20..	Farm premises ...	30,000
Homer, Ont., August 21	Boarding house ..	10,000
Ottawa, Ont., August 21....	Stores	10,600
North Battleford, Sask., Aug. 24	Sash and door factory	25,000
Guelph, Ont., August 26	Rink	25,000
Vancouver, B.C., August 28.	Sash and door factory	10,000
South Wellington, B.C.	Hotel	40,000
Fernbridge, B.C.	Lumber yard	150,000
Trenton, Ont., August 29 ...	Garage	30,000

The structures damaged and destroyed included 70 residences, 30 barns, 9 stores, 5 factories, 3 business blocks, 3 office buildings, 6 hotels, 4 planing mills, 2 icehouses, 2 garages, 1 tannery, 1 elevator, 1 picture theatre, 1 school, 1 rink.

Of the presumed causes 18 were lightning, 7 electrical defects, 6 matches, 5 dropped cigarettes, 4 incendiary, 4 bush fires, 3 gasoline, 3 upset and exploded lamps, 2 gas jets, 1 engine backfiring, 1 overheated boiler.

There were burnt 20 horses, 20 pigs, 5 calves, 1,000,000 bushels wheat, 2,000 bushels oats, 300 tons hay, 2 million feet lumber, 11 freight cars, 3 gasoline launches, 3 automobiles.

During August only three persons were reported as having lost their lives through fire.

The following table compiled by *The Monetary Times* shows deaths caused by fire during the last six years:—

	1909.	1910.	1911	1912.	1913.	1914.
January	16	27	27	27	14	26
February	8	15	12	11	21	18
March	16	20	18	24	22	27
April	18	37	20	15	11	22
May	21	15	28	18	33	8
June	16	52	13	6	18	12

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 28th:—

Chambers Ferland Mining Company, 65,890; La Rose Mines, Limited, 85,080; O'Brien Mine, 66,000; Dominion Reduction Company, 74,200; City of Cobalt Mining Company, 82,570; Penn Canadian Mines, Limited, 65,190; Cobalt Townsite Mining Company, 85,640; McKinley-Darragh-Savage Mine, 246,310; Beaver Consolidated Mine (Kerr Lake), 64,660; Tough Oakes Gold Mine, Limited (Swastika, Ont.), 61,680; total, 897,220 pounds, or 448 tons. The total shipments since January 1st, 1914, are now 25,280,013 pounds, or 12,640 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

◆

EMERGENCY CURRENCY AS SOUVENIRS

Mr. Douglas Robertson, who arrived at Montreal from England a few days ago, tells *The Monetary Times* that there is far more war talk, fear and business suspension in Canada than in the old country, and thinks it is quite unjustified here. When hostilities were declared there were signs of panic for seven or eight days, but these have disappeared entirely. Great Britain has its mind upon two things—war and "business as usual." A striking example of the British spirit and the trust in army and navy, was cited by Mr. Robertson. The emergency currency issued by the government in one pound and ten shillings paper notes, he said, is being grabbed up by people all over the United Kingdom as souvenirs. "Have you got one of those one pound notes?" is the frequent question. "Yes, we have managed to get one for each of the family," was the reply on one occasion. It is estimated that at least $5,000,000 of this paper is being held as souvenirs.

Post offices have been paying money only in postal orders. One man had a guinea postal order and asked for change at the post office. He was given two orders of half a guinea each. When he asked how he was to pay car fare with those, the official smiled, and gave him instead a bunch of one shilling and six penny orders.'

Mr. Robertson is emphatic regarding the wonderful manner in which Great Britain has adopted the motto "Business as usual." He anticipates that Canada will follow this example within four weeks. Mr. Robertson is on his way to Prince Rupert, where he will inaugurate and manage an insurance department for Messrs. Harrison, Gamble and Company. This firm transacts a real estate, financial agency, shipping and general merchants business there.

AUGUST MUNICIPAL BOND SALES

Total Was Small Last Month, But Market Was Fairly Good

The municipal bond sales in Canada for August, as compiled by *The Monetary Times*, amounted to $411,755, compared with $2,154,260 for July and $526,300 for the corresponding period of last year.

August municipal bond sales are usually smaller than the preceding three months, but owing to the financial uncertainty resulting from the war into which the British Empire has been forced, brokers have not tendered for several issues, notably that of Ottawa, while other issues have been withdrawn. Municipalities have adopted temporary financial measures, and details concerning various transactions have for a time been withheld, so that *The Monetary Times* list and total given below does not indicate the total sales during the past month. Sales in Canada for the year to date are much in advance of the corresponding period last year, as will be seen from the following totals:—

The following table, compiled from the records of *The Monetary Times*, shows the sales in the Dominion during the first eight months of 1914, compared with the three previous years:—

	1911.	1912.	1913.	1914.
January	$ 420,337	$2,133,531	$1,337,500	$1,628,337
February	1,037,287	2,596,378	1,038,806	5,995,336
March	6,271,025	1,926,716	335,492	5,108,776
April	3,910,288	927,160	3,693,857	2,708,153
May	3,946,047	1,928,748	880,630	5,655,755
June	3,983,670	1,690,344	2,435,726	4,299,294

	$138,000		

British Columbia.

Richmond, B.C.	$104,500	5	1954

Manitoba.

East St. Paul S.D.	$3,000	6	1934

There were no Canadian municipal bonds sold in Great Britain during August, but for the first seven months debentures totalling $32,347,435 were sold.

The municipal bond sales in the United States as compiled by *The Monetary Times*, during the first eight months of this year amount to $5,008,000 as compared with $20,168,053 for the whole of 1913. The recent sales include:—

Port Arthur	$100,000
Port Coquitlam	100,000
Edmonton Schools	850,000
Kingston	35,000

The monthly totals are as follow:—

	1914.
January	......
February	$ 50,000
March	18,000
April	25,000
May	1,750,000
June	2,000,000
July	1,130,000
August	35,000
	$5,008,000

CANADIAN-BRITISH TRADE

The following are official figures of trade between Canada and Great Britain in the under-mentioned articles during July:—

Imports from Canada.

	July, 1914.	July, 1913.
Wheat	£5,138,031	£4,535,106
Wheatmeal and flour	1,143,820	1,257,781
Oats	344,446	480,649
Barley	407,765	540,644
Bacon	566,055	544,268
Hams	140,547	233,871
Cheese	1,044,231	1,284,395
Canned salmon	891,506	518,675
Canned lobsters	212,311	185,505

Exports to Canada.

Spirits	£ 381,394	£ 385,245
Wool	71,539	64,205
Pig iron	52,763	66,679
Wrought bars	14,540	61,219
Galvanized sheets	329,638	338,041
Tinned plates	68,036	88,521
Steel bars	84,006	237,484
Pig lead	41,353	75,079

QUEBEC PROVINCE FINANCES

The preliminary statement of the revenue and expenditure of the province of Quebec for the year ended with June 30, shows ordinary revenue of $9,000,376 and ordinary expenditure of $8,624,367. Other expenditure raised the total to $12,760,746, necessitating a considerable addition to the debt of the province.

The statement of the public debt and temporary loans and deposits of the province on June 30th, 1914, is as follows:

Funded Debt.

July 1st, 1880	$ 747,228
January 1st, 1888	3,182,800
March 1st, 1894	2,530,666
December 30th, 1894	5,332,976
May 1st, 1896	292,000
April 1st, 1897	1,360,000
April 1st, 1897	9,236,061
January 1st, 1913	1,949,586
July 1st, 1914	1,216 666
	$25,847,985
Sinking fund invested	1,268,819
Net funded debt (including increase of capital by conversion)	$24,579,166

Temporary Loans and Deposits.

Temporary loans	$ 1,460,000
Teachers' pension fund	200,429
Protestant council of public instruction	41,840
Security and trust deposits	234,560
	$26,515,996

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Twin City Rapid Transit Company.—For the third week of August the earnings of the company were $180,173, an increase over the corresponding period last year of $7,137, or 4.13 per cent.

Western Canada Flour Mills.—The directors have declared a dividend of 2 per cent. for the three months ended August 31st, 1914, payable September 15th, 1914. The transfer books of the company will be closed from the 8th to the 15th September, inclusive.

Childs Restaurant Company.—The company has declared the quarterly dividend of 1¼ per cent. on the common stock, a reduction of 1¼ per cent. from the last previous disbursement, declared in May. The company is a New York enterprise, with branches in Toronto and Montreal.

Kaministiquia Power Company.—The net income for June was $22,697. After all fixed charges the surplus amounted to $15,042 for the month. For eight months the company's net earnings total $185,295 and the surplus for the same period amounts to $126,479.

Crown Reserve Mining Comoany.—The company has shipped 55,000 ozs. of silver to the London market, to be followed by another consignment soon. The company has made satisfactory arrangements with its bankers in London to advance the company enough for operating expenses and to store the remainder until quotations are more regular and stable. At the end of the property on the 200-foot level exploration has yielded good results.

East Canada Power and Pulp Company.—At a meeting of the bondholders in Montreal, the affairs of the company were placed before the meeting, which was afterwards adjourned until October 1st without any definite action as to the future policy of the company being taken. This was necessary because no information had been received from France as to whether or not the notices calling the meeting had been published there, and that as a result of the war and interrupted communications bondholders were not certain as to whether or not this week's meeting was legal.

International Nickel Company.—While the company has closed all its mines in Canada with the exception of the Creighton, the curtailment is not so drastic as might be supposed, says the Wall Street Journal, as the bulk of the company's output comes from the Creighton mine. The plant at Constable Hook is closed, but that is always done in August in each year for repairs and adjustments. Like practically every other concern, the International Nickel Company is curtailing to meet the exigencies of the situation.

Domestic demand for the company's product continues good, but the foreign demand has been restricted as in other lines. The lower price for copper, which is an important incidental product of the nickel company, will probably operate to reduce the margin of profit on nickel.

Laurentide Company, Limited.—At the annual meeting on Tuesday, net profits were reported for the year ended June 30th, available for dividends, totalling $730,774. This compares with $758,085 for the previous year, a decrease of $27,311. In addition to the $57,366 taken from the earnings for betterment of plant, there was expended during the year on capital account for the new power development $1,645,200, for the enlargement and improvement of the pulp and paper plant $161,267, and for additions to real estate $93,581. That would make a total expenditure on capital account of about $1,900,000, against the $2,400,000 secured by the new issue of stock at par last summer.

The balance-sheet will show active assets of $2,284,766, and after deducting $500,000 of money unexpended from the capital stock issue, a balance of $1,784,766 remains against active current liabilities of $800,468. That would leave a surplus of liquid assets of $984,298. In addition to this the company has sundry reserves, depreciation, contingent and surplus accounts aggregating $876,400. The work on the new power development has proceeded as rapidly as was originally planned, and its cost up to this time is within the estimates.

Sawyer-Massey Company.—The directors have passed the preferred stock dividend of 1¾ per cent. The official circular to shareholders is as follows:—

"Your directors, having considered very carefully the question of the quarterly dividend on the preferred stock, payable on the 1st September next, have concluded that, owing to the greatly disturbed commercial and financial conditions existing at the present time, that it is in the best interest of the shareholders that the resources of the company should be conserved and strengthened, and have, therefore, decided to defer payment of the dividend until further notice, and feel that their action in the matter will meet with the approval of every shareholder.

"The dividends on the preferred shares, being cumulative, will accrue to the benefit of the shareholders until such time as the directors feel that conditions are such that they can be resumed and paid.

"Attention is called to the fact that the company has no business in any of the countries engaged in the present war."

Last year the company earned 7.78 per cent. on its preferred stock, the year before 13.93 per cent., and in 1911 15.30 per cent.

The company has bonds outstanding of $987,750, preferred stock of $1,500,000, and common of $1,500,000. The company manufactures agricultural steam engines, gasoline tractors and threshers, etc., at Hamilton.

◆

NORTHERN NAVICATION BONDS OFFERED

The unsold portion of an issue of $275,000 first mortgage 5 per cent. gold bonds of the Northern Navigation Company, Limited, is being offered by the Tillitson and Wolcott Company, of Cleveland, New York and Cincinnati. The prospectus issued in connection with this offering which is made at a price to yield 5½ per cent. per annum, gives considerable information to the prospective investor.

The Northern Navigation Company, a Canadian corporation incorporated in 1899, owns nine other boats and is an integral part of the Canada Steamship Lines, Limited. This latter company was formed under the Canadian Companies Act to acquire the assets of twelve other steamship companies. The combined companies operate about 100 steamers and control by far the most important part of the passenger and freight transportation business between Canadian ports on the Great Lakes and Montreal and Quebec on the St. Lawrence.

The bonds are secured by a first mortgage on the new steel steamer "Noronic," which is the largest stern wheel passenger steamer on the Great Lakes, together with all its appurtenances and equipment. This vessel was recently built by the Western Drydock and Shipbuilding Company, Limited, at a cost of $750,000, and represents the highest type of modern steamship construction.

The net earnings of the company for the last seven years have averaged $147,882, and since organization the company has paid dividends at an average of 8 per cent. per annum. Its capital consists of $1,000,000 common stock, fully paid, $500,000 first mortgage ten year bonds, authorized but not issued, and this issue amounting to $275,000 on the "Noronic."

◆

An application by the Cape Breton Electric Company, Limited, to the Nova Scotia board of commissioners of public utilities to approve an issue of $[illegible] of 5 per cent bonds of the company was heard on September 2nd.

The town of Coleman, Alta., wants a man to fill the positions of constable, secretary-treasurer and fire chief. In the case of an incendiary blaze he would be able to arrest the criminal, collect the fine and put out the fire. One hundred dollars a month is the salary. In spare time, he will probably help the town clerk, give a little assistance to the garbage collector, shovel snow, send out weather reports, adjust fire losses and sell life insurance.

T. C. BOVILLE,

Deputy Minister of Finance.

DIVIDEND NOTICES

PORCUPINE-CROWN MINES, LIMITED.

DIVIDEND No. 3.

Notice is hereby given that a dividend of 3 per cent., for quarter ending 30th September, has been declared, payable the 1st October, 1914, to shareholders of record the 15th September.

Transfer books will not be closed.

Dividend cheques will be mailed on the 30th September by our Transfer Agents, "The Crown Trust Company."

By order of the Board,

JAMES COOPER,
Secretary-Treasurer.

Montreal, August 17th, 1914.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK.

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared and will be payable at its Head Office, in this City, on and after Thursday, the 1st of October next, to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board.

A. P. LESPERANCE,
Manager.

Montreal, August 24th, 1914.

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND NO. 110.

Notice is hereby given that a DIVIDEND OF TWO AND ONE QUARTER PER CENT. (being at the rate of Nine Per Cent. per annum), on the amount paid up on the capital stock of this Company, has been declared for the quarter year to the Thirtieth day of September, 1914, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the FIRST DAY OF OCTOBER, 1914, to Shareholders of record at the close of business on the sixteenth day of September, 1914.

By order of the Board.

EDWARD SAUNDERS,
Managing Director.

Toronto, 2nd September, 1914.

THE BANK OF BRITISH NORTH AMERICA

Incorporated by Royal Charter

"The Court of Directors hereby give notice that an Interim Dividend for the half-year ended 31st May last of forty shillings per share, being at the rate of eight per cent. per annum, will be paid, less Income Tax, on the 3rd day of October next, to the proprietors of shares registered in the Dominion of Canada.

"The dividend will be payable at the rate of exchange current on the 3rd day of October next to be fixed by the Managers.

"No transfers can be made between the 19th inst. and the 2nd prox. inclusive, as the books must be closed during that period.

"By order of the Court.

"JACKSON DODDS.
"Secretary."

The Bank of Toronto has opened a branch at Freelton, Ont., under the management of Mr. J. B. Connell, formerly accountant at Hamilton branch.

UTILIZING ONTARIO'S WATER POWERS

The mines and metallurgical plants of northern Ontario are now for the most part operated by electricity generated by water powers. At Cobalt, the falls and rapids on the Montreal and Matabitchewan Rivers are utilized; at Sudbury, mines and smelters are supplied with power by the Spanish, Wahnapitae and Vermilion Rivers; power is conducted to Porcupine from the Mattagami; at Michipicoten the Michipicoten and Magpie hoist the ore and operate the machinery at the Helen and Magpie mines; the Canadian Exploration Company's gold mine at Long Lake, also utilizes water power. A new water power installation is being put in at Gowganda Lake to operate the Miller Lake-O'Brien silver mine and a transmission line is under construction from the Blanche river at Charlton to work the gold properties in the new field at Kirkland Lake. Water powers are numerous in northern Ontario, and, as at Iroquois Falls on the Abitibi River, are employed also to operate pulp and paper mills. They have been of great service to the mining industry in providing cheap power.

◆

LONDON PRICES QUOTED

Cash trading among London Stock Exchange brokers is not large and for the present is not encouraged. Prices quoted unofficially, about two weeks ago, for various securities in London, were as follow:—

Consols	70
Local loans	80
London County Council 3 per cent.	79
Metropolitan consolidated 3 per cent	86
Bank of England	245
Port of London 3½ per cent.	86
New South Wales 4 per cent. (1942-62)	95
New Zealand 4 per cent. (1929)	97
Ontario 4½ per cent.	96½
Queensland 4 per cent. (1940-50)	96
Quebec 4½ per cent.	98
South African 10-year bonds	94
West Australia 4 per cent. (1942-62)	95½
Canadian Pacific	157
Grand Trunk ordinary	11¾
Missouri	8½
Union Pacific	114½
United States steels	51
Mexican Railway ordinary	32½
Mexican Railway 1st preferred	104
Mexican Railway 2nd preferred	66½
Brazilian Tractions	52

JULY BANK STATEMENT SHOWS PREPARATION

Banks are Calling Loans in New York—Savings Deposits Increase Heavily — Current Loans Increased Slightly

	July, 1913.	June, 1914.	July, 1914.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$356,535,196	$355,006,229	$346,854,051	— 2.7	—2.2
Deposits after notice	621,347,335	663,650,230	671,214,125	+ 8.02	+ 1.1
*Current loans in Canada	901,550,453	875,536,999	876,570,959	— 2.7	+ .11
Loans to municipalities	43,121,384	37,260,571	36,372,334	—15.6	—2.3
Current loans elsewhere	42,960,513	46,186,854	48,013,052	+11.7	+3.9
Call loans in Canada	67,991,255	67,401,484	68,441,816	+ .66	+1.5
Call loans elsewhere	89,266,235	137,120,167	125,545,237	+40.6	—8.4
Circulation	99,143,411	99,138,029	94,315,561	— 4.3	—4.3

*Including loans to municipalities.

The July bank statement shows that the banks during that month were throwing up financial earthworks, and that business took some ammunition out of store for its own use. In other words, towards the end of July, the chartered banks prepared to meet the situation likely to result from the war, and business drew upon its demand deposits to the extent of $8,000,000 during July. At the same time, deposits after notice, usually understood to represent the people's savings, increased by nearly $8,000,000. This is a matter for satisfaction, although some of the amount may have been accounted for by a change in the bookkeeping methods of one of the banks. It would be interesting to know if the bank branches in Quebec province have received an unusual amount of new deposits. There may have been considerable money in the proverbial stocking in that province, which may have found its way to the banks at the present time.

The changes in the principal accounts during the month and the past year are noted in the above table. Current loans in Canada increased slightly in July, although they are $25,000,000 less than a year ago. One may hope that this account will not be curtailed sharply. Loans to municipalities decreased slightly. Current loans abroad gained a little, but probably in connection with financing in London. Call loans in Canada made a slight increase, and owing to the favorable attitude of the banks to the stockbrokers, that account is not likely to vary considerably. Call loans abroad, chiefly in New York, decreased during the month by $12,500,000, a decline of 8.4 per cent. These loans, at the end of July, were still 40 per cent. greater than in July, 1913. Undoubtedly a considerable reduction is being made and the August bank statement will show that loans in New York have been called heavily. Circulation declined in July by about $4,000,000.

Trend of Loan Accounts.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1913—July	$901,550,453	$67,991,255
August	899,1[illegible]2,804	[illegible]
September	903,717,[illegible]	70,[illegible]47,29[illegible]
October	90[illegible],159,7[illegible]6	71,118,25[illegible]
November	865,888,832	70,12[illegible]
December	852,9[illegible]6,548	72,8[illegible]
1914—January	84[illegible],883,750	71,[illegible]48,[illegible]
February	842,084,[illegible]	71,[illegible]74[illegible]
March	855,381,265	[illegible]
April	865,87[illegible],876	68,52[illegible],774
May	872,152,2[illegible]	67,21[illegible],50[illegible]
June	875,536,999	67,4[illegible]1,484
July	876,570,959	68,441,81[illegible]

This time last year, current loans in Canada were $25,000,000 greater. Current loans, however, were in [illegible] of the past twelve months, smaller than they were in July. Call loans in Canada in July were 1.5 per cent. more than in June. The banks practically have agreed not to call their loans to the stockbrokers so long as the stockbrokers in their turn do not transact business while the stock exchanges are closed and treat their clients generously in regard to margins.

The following table shows the expansion of loans at home and abroad during the past four years:—

July	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1910	$65[illegible],0[illegible]8,[illegible]	$2[illegible],267,390	$[illegible]0,[illegible]81,25[illegible]	$102,436,[illegible]37
1911	723,765,[illegible]58	32,875,114	5[illegible],288	1[illegible]4,0[illegible]9,[illegible]3[illegible]
1912	852,256,651	35,741,[illegible]98	7[illegible],407,734	117,[illegible]61,437
1913	901,550,453	42,960,51[illegible]	67,991,255	89,266,235
1914	876,570,959	48,[illegible]52	68,441,81[illegible]	125,545,287

Current loans in Canada are 2.7 less than they were a year ago, and current loans elsewhere are 11.7 per cent. more. Domestic loans were higher last July than in any past July with the exception of 1913.

Course of Deposits.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1913 July	$356,585,19[illegible]	$621,347,[illegible]8[illegible]
August	[illegible]58,[illegible]21,925	619,[illegible]2,847
September	[illegible]81,7[illegible]7,513	621,249,585
October	389,856,507	621,511,207
November	384,486,040	625,8[illegible]3,150
December	[illegible]81,[illegible]75,5[illegible]	624,692,[illegible]
1914—January	[illegible]	635,1[illegible]5,055
February	[illegible]7,51[illegible],505	640,927,1[illegible]
March	[illegible]45,50[illegible]	[illegible]40,143,[illegible]4
April	35[illegible],515,997	655,670,22[illegible]
May	[illegible]4[illegible],748,488	663,945,75[illegible]
June	355,006,229	66[illegible]
July	[illegible]46,854,[illegible]51	[illegible]1,214,125

Demand deposits were lower in July than in June. There was a heavy decline of about $[illegible] in this item during the month. In January and February, however, the total demand deposits were smaller than in July by about seven and nine million dollars respectively.

The deposits record for the past five years for the month of July is given in the following table compiled by *The Monetary Times*:—

July.	On demand.	After notice.	[illegible]
1910	$2[illegible]	$5[illegible]	$[illegible]
1911	[illegible]	5[illegible]	[illegible]
1912	[illegible]	[illegible]	[illegible]
1913	[illegible]	[illegible]	[illegible]
1914	[illegible]	[illegible]1,214,125	[illegible]17

Loans to Municipalities

[illegible]

Loans to municipalities decreased by about a million dollars in July. Some assistance probably will be given by the banks to municipalities, which in turn will be expected to do their best in marketing debentures and what is more, to take the first reasonable offer received. In the past there has been a disposition on the part of municipalities "to wait for better prices," rather than to accept the banker's advice. Such a municipal policy has proved expensive in the past.

GERMANY DRAINING GOLD RESERVES

Drastic Measures Adopted — Bank Laws Suspended

Little information regarding finances in Germany has been allowed to come out of that country. What few words have been cabled have an inspired touch which savors strongly of official Berlin. A London Times' correspondent, however, in his journal on August 10th, gives some interesting information regarding Germany's financial mobilization and the industrial and trade preparation for the war.

There was everywhere, he says, a tremendous rush for gold. For some days, the private banks having already refused cash, the Imperial Bank was so besieged that the doors were shut early in the morning, and it was stated that the officials already had more business than they could handle before closing time.

Bank of England Bombshell.

In reality, as regards the monetary situation, there seemed to be remarkable confidence, at any rate, until the news of the increase of the English Bank rate to 8 per cent., which struck financiers like the news of a lost battle.

Meanwhile the legislative preparations, of which this is the first published account, are of extraordinary interest. Germany is making an astounding drain upon her financial reserves and her credit system and creating a situation which may be tolerable in victory but will be appalling in defeat. It must not be forgotten that they are the preparations of a country which only last year was afraid or unable to raise any more ordinary taxes and proceeded to a direct confiscation of capital by way of the "levy" little or any of which, by the way, has been collected. About the collection of taxes and of the "levy" nothing definite was known when we left Germany. The tax collectors had for the moment been commandeered by the military authorities to arrange for the billeting of troops. In Berlin they were making a census of accommodation.

New Money Bills.

The Reichstag on Tuesday passed without discussion seventeen emergency bills. The first authorized extraordinary expenditure to the amount of £265,000,000 ($1,325,000,000)—£250,000,000 ($1,250,000,000) from loan and £15,000,000 ($75,000,000) from the empire's stock of gold and silver. I will try to group the most important of the other measures, taking the financial measures first.

The German bank law, in order to counteract an excess of bank notes, makes the Imperial Bank pay a tax of 5 per cent. of the amount by which its notes in circulation exceed the stock of cash. This provision has now been suspended for an indefinite period. In peace time the Imperial Bank must cover the notes in circulation which are not covered in cash by discounted bills with a currency of not more than three months and backed by three or at any rate two good names. These restrictions have been removed and the Imperial Bank can now buy bills with only one signature. Further, the bank is now allowed to cover its note issue not only by discounted bills but by any imperial acceptances which fall due within three months.

Paper Money Mix Up.

All the paper money issued by the Imperial Bank now becomes legal tender and there is no distinction left between actual bank notes and other paper. The Imperial Bank has been relieved of its obligation to hand out gold in exchange for its paper. The private note issuing banks are relieved of their obligation to give gold in exchange for their notes and are allowed to give Imperial Bank notes instead. These provisions take effect not from the declarations of war but from July 31, when the Kriegszustand was declared. In peace time the Imperial Bank in Berlin and its branches at Frankfort-on-Main, Konigsberg and Munich are compelled to give gold in exchange for parcels of silver coins to the amount of not less than £10 ($50), or of nickel and copper coins to the amount of not less than £2 10s. ($12.50). These obligations are now suspended by an amendment of the coinage law. This is mainly a precautionary measure.

At present the Imperial Bank is engaged in satisfying the demand for silver and nickel from its extraordinary resources, rather than fearing a demand for gold in exchange for silver and nickel. But it is calculated that when the first

rush of adjustments of accounts among the public has passed there will be a fresh effort to turn the accumulation of silver and nickel into gold.

The empire is enabled for an indefinite period to employ bills (Wechsel) as an additional form of credit—these bills being of course free from taxation. Bill and check transactions are in Germany subject to restrictions unknown in other countries and there is practically no escape from the necessity to present bills and checks immediately they fall due and to take action immediately they are dishonored. The law has now been amended so as to protect the holders of bills from the consequences of the state of war and especially of the interruption of postal and other communications.

In order to help industry all the restrictions of any importance which the Gewerbeordnung places upon employment and the regulation of hours of labor in particular industries have been removed. This is much as if the factory acts and all similar measures in England were to be suspended. The provisions of the sick insurance and other imperial insurance laws have been adapted to the needs of war time. The legal provisions for the support of families of soldiers have been amended. The German law fixes minimum rates of aid. The minimum rates are only—for a wife, 9s. ($2.25) a month in May, June, July, August, September and October and 12s. ($3) a month in the other months of the year; for every child under 15 years of age 6s. ($1.50) a month.

This is Remarkable Bill.

Perhaps the most remarkable bill of all is that for the granting—up to a total amount of £75,000,000 ($375,000,000)—of loans on all sorts of stocks and securities. In connection with the Imperial Bank special loan institutions will be set up which will issue special paper (Darlehnskassenscheine). This paper will be honored by the Imperial Bank and have the same status as banknotes, although the public is not obliged to accept it in payment. The loans will run as a rule for three months and exceptionally for six months. The "loan" paper will be issued in notes of 5s., 10s., £1 and £2 10s. ($1.25, $2.50, $5 and $12.50). Loans can be effected on all sorts of (not perishable) trade stock and industrial products up to one-half or even two-thirds of the assessed value; upon all sound German stocks and shares up to something less than the market quotation; and upon any other securities which the authorities choose to accept. In the case of goods which are subject to wide fluctuations of price, the security of a third person must be given. The procedure will simply be that the loans will be arranged by negotiation and that the authorities will, without removing stock given as security, place their seal upon it.

What May Result.

There was a modest scheme of this sort in 1870, but the whole amount then involved was only £4,500,000 ($22,500,000), as compared with the present sum of £75,000,000 ($375,000,000). The rate of interest is, "as a rule," to be something above the published rate at which the Imperial Bank discounts bills. It is no doubt a wonderful scheme of relief—and it should be added that the loan establishments will do business down to an amount so small as £5 ($25). But, once again, one wonders what appalling consequences will result if the war drags on and trade remains at a standstill. I venture to predict that the £75,000,000 ($375,000,000) of "loan" paper will be absorbed very rapidly and that it will be impossible for most of the borrowers to deem it within three months or any such period unless the German forces secure very different results from those which are being concealed from the hoodwinked and unfortunate German public.

◆

An optimistic feeling prevails in London among those interested in the financial result of the grain crop in western Canada, especially as the safety of the Atlantic, which is now assured, has induced tramp steamers to enter the trade again on this route. It is anticipated the crop will now be shipped quickly until the close of the St. Lawrence.

The outstanding wool features of the past year in Australia have been:—Considerable increase in the Australasian clip; strength of the continental demand; apathetic attitude of United Kingdom buyers; the free admission of wool and meat into the United States; rapid development of the frozen mutton trade; increased attention paid to cross-breeding; and preference shown by manufacturers of merino wool.

THE DOMINION BANK

Sir Edmund B. Osler, M.P., President. W. D. Matthews, Vice-President

It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

HOW NATIONS ARE FINANCING

European Countries Are Preparing to Raise Large Loans

Little is heard as to how the nations at war are financing. Extraordinary financial measures have been passed in many European countries, several of them not engaged in the struggle. To date it has been difficult to learn their details In the British House of Commons about $1,000,000,000 has been voted, the money being required for meeting the expenses incurred in connection with military operations, food supplies, keeping communications, relieving distress and other matters arising out of the existence of a state of war between Great Britain and Germany. The sum placed at the disposal of the government will enable it to provide for all measures which may be taken for the security of the country

How Best to Raise Funds.

The real problem is to raise the money in the most advantageous way. The London Financier says it is understood that the balances to the credit of the treasury are ample to provide for immediate outlays, such as the cost of mobilization, but, should any shortage arise, it will be a simple matter to obtain temporary advances from the Bank of England. At all events, an immediate issue of government securities will not be necessary. It will be the duty of the treasury authorities, in consultation with the banking community, to take the first favorable opportunity for making a public issue. Apparently it has not yet been decided what form the issue shall take. The suggestion that it should be raised by means of an emission of exchequer bonds is thought to be a good one. This form of redeemable security is popular with investors, and the new exchequer bonds would be still more popular if they were issued in bonds of a denomination sufficiently low to attract the small investor. The rate of interest and the price of issue will necessarily be governed by the financial conditions obtaining at the time when the loan is floated.

Scheme in London.

With a view to assisting the British authorities to solve the problem relating to the cheapest and soundest method of issuing the £100,000,000 war loan, the outlines of a scheme have been prepared by certain financial interests in London, says the London Financial Times, and appear likely to afford a basis upon which to build up the necessary superstructure. It is proposed that the emission in question shall be known as "British three per cents.," and shall be offered at a discount of 2 or 3 per cent., an option being given after a period of two or three years to Consol holders to exchange £100 of that 2½ per cent. security for £87 10s. of the new loan. An important provision in this connection is that holders of Consols who take advantage of the option shall have already invested, in a proportion to be fixed, in the new three per cents. It is maintained that the advantage of the scheme is to give to Consol holders an additional ⅛ per cent of interest, which, capitalized at, say, 32 years purchase, would represent an appreciation in capital values of at least £20,000,000, the result being to strengthen the nation's finances to that extent. It is also considered that the depreciation which has been going on in Consols would be checked by the creation of such a security as that now suggested. moreover, the exchange operation, if exercised, as it undoubtedly would be, should cancel £70,000,000 of indebtedness within the next two or three years and without inconvenience.

Forthcoming War Loan.

A London cable on August 26 said that the chancellor of the Exchequer, had introduced into the British House of Commons, a resolution as the basis for the forthcoming war loan bill. The bill, Mr. Lloyd George said, would differ from the previous war loan measures in two respects First, the actual amount of money to be taken has not been fixed. The sum to be raised will include not only the vote of credit for $500,000,000 already authorized, but the sum by which the revenue will be diminished in consequence of the war Second, the bill will not indicate the precise method by which the money is to be raised. That will be left to the discretion of the treasury to be decided according to the conditions prevailing.

In the meantime, the British government has made two offerings of treasury bills, each of $75,000,000. Both issues were several times oversubscribed. Applications for the first loan totalled $210,000,000 and for the second, over $200,000,000. Many of the applications were from the banks.

In the current year the new issues of capital in the London market alone will probably reach £250,000,000, after providing for the nation's expenditure upon the construction of houses and extensions of works. If the occasion should arise the British people should be able, without any serious difficulty, to raise loans amounting to £200,000,000 a year over and above any sums they may derive from the sale to the United States of a part of the great quantity of American securities they now possess, according to Sir George Paish.

Belgium and France.

Great Britain has decided to make a loan of $50,000,000 to Belgium by an issue of British treasury notes similar to those put out for the British government itself.

Important credits demanded by the French government amount to $550,800,000, which will be submitted to Parliament for approval. Article 3 of the law for voting this extraordinary loan distinctly states that only $200,000,000 of the above total can be issued in treasury bonds. These probably will bear 6 per cent. interest. The balance, therefore, will be obtained by other means.

Canada's war financing has already been discussed in detail in *The Monetary Times.*

◆

BRITISH GOLD RESERVES

Aside from those of the Bank of England, little publicity is given the gold reserves of British banks. The Bank of England issues a weekly statement as to its own reserves, and not a few financiers consider that this system should be made obligatory on all banking houses. Sir Edward Holden has already promised to publish the reserves of his own bank, the London City and Midland, but many other bankers do not approve of this. The argument is that while the Bank of England is, to all intents and purposes, a national institution, bound to give publicity to its affairs, the joint stock banks are not in the same category. Moreover, it is considered unwise, especially during the present crisis, to disclose the total resources of the British banking world. If it were decided by other bankers to agree with Sir Edward Holden's views, it would be interesting to see how the reserves of the banks now compare with the records gathered from the annual reports issued by the deputy master of the Mint.

A Canadian banker to *The Monetary Times* expressed the opinion that the joint stock banks of England have been accumulating gold for some time past, and that Great Britain is therefore in a much stronger gold position than has been shown by recent Bank of England statements. The financial measures, undertaken by the British government to conserve gold, has cleared the situation anyway.

In discussing the gold question in the British house recently, Chancellor Lloyd George said:—"There is a danger that individuals might selfishly attempt to hoard gold in order to be in a better position than their neighbors. It is vital that it should be made clear that any man who does that is inflicting a great injury on the country. In this tremendous struggle finance is going to play a great part. It is one of the most formidable weapons in this exhausting war. Anyone who, through selfish motives, greed or excessive caution or cowardice attempts to withdraw gold and appropriate it for his own use, let it be clearly understood that he is assisting the enemy and that he is assisting them more effectively than if he were to take up arms in their favor."

◆

For the first six months of 1914 the Toronto Hydro-Electric Commission reports net profits of $40,500, or 6 per cent. on the investment. The gross income was $741,273.45, against which there were expenditures as follows: Current, $147,566.24; management, repairs, maintenance, $268,828.11; interest, $122,031.78; depreciation, $108,759.83; sinking fund, $43,686.82; leaving net profit of $40,500.67.

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the

FIRST DAY OF OCTOBER NEXT,

to Shareholders of record on 15th September, 1914.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City, on Monday the 2nd of NOVEMBER next, at three o'clock in the afternoon

By the order of the Board,

EDWARD C. PRATT,
General Manager.

Montreal, 25th August, 1914.

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-nine years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Ten and One-quarter Million Dollars of Shareholders' Money are a further pledge of their security.

These bonds may be had in sums of One Hundred Dollars and upwards.

TRADE WAR ON GERMANY

Determined Campaign is in Preparation — Canada's Opportunity

The trade departments of the British government and many allied interests are working in England and elsewhere to capture German trade. To them the European war has but one phase, the obtention of more business. A Canadian Associated Press cable says that the announcement of the British government regarding the capture of Germany's export trade has been received with enthusiasm by British traders. With a view of replacing some of the larger markets in hardware and metals, a syndicate of British merchants is sending to Canada a direct representative, Mr. P. G. Donald, who will act in the general interests of obtaining some goods hitherto supplied by Germany for the whole of the English market.

Canada's Opportunity.

"That Canada is alive to the opportunities presenting themselves is obvious," Mr. Donald says, "from the prompt and courteous assistance given to us by the Canadian representatives on this side. It now merely remains for the Canadian government and manufacturers to grasp their opportunities for a large trade to spring up between us."

Schemes of making war on Germany and trade matters have been discussed also at a meeting of the Royal Colonial Institute. It was resolved to bring statistics before the commercial community showing the German and Austrian trade with the overseas Dominions in recent years. Particular mention was made of the manner in which the German and Austrian trade competitors have studied the wants of the Dominions buyers on the spot, whereas the British manufacturers appear to show less enterprise in this respect. The British board of trade are to be asked to encourage and assist the Colonial Institute in making these matters known. Another meeting will be held after the government's views have been further ascertained.

Germans Sell These Lines.

The London Chamber of Commerce committee held a private meeting to discuss this anti-German trade campaign. It calls the attention of manufacturers to the following lines which Germans sell heavily in England:—Electrical appliances and apparatus, iron and steel, wire, stone and earthenware, chinaware, cutlery, hollowware, cotton hosiery, woolen and worsted piece goods, cotton prints, furniture, leather, gloves and boots and shoes. It is estimated that $1,000,000 worth of German dynamos and motors are sold annually in British territory.

The Imperial board of trade has arranged for the suspension of German and Austrian patents in England, wherever manufacturers want to make use of them in the public interest. All English chambers of commerce have been advised of this opportunity and urged by the London chamber to interest manufacturers in cornering German business, especially in hosiery. Germany shipped over $17,000,000 worth of stockings and socks to England last year, as well as much underwear. Furthermore, Germany has enjoyed an extensive Canadian trade in women's suits and cotton goods.

The English papers are making an especial attack on the German manufacturers of Christmas cards and toys. All parents are being urged to deny their children playthings made by the enemies of the empire.

Canadian Work in London.

The work of the British navy in safeguarding the trade routes is of great assistance in this commercial war.

Falling in with the new campaign for securing German markets, Mr. Harrison Watson, trade commissioner of the Canadian government in London, is engaged in giving information and making inquiries concerning goods hitherto supplied by Germany to Canada.

Hardware, iron goods, cutlery, toys, metals and fibre goods are among the commodities which British manufacturers could readily supply.

STOCK EXCHANGES QUIET

Little Disposition to Reopen in Canada—New York Position

There is little disposition either in Montreal or Toronto to reopen the stock exchanges until London and New York set the example. The question of trading for cash on the Canadian exchanges has been discussed, but no definite plan is evolved. Some of the brokers do not favor this form of trading. A suggestion has been made also that such trading should be transacted at fixed prices.

Under the careful regulation of the New York Stock Exchange Clearing House, cash transactions in securities are being effected. Some private trading is going on too. This is not being indulged in, perhaps, by the body of stock exchange members, but some transactions in listed securities are daily taking place without the knowledge and sanction of the stock exchange authorities.

At Discretion of Houses.

In a measure, it has been left to the discretion of banking and brokerage houses to regulate their own attitude as to what may be termed new business, although it is "unwritten law," perhaps, that they should hold aloof from the market in every way.

But the question arises, says Financial America, whether the present regulated transactions and those which are effected privately would not be more advantageously dealt with if the New York Stock Exchange itself be opened for cash trading.

"Under the present arrangement," it adds, "much confusion exists. The public, surely, is largely in the dark as to any trend the market may have. And brokerage houses are in a condition of embarrassment and impatience, even as to cash trading under the regulation of the Stock Exchange Clearing House, which would be at least partially relieved should the stock exchange be thrown open to such transactions. The sentimental effect of such a course would be good, it would seem, for the ruling as to minimum prices for cash sales would still be operative and the stability afforded by this ruling under the present method of trading would not be endangered.

Open for Cash.

"There is ample evidence that there is growing favor of the course suggested. The plan is being considered relative to various exchanges in smaller cities. San Francisco is opening its market on certain dates for transactions in designated securities. The time is ripe for the consideration of this plan by the authorities of the New York Stock Exchange."

The Standard Stock and Mining Exchange, at Toronto, opened for business on August 24th and 25,000 shares changed hands. Prices were fairly well maintained. The business on subsequent days was not as heavy.

◆

CANADIAN PACIFIC RAILWAY AND SPOKANE LINE

Some years ago, for the purpose of securing access to the state of Washington and other important territory in the northwestern United States, the Canadian Pacific Railway Company entered into a working arrangement with the Spokane International Railway Company, extending from Kingsgate, on the line of the Canadian Pacific Railway in British Columbia, to Spokane, Washington, a distance of 141 miles, with branch lines 22 miles in length. The volume of traffic secured to the lines by this connection has become so important that a more permanent arrangement is desirable. The directors have not as yet decided whether this could be best accomplished by the acquisition of the capital stock of the Spokane International Railway Company, by a guarantee of interest on its bonds, or by some other means, and therefore they will ask the authority of the shareholders to exercise their discretion in carrying out such a transaction for closer and more permanent relations with the Spokane International Railway Company as may appear to be most desirable.

DOMINION NOTES FINANCING EXPLAINED

Finance Minister White Tells How it Will Work—Sir Wilfrid Laurier Approves

An interesting discussion took place in the House at Ottawa respecting the legislation introduced by the finance minister in regard to Dominion notes. Mr. White explained that the legislation authorizes an increase of Dominion notes from $30,000,000 to $50,000,000 without any limitation or condition whatsoever, so that it would be open to the government to avail itself of it now or at any later time. In other words, there is an integral change made in the Dominion Notes Act whereby a margin of 25 per cent. of gold may be held in respect of an issue of $50,000,000 instead of $30,000,000 as under the present legislation. As regards denomination, notes of any denomination may be issued to make up this amount. It may be wholly in ones, twos, or in fives or large legals, but it will be a combination of all.

It is desirable that the total amount of free Dominion notes that should be outstanding at any time should not be materially in excess of the amount of notes of small denominations in the hands of the public. In other words, in order that the Dominion may be able to retire its notes in gold there should not be outstanding a larger amount than is required from time to time by the community for its purposes. We have, however, a safeguard against any difficulty on that score. In the Bank Act there is a provision that the chartered banks of Canada must hold 40 per cent. of their cash reserves in Dominion notes. That being so, the amounts which the banks must hold under that legislation cannot of course come in for redemption. Therefore, the position is this:—

Must Consider Three Facts.

In estimating what notes are likely to be presented for redemption, we have to take into consideration three facts: first, how many notes are likely to remain outstanding in the hands of the public; secondly, how many notes are likely to be required by the banks for the purpose of their clearings (which is a very large amount); and thirdly, what amount of notes must be held by the chartered banks, representing not less than 40 per cent. of their cash assets? As to the present issue of Dominion notes, I have some information here which I think will be of interest to the House:—

Present issue of Dominion Notes and Gold holding as on July 31, 1914.

Fractionals 1's, 2's, 4's and 5's	$ 25,180,333
50's, 100's, 1,000's	7,209,500
Bank specials good between banks only, in 500's, 1,000's and 5,000's	80,404,000
Total	$112,793,833
Amount Dominion notes held by the banks this date	90,588,065
Amount Dominion notes in the hands of the public other than the banks	$ 22,205,768
Gold held July 31, 1914, as reserve for Dominion notes	91,735,584
Amount of gold required to be held under the present act for this issue	90,293,833
(In addition to the $91,735,584 the minister also has $5,400,842 in gold to satisfy the 10 per cent. requirement of the Savings Banks Act.)	
Amount Dominion notes outstanding not covered by gold holding	21,058,240
The banks had in current gold and subsidiary coin on the 31st July, 1914	51,406,472

Not Covered by Gold.

Referring more particularly to the item of $21,058,240, representing the amount of Dominion notes outstanding not covered by gold holdings. The Dominion may issue $22,500,000 of free money to-day, but it happens that only $21,058,240 in Dominion notes are outstanding unsecured by gold. In addition to that, although the question does not arise here, the banks held in current gold and subsidiary coin on July 31st, 1914, $51,406,472, so that in round figures you can say that the gold reserve of the Dominion both by Dominion and chartered banks would be over $150,000,000

With respect to this proposal to increase the note issue from $30,000,000 to $50,000,000 against 25 per cent. of gold,

Mr. White explained that if advantage is taken of the proposals in the Dominion Notes Act, 1914, on the basis of the circulation as of July 31, the total outstanding circulation would be approximately $127,800,000. The gold reserve as respects that issue would be $91,735,000. This works out a percentage of gold to circulation of approximately 71.7. 71.7 per cent. is a larger percentage of gold holding to notes issued than was held by the Dominion at any time prior to 1909. At the present time the gold holding is approximately 81 per cent. of the total issue of Dominion notes. The issue of $15,000,000 additional Dominion notes would reduce the percentage to 71.7 as stated.

Gold Holding and Circulation.

In 1870 the percentage of gold holding to circulation was 22; in 1880, 41; in 1890, 34; in 1900, 55; in 1908, 65; at the present time 81 per cent. and at this extension that we propose, it will fall to 71.7 per cent.

It is provided in the war appropriation bill that the government may borrow in order to raise the funds in whole or in part. I thought it advisable that in addition to all the borrowing powers which the Dominion at present possesses we should insert in the bill the power to borrow. It would appear to me that it would not be just that the whole burden of this war in its entirety should fall upon the people of Canada during each year of the continuance of hostilities and that it would be proper that borrowing powers should be taken in connection with the appropriation bill. That is the course adopted by other countries. Great Britain has, according to the despatches received, issued treasury bills which have been at once subscribed for the purpose of carrying on the war. Her first step was to borrow a large sum of money, reported to be something like $45,000,000 or $50,000,000, from the Bank of England. The recent transaction under which treasury bills are sold will repay that advance from the Bank of England and put her in funds to the extent of the further amount realized by the sale of the treasury bills.

Meet Situation in Three Ways.

We will attempt to meet the situation in three ways: first, we will raise an additional amount by the taxation from customs and excise; and secondly, we will, from time to time, endeavor to make loans to meet the deficit between our revenue and the expenditure upon capital account, plus the special expenditure required in connection with our military and naval operations. We shall pursue that policy and avail ourselves at the same time of this expedient of issuing Dominion notes which is, after all, a method of borrowing from the public of Canada upon our own securities.

Sir Wilfrid Laurier said:—"This is not a temporary measure; it is a permanent measure and I do not know that I have any great criticism to offer. I think, on the contrary, that I approve of it altogether. The only point which might occasion some—not criticism—but desire to have further information is in regard to the raising of the proportion of Dominion notes not covered dollar for dollar by gold from $30,000,000 to $50,000,000. The proportion hitherto existing—25 per cent.—remains the same, but the amount is increased from $30,000,000 to $50,000,000. My hon. friend, I am quite sure, has given a good deal of consideration to that matter. I know that he is a believer in the credit of Canada being maintained upon a gold basis and nothing else. In changing the proportion from $30,000,000 to $50,000,000 that principle has been maintained. I was relieved when I heard him say that at the present time our gold holdings amount to 81 per cent. of the Dominion note issue and that therefore the alteration would be only 3 or 4 per cent., which I think, is not material. I have no doubt that those who follow these matters will be relieved to know that our Dominion note issue remains upon an absolutely secure gold basis."

◆

IS FRANCE HOARDING SILVER?

Paper notes of fifty centimes, one franc and two francs (10, 20 and 40 cents) are being printed under the authorization of the government by the Paris Chamber of Commerce to supply change. The first issue amounts to $2,000,000. This fractional currency can be exchanged at the Bank of France for large bills. It is estimated that $400,000,000 in silver is now hoarded in France, so that even the small coins are going into hiding

SPOTS ON THE MORATORIUM

Some of Its Disadvantages—London Advice is to Pay if Possible

A [illegible] Central News Agency's [illegible] extremely [illegible] has been that [illegible] dividend declarations, [illegible] postponed disbursements [illegible] of the crisis [illegible] down the [illegible] those who [illegible] banks for [illegible] market [illegible] at their worst [illegible] a very rigid [illegible] customers, and [illegible]

Should Pay if Possible.

The London [illegible] from the obligation [illegible] August 4th, [illegible] or even [illegible]

"Obviously, [illegible] of the public [illegible] embarrassments [illegible] the moratorium [illegible] money to [illegible] are enemies of the State [illegible] enemy. The [illegible] possible and [illegible]

"To do otherwise [illegible] and precipitate [illegible] everybody that [illegible] of relief under the [illegible] obligation to provide [illegible] ture, such as rent, taxes and wages. [illegible] which cannot be escaped, and [illegible] cline to pay up, [illegible] in a position of great difficulty. [illegible] every citizen to do all [illegible]

Commonsense and Debts.

"Quite apart from [illegible] nonsense dictates that [illegible] debts as no advantage is to be gained by [illegible] which will have to be [illegible] the moratorium will expire, [illegible] protected by the law.

"But many tradesmen, [illegible] tries, will inevitably experience [illegible] and if their accounts are not paid [illegible] impossible to tide over [illegible] cies will result, and losses [illegible] flicted on almost every class of the community. [illegible] we trust that, [illegible] all who owe money [illegible] promptly do so, [illegible] at a time when it is [illegible] stability should be maintained."

Canada [illegible] torium.

How to Work it.

"With reference," writes the London [illegible] proclamation issued postponing the [illegible] bills of exchange, the [illegible] proclamation is as follows:—

"'When an [illegible] bill of exchange [illegible] payment at the bank [illegible] please this bank [illegible] return the answer, [illegible] Proclamation.' The [illegible] ceptor, who will [illegible] purpose in the usual way.

"Those acceptors, therefore, who [illegible] selves of the proclamation, must instruct their [illegible] cordingly.

"Every bank must, of course, decide [illegible] it is necessary to give instructions in regard [illegible] its branches or correspondents in various parts of the country.'"

SECURITY VALUES

[illegible] some [illegible] as [illegible] panic period of 1907 have not depreciated to any extent intrinsically, but in cash worth, governed largely by Law of Supply and Demand, and pessimistic sentiment [illegible] by existing war.

Indications are that, when war is ended, the hoarded millions now in savings banks will immediately seek investment. Undoubtedly this would cause large increase in values of Canadian Securities, which will possibly enjoy more popularity than ever.

We can offer some "Bargain Lots" which can be purchased to good advantage by Shrewd Investors.

CANADA PUSHING EXPORTS

Good Results in Motor Cars in Australia—South African Markets

In the weekly reports received from the Canadian trade commissioner and issued from Ottawa weekly, growth in Canada's export trade is indicated. At this time when manufacturers are giving more attention to export channels, the valuable trade commission service of the Dominion government is in great demand.

The trade commissioner at Melbourne, Mr. D. H. Ross, has gathered information regarding the automobile trade. In some of the states of Australia, he says, there is no government registration of motor cars and hence it has only been possible to ascertain the number of cars and the names of the manufacturers registered in Victoria, New South Wales and South Australia. The total number of cars in the three states together with the proportion of Canadian cars, down to recent dates, is shown thus:—

Motor cars in	Total number.	Canadian share.
Victoria	8,339	1,350
New South Wales	13.901	2,065
South Australia	4.512	1,029

Canada Made Good Record.

Aggregating the three states, 26,752 cars were registered, of which 4,444 cars were of Canadian manufacture. Excellent direct representation, combined with the undoubted value of the leading lines of Canadian cars, is responsible for these encouraging results in face of competition in the Australian market of motor cars from all parts of the world.

In South Africa.

Mr. D. M. McKibbin, Canadian trade commissioner for South Africa, reports that results recently accruing to the enterprise of certain Canadian manufacturers have been very gratifying. In two instances specimen products have been shipped entirely at the expense of the manufacturer. The one, an agricultural implement, was immediately taken up by a leading Johannesburg house, with connections at the coast and throughout the Free State and the Transvaal. The other (a machine employed in irrigation) was found to be inadequate to local requirements. But the same firm submitted specifications of a similar machine that would be entirely suitable to South African conditions, and the manufacturer was asked to quote on it. His further response has proved equally gratifying, his quotations being satisfactory; and considerable business can confidently be expected.

Gasoline Engines and Boilers.

There has been an increasing demand in South Africa for gasoline engines. In certain parts of the country fuel of any description must be transported long distances, and there the gasoline engine has come to stay. In other sections, however, it has been found that motive power that can be generated on locally obtained fuel will prove more economical than gasoline produced energy. Wood is plentiful in certain districts and there the wood burning portable boiler is the favorite. But over considerable areas in the northeast of the Cape province and throughout Natal, Transvaal and Rhodesia, open coal seams can be found where the farm owner and his neighbors help themselves to excellent fuel at a minimum of cost. Here a lucrative trade could be found by the manufacturers of portable boilers (vertical) and engines of 2 to 8 horsepower, that will comply with the boiler regulations of the Union and yet can be sold at a low price.

◆

If you meet two men with slouch hats, armed with revolvers and rifles, bowie knife in belt and sword swinging to heel, glancing around suspiciously, eschewing conversation, avoiding company, carrying a bulky suitcase, eating meals by the wayside,—you will know they are Alderman E. H. Riley and W. J. Tregillus, of Calgary, on the way to England with $500,000 of Calgary's bonds. They are on active service and are saving the city $12,000 war insurance on the securities. Before they went, the city fathers discussed all that might befall the bond carriers, including gunmen's attacks and sunken ships. But the aldermen did not pale and they are taking the bonds to Europe on a personally conducted tour.

CANADIAN PACIFIC LOOKS AHEAD

Directors Report Provision for Present Needs and Plans for Future Financing

The Canadian Pacific Railway capital expenditure of over $60,000,000 for cars and locomotives in the years 1910-1914 was so very large that the directors decided that it would be proper to spread the payments for this year's deliveries, about $14,000,000, over a period of fifteen years, under the terms of an ordinary equipment trust agreement, and, therefore, a contract was made with the Victoria Rolling Stock and Realty Company to provide the equipment and receive payment in 15 annual instalments, with interest at four and one-half per cent. per annum. All of the equipment has been delivered, and the cost has been advanced by the company pending the sale of the rolling stock company's bonds, when the Railway Company's treasury will be recouped.

The Canadian Pacific Railway accounts for the year show that $35,571,959 had been advanced from current funds to meet the cost of additional railway mileage and ocean steamers against which no securities have been issued or sold. In ordinary course, four per cent. consolidated debenture stock would have been utilized to meet this expenditure, but market conditions were not favorable to the sale of this security in large amounts without unduly depressing the market price.

Special Investment Notes.

In these circumstances the directors decided to create a special investment fund composed of the deferred payments on land sold, and securities in which land funds had been invested, to the amount of $55,000,000, and to issue against this fund and the company's credit ten-year note certificates to the amount of $52,000,000, carrying interest at the rate of six per cent. per annum, to be offered to the shareholders at 80 per cent. of their face value, thus providing all the money required for the present purposes of the company, and at the same time giving the shareholders participation in the proceeds of land sales to the amount of about $10,000,000.

The issue was entirely successful. The note certificates, with interest, will be paid off in instalments without any encroachments on revenue from traffic, and the four per cent. consolidated debenture stock can be marketed in such amounts and at such times as may be most advantageous.

Since the close of the last fiscal year first mortgage 5 per cent. bonds to the amount of only £64,700 or $314,873 have been taken up and cancelled, because the holders were unwilling to surrender their bonds at a premium satisfactory to the Canadian Pacific Railway directors. The outstanding bonds, amounting to £2,638,000 or $12,842,646.67, will mature July 1st, 1915, and on or before that date they will be paid off and cancelled with funds set aside for the purpose.

Over Three Hundred Million.

As mentioned in the notice to shareholders, the annual general meeting will be made special for the purpose of authorizing, if approved, an increase of the company's ordinary capital stock by the amount of $75,000,000, namely, from $260,000,000 to $335,000,000, in order to make it accord with the amount for which the company has the sanction of government. Although with the curtailment of capital expenditure no necessity exists for issuing any additional ordinary stock at this time, and there will be no resumption of works requiring any large amount of money until a decided improvement in business conditions furnishes ample warrant. The Canadian Pacific directors are convinced of the prudence of making provision at this time for capital requirements covering a considerable period in the future. No portion of this increased amount will, of course, be issued by the directors until the sanction of the shareholders has been obtained at a special general meeting called for the purpose.

NEW USE FOR SAFETY DEPOSITS

"An attempt to blow up one of the chief London banks," says the Evening News, of that city, "has led to an [illegible] warning to all banks to examine thoroughly upon delivery [illegible] deep boxes deposited with them. A harmless looking deep box," the paper continues, "was presented at a London bank for deposit in the strong room. A sharp ear caught an ominous ticking, and an infernal machine was discovered in the box."

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, but the situation today justifies our conservative yet progressive policy.

BUY GOLD AND PAY GOLD

Minister of Finance Says No Fear Need Arise Regarding Undue Inflation of Currency

Sir Wilfrid Laurier asked finance minister White in the House at Ottawa if he is able at this moment to get all the gold he needs from the production of the country or whether he has to import any gold. In face of the development that has recently taken place in gold production in Canada, does he still import gold or has he enough in the country? he added.

Mr. White replied that when the Dominion buys gold it must pay for it in gold. Therefore, at the present time it is no object to the Dominion to buy gold and pay out gold if that gold leaves the country. "In the provision which I have inserted," the finance minister continued, "in this Dominion Notes Act whereby Dominion notes may be issued against bar gold as well as against gold coin, it is in my mind that we shall be able without depleting our balances with the bank to purchase bar gold the product of Canada of the requisite degree of fineness. The present method of purchasing gold through the mint is that they tender for gold no matter where it can be bought, whether in Canada or the United States. They require bar gold of a certain fineness. They may have to refine it a little more after they get it, but the gold purchased is converted into coin here.

Must be Fine Gold.

"I have taken the matter one step farther by this amendment to the Dominion Notes Act. If bar gold is available, whether bearing the stamp of the United States government assay office or of the Royal Mint, or any branch thereof in Canada or Australia, we may pay for it by the issue of Dominion notes against it. That would not deplete our financial reserves. If I attempted to buy gold now that was not of the degree of fineness which would enable the Mint to coin it into specie, or gold currency, I would have to pay out gold to get that and thus impose quite a strain upon our reserves at the present time confronted as we are with the programme I indicated to the House yesterday.

"It is not an object of the government just now to buy gold, but it is an object of the government at the present time to conserve its gold; and therefore we have, as a corollary of the action that we took in making bank notes legal tender so far as the obligation of the banks to the public is concerned, discontinued the redemption of Dominion notes in gold. That was found necessary in order to conserve the gold resources of the country.

Inflation of Currency.

"Sir Wilfrid Laurier has had in mind, what of course any financial man would have in mind—namely, the supreme importance of not inflating the currency beyond the point upon which we can readily get back upon a gold basis.

"We have been upon a gold basis. At the present time, like other countries, we are not upon a gold basis. The United States to-day is upon the basis on which it was in 1907. Payments are being made by clearing-house certificates; but nothing that we are doing at the present time in connection with the Dominion Notes Act, and nothing I hope that we shall be obliged to do in the future to meet the situation by issuing Dominion notes, will put the Dominion in a position in which its note currency will be so inflated that we shall not within a reasonable time be able to get back upon a gold basis.

"If we should have to take action in the future that would make it difficult for us for a long time to get back upon a gold basis certain evils would follow that it is not necessary to advert to here. We hope to be ready, as soon as the necessity no longer exists of conserving our gold supply, to return to a gold basis. This extension from $30,000,000 to $50,000,000 does not in any way affect the circulation on account of the notes in the hands of the public and the amounts the banks are required to hold under the provisions of the Bank Act."

TORONTO TERMINALS RAILWAY COMPANY

The financing of the Toronto Terminals is discussed as follows in the report of the Canadian Pacific Railway. To give effect to an agreement with the city of Toronto, and to an order of the board of railway commissioners requiring the railway companies to provide a union passenger station and joint terminals commensurate with the passenger traffic of the city, and to eliminate grade crossings by the elevation of their tracks in the joint terminals on the water front, the Toronto Terminals Railway Company has been organized with the sanction of parliament, and a contract has been made between the Canadian Pacific Railway, the Grand Trunk Railway Company of Canada, and the Toronto Terminals Railway Company, for the construction and operation of the union passenger station and terminals, which fixes the rental to be paid by each company for the use of the facilities at five per cent. per annum on one half the amount of the Terminals Railway Company securities outstanding at any time, provides for the joint and several guarantees by the company and the Grand Trunk Railway Company of Canada of the payment both as to principal and interest of the said securities, and establishes the basis on which the expense of operating the station and terminals shall be divided between the companies.

The Dominion government and the city of Toronto will participate in the expense of carrying out these works on a basis to be determined by agreement between the parties, or to be settled by the railway commissioners of Canada, but it is estimated that the portion of the cost to be borne by the Terminals Company will be approximately $12,000,000. The contract will be submitted for the shareholders of the Canadian Pacific Railway consideration and approval.

◆

FARMERS AND FIRE HAZARDS.

As the farmers of Saskatchewan are continually giving to the world evidences of a progressive spirit in matters relating to their best interests, it may not be amiss to make an appeal for greater interest on the subject of fire prevention, suggests Mr. R. J. McLean, Saskatchewan's fire commissioner, in a bulletin. An analysis of reported fires shows that in rural districts sufficient thought has not been given to safety from possible fire and, consequently, adequate precautions are not generally taken in this respect.

The peculiar circumstances in which we find ourselves in the fall of 1914 give an additional emphasis to the necessity of the conservation of our resources. Farmers should sit up and take notice of the fact that fires increase the cost of living, inasmuch as each and every fire means a capital loss, where insurance is carried, which can only be replaced at the cost of the community in general.

When insurance is not carried the loss, in the case of the individual owner is direct and absolute and the community suffers indirectly by the destruction of so much productive capital. Elimination of fire waste should be the wish of all. When consideration is given to the fact that the farmer is generally removed at a great distance from his nearest neighbor and help, in case of fire, is a factor of little value, prevention of fires should be the farmer's aim.

Another aspect of the case to be considered is that, where women and children are so often left alone every human consideration demands the utmost precaution.

The great majority of fires are due to carelessness.

Here are some suggestions to guard against fires from this cause, which, if observed, will lessen the waste of property and the loss of life by the ravages of the fire fiend. Do not fail to burn all fire-breeding rubbish, but away from buildings, using every precaution. Do not keep gasoline or gasoline engines in the barn, but in a separate building. See that ashes are kept in a fireproof receptacle. Do not go, or permit any employee to go, into barns or other buildings with an open light. Avoid mistaking gasoline for kerosene by having the gasoline can painted red. Keep a supply of water and pails always available for fire protection. Do not permit careless handling of matches nor throw away a lighted match till completely extinguished. Do not use or permit the use of kerosene in lighting fires. Have the chimney flue inspected and cleaned every fall. Guard against the danger of overheated stoves. Do not permit stove-pipes near unprotected wood nor suffer them to pass through woodwork without a proper ventilating thimble. Do not handle gasoline by artificial light.

POSITION OF GRANBY EXPLAINED

The directors of the Granby Consolidated Mining, Smelting and Power Company, Limited, through Mr. William H. Nichols, president, has addressed the following circular letter to the company's stockholders:—

"We suppose that no shareholder will be surprised to learn that the directors have unanimously decided to defer action on the question of a dividend.

"Under the unprecedented conditions prevailing at this time, when there is no market for refined copper, it seems plain that working for a large output which could not be sold would be very unwise, as it would only postpone the time when normal prices might be resumed. Accordingly, the works at Phoenix and Grand Forks were closed down on the seventh.

"The entire energies of our staff are now concentrated at Anyox, where recoveries and values are much higher than at the old mines and smelter. The problems involved in accomplishing the most efficient and profitable handling of our business in this new field can now receive the undivided attention of the management.

"If this interval of reduced activity, made necessary by the war in Europe, can be utilized to place the company in position to reap the greatest advantage from improved conditions when they arise, the company will accomplish the most that could be wisely attempted.

"The spirit of the management is admirable and every effort will be made to convert the temporary conditions, for which neither the property nor its management is in any wise responsible, into permanent benefit to the company."

◆

NORTHERN BRITISH COLUMBIA'S RESOURCES.

(Staff Correspondence.)

Vancouver, August 22nd.

The possibilities of the northern interior of British Columbia have been reported on by Mr. Charles F. Law, mining engineer of Vancouver, who, as Canadian representative of the company which proposes to construct an east and west railway in the north, has been in the field all summer on a reconnaisance survey. This is a company projected by Mr. D. A. Thomas, the Welsh coal magnate. The primary reason of the company's activity is the coal-bearing areas in the Groundhog district, north of the Skeena. The company's charter gives it two years in which to commence actual operations. It is proposed to construct the first section to the Groundhog coal country, and ultimately expend $75,000,000 on a line that will extend from the Pacific coast to Prince Albert, traversing the Peace River district, of which much has been heard in the past few years. An allied concern is the Peace River Tramway and Navigation Company, which will operate two short lines of tram, one 16 miles and the other six miles in length, which will give connection between northern inland waterways, and furnish through transportation facilities on 2,500 miles of navigable waters.

Mr. Law covered the country from the coast to Fort Smith West of Hudson's Hope is a tract of level land, lightly covered with timber in places, 600 miles long and varying from 40 to 100 miles in width. This, he says, contains the best agricultural land to be found in the north.

Five survey parties are in the field and will complete the initial surveys. These parties are working different sections between the Naas River and Prince Albert. In the Groundhog basin, the mining of coal will create a certain amount of activity and supply freight. In the interior, facilities are not in such demand though the short tram lines will supply needed accommodation.

Mr. Law took up three oil leases in the neighborhood of Vermilion chutes. He expressed the opinion that extensive potash deposits are to be found beneath the stratas of salt to be found along the banks of Salt River, near Fort Smith. Potash is practically a monopoly of Germany.

◆

Marshall Field's twelve things to remember are unusually opportune. Here they are:—The value of time; the success of perseverance; the pleasure of working; the dignity of simplicity; the worth of character; the power of kindness; the influence of example; the obligation of duty; the wisdom of economy; the virtue of patience; the improvement of talent; and the joy of originating.

ENGRAVING DOMINION NOTES.

In explaining the new legislation in regard to Dominion notes, Finance Minister White gave to the House information respecting the engraving of the signatures. He said the signatures may be engraved provided that there be added a distinguishing device and serial number while the notes are in the custody and control of the officers of the finance department. At the present time the signature of the deputy minister is engraved upon notes and a clerk in the finance department adds his individual signature.

"We propose now to modernize the system by having both signatures engraved," continued Mr. White, "with this safeguard, that after the notes are printed with the engraved signatures a distinguishing device and serial numbers shall be engraved on each note and that shall be done while the notes are in the custody and control of the officers of the department of finance. It is an additional safeguard to the note issue of the Dominion. I had this legislation prepared last year and intended to introduce it last session.

"If a note has not the distinguishing device, we shall know it has been issued without the authority of the department of finance. It is a check upon the issue of Dominion notes."

Mr. Carvell said the minister had stated that the notes would not be actually signed as in the past but that a device would be placed on them. Is that intended to be a secret device known only to the officers of the department, he asked. Mr. White replied:—It will be stamped on the bill and so that way it will be public.

"Why could not the forger stamp the device on as well as he could forge the signature?" asked Mr. Carvell.

Mr. White replied:—"The Dominion notes are engraved with very great care. The device will be engraved with equal care and the result it will be exceedingly difficult, if not impossible, to successfully counterfeit either the notes or the device. The legislation is modern. The Bank of England notes are printed and the signatures are engraved. In the revision of the Bank Act last year we introduced a similar provision with respect to bank notes, it being found impossible, on account of the great demand for bank notes, to have them signed by officers."

The actual results of THE DOMINION LIFE are unexcelled
A TYPICAL CASE.—The holder of Policy No. 21 was assured on the Ordinary Life, reduction of premium plan. His premium was reduced by 13% in each of the years 6-10, by 28% in each of the years 11-15, by 40% in each of the years 16-20, and a reduction of 50% in the years 21-22. In the 22nd year we found that there was sufficient surplus to the credit of the policy to cancel all premiums. The assured was notified and at his request a paid-up policy, but STILL PARTICIPATING, was delivered to him.

ATTITUDE OF ENGLISH BANKS

English banks which have failed absolutely to assist the trade of the country in the present crisis were rapped sharply in the house of commons by the English chancellor of the exchequer. "At all costs we must keep the machine of commerce and industry going," he declared, "and it is for this purpose that the government came to the help of the banks. Many bankers have behaved well, but some have not. It may be necessary to name the latter, but I hope before this has to be done that they will adopt a more liberal policy."

CANADA'S HELP IN THE FIGHT

Twenty thousand men for the front.
One hundred thousand, if needed.
Hospital fund of $100,000.
Flour (1,000,000 bags) from the Dominion.
Flour (250,000 bags) from Ontario.
Cheese (4,000,000 pounds) from Quebec.
Coal (100,000 tons) from Nova Scotia.
Apples (100,000 barrels) from British Columbia.
Oats (500,000 bushels) from Alberta.
Oats (100,000 bushels) from Prince Edward Island.
War relief funds at home.
Men, money and heart and soul for Empire.
And in the meantime Canada's motto is, "Business as usual."

◆

MOVEMENTS OF MORATORIA

Mr. Lloyd George said last week that he was considering whether or not he could arrange a limited moratorium without interfering with the interests of those who wished to abolish it. He said he had consulted bankers and traders in this connection. Out of 8,000 replies, 4,500 were in favor of ending the moratorium; the remainder wished its extension.

A cable from Paris says that the Danish parliament has voted three months' moratorium covering all debts except civil law debts and coupons until October 10th. No suit is possible for debts contracted after August 1st abroad or toward foreigners.

The Swiss moratorium has been extended to September 30.

◆

THE EUROPEAN CONFLICT AND OTHERS.

"This co-operation of the citizens of various countries in business enterprises in all parts of the world is the most potent of forces making for peace and progress. More rapidly than is commonly conceived, it is bringing into existence a single economic world-state with an order and a government which are hardly the less authoritative because, as yet, they possess a slender political support. That economic world-state consists of all that huge area of industrially developed countries in regular and steady intercourse, linked to one another by systems of railroads and steamship routes, by postal and telegraphic services, administered by common arrangements, by regular commerce, common markets and reliable modes of monetary payment, and by partnerships of capital and labor in common business transactions."

When Mr. J. A. Hobson, a British authority on economics, early this year wrote the foregoing paragraph, he did not suppose that a European war was about to demolish this state for a time. In the excellent volume in which the above occurs, Mr. Hobson deals in detail with the conflicts between capital and labor, producer and consumer, competition and combination, the individual and society, in an effort to discover lines of industrial reformation based upon a conception of organic harmony, supplying meanwhile much fuel for critics. His volume is an eminently valuable contribution for perusal by the peaceful student of affairs.

"Work and Wealth." J. A. Hobson. $2 net. Macmillan Company of Canada, Toronto.

Germany's Investments in Canada

INVESTIGATION *of The Monetary Times shows that comparatively little German money has been placed in the Dominion—Some interesting phases of the Fatherland's consideration of Investments here—Dresdner Bank's Canadian venture*

(Copyrighted by *The Monetary Times*, July, 1914.)

GERMANY has seldom lacked initiative either in commerce, industry or finance. In investment it has invariably acted cautiously, with the result, as it has happened, that German ventures in Canada have not been large. Canadian Pacific Railway shares have been traded in there considerably, many important Canadian Pacific Railway movements having originated in Berlin. The next interest of any significant importance in Canada was that of the Dresdner Bank with Messrs. J. P. Morgan & Company. This took the shape of a two million dollar investment in the now defunct Sovereign Bank of Canada, of which the German bank contributed one million dollars. The failure of the Canadian institution, in the opinion of German authorities, shattered faith, and will for many years prevent further large investments from Germany coming to this country. The Dresdner Bank's investment was to have remained in the country, that German institution having agreed to the plan of the formation of a new company to take over the assets of the Sovereign Bank.

Several smaller investments have been made in farming lands. A land company was incorporated some years ago at Winnipeg and obtained the money of small investors in Germany for the purpose of acquiring and selling farming lands in the West. Having bought areas, at what must be regarded as too high a price, the company recently was unable to sell its lands. This particular concern was launched when the immigration movement from Germany to Canada was active. A few years ago the exodus from that country totalled 280,000. In 1909 the figures had declined to 20,000. The chief reason is that Germany has changed from a farming to an industrial nation, the change being furthered largely by the indemnity received after the Franco-German War. The farmers migrated to the prosperous cities and became industrial workers, earning more money with less labor. Like Canada, Germany experiences difficulty at present in obtaining labor to garner its crops. Harvesters are usually obtained from Russia in order to relieve the situation, but that source is no longer available.

There is little likelihood of Germany becoming interested in the financing of Canadian railroads. The chief German interest in Canadian investments is in railroad stocks affording speculative opportunities. Canadian Pacific is listed on the Berlin Exchange and Grand Trunks are traded in through London. The Canadian Northern stock probably would have had a big market in Berlin had it not been for the war.

No German interest is exhibited in federal and provincial government and municipal bond issues. Inducements do not exist to counteract the influence of distance between the two countries. The small German investor prefers the bonds which are issued by his own country, or by neighboring nations. He also invests largely in bonds which are released by lottery at a premium.

Light and power propositions do not, generally speaking, appeal to German capital. The Imperial German Government makes every effort to interest money available in that country for the promotion of these industries in its own country or colonies. The Canadian iron industry might have attracted capital from the Kaiser's land, but much educational work would have had to be done, as Canada in the minds of many still forms part of the United States, and the possible competition of the United States Steel Corporation was not regarded favorably by Germany. Another unfavorable factor were the experiments being carried on in the Dominion with electric smelting. The chief effect of these experiments has been to introduce an element of uncertainty into the situation.

In mining ventures the Cobalt camp does not figure. The mineral obtained in Northern Ontario is similar to the ore which has been mined in Saxony for the past three centuries. The experts who visited Cobalt in its first days reported that it was a freak camp, and rather deprecated investment in its mines. That fact, together with the failure of one or two badly organized and unsound propositions floated on the London market, has checked the inflow of European capital into the development of Canada's silver mines. One German company, for instance, with an office in Toronto, claimed to have the secrets of ore treatment as in use by the Royal Saxonian Government, secrets which have been jealously guarded for many years. The consequent failure of this company created bad feeling in this country and Germany.

A large part of the asbestos mined in Canada goes either directly or indirectly to Germany, where the asbestos industry is important. One might imagine that this fact would prove an inducement to German investment in our asbestos mines. As a matter of fact, had it not been for the big amalgamation of asbestos properties in Quebec Province in 1909, I have the best authority for stating that German capital would have interested itself in the financing of several asbestos properties in that province. At present Germany prefers to buy the material, even at an enhanced price, rather than place its money in prospecting and development of the mines under current conditions. Now the trade is stopped.

Our timber limits would not have attracted attention in Germany unless in conjunction with a pulp and paper industry. The European has decided opinions upon our system of fire ranging, as it relates especially to timber limits. One favorable factor in German investment in Canada is that it seldom has made profits without considerable reinvestment. The German Development Company, for instance, representing important Berlin bankers, started in this country with a capital of $60,000 for the purpose of locating and developing mining properties in Canada. Within one year the investment was raised to a quarter of a million dollars, and later increased to $1,000,000. The most important of the company's ventures (coal lands in the West) were amalgamated with the interests of the Canadian Northern Railway Company, and the monetary interest was recently further enlarged. The Canadian Northern Western Railway will build into these coal fields representing an investment of $4,000,000, while the coal mines which they will tap have received $2,000,000 of foreign and chiefly German capital. A little Belgian, French and English money is interested in this scheme. German capital to the extent of $3,500,000 is invested in British Columbia coal lands, and in Alberta coal lands there is about $3,000,000 of German capital.

There was not enough known of Canada in Germany to interest the banks to any large extent. Where capital has been invested here it has generally financed the scheme of a man who has made a study of Canadian conditions and opportunities.

There have been attempts made continuously to attract German capital for the purpose of investing in real estate in the West. Every failure—and such were bound to result if agents only desirous of earning a commission quickly are purchasing—did not result in further and larger investments from Germany.

German financiers who have become interested in Canada think that land companies, for the purposes of acquiring good lands and advancing of money to settlers as an extra inducement, are good investment opportunities. German capital might have played an important role in the Canadian beet-sugar industry. Its cultivation in Germany is one of the biggest and best-paying industries there. A glance at the names connected with the promotion of beet-sugar companies in Canada reveals the fact that German experts are at present very largely associated.

Since the removal of the German surtax there was thought to be an opening for German-Canadian trading companies. If Canadian partners could have been found, this development might have been an early and important one.

There is another phase to be considered in connection with the investment of German capital in Canada and the interest of Germany in Canadian securities. Since the action in Berlin against the introduction of the Chicago, Milwaukee and St. Paul shares on the Berlin Boerse, a Copenhagen city loan was offered for subscription in the German market without the government making any objection to its admission on the Berlin and Hamburg Stock Exchanges. The authorities also consented to admit a loan of the city of Budapest, which, although competed for by a syndicate headed by a German bank, was taken up by the Credit Lyonnais and other large French institutions. This seems to show that the official action against foreign loans was directed against American securities in the first place, although the Government does not favor the introduction of other foreign securities at present. A dispatch from Berlin to *Financial America*, of New York, commenting on this situation, said:—

"This policy, alleged to be designed to protect the home money market, is of great importance to foreign countries, and especially to the United States. This is not so much because of the stoppage of an outlet for German capital, but by reason of the reaction of this 'politics of blockade' on other industrial countries. The newly created capital in Germany is very great and seeks investment. It is pouring into industrial undertakings, most investors being dissatisfied with the low interest rate on domestic loans. As German industry has hitherto depended upon exports, a further increase in her production will force the Empire in still greater degree than at present to live on outside nations. In past years domestic consumption here has not grown in proportion to the capacity of production, mainly in consequence of wages of labor having been only slightly increased—not at all in proportion with the rise in commodities prices—the people thus being prevented from buying in the measure that they otherwise would do. If, nevertheless, all branches of industry are fully occupied just now, with labor fully employed, it is precisely this expansion of industry that will increase German competition with foreign countries.

"German industry has greatly increased its markets abroad because of our excellent machinery, our exemplary organizations and the bounty-giving policy of the great syndicates. Germany is also helped by her large and efficient mercantile marine and the great number of German banks in foreign countries. There is no country in the world where the results of German industry have not been carefully introduced. Not even the half savages in the most solitary parts of Africa are considered too mean to trade with. The pressure of production in excess of home consumption will force German manufacturers to use the dumping method in a still greater degree than at present."

On the other hand, the directors of the Deutsche Bank of Berlin, in a recent annual report, urged the advisability, and even the necessity, of foreign investment as a part of Germany's economic system. Mr. Bernhard Dernburg, former Colonial Secretary, and himself a banker, took issue with the view of the German authorities in barring the shares of the Chicago, Milwaukee and St. Paul from the Stock Exchanges on the ground that the country was in danger of being flooded with "dangerous speculative securities." Mr. Dernburg declared that foreign loans should be extended in Germany rather than restricted, because Germany's ability to expand her export trade was directly involved. He attacked the theory that the introduction of foreign stocks and bonds injuriously affects the popularity of German consols and other Government issues. These, he said, have nothing particularly attractive in themselves and must be viewed from the interest-bearing standpoint purely, the same as other investments.

In discussing the question the Deutsche Bank says:—

"These foreign investments have become a necessity for Germany's economic system. Frequently, and especially in times when high rates of interest prevail, such securities prove serviceable in adjusting Germany's financial relations with foreign markets. Notwithstanding a few regrettable losses, which were sustained more than twenty years ago by reason of the non-fulfilment of obligations assumed by foreign Governments, the average result of German investments in foreign securities is exceedingly favorable, and, as can be shown, has enhanced the national wealth by many hundreds of millions of marks.

"Although our activity in issuing new securities is principally and preferably directed toward domestic issues, the Deutsche Bank, after careful investigation and deliberation in each instance, has participated in the introduction of a moderate amount of foreign securities, and may point to the fact that for a long period of years not a single security of foreign origin which it has introduced at German Stock Exchanges, has been in distress. But even from bonds which defaulted twenty years ago, Germany's wealth has greatly increased, as was the case with the securities of the Northern Pacific Railroad, the larger part of which has long since gone back to the issuing country with considerable advantage to the German holders, or may be profitably sold to America at any time."

(The investments of other countries in the Dominion are dealt with in "Capital Investments in Canada," published by *The Monetary Times*.)

WINDSOR WILL INSURE VOLUNTEERS

The city of Windsor, Ontario, has voted an appropriation of $7.500 for the purpose of insuring the life of every man who has volunteered for service from that city in the British army. The plan covers every man, whether a resident of Windsor, Detroit or elsewhere. Many of them have families in Detroit. The insurance was placed with the Metropolitan Life Insurance Company, and covers not only death, but total disability.

◆

WHAT CONFIDENCE AND ENERGY CAN DO

The present is not the time to preach to Canada about land speculation. That period of unhealthy excitement is over, and the Dominion is making headway again. She now needs self-confidence and the will to do hard work. The war will have the effect of withdrawing financial support hitherto received from Europe. Canada will have to do without a good deal of London money; but nobody who knows the country doubts that it is now on the threshold of a new era of prosperity. The lesson of the real-estate speculation has been taken to heart; there is no further need to talk about it. Crying over spilt milk will not help the cow, nor the farmer, nor the manufacturer. What is wanted is confidence and energy; and Canada has both in full measure.

"Business as usual during the war" is the motto which necessarily has certain limitations; it must be conjoined with the other motto "Never Again." We must carry on business "as usual," with these exceptions: German goods must be barred, and the business of the Empire must correspondingly expand. Never again may we permit the German commercial traveller to roam over the British Empire in the dual rôle of ambassador of German commerce and military spy, smuggling arms and ammunition. The expulsion of Germany from the trade of Great and Greater Britain will leave many vacant gaps, and we look to the Canadian and Australian merchants and manufacturers to unite with all the other British traders throughout the world in order to make this a war of conquest—not of territory, but of trade, commerce, industry, and prosperity. Confidence and energy must be the watchwords all along the serried ranks of business men throughout the Empire.—London Financier.

◆

Only small incomes should economize.

Figure on the good things to come after the war.

Good business is like glue—if you keep your fingers there, it sticks.

Canada's revenue in August was $14,196,104, or within $351,749 of the total for August, 1913. The revenue from customs amounted to $8,245,148, a decrease of $1,600,573. Under post-office and some other heads there were increases. For the five months of the fiscal year the revenue has amounted to $60,378,118, or $11,250,339 less than in the corresponding period of the previous year. Outstanding temporary loans are given at $8,273,333. The net debt of the Dominion stands at $332,061,935, an increase of $188,188 in this month.

THE MONETARY TIMES ANNUAL

The Monetary Times Annual will appear, after the close of the year as heretofore. For no other year during the past half century will business and financial men need so constantly a business and financial record, as for nineteen-fourteen. The preparation of the Annual has commenced and many advertisers already have signed contracts for space therein.

◆

WAR MAXIMS AND MORALS.

Here are some opportune hints from the London Financial Times:—

Do not be extravagant in spending, but, on the other hand, do not be unconscionably parsimonious. Satisfy your reasonble requirements and keep money circulating for the benefit of the country.

Shun speculation just now, but do not be afraid to buy really first-class securities. You will probably never have a better opportunity.

Keep calm! Do not let your mind become so pre-occupied by the war that you muddle the ordinary affairs of life. Above all avoid irritation.

We cannot all go to war. The business of the nation must be carried on. Those also serve their country who conduct that business steadfastly and give employment to others.

The enterprising manufacturer should now find his opportunity in trying to supply the place of goods imported from abroad; the exporter his in cultivating the wide field left open to him by the tying up of German shipments.

Advertisers will do well to keep their wares before the public. People's memories are short and ground once lost is expensive to recover.

Do not give up games and amusements! They not only distract the mind, but help a number of deserving people.

Trust the Fleet! If there is any department that knows its business from "A" to "Z" it is the Navy.

Do not walk about with more money or notes on you than you require. Pickpockets make a good living in times like these.

There is no man alive from 17 to 70 who cannot do something to serve his country, if it be only by [illegible] a cheerful countenance.

Do not attempt to interfere with the housekeeping! Your wife can do it for you much better than you can, even in times of pressure. On the other hand, do not attempt to explain the objects of the moratorium or the changes in the Bank rate to your female relatives. That way madness lies.

◆

The Royal Bank has opened a branch at London East, Ontario.

We have to eat and drink, so we may as well do the third thing and be merry.

Belgium has moved away its capital, so has France, but Canadian business should leave capital where it is and increase output.

"Business as Usual"

GRAND TRUNK RESUMES WORK

The Grand Trunk Railway Company, which several weeks ago discontinued work on the replacing of tracks west of London, Ontario, with 100-pound rails, has recommenced the work at Wanstead.

COBALT BACK TO NORMAL

The ore shipments from the Cobalt camp for the week ending September 4th were made by seven mines, including three cars from Coniagas. The output from the mines to the smelters is now about normal, as all last week shipments were of high grade and concentrates.

COMPANY INCREASES SIZE OF FACTORY

The United States consul, Mr. H. J. Harvey, reports that a $100,000 safe and register company of Fort Erie, Ontario, has so many orders ahead that it has been obliged to increase the size of its factory. A register is produced which is fireproof and is sold at a moderate price.

NEVER KNOW TILL WE TRY

For the first time in the history of the brick and tile-making industry of the Dominion red roofing tile are being successfully manufactured. The plant that is turning them out is located near Mimico, and the owner is the Ontario government.

BIG BUSINESS FOR CANADA'S LARDER

Canada's Trade Commissioner at Birmingham, England, Mr. J. E. Ray, reports that there will be a record demand for Canadian foodstuffs during the war. British importers, he says, are looking to Canada for cereals, flour, cheese, hams, bacon, canned meats and lumber, to replace European sources of supply cut off by the war.

STEEL COMPANY RENEW BUILDING OPERATIONS

The Fort William plant of the Steel Company of Canada, on which construction was started last year and not completed owing to the dull manufacturing season, has resumed operations and a large gang of men is at work on the completion of the building. The plant will be ready for operation between November 15th and December 1st.

THIS WILL HELP EMPLOYMENT

Canadian immigration decreased 58 per cent. during the five months of the fiscal year. The total as given in a statement issued from Ottawa was 105,631, made up of 32,312 British, 34,930 American and 38,389 from all other countries. During the corresponding months of 1913 the total number was 250,906, composed of 99,114 British, 54,040 American and 97,752 from all other countries.

FACTS ARE GOOD, TOO

The optimist is sometimes accused of talking cheerful sentiment while the facts contradict. The main body of facts in Canada to-day (a few are cited on this page) justify continued faith in the position, strength, natural resources and possibilities of the Dominion. Business can afford, therefore, to take a cheerful view and go on as usual, so far as war conditions will permit.

MONEY FROM LONDON FOR RAILROAD WORK

Sir William Mackenzie announces that he has received word from London that the firm of underwriters entrusted with the sale of the government guaranteed bonds of the Canadian Northern Railway has been able to forego its rights under the British moratorium and provide a considerable portion of the funds which it undertook to secure. Sir William stated that as the result of this the railway would be able to complete the Canadian Northern lines.

PROPER TREATMENT FOR MORTGAGES

"This is a time for consideration and mercy—and both must be freely given,"—Mr. J. K. Macdonald, president of the Confederation Life Association. "Self-interest will lead lending companies to deal leniently with good borrowers." —Mr. J. F. Weston, managing-director of the Imperial Life. "We have not foreclosed a solitary mortgage, and do not anticipate having to take any such action."—Mr. Edward Saunders, manager of the Canada Landed and National Investment Corporation.

RESUME MANUFACTURE OF STARCH

The Fort William Starch Works, at Fort William, which have been closed for the past few weeks on account of over-production, is to resume manufacturing operations within the course of two weeks. Superintendent E. G. DeCorolios, in an interview a few days ago, stated that large orders had recently been received from western points and had almost depleted the stock in hand, and he anticipated that when operations are resumed they will continue steadily throughout the fall and winter months.

MUCH BUILDING AT KAMLOOPS

Building permits issued in Kamloops for month of July amount to $11,979 more than in July, 1913. Out of the twelve cities in British Columbia only three of them show an increase over last year, Oak Bay and North Vancouver being the other two, the latter place showing $2,310 of an increase. Tenders were called for a fine drill-hall, but owing to the war, contract will not be let. The Canadian Northern Railway have arranged to go on with track-laying, which, along with Canadian Pacific Railway double-tracking, will help employment of labor materially.

FOOD PRICES ARE BEHAVING

The Department of Labor has issued a bulletin summarizing the general price situation in Canada after exactly one month of war. The rise of 2.2 points indicated, though great, is by no means unprecedented. Variations of two or three points within a few weeks have happened several times previously. For example, the readjustment of prices to a higher level, which took place at the close of 1911, sent the department's number up four points in a single month, and during the business boom of the fall of 1912 the number went up over two points for a couple of months in succession.

WEALTH OF STOCK IN SASKATOON DISTRICT

Within the past ten days, several representatives of large Canadian and United States packing concerns have visited the Saskatoon district with a view to investigating live stock conditions so as to come to some decision, it is thought, with regard to the desirability of establishing a plant there. Without exception, these people have gone away very agreeably surprised at the quantity of stock in the district, and at the manner in which the farmers generally are taking up the raising of stock. They are satisfied that the city of Saskatoon is now quite ready for the location of packing houses, abattoirs, etc., and there is little doubt but that important developments in these lines may be looked for next spring, and even earlier, probably. The other day, on one train, no fewer than 55 carloads of stock left the Saskatoon district for South Saint Paul, Winnipeg and the East.

BANKS WILL HELP FARMERS

Britain cannot support herself in food, and relies on her colonies to supply her. Canada has millions of acres of virgin land, capable of yielding the finest of crops. To cultivate this would require far more labor than is available. The secret, therefore, lies in the more economical and intensive cultivation of the land now in use. To get more out of the land than before, every effort must be made by the producers to produce more. The farmer at the present time is the man to be envied. His call for assistance will be responded to the most readily by all, and the banks are prepared to render every possible assistance to the ones who are producers, says the Sterling Bank's bulletin.

GERMANY HELPS CANADIAN INDUSTRIES

During the past two months, without exception, the weekly reports of orders received by the Canadian Converters' Company have shown substantial increases over the corresponding periods in 1913. Mr. James R. Gordon, the president, who made this statement, also said that although the business being received from the larger centres throughout the Dominion was not as voluminous as a year ago, country business was very good and an early improvement in the city business was expected. The discontinuance of shipments of all kinds of dry goods from Germany and Austria, Mr. Gordon stated, could not help but be reflected by better business for Canadian industries manufacturing similar materials.

TO BUILD TORONTO-HAMILTON ROAD

The Ontario government, the cities of Toronto and Hamilton, and other public bodies interested have practically decided to build a concrete road from Toronto to Hamilton. The estimated cost is $500,000. A circular, prepared largely through Messrs. Gooderham and Irish, of Toronto, submitted to the provincial minister of public works, gives four reasons for the immediate undertaking of this work. They are: First, it will give instant and practically continuous employment to thousands of men at the height of the present depression; second, it will create for the province a valuable asset at a price far below its cost in normal times; third, it makes no unbearable burden in taxation, the outlay being borne solely by the ultimate beneficiaries; fourth, it is relief work of the most practical kind. It is suggested that the road be paid for in a period of twenty years by the various parties interested in the issuance after interim financing has been completed of 5 per cent. sinking fund bonds, or similar securities, insuring the repayment to the government of the money advanced through its credit during the interim period.

FOR THE BUSINESS COWARDS

In a speech at Toronto, Hon. G. P. Graham, former minister of railways, said that he divided Canadians into three classes. There were the brave sons who had gone to the front to fight the battles of their country. There were those who ought to have gone, but he believed these were few in number. Mr. Graham did not agree with those who criticized the stay-at-homes. No one had a right to say that another man should go, for Canada's fighting sons were a free-will offering to the Empire. Lastly, there were those who had to remain at home, and among these were the business men. It was their duty to see that those who remained behind were looked after to the last farthing. There should be no business cowards in such a crisis, men who threw up their arms and declared that they were ruined. "When preaching economy, take care that you do not do so at the expense of others," said Mr. Graham. It was no time for cowardice, but men had to do something to preserve the industrial life of the country. Men had no right to pray for courage when they were seeking refuge beneath the bed. Some business man might be heard to whine that they were going to lose money if they kept their factories open. They forgot that other men were losing their lives in the same cause. The final result of the war, if all did their duty, would be the strengthening of the Empire.

◆

Try British army methods in business—hang on the cavalry's stirrups and get there.

BRITAIN'S SILVER BULLET A BIG FACTOR

"We want every penny we can raise, to help fight the enemy," said Mr. Lloyd George, English chancellor of the exchequer, replying in London this week to a deputation from the municipalities which wanted the aid of the treasury in securing loans at cheap rates.

"We must come out triumphant in this struggle," continued the chancellor, "and as finance is going to play a very important part in it, we must husband our resources. We don't want a penny spent which is not absolutely essential to relieve distress. In my judgment the last few hundred millions may win this war.

"The first hundred millions our enemies can stand as well as we can, but the last they cannot, thank God. And, therefore, I think cash is going to count much more than we imagine. At the present moment we are only at the beginning; we are fighting a very tough enemy, who is well prepared for the fight, and will probably fight to the very end before he will accept the only conditions upon which we can possibly make peace.

"If we are wise, that is where our resources will come in, not merely of men, but of cash. We have won with a silver bullet before. We financed Europe in the greatest war we ever fought, and that is what won. Of course, British tenacity and British courage always come in, and they always will. But let us remember that British cash tells, too."

◆

FIRE LOSSES DUE TO MENTAL ATTITUDE

The prime factor in fire waste is, undoubtedly, carelessness and indifference. And the deduction of Saskatchewan's fire commissioner, Mr. R. J. McLean, is that the two most effective methods of dealing with this mental attitude are (a) educational propaganda, (b) restrictive regulations. Both methods are being used in Saskatchewan. Education is given through publication of bulletins and dissemination of useful information. Restrictive regulations are being increasingly adopted.

The commissioner's returns show the number of fires reported (exclusive of prairie fires) as 624, of which 66 were due to exposure. The total loss amounted to $1,328,981. Reckoning on this basis the loss for the year 1913 may be placed at $1,772,000. The approximate correctness of these figures is established by the fact that the official report of the superintendent of insurance for the province, shows that insurance companies have actually paid in fire losses $1,271,083. Making allowance for uninsured losses and insurance claims settled on a 60 to 80 per cent. basis it is evident that the figures $1,328,981 for the nine months' period approximate to the actual amount of the fire waste and can be confidently regarded as near the mark.

The class of buildings most generally affected has, of course, been buildings of frame construction, as is to be expected, where wood buildings constitute at least [illegible] per cent. of the whole. As to purposes for which affected buildings were used the following is a summary of the principal ones:—Dwellings 216, barns 52, stores of all kinds 51, stables 30, livery barns 31, elevators 21.

The most common causes of fires reported are as follows: Overheated stovepipes 35, sparks 33, kerosene 26, defective chimneys and fireplaces 20, children with matches 17, gasoline explosions 12, match carelessness 12, cigar or cigarette 12, coal gas explosions 12. There were 191 fires or approximately 30 per cent. of original fires reported as being of unknown origin. Lightning was responsible for 61 fires involving a loss of $30,043. As mentioned above, exposed fires numbered 66 with a total loss of $99,668.

◆

Encourage every business to work on the firm belief of the invincibility of our navy and its success in keeping the seas free for our ships. Let us work with renewed vigor and attack our enemy in the markets of the world with our army of commerce.—H. E. Morgan, London, England.

"We may not see much recovery for a month; perhaps for two months," said Sir William Van Horne, in an interview at Montreal, "but we are going to benefit by the conditions prevailing elsewhere. We may have to wait a little; but the improvement will surely come. That was my belief when the war broke out. I see no reason to change."

PERSONAL NOTES

Mr. Brock Willett has been appointed Montreal representative of the new Casualty Company of Canada.

Mr. A. L. Sawle, mayor of Athabasca, Alta., has resigned as manager of the Imperial Bank of Canada there. to join the Northern Transportation Company.

Mr. C. S. Cameron, secretary and treasurer of the Dominion Steel Corporation has left for England and will investigate opportunities for trade in the English markets.

Mr. William Fitzgerald, who has held the office of superintendent of insurance since 1885 and retired on September 1st, is in his 70th year. He gave up the active work of his office last spring.

Mr. Edson L. Pease, vice-president of the Royal Bank of Canada, has accepted a directorship on the board of the North British and Mercantile Insurance Company, with head office at Montreal.

Mr. F. J. J. Stark, general manager of the Dominion Gresham Guarantee and Casualty Company, with head office at Montreal, was a recent visitor to Toronto. This company is making good progress under the management of Mr. Stark and the presidency of Mr. F. W. Evans.

Mr. B. B. Kelliher, chief engineer of the Grand Trunk Pacific Railway, has resigned on account of ill-health. For 50 years he has been engaged in railway construction. Mr. M. A. Woods, an assistant chief engineer, will assume charge of the engineering department of the railway with headquarters at Winnipeg.

Mr. Cutler J. DeLong went to the Glens Falls Insurance Company's office 36 years ago, equipped with some years' experience as a teller in a local bank. He was made cashier at once and later on became treasurer, which office he still holds. Mr. DeLong is a genial gentlemen, exact and correct in the figures he makes and the conclusions he arrives at, and well qualified for his responsible duties. The company is active in Canada.

Mr. William Wainwright, comptroller of the Grand Trunk Railway, who died recently, left real estate to the value of $29,000, stocks and bonds to the value of $291,000, and cash and other assets amounting to $175,000. Altogether the estate is estimated to represent $496,000. Mr. Wainwright was a large stockholder in the Richelieu and Ontario Navigation Company, the Montreal Light, Power and Heat Company, the United States Steel Corporation and the Canadian Consolidated Rubber Company. The estate is distributed among the members of the family.

Mr. A. Homer Vipond, manager of the Montreal branch of the New York Life, is a man "whose name and fame," says the company's bulletin, "are so familiar to our readers that it is difficult to say anything new about him. While working in the post office of a country store, he saw a card from a New York Life man asking the postmaster to recommend a good boy. He replied. Result: The New York Life got the kind of an agent we would like to have thousands of. He comes to the company's club this year with $373,089 of new business.' Mr. Vipond is a life underwriter well known throughout Canada. He is an ex-president of the Life Underwriters' Association of Canada and one of its most prominent workers. He is a big man in every sense.

Sir George Paish, who has been appointed to assist the British treasury in dealing with economic and financial questions arising out of the war, knows Canada well and has great faith in its energy and resources. Of his appointment, the London Financial Times says:—"It is a development upon which we heartily congratulate the late joint editor of the Statist. This post Sir George has relinquished, for the time being at any rate, and it must be left for events to show whether he will remain an important government official or return to his old duties when peace has been restored. In selecting one of the editors of the Statist for the important post of economic adviser the treasury has conferred a signal honor upon the entire corps of financial journalists, and has recognized the ability and integrity with which this branch of a great profession is conducted."

Mr. Alfred C. Flumerfelt, of Victoria, B.C., was elected to the directorate of the Great-West Life Assurance Company in February, 190[illegible]. Thus the company's important interests at the Pacific Coast were recognized by the appointment of a resident director. For many years previously, Mr. Flumerfelt had been intimately acquainted with the company the directors and many of the agents, being one of the early shareholders and greatly interested in the company's development. The company's bulletin gives an interesting sketch of this prominent British Columbian. He was born in Markham, Ontario, and after some preliminary business training in the east, joined the stream of enterprising people setting out for the then undeveloped western provinces. He came to Winnipeg in 1879, embarked in the wholesale boot and shoe business, sold out to Ames, Holden and Company, of Montreal and in 1886 removed to Victoria, B.C., as manager of the Ames, Holden branch in that city. There, as the province grew, his interests multiplied until at the present time few are more closely associated with British Columbia financial affairs than A. C. Flumerfelt. Upon his life was issued the largest life insurance policy ever placed in Canada, issued by the Great-West Life. For 14 years he has been a member of council of the Victoria board of trade, holding office as president. He is president of the British American Trust Company, Limited, director of numerous mining enterprises, director of Redmond and Company, Limited, Montreal, president of the Hutchinson Company, Limited, of Victoria and of the Patterson Shoe Company, Limited. In 1910 Mr. Flumerfelt was accorded the distinction of appointment to the Royal Commission on Forestry Resources in British Columbia.

PACIFIC COAST BOND ISSUE

An issue of $150,000 7 per cent. first mortgage gold bonds of the W. N. O'Neil Company, Limited, Vancouver, guaranteed by W. N. O'Neil Company, Limited, Victoria, is being offered to investors by the Royal Financial Corporation, Vancouver.

The W. N. O'Neil Company handle builders supplies, and a subsidiary concern is the Western Warehousing Company. The former company covers British Columbia, Yukon and Alberta. The report of the auditors shows that sales grew from $375,079 in 1913 to $699,305 in 1912, and in the stringency year the sales for the thirteen months ended January, 1914, were $553,129. The net profits were 1910, $50,273; 1911, $45,179; 1912, $49,808, and for 13 months ended January 31st, 1914, $23,200. Assets are shown as totalling $417,972, which when current liabilities after applying proceeds of this issue of bonds have been deducted, shows net total of $372,519.

Mr. A. Vogel, an American agent for German potash syndicate, has issued a denial through the New York chamber of German-American commerce that German potash syndicate is so seriously affected by war that its offices in the United States and Canada will be discontinued.

Voluntary war contributions announced this week include 100 cases of yeast from the Gillett Yeast Company of Toronto, for the use of the naval department; $10,000 from the Rosamond Woolen Company of Almonte, and $10,000 from the Acadia Sugar Refinery Company of Halifax, to the Canadian Patriotic Fund.

The London Standard says:—"Indemnities exceeding a total of £28,000,000 ($140,000,000) already have been demanded by the Germans from the towns and districts they have occupied. The demands are as follows:—Brussels, £8,000,000; Liege, £2,000,000; Louvain, £4,000,000; province of Brabant, £18,000,000; Lille, £28,000; Amiens, £40,000; Roubaix and Tourcoing, £40,000. A number of less important towns also were fined various small sums."

Lloyd George announced last week that arrangements had been made to remove difficulties in foreign exchange obligations, joint stock banks with co-operation of Bank of England agreeing to provide acceptors with funds necessary to pay at maturity all bills contracted before moratorium was declared. Interest charge will be 2 per cent. above ruling bank rate and acceptors are to be under obligation to collect debts from clients as soon as possible and pay off advances by the bank. Bank undertakes not to claim repayment for one year after the close of war of any amount not recovered by acceptors from clients.

HOW FIRE INSURANCE IS SHARED

United States and Other Corporations Show Largest Total Increase—Premium Rate Lower

The gross amount of fire insurance policies new and renewed taken during the year by fire companies in Canada was $2,925,200,553, which is greater by $551,038,821 than the amount taken in 1912. The business of the Nova Scotia, the Ontario and the Sovereign companies returns are not included in last year's returns.

The premiums charged on the 1913 business amounted to $35,347,139, being $4,707,272 greater than the amount charged the previous year. The rates of premiums (1.208) is lower than that of 1912 (1.291). The loss rate (54.39) is 2.14 per cent. higher than the loss rate the previous year (52.25), and 7.30 per cent. less than the average loss rate 61.69 for the past 45 years.

The rate per cent. of premiums charged upon risks taken is shown in the following table:—

Companies.	Gross amount of risks taken during the year.	Premiums charged thereon.	Rate of premiums charged per cent. of risks taken.
Canadian	$ 712,651,986	$ 9,481,729.08	1.33
British	1,318,925,094	15,962,229.26	1.21
United States and other	893,623,473	9,903,180.36	1.11
Totals	$2,925,200,553	$35,347,138.70	1.21

Canadian Companies were Active.

The increase in the amounts taken in 1913 as compared with 1912 among Canadian companies is $59,069,560. Among British companies there is an increase of $170,528,776, and among United States and other companies there is an increase of $321,440,485.

In 1912 the increases in amounts written among Canadian, British and United States and other companies reporting to the Dominion insurance department were $81,516,414, $150,294,771, and $154,709,050 respectively.

The details of the increase and decrease for the individual companies are as follows:—

Canadian companies. Increase.—Acadia, $3,687,946; Anglo-American, $7,033,322; British America, $11,536,559; British Colonial, $5,445,090; British Northwestern, $3,016,630; Canada National, $4,729,193; Canadian, $1,601,700; Dominion, $5,575,425; Equity, $4,090,062; Hudson Bay, $2,016,883; Imperial Underwriters, $4,713,255; London Mutual, $5,224,507; Liverpool-Manitoba, $1,709,351; Mercantile, $3,543,219; Montreal-Canada, $1,238,618; Mount Royal, $8,563,386; North Empire, $2,328,471; Northwest, $[illegible],189,415; Occidental, $207,005; Pacific Coast, $2,422,801; Quebec, $5,205,568; Western, $57,048,817; total, $141,497,815.

Decrease.—Central Canada Manitoba Mutual, $403,121; Factories, $16,865,159; Nova Scotia, $24,753,906; Ontario, $19,021,037; Ottawa, $1,800,317; Rimouski Fire, $3,058,303; Sovereign, $15,626,412; total, $82,428,255. Total increase, $59,069,560.

One Company Showed Decrease.

British companies. Increase.—Alliance, $2,781,[illegible]79; Atlas, $4,055,873; Caledonian, $2,[illegible]04,867; Commercial Union, $34,847,30[illegible]; Employers' Liability, $7,828,399; General Accident, $2,104,075; Guardian, $7,730,337; Law Union and Rock, $2,843,017; Liverpool and London and Globe, $9,616,208; London and Lancashire Fire, $8,252,765; London Assurance, $4,601,055; North British and Mercantile, $2,089,604; Northern, $10,676,835; Norwich Union, $4,715,432; Palatine, $13,214,906; Phœnix, $10,041,944; Provincial, $546,405; Royal, $13,737,634; Royal Exchange, $9,645,[illegible]04; Scottish Union and National, $3,202,514; Sun, $1,494,545; Union Assurance, $7,378,184; Yorkshire, $6,129,894; total, $170,528,776.

United States and other companies.—Increase.—Ætna, $3,57[illegible],465; American Central, $27,974,811; American, $4,435,004; American Lloyds, $417,397; California Fire, $964,229; Connecticut, $402,718; Equitable, $3,566,835; Fidelity-Phœnix, $2,509,087; Fireman's Fund, $6,055,481; Firemen's, $3,842,185; Générales, $7,630,579; German American, $26,787,840; Germania, $1,475,100; Glens Falls, $307,430; Hartford, $38,372,033; Home, $54,926,606; Insurance Company of North America, $5,018,296; Insurance Company State of Pennsylvania, $2,336,532; Hanover, $[illegible]99; National, $30,517,243; National Union, $5,355,554; Niagara, $7,904,980; Northwestern National, $15,486,903; Phœnix of Hartford, $15,773,491; Providence-Washington, $3,197,890; Queen, $3,957,194; Springfield Fire and Marine, $31,625,879; St. Paul, $5,193,181; L'Union of Paris, $4,809,801; Westchester, $7,192,968; total, $324,805,740.

Decrease.—Continentl, $3,365,255. Total increase, $321,440,485.

◆

BRITISH ARE PAYING LOAN CALLS

Holders of allotment letters and scrip of the province of Quebec £1,000,000 4½ per cent. registered stock, 1954, (June, 1914, issue), were duly informed that the instalment of 35 per cent. due September 3rd, 1914, should be paid on the due date, otherwise interest would be charged at the rate of 6 per cent. per annum, pursuant to the terms of moratorium proclamation dated August 6th, 1914.

Despite the English moratorium payments in connection with South Vancouver have practically been completed.

◆

STOCK PRICES IN LONDON

Many inquiries are reported in London from the public for cheap investments, but while, here and there, one hears of business being done, in most cases it seems to be difficult so to adjust prices to make them acceptable to both the potential buyer and the would-be seller. The following prices must be regarded as nominal, but they may be taken as a basis on which business is being arranged in London:—

		Price on 30 July.
Consols	70	69
Local loans	80	81
London county council 3 per cent.	79	77½
Metropolitan Consolidated 3 per cent.	86	87
Bank of England	245	247½
Port of London 3½ per cent.	86	87
Canada 4 per cent.	95½	97
New South Wales 4 per cent. (1942-62)	95	97
New Zealand 4 per cent. (1929)	97	100
Ontario 4½ per cent.	96½	96
Queensland 4 per cent. (1940-50)	96	97
Quebec 4½ per cent.	98	99
South Africa 10 year bonds	94	92½
West Australia 4 per cent. (1942-62)	95½	97
Canadian Pacific	158½	165
Grand Trunk Ordinary	11¾	11¼
Atchison	86	90
Missouri	8½	10
Southern Pacific	82	86
Union Pacific	116	117
United States Steels	51½	54½
Mexican Railway Ord.	32½	30½
Do. 1st Pref.	104	101½
Do. 2nd Pref.	66½	62
Brazilian Traction	55	58
Lobitos Oil	22	1 5/16
Mexican Eagle Ord	[illegible]	1 11/16
Do. Pref.	[illegible]	[illegible]
Rubber Trusts	4	[illegible]
"Shell" Transports	[illegible]	[illegible]
Spies	14	[illegible]

◆

The Dominion Bank has closed its Riverside branch at Calgary.

Buy Canadian and Empire stuff, assist peace loving countries and put a kink in military madness.

Over anxiety does no good and depresses business. Have faith in the British institutions which have confidence in you.

The only difference just now in the labels of British and German trade is "Business as usual" and "Store closed."

When the European automobile casualty list is known, manufacturers will be glad they had faith in their business.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Imperial, Sask.—September 4—Mr. W. Leverton's barn. Loss and cause unknown.

Vancouver, B.C.—August 28—Sunset sash and door factory, Broadway. Loss, $8,000. Cause unknown.

Montreal, Que.—August 31—Mount Royal Spinning Mills at Cote St. Paul. Loss, $2,000. Cause unknown.

Deep Brook, N.S.—September 2—Colonial Arms. Loss, $50,000. Insurance, building, $29,000; contents, $9,000. Cause unknown.

Dragon Station, Que.—September 5—Curtis and Harvey's Limited plant. Loss, $2,500. Cause, supposed fire caused explosion.

Brockville, Ont.—August 31—Messrs. A. E. McLean and Company's marble works, Athens. Loss unknown. Cause, supposed incendiary.

Chilliwack, B.C.—August 30—Fashion livery, blacksmith shop and cabinet shop. Loss, $20,000. Insurance, about 50 per cent. Cause unknown.

Toronto, Ont.—The report of Fire Chief Thompson shows the following losses:—

August 26—Two frame stables of A. Zuccero and A. Battaglia, rear 70 Amelia Street, owned by J. Moyses. Cause, incendiary. Loss, contents, $125 and $186; building of Pitner Gasoline Light Company, owned by S. Willard. Cause unknown. Loss, contents, $1,000; building, $300.

August 27—Automobile, No. 3628, owned by Geo. S. Abrey, 606 Indian Road. Cause, backfiring engine. Loss, $50.

August 30—Frame paint shop, of Canadian National Exhibition, owned by city of Toronto. Cause, spontaneous. Loss, $250; frame stable of H. Coates, 1304 Queen Street East. Cause unknown. Loss, contents, $200; building, $150.

August 31—Dwelling of Mr. Rotterman, 173 Baldwin Street, owned by Aaron Rondo. Cause, lighted match dropped in clothes closet. Loss, contents, $300; building, $50; gasoline launch of Ross Clarke. Cause unknown. Loss, $300.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

St. Catharines, Ont.—Fire Chief Early's August record of fires shows the following losses:—

August 11—Dwelling of Mr. Clay, Queenston Street. Value of building, $600; value of contents, $300; insurance on building, $300; insurance on contents, $200; loss on contents, $10. Cause of fire, children set fire to curtain.

August 25 Mrs. Ferranto's fruit store, King Street. Value of building, $3,000; value of contents, $800; insurance on building, $2,000; insurance on contents, $500; loss on building, $10. Cause of fire unknown.

The following fires were adjusted by J. S. Rankin, Vancouver, B.C.:—

Nakusp, B.C.—July 30—Logs and piling. Loss, $685 Cause, bush fire. Insurance, Phœnix of London, building, $1,280.

South Wellington, B.C.—August 11—Carpenter and Muyleart, hotel. Loss, contents, $3,000. Cause, bush fire. Insurance, Western Assurance Company, contents, $3,000.

Vancouver, B.C.—August 17—Hugh Walter Frith's dwelling. Loss, building, $650; contents, $575. Cause, overheated stove. Insurance, Liverpool and London and Globe, building, $600; contents, $500.

Hammond, B.C.—July 31 Franco-Canadian Trust Company, owner; D. Hallrin occupant, dwelling. Loss, building, $3,120; contents, $2,000. Cause, overheated stove. Insurance, Rochester German, building, $2,000; Pacific Coast, contents, $1,500.

Ardley, B.C.—August 5—Ardley Lumber and Shingle Company's shingle mill plant. Loss, buildings, $1,600; machinery, $3,[illegible]00. Cause, sparks from bush fire. Insurance, Occidental Fire Insurance Company, building, $700; St. Paul Fire and Marine, building, $600; contents, $650; British Crown, building, $600; contents, $650; Guardian, building, $187.50; contents, $625; Quebec, building, $187.50; contents, $625.

South Vancouver, B.C.—July 23—G. L. Boyd's dwelling. Loss, building, $2,255; contents, $1,140. Cause, lighted match. Insurance, North Empire Fire Insurance Company, building, $2,000; contents, $1,000.

August 24—British Columbia Brass Works' machine shop. Loss, building, $75; contents, $240. Cause, gas heater. Insurance, North Empire Fire Insurance Company, contents, $1,000.

North Vancouver, B.C.—August 5—Louisa Shackford's dwelling. Loss on building, $620; contents, $575. Cause, defective chimney. Insurance, London and Lancashire, building, $500; contents, $500.

August 29—Mathilda Parguette's two dwellings. Loss, buildings, $1,500; contents, $500. Cause, lamp explosion. Insurance, Insurance Company of North America, building, $900; contents, $100.

The following fires were adjusted by Paterson and Waugh, Edmonton, Alta.:—

Edmonton, Alta.—August 20—Joseph Korenda, owner; A. Johnson, occupant. Loss, barn, $164. Cause unknown, supposed to be carelessness of children or vagrants in hay loft. Insurance, Queen, building, $250.

August 24—Norval Chandler's private dwelling. Loss, building, $64; contents, $116. Cause unknown, supposed to have been explosion of kerosene oil lamp. Insurance, North Empire, building, $300; contents, $300.

NATIONAL BRICK COMPANY

The directors of the National Brick Company have passed the dividend on the common stock. It was payable quarterly at the rate of 5 per cent., and was due September 15th. A circular to the shareholders says: "Owing to the present unsettled conditions it has been decided to defer the payment of the dividend on the common stock, thereby conserving the interests of the shareholders. When the payment for the preceding quarter was declared in May the prospects were bright, and there was promise that the brick business would have an active and profitable season. The outlook has been entirely changed by the war, one of the first results of the financial disturbance being a cessation in building operations."

◆

Look at business with sanity and cheerfulness.

Put a few sunken contact mines under German trade.

This is a time when the bank and the factory can afford to strain a little.

Don't make the war an excuse. Make it an inspiration to do better business.

Kitchener would rather have you plan your own business campaign than try to figure his.

The value of German commercial ships captured thus far is estimated at £47,000,000, with cargoes.

Germany will have to foot the bills for considerable British material to repair damage in Belgium.

Which is better, to shiver for weeks on the business brink till you die of cold or to take a swimming chance?

Five columns of bright advertising of first-class Canadian goods is better for everybody than twenty yards of second-class war poetry.

A meeting of the shareholders of the Lake Erie and Northern Railway has been called for October 5 in Montreal to pass upon a proposal to cancel a mortgage of $500,000 securing second mortgage bonds and to issue more bonds for further construction to be secured by a new mortgage.

The Canadian banks state that under present international exchange conditions, they do not want to get burdened with United States paper money, other than that with a gold guarantee, such as gold certificates and greenbacks. Silver certificates and national bank notes, which have not the gold behind them, are being discriminated against to the extent of 2 per cent.

NEW INCORPORATIONS

Forty-five Charters Were Granted—Military Equipment Company Formed

Canada's new companies incorporated this week number 25. The head offices of these companies are located in seven provinces. The total capitalization amounts to $3,612,000, the largest company being:—

Middle West Petroleum Company, Limited, Vancouver $1,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	6	$1,390,000
Saskatchewan	8	757,000
Manitoba	8	450,000
Ontario	2	150,000
Quebec	18	710,000
New Brunswick	1	30,000
Prince Edward Island	2	125,000
	45	$3,612,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Regina, Sask.—Waddell Brothers, Limited, $30,000.

Arcola, Sask.—The Arcola Brick Company, Limited, $30,000.

Victoria, B.C.—Victoria Furniture Company, Limited, $10,000.

Meyronne, Sask.—Meyronne Hotel Company, Limited, $30,000.

Raymore, Sask.—Raymore Village Telephone Company, Limited, $2,000.

Swift Current, Sask.—Scientific Tire Filler Company, Limited, $5,000.

Watrous, Sask.—Little Manitou Lake Petroleum Products, Specialty, Limited, $500,000.

Saskatoon, Sask.—A. Dulmage, Limited, $60,000. Blackstock and Forrester, Limited, $100,000.

Hull, Que.—Monette-Valin Limited, $99,000. A. W. Monette, J. A. Valin, P. H. Durocher.

Waterloo, Ont.—Waterloo Iron Works, Limited, $99,000. A. Choiniere, J. A. Corcoran, E. Bessette.

Lachine, Que.—Laing Boat Company, $20,000. C. Champoux, L. deKalise Stephens, S. L. B. Harris.

Quebec, Que.—La Cie Jos Lefrancois, Limited, $49,000. J. Lefrancois, J. E. Vallee, J. M. Dessureault.

Maisonneuve, Que.—Exchange Hotel, Limited, $15,000. D. R. D. Menard, A. Menard, H. Dauphinais.

Portage la Prairie, Man.—Padrone Cigar Company, Limited, $25,000. L. E. Nauer, J. E. Jaffray, H. J. Hassard.

Kildonan, Man.—The Kildonan Hygienic Dairy Company, Limited, $100,000. M. Sucharoy, S. Zipurski, A. Cohon.

Quebec, Que.—Dominion Iron and Wrecking Company, Limited, $20,000. W. H. Millican, F. O. Drouin, P. Drouin.

Saint George, N.B.—The Saint George Fox Company, Limited, $30,000. Hon. D. Gillmor, H. I. Taylor, W. L. Harding.

Toronto, Ont.—International Military Equipment Company, Limited, $100,000. A. McL. Moffatt, J. Doust, S. B. Dawson. Thompson's Restaurants, Limited, $50,000. W. W. Thompson, C. M. Preston, J. H. Pritchard.

Prince Edward Island.—Strathern-Connaught Silver Black Fox Company, Limited, $75,000. A. MacNeill, J. S. Allen, A. C. Saunders. Kinsmansilver Black and Patch Fox Company, Limited, $50,000. W. H. Kinsman, W. B. Purdy, J. E. Newsome.

Vancouver, B.C.—Middle West Petroleum Company, Limited, $1,000,000. Pacific Standard Oil Company, Limited, $100,000. Lynn Valley Copper Company, Limited, $250,000 A. B. Cushing Lumber Company, (Vancouver), Limited, $20,000. Auto Mud Track Company, Limited, $10,000.

Winnipeg, Man.—Marr's Star Home Bakery, Limited, $20,000. R. W. Marr, R. J. Marr, M. Marr. McGowan Lynn Company, Limited, $20,000. R. M. McGowan, G. W. Baldwin, N. M. Lynn. The Pacific Wall Bed Company, Limited, $60,000. G. E. Betts, F. G. Rumble, J. W. Gibson. Strathcona Hockey Club, Limited, $5,000. F. P. H. Marples, G. T. Howden, R. A. C. Manning. Tuxedo Holding Company, Limited, $200,000 C. C. Heubach, T. D. Whiting, E. Smith. Webb-Klar Display Company, Limited, $20,000. J. A. Banfield, H. Webb, B. Klar.

Montreal, Que. Cafe Canadien, Limited, $20,000. A. Leroux, G. Connelly, H. Farmer. Petit and Petit, Limited, $49,000. L. Petit, T. Metayer, E. Gaulin. Freer Colony and Company, Limited, $10,000. H. J. Trihey, P. Bercovitch, E. Lafontaine. Empire Cafe, Limited, $20,000. D. J. Ouimet, H. Valiquette, A. Ouimet. West Side Athletic Club, Limited, $20,000. W. F. Burke, J. Walsh, J. E. Murray. Mont Tremblant Hotel Company, Limited, $20,000. W. G. Mitchell, H. L. Mitchell, D. McA. Coughlin. The Drummond Publishing Company, Limited, $20,000. E. T. Sayers, J. A. Beaudry, L. Charlebois. Bastien Silver Fox Breeders, Limited, $49,000. T. Rinfret, A. R. W. Plimsoll, R. Brodeur. Mountain City Realty Company, Limited, $50,000. A. R. Hall, G. C. Papineau-Couture, P. A. Badeaux. Higgins & Lee Motor Supplies, Limited, $50,000. R. S. Higgins, J. L. R. Gibson, J. T. Lowry. McKenna, Limited, $50,000. J. McKenna, F. J. McKenna, L. J. McKenna. Standard Properties, Limited, $50,000. R. Chenevert, F. Callaghan, P. Gregory.

Application is being made for letters patent for the following companies:—

Port Elgin, N.B.—Botsford Farmers, Limited, $49,000. A. E. Wry, M. G. Siddall J. G. Lamb.

Dundas, P.E.I.—The Dundas Silver Black Fox Company, Limited, $90,000. D. E. Morris, A. T. Gay, M. McKay.

◆

UNDERSTANDING THE WAR

The average man is well posted respecting the political, military and naval aspects of the war. *The Monetary Times* tells the best business and financial story of the war from week to week. The following articles appear in the current issue on the pages noted:—

	Page.
German Investments in Canada	5
Business as Usual	8
Britain's Silver Bullet	9
See to Employment	15
Against a Moratorium	15
Canada Controls World's Nickel	19
Opportunity for Millers	21
Markets for Gold and Silver	22
Germany's Colonial Investments	22
About Moratorium Laws	25
Hoarding Money is Foolish	26
Gifts to the War Fund	26
Openings for Trade	29
Foundations for Confidence	30
Trading With the Enemy	34
Opportunity for More Business	34
London Looks as Usual	34
Canada is a Large Producer	37
Alberta Farmers Selling Dollar Wheat	38
Manufacturers Advised on Duties	41
English speaking Nations are Traders	45
Back to the Land	45

Three years before the Franco-German war of 1870 the first issue of *The Monetary Times* was published. Since then, this journal has featured enterprise, reliability and optimism in the proper place.

◆

More production in Canada will solve problems in many lands.

There are a whole lot of things to nail to the mast besides flags.

Kitchener and Jellicoe cannot look after your business while you are minding theirs.

The trouble is that the Kaiser used the wrong advertising mediums at the wrong time.

"Thrice is he armed that hath his quarrel just," and in business four times he who gets his blow in first.

WILL PACIFIC COAST GROW WOOL?

Trade Within the British Empire — An Australian's Idea

(Staff Correspondence.)

Vancouver, September 5th.

With confidence in Canada's Pacific coast, the government and municipalities and the big corporations are going on with works. Manufacturers are preparing for business, and probably home production will be greater than ever before. The construction of the Pacific Great Eastern is proceeding and there will be no interruption of construction on the part of the Canadian Pacific Railway, on its terminal work at Vancouver and the building of the Kettle Valley line. Sir Donald Mann, said in Vancouver, that the dredges would be working at the head of False Creek, where his company has terminal location. At Victoria, public works are going ahead, and at Prince Rupert, construction has started of the $3,000,000 drydock by the Grand Trunk Dock and Shipbuilding Company.

After Australia's Lumber Market.

Mr. O. C. Beale, an Australian industrial authority who is a visitor to Vancouver, discusses in a practical manner the building up of the lumber trade between British Columbia and the Antipodes and also the development of woolen manufacture here.

It has been mentioned that the lumber imported into Australia was mostly supplied by Norway and Sweden, with United States ahead of Canada. One of the reasons why British Columbia mills supply so little is because the lumber manufacturers do not seem to have conformed to the requirement of the trade in as great a degree as have the Americans, suggests Mr. Beale. He says that lumber has often been sent from British Columbia in cumbersome cargoes and in unsuitable sizes, whereas it should be prepared for the Australian market before it is shipped.

This criticism, in a general way, might be considered by other kind of manufacturers. When the Germans started out to enlarge their commercial fields, the first thing they did was to send men specially versed in the various lines of manufacture to different countries. There they spent some time to become thoroughly acquainted with what was required by the people in each particular market. This procedure has been favorably commented on by a trade commissioner from South America. There should be no reason why a large part of the lumber used in Australia should not be obtained from British Columbia. Prominent Australian business men would like to see it, because it would mean more reciprocal trade. Efforts are being made to foster business relations between these two parts of the empire and the prospect of an increase in trade is favorable. Russian mills at Vladivostok are also looking for lumber business in Australia.

Products Shown in Practical Manner.

Mr. Beale is of the impression that woolen manufacture might be encouraged here. The raw product could be secured in Australia, and made into goods for the Canadian market, where the demand was strong. He advised starting in a small way, with a competent woolen specialist, preferably a Scotchman, in charge. The suggestion is worth considering, particularly in view of the suggestion, made from time to time, that this province is favorably adapted for the raising of sheep. The nature of the country here is not widely adapted for farming, but hilly areas as well as other tracts would supply excellent pasturage for sheep. The climate is favorable, since winters are not severe, and there is a market right at hand.

An exhaustive display of large photographs, depicting the lumber industry from start to finish, including the manufacture of shingles was shown at the Vancouver exhibition. This exhibit was supplemented by a practical utilization of British Columbia woods, made into wainscotting, panelling, mouldings, doors, windows, mantels and furniture. An office was built of fir, and a room was made with hemlock.

◆

And now it is the conservation of business.

When you feel "business blues," swap places with the German business man.

RAILROAD EARNINGS

The following are the railroad earnings for the last two weeks of August:—

Canadian Pacific Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$2,154,000	$2,506,000	— $352,000
Aug. 31	2,980,000	3,345,000	— 365,000

Grand Trunk Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$1,096,476	$1,048,536	— $ 47,940
Aug. 31	1,581,731	1,700,012	— 118,281

Canadian Northern Railway.

	1914.	1913.	Increase or decrease.
Aug. 21	$ 307,600	$ 396,200	— $ 88,600
Aug. 31	386,200	573,000	— 186,800

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and The Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully *both* your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

SEE TO EMPLOYMENT

Plans are well in hand respecting Canada's assistance in the European war. The financial position has been described by a leading banker as impregnable. Many industries are active as a result of orders for war equipment and material. Others are busy, indirectly, as a result of the struggle. Sentiment is improving as it should improve on the facts, and favorable sentiment is a strong help to business. The next important question is employment. Already some practical steps are being taken. The provincial highways commission of Saskatchewan will employ in road building 2,500 men in the areas of the province affected by drought. The Toronto Harbor Commission proposes to proceed with its work and many other employers of labor are arranging to keep hands busy.

The bureau of municipal research at Toronto asks a pertinent question: "Should any willing worker be without employment in a country as rich in resources as Canada, no matter how many may come in from other lands?

"Yet unemployment exists—even when there is work enough for all workers, if properly distributed. General restriction of immigration, deportation, or charitable work will never solve the problem. Some form of central control is what we need."

For some time past *The Monetary Times* has advocated greater production in Canada. The Montreal Gazette, endorsing that attitude, says:

Efforts in Canada must be directed more and more at a time like the present to securing a greater measure of production and to building up a balance of trade which will go towards offsetting the large obligations of the country abroad. In all measures that will promote a free marketing of foodstuffs and manufactures, the banks are prepared to lend all assistance and to draw when needed on the emergency provisions created for the present situation.

There are two main dangers arising out of the European situation which have to be considered here. One is the danger that there will be difficulty later on in meeting interest obligations abroad. The other is the danger of unemployment. To embark on a large programme of public undertakings, or rather to continue, without modification, the programme that has been mapped out, would lessen the second danger, but would increase the first. It would give a measure of fictitious prosperity at the cost of capital within the country at a time when supplies of new capital are shut off and are likely to be shut off for some time to come, and would add to the difficulties of meeting the country's obligations abroad.

It will be easier to meet those obligations and to maintain the credit of the country in the eyes of the world, it is argued, if government and municipalities make up their minds to go easy on their expenditures. Necessarily this must mean distress, unemployment and lower wages, which will have to be dealt with by broad measures of relief, but it is regarded as the lesser of the two dangers.

That the farmers of Canada can do the Empire a good turn, with profit to themselves, by largely increasing their wheat acreage for next season's crop, is the excellent system expressed in a cablegram just received from a number of members of the Liverpool Corn Exchange. The area likely to be sown to wheat in Europe will be reduced seriously owing to the mobilization of nearly twenty million men. The Dominion government is strongly impressed with the desirability of increasing the wheat acreage in Canada. That is a matter of great importance and might help the unemployment question.

◆

Back to the land, back to the normal, and backbone to business.

Those who plan their business campaign in war time will keep their business in peace time.

After trying to absorb the wandering dissertations of Mr. W. F. Maclean, M.P., regarding Canada's banking system, it seems that what is really wanted is a money fountain where the button can be pressed while the dollars flow, regardless of a basis of credit.

PAY YOUR DEBTS

A moratorium is not a permanent measure of financial relief. It is a temporary and emergency measure postponing the settlement of certain debts. It does not cancel a debt. It merely puts off the day of its payment. The best way to deal with a debt at any time is to pay it as soon as possible. At Fairbank, a suburb of Toronto, the people passed a resolution asking the government to declare a moratorium for a year. The reason given for such an extraordinary proposal in regard to an emergency measure was that many found it impossible to meet payments in respect of real estate purchases. But the same condition probably would have prevailed, war or no war. A great number of speculative real estate purchases will have to be put on a proper basis and the war has made no difference to that fact, although the war is sometimes used as an excuse. As a rule, the man who has purchased property for his home or purely as an investment, and not as a gambler in a real estate boom, is able to meet his principal and interest payments and to get necessary mortgage renewals at a legitimate rate of interest.

There is considerable misapprehension about the alleged benefits of a moratorium. *The Monetary Times* doubts very much whether the declaration of such a measure is necessary in Canada. That opinion will be changed if specific instances of the necessity are cited and these cases are found to be at all common. General talk about the need of a moratorium is not an argument in its favor. A moratorium is a measure to withstand the early shocks of a crisis. Those have been met and conquered here. Much evidence comes from England that moratoria are not financial things of joy forever or for short periods either. Mr. Lloyd George, the English chancellor of exchequer, received 8,000 replies to his inquiry addressed to bankers and traders as to whether they thought an extension of the moratorium advisable. Of these, 4,500 were against an extension. However, an extension of one month to October 4th was made, when the moratorium probably will pass out of history, having done duty in the world's metropolis for only two months.

Difficulties innumerable have arisen regarding the scope of the moratorium in Great Britain. Judges differ as to its application. Few people seem to know exactly what it covers. Lloyd George's official explanation of it is described by a London authority as "studiously vague." From the terms of the English proclamation it appears that the workers of the community are practically not affected, either as debtors or creditors, by the statutory provisions which have been made temporarily for postponement of payments. But already, says the English Law Journal, the question has arisen about the enforcement of the small liabilities (under £5) which are excluded from the operations of the moratorium, and Judge Parry, at Lambeth County Court, has stated that, as a result of communications with the Lord Chancellor, it has been laid down that in these small debt courts execution should be stayed on all judgments in every case of hardship, or, except with the special leave of the judge, in any case where the breadwinner is engaged in the King's service. Provision has been made on a larger scale for the more extensive liabilities which are covered by the moratorium by the issue of directions under the authority of the Lord Chief Justice, which, while allowing writs to be issued as usual in the High Court, prohibit the making of orders for summary judgment or the signing of any judgment at all, even in default of appearance, for any liabilities which are covered by the moratorium.

Many difficulties have arisen, too, with regard to stock exchange dealings. A London man writes: "I have, during the past fortnight, been consulted on many occasions as to the position of clients involved in such transactions. I understand that all questions relating to the stock exchange are dealt with by the stock exchange committee. The questions which arise under the moratorium appear to be questions of law rather than for the ruling of the committee. Would it not, therefore, be advisable that an independent committee be formed, presided over by, if possible, the Lord Chief Justice of England, whose knowledge of city affairs eminently fits him for the position, or, if this is not possible, by some other high legal authority?"

Questions have arisen also regarding calls on new loan issues. In reply to these the London Financial Times says: "The fact that the country is at war and a general moratorium is in operation does not in any way relieve subscribers to new issues of their liability to pay calls. All that has happened is that if a call falls due within the moratorium period the person liable has the right to postpone payment until one month after the due date; while, on the other hand, the company or authority to whom the call is payable, has the right to charge interest at the rate of 6 per cent. per annum for the period on the amount of the call unpaid. Of course, any person may pay the call on the due date and thus avoid the payment of interest.

"It is considered unnecessary that notice should be given to each holder of partly paid shares or scrip that interest will be charged on unpaid calls. It is often the case that the scrip is to bearer, so that there are obvious difficulties in the way of getting into touch with the individual holders, and it is deemed sufficient that the date of the call is given on the scrip, or was contained in the prospectus."

Instead of talking moratorium, we may consider with greater advantage, the payment of our debts.

◆

Nelson won a notable victory by using his blind eye to the blue end of the picture.

Much of the trouble is that we have to dig into our own pockets now instead of John Bull's. The way out is to create wealth from the riches of the land.

CANADA'S HELP IN THE FIGHT

Twenty-two thousand five hundred men for the front.
One hundred thousand, if needed.
Hospital fund of $100,000.
Flour (1,000,000 bags) from the Dominion.
Flour (250,000 bags) from Ontario.
Flour (50,000 bags) from Manitoba.
Cheese (4,000,000 pounds) from Quebec.
Coal (100,000 tons) from Nova Scotia.
Salmon (1,200,000 cans) from British Columbia.
Oats (500,000 bushels) from Alberta.
Oats (100,000 bushels) from Prince Edward Island.
Horses (1,500) from Saskatchewan.
War relief funds and employment schemes at home.
Men, money and beart and soul for Empire.
And in the meantime Canada's motto is "Business as usual."

◆

Get back to normal.

It is useless to talk trade war; make it.

Some must stay at home, and there is work here.

The Russian moratorium is operative in Tchernigoff, Kholmsk, Minsk, Pskoff and Vitebsk—which about expresses our views regarding the Kaiser.

CANADA AND THE FOOD SUPPLY

There is a possibility of too much attention being paid to the capture of the trade of the enemy to the neglect of agriculture. To make war on German trade, and to endeavor to secure it, is quite legitimate; but the profits resulting from this will be of relatively little use if the all-important question of maintaining the food supply is overlooked. Already, as a consequence of the outbreak of war, large numbers of men are deprived of their regular employment, and, in place of their remaining idle, these men, or at least those of them who are physically capable, should pay attention to the motto "Back to the Land." The question of the food supply, not only of this country, but of the world, is of vital importance, more especially in regard to corn and cattle. Only a relatively small proportion of the population is engaged in agriculture, the majority being employed in the manufacturing industries. Canada, at least, we feel sure will endeavor to take advantage of the position.—London Financial News.

◆

Opportunity is useless unless you grab it by the neck.

Every time you buy German goods, you help to prolong the war.

Do business in the Empire. It's big and strong and brave and rich enough.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Chippawa, Ont.—A by-law to issue $3,000 for sidewalks has been registered.

Minto Township, Ont.—Tenders will be received up to September 14 for $9,421 debentures. W. B. M'Le[illegible], clerk, Harriston.

Halifax, N.S.—Tenders are desired for an issue of $55,000 4½ per cent. 30-year debentures, the date of closing is September 21st,

West Vancouver, B.C.—The council will offer two one thousand dollar debentures to settle claims for roads made through property.

Coleman, Alta.—An issue of $2,500 6 per cent. ten-instalment debentures have been authorized, but no offers for same have been received.

Lethbridge, Alta.—The city has received a cheque of $100,000 from the sinking fund committee borrowed on the hypothecation of debentures authorized by the recently-passed money by-laws.

Stratford, Ont.—The city council has empowered the treasurer to invest in city debentures the cash now to the credit of the sinking fund. The dull state of the money market led to this action.

Swift Current S.D., Sask.—Tenders will be received up to September 30 for $60,000 6 per cent. 30-year debentures. J. T. Dodds, secretary-treasurer. (Official advertisement appears on another page.)

Blenheim, Ont.—No debentures of this town have been offered or sold recently, but Mr. P. S. Shillington, town clerk, informs *The Monetary Times* that an issue may be made at the end of the year.

Saanich, B.C.—Three debenture issues of $375,000 for water, $450,000 for paving (to which the government contributes $1[illegible]0,000), and $50,000 for schools, and the by-law to ratify an agreement with Victoria for the purchase of water in bulk as soon as the Sooke waterworks is completed, were discussed at a recent council meeting.

York Township, Ont.—Deputy Reeve Griffiths, in reply to a deputation desiring the construction of sewers, etc., said the council had at the present time an abnormal overdraft with the bank, and he had reason to believe that the debentures could not be sold. The council would consult the banks and ascertain if a loan could be secured.

Calgary.—Mayor Sinnott received on September 4, a cable message from London, England, reading:—"Bonds delivered. Advise our friends all well. (Signed) Riley Tregillus." The cable means that the $5[illegible]0,000 issue of city of Calgary debentures which was sold in London just before the war broke out, are now in the hands of the purchasers and the money will soon be in the city treasury.

Vancouver.—Assessment officials of Vancouver are making up the roll for 1915, and the prospect is that the increase will not be large enough to supply the necessary money if the usual rate is levied. The object in past years has been to keep the rate at two mills net, but that was not enough this year. With existing conditions, it is not improbable that the city may have to resort to a tax on improvements. This was suggested this year, but not adopted. Improvements years ago were taxed at 50 per cent. of the assessed value and later at 25 per cent. before they were exempted altogether. There is a feeling that revenue-bearing blocks, especially those downtown, which profit [illegible] from the large police and fire protection expenditures, should pay some taxes. The city's financial problem in 1915 will require careful handling by the council, but it should not present any particularly difficult features.

Calgary.—Recommendations of the special committee of Calgary council have been carried as follows:—"That all parties who are willing to work for the city, and to have their wages credited to their account with the city, be allowed to do so, on signing an undertaking to this effect, [illegible] to the city solicitor, and that the city treasurer be instructed to acknowledge from time to time the amounts credited to such employee on the books of the city, no such acknowledgment to be given to the employee, but to the party proposing to give credit to the said employee, and such acknowledgment to contain a condition that the account is payable on the order of the city council, within one year from the date of the acknowledgment, and on the presentation of the letter acknowledging the said account. The committee further recommends that the city treasurer be instructed to credit, in payment of taxes, all moneys to the credit of any employee of the city, owing taxes to the city, on the application of such person to have this done."

Montreal.—Important provisions of the agreement by which the city of Montreal appoints the Bank of Montreal its sole financial agent with the exclusive right to bring out all its issues, are as follows: 1.—The bank will float by way of public issue all permanent loans that may be made by the city in London hereafter for ¼ of 1 per cent. commission, plus stamps, advertising and legal expenses. 2.—Upon loans or issues made in Montreal or New York a commission of ¼ of 1 per cent. for loans under $4,000,000 and 3/16 of 1 per cent. upon issues of $4,000,000 and over. 3.—Upon temporary advances made and upon over-drafts allowed by the bank in Montreal no commission and no charge whatever except current interest will be made. 4.—On redemptions of permanent loans at their maturity the bank will be entitled to charge ⅛ of 1 per cent., except in cases where the redemption is made by the issue of a renewal loan, in which cases commission on the redemption of the old loan will be waived. 5.—The bank agrees from time to time so far as financial and other conditions may permit, to advance to the city upon the security of treasury bills such funds as may be agreed upon during the intervals between the issues of its permanent loans, at the best rate obtainable on the market at the time at a commission of ⅛ of 1 per cent., provided that reasonable notice of the city requirements be given to the bank. The agreement is to continue for a term of five years, at the end of which time it will terminate provided a year's notice to that effect is given by either party.

THOUGHT LIFE INSURANCE WAS BEST

Ten life insurance policies valued at $37,080 made up the principal item in the $38,880 estate of the late Mr. S. Campbell, hotelkeeper, who died at Brantford on August 2nd.

FINANCIAL CORPORATIONS ARE TAKING STOCK

Mr. A. L. Crossin, of Messrs. Oldfield, Kirby and Gardner, Winnipeg, discussing the present situation, says: "We were all aware that a change must come in the condition in Canada. For many years we have been spending immense sums in the building of railways and the development of the country in other respects. We knew that the time must come when we must take out of the soil all that was needed to pay the interest and the principal of these vast loans. We expected that this process of change would be extended over a number of years, a great many years, in fact. What we expected to be done in a series of years has now been done in a moment. We can get no more money to spend on capital account and we must begin at once to increase our production. The result is the present difficulty and stringency. We are not receiving money from abroad; and we are not certain what the demands will be which will be made on us. All financial corporations are consequently taking stock and seeking to ascertain what their true position is."

◆

If you don't [illegible] with [illegible] your business.

If you [illegible] your business [illegible].

"It is [illegible]."—Sir William [illegible].

[illegible]

[illegible]

No one can [illegible] the [illegible] of the Canadian Pacific Railway without recognizing the very great strength of the undertaking, and its importance as one of the great assets of Canada.—London Statist.

DIVIDEND NOTICES

THE MONTREAL CITY AND DISTRICT SAVINGS BANK.

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared and will be payable at its Head Office, in this City, on and after Thursday, the 1st of October next, to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board.

A. P. LESPERANCE,
Manager.

Montreal, August 24th, 1914.

CANADIAN WESTINGHOUSE COMPANY, LIMITED

DIVIDEND NO. 39

A quarterly dividend of one and three-quarters per cent. (1¾%) has been declared upon the outstanding Capital Stock of the Company, payable October 10th, 1914, to shareholders of record at the close of business, September 30th, 1914. Transfer books will be re-opened October 1st, 1914, at ten o'clock a.m.

Cheques will be mailed to shareholders.

By Order of the Board.

JOHN H. KERR,
Secretary.

Hamilton, Canada, September 3rd, 1914.

DIVIDEND NOTICE.

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED.

COMMON STOCK DIVIDEND, No. 61.

Notice is hereby given that a quarterly Dividend of 1¾ per cent. for the three months ending the thirtieth day of September, 1914, being at the rate of 7 per cent. per annum, has been declared on the Common Stock of the Company.

Preference Stock Dividend, No. 37.

Notice is also given that a half-yearly Dividend of 3½ per cent. for the six months ending the thirtieth day of September, 1914, being at the rate of 7 per cent. per annum, has been declared on the Preference Stock of the Company.

The above Dividends are payable on the first day of October, 1914, to Shareholders of record at the close of business on September 15th, 1914.

By order of the Board.

J. J. ASHWORTH,
Secretary.

Toronto, September [illegible]th, 1914.

The printing of 25,000,000 £1 notes of emergency currency in England, in the short time allowed, constitutes a record in the output of the printing press. Messrs. Waterlow Brothers and Layton, of London, were entrusted with the order. The artist who designed the notes received draft instructions on the afternoon of Sunday preceding bank holiday, and two designs were submitted on the Monday morning. The best points of each were adopted, and a proof of the finished plate submitted to the treasury and accepted at midnight on Monday. Electro reproductions of the plate had to be made in sufficient numbers so that forty notes could be printed on one sheet, and between 500 and 600 sheets per hour were turned out by each machine, each one accurately numbered, and all in perfect uniformity. They had to be printed on ordinary stamp paper, as that was the only paper in store bearing the water mark, and as the quantity in store was low some paper direct from the mill had to be used. [illegible] notes were promised by the Friday morning [illegible] period, and 3,500,000 were actually delivered, while the daily output during the succeeding week was 5,000,000.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

SCHOOL DISTRICT OF SWIFT CURRENT, SASKATCHEWAN.

Sealed Tenders will be received by the undersigned up to and including the 30th day of September, 1914, for the purchase of $60,000.00 Debentures of the Swift Current School District No. 167 of Saskatchewan, for completing and equipping the Central and Elmwood School Buildings in the said city. Repayable in 30 years with interest at 6 per cent. payable yearly. Debentures approved by the Local Government Board of Saskatchewan. The highest or any tender not necessarily accepted.

J. T. DODDS,
Secretary-Treasurer.

Swift Current, Sask., 25th August, 1914.

CONDENSED ADVERTISEMENTS

advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

CHARTERED ACCOUNTANT, Canadian, age 36, wide experience during ten years' independent public practice, also law and engineering training, seeks engagement with chartered accountant firm or as chief accountant with financial or manufacturing or public service corporation. Capable manager and correspondent, active, successful; character and standing of the best. Ready September. Address Box 365, *The Monetary Times*, Toronto.

MUCH WORK AT HOME

It was the duty of those who were obliged to stay at home to carry on their work with the same courage, energy, and unselfishness that they expected, and would surely see displayed by those brave men who had gone to the front, said Mr. H. Gordon Selfridge, at an address in London.

War required two forces; one of men who fought with risk of life against the enemy, and another to keep the lifeblood of the nation moving to carry on the work of making and providing.

To the one force was the glory and the reward when successful; to the other the less exciting, less glorious, but necessary duty to the nation, and war demanded sacrifices from both.

Let them prove that they did not only carry on business for profit, but also to provide for the wants of the people.

To withdraw publicity from their businesses at such a time would be like slackening fires in a vessel when steam was most needed.

There should be no holding up of payments by which manufacturers would be hampered.

To keep factories at full time was a national proposition.

The end of the war would be brought about as much by shrinkage of trade as by victories of our army or the weight of our fleets.

* * *

[illegible] can afford to advertise everywhere.

Sit down all the time and you will soon learn that you have no standing in the community.

Writing on the situation on this continent, Messrs, H. F. Bachman and Company, bankers, New York, say:—"We firmly believe the future holds much for American enterprise and industry during the coming years. With Europe torn by a war of ambition and conquest she is sacrificing her trade and commerce the world over. America stands ready to seize the opportunity of a century."

CANADA CONTROLS WORLD'S NICKEL

War and Mineral Production — Dominion is Heavy Producer

BY J. DOWER.

Germany as an important industrial nation, has been built largely upon the development of its mineral wealth. Upon that foundation, its iron and steel industries have been raised. It has copper, lead, zinc and other minerals in fair quantity and great wealth in its salt mines. It has practically a monopoly of potash, and supplies the world with that product. In its mineral resources Canada also has a substantial foundation on which to secure a large share of Germany's lost trade. Last year, the value of Canada's mineral production was $140,000,000.

This industry is one of great importance, providing material for industries of peace as well as for the construction of war implements. Dreadnaught, aeroplane and locomotive, autotruck, gun-carriage, and ambulance wagon. Bayonet, sword and lance, cannon, maxim and rifle, bullet, shot and shell, watch, compass and heliograph, are all evolutionary products of mineral ores taken by the peaceful miner from Mother Earth.

In war times, prices of the important minerals fluctuate considerably, owing to lack of supplies or loss of markets, difficulty of shipment, etc. But as a result of the conditions caused by the war, an opportunity is presented to Canada's mineral producers, and to the manufacturers who convert these products into articles of commerce.

Great Britain imported during the first seven months of this year coal, coke, manufactured fuel, iron ore, scrap iron and steel, and other metallic ores, all as raw material to the extent of $48,000,000, and as articles wholly or mainly manufactured, iron and steel and manufactures thereof, other metals and manufactures thereof, cutlery, hardware, implements, instruments, electrical goods, and machinery of all classes valued at $188,000,000. Other markets are available for the alert Canadian manufacturer. Their permanence depends on the ability to meet future competition on the resumption, by the European nations, of mercantile activity.

Gold, Basis of Credit.

The first mineral product of importance, gold, is the basis of the world's credit. The British Empire's largest producer is the Transvaal, its output annually amounting to over $190,000,000. German financiers are one of the principal factors in the control of the industry in South Africa. Canada ranks as the fourth largest producer of gold in the British Empire, the annual output being about $16,000,000. Silver is a product in which Canada's resources lead the Empire, the Dominion mining about $18,000,000 annually. In the production of gold the use of mercury for extraction of the metal from the ores is a notable factor, as also is the cyanide process.

The supply of mercury or quicksilver is limited. As fulminate, a product from mercury, is necessary for the manufacture of explosive caps for the belligerent nations in addition to many other uses of mercury in medicine and the arts, the Cobalt mills and those of other countries will be affected by advancing prices. Germany is the largest producer of cyanide, though one producer in Great Britain is stated to be able to supply normal demands at this time.

Coal was Nova Scotia's gift to the Motherland and a reminder to the world of Canada's undeveloped supply of this material. This maritime province's patriotic provision of fuel for His Majesty's battleships indicated the importance of coal in fighting operations as well as for its heating and power—generating offices, performed in times of peace. Coal tar and aniline are notable products from coal, and Germany has claimed a large share of the world's trade in these products.

Trade Barometer is Affected.

Iron, the barometer of trade and commerce, is particularly affected by wars. As destruction advances, so construction recedes for the time being. Such early results as those indicated by the partial closing of various large works, are already noted. No doubt these and all other large North American firms are examining the business held by Germany and are preparing to capture some of it.

Iron ore prices are stated to be normal, but owing to the cutting off of supplies of constituent elements, such as manganese ores, fer[illegible] and other materials necessary in the manufacture of steel, the commodity has risen in price. Some Canadian manufacturers had surplus stocks of ferro manganese and sold it in the United States at a good profit. Disinfectant and chemical manufacturers may also have to ask Canadian producers to supply the demand for manganese.

Canada Controls Nickel Supply.

Interest was shown last year in a statement in *The Monetary Times' Annual* relative to Canada's valuable nickel resources. This country produces two-thirds of the world's supply. The article said:—"The most important use of nickel is in the manufacture of nickel steel, largely required for the manufacture of guns. The Canadian export, therefore, would be of great importance in case of war, and other European countries might be seriously hampered should the output be curtailed or stopped. The only other extensive deposits from which large outputs are obtained are in New Caledonia, France. The mines there, which produce practically the remaining third of the world's supply, are controlled by France, and the Krupp Company is understood to have obtained some control in the interests of Germany."

Another important industry in which the salts of nickel are used is the plating industry.

Copper at the beginning of the year showed prospects of an increased production. Germany, Great Britain, France, Austria and the United States are the largest consumers of this material, the electrical industry including tramways probably absorbing the largest quantity, though the shipbuilding and engineering trades utilize large amounts. Under present conditions, and with producers limiting output to about 50 per cent., early promises are not likely to be fulfilled. Munitions of war will consume much copper. Canada has an increasing output of copper.

Canadian copper producers and manufacturers of electrical machinery fittings, wire, cable, etc., should benefit.

Painters Want Home Product.

The production of lead in the Dominion is heavy, giving a fair supply of bullet making material. The need of red and white lead, litharge and other products may make for an increased manufacture of these materials used by the manufacturers of paints and colors who will also probably have to appeal to Canadian producers for various other minerals which are used in their processes of manufacture, now that Germany and Britain are unable to market quickly their products of this nature. Zinc is another product of Canada which should show an increased output.

The production of arsenic in America is often, though not invariably, a by-product of other metal smelters. The limiting of the exports from Europe may benefit Canadian producers.

Tin, another mineral affected by the war, is not produced commercially in Canada, though indications have been discovered at different points in the Dominion. The Straits Settlements are the chief producers of this mineral. In Cornwall, England, tin has been mined continuously since the days of the Phoenicians, who took back with them some tin in blocks, which were used in the construction of King Solomon's Temple. This mineral is used not only in making tin-plate for pots and pans, but also is an important component part of printers' type, and utilized in making various chemicals, one of which is used in weighting silks. When war shut off the United States supply, the price per pound, which is normally around 35 cents, jumped to about 65 cents. This will add to the cost of the fruit canning industry and affect the plumbing, sheet and metal trades. Antimony, another mineral which Canada produces, was affected by war alarms, and the price rose from four to twenty cents per pound.

Glass and Potash.

Belgium has been a large exporter of glass, and now Canadian supplies will be stopped from this source, giving an impetus to manufacturers at home.

Potash is practically a monopoly of the German nation in the same way as nickel is a monopoly of Canada. There are inexhaustible supplies which are operated by a syndicate so that fertilizer and chemical manufacturers will have some difficulty in getting a supply of raw material. From potash salts are obtained such articles as bichromate of potash, bromides, etc.

Another Canadian industry affected is that of the manufacture of paper which uses large quantities of the mineral

SAVINGS DEPARTMENT

Interest allowed on deposits at all Branches of Bank from date of Deposi product China clay as a filler. This being imported from Great Britain, slow deliveries of this material being likely. It has been discovered in small quantities in Quebec, and the 1912 output was valued at $160.

Saltpetre and sulphur, constituents of gunpowder, are not separately mentioned in Canada's mineral production, though charcoal, while not an actual mineral product, is an important item of Canadian commerce.

OPPORTUNITY FOR MILLERS

Canadian flour is becoming well known in the Japanese market, and Mr. G. B. Johnson, Canadian trade commissioner at Yokohama, suggests that, while the present time is inopportune for the despatch of Canadian flour to Japan, owing to the congestion in the market, this condition is no doubt only temporary, and as the season which promotes a brisk demand for flour is close at hand, the price may possibly advance, if the stocks now accumulating can be got rid of in the meantime.

The imports of flour have been increasing for the past three years, the increase being entirely in Canadian flour, which shows a tendency to oust the United States product.

It is a matter for serious study as to whether or not the time is opportune for a certain amount of co-operation among Canadian millers, who are, or might become, interested in the Oriental market, in regard to the sale of their product in the east. Only wealthy concerns can stand the expense of properly studying conditions here, advertising in, and exploiting this market, and maintaining big organizations to look after sales abroad. The market in the Orient is worth the effort to capture. Serious study of conditions would reveal the quality and brands of flour suited to local requirements, and the enormous Oriental business now in the hands of United States mills, which they evidently find profitable, might be shared by Alberta and British Columbia mills to a greater degree. Certain brands manufactured particularly for this market, when once known and liked, would always be in demand.

MUNICIPAL ACCOUNTING AND AUDITING

Uniformity in the records, offices and general administration of any one class of municipality within a province is desirable. Municipal authorities outside of the province have been good enough to state that Saskatchewan leads in this regard, suggests Mr. J. N. Bayne, deputy minister of municipal affairs of the province. It is a fact that each rural municipality uses the same set of books as every other rural municipality, and that these are prepared and prescribed by the department. A general Rural Municipality Act governs all the rural municipalities, and special legislation for the benefit of any one is practically never known. The same statements may be applied to the other classes of municipal organization throughout the province. Uniformity in municipal accounting means much for the taxpayer and for the general standard of municipal offices existing.

The province is to be congratulated on having, in even some of the most remote portions, auditors who are most painstaking and competent, thinks the deputy minister. They turn out annual financial statements which are complete in every detail, while their investigations are exhaustive. On the other hand, however, a few local auditors are stated to be too careless in regard to the documents to which they attach their names. In more than one case it has been found that the local auditor has not taken either time or trouble to thoroughly examine the books with which he has been entrusted, and, while his figures are not correct, his lapses are further added to by the fact that through fear or innocence of the law he has not reported infractions of the latter. In numerous cases, therefore, it has been found necessary to have the work of auditing and inspecting the municipal records performed by a firm of chartered accountants from outside the municipality who cannot possibly have any local bias. Practically all of these examinations have produced beneficial results. Again, a large number of our municipal institutions are commencing to see the desirability of hiring chartered accountants to do their audit work entirely, thus eliminating local feeling. It is hard to impress too firmly the necessity of a true devotion to duty by all those entrusted with the investigation of municipal records.

MARKETS FOR GOLD AND SILVER

Demand for Yellow Metal is Satisfactory — Nations Are Buying Silver Bullion

Canada is a large producer of the precious metals, gold and silver.

The war has called attention to the fact that gold mining has some very distinct advantages over the mining of other metals. At ordinary times the fixed price and constant demand for gold have enabled mining men to make more definite valuation of gold deposits than of other ore bodies. Instead of figuring in ounces it is possible to figure in dollars. Knowing costs of mining and treating the ore and the amount of ore the value may be determined. For other metals an additional, variable price must be constantly kept in mind. Gold mining is an especially sound industry in times like the present, suggests the Canadian Mining Journal. The market for many other metals produced in America is poor, but gold is in great demand.

The producers of silver have experienced considerable difficulty in disposing of the metal during the past few weeks. For some days the outlook was very discouraging; but the situation is now much better. London is taking silver at a higher price than before the war and shipments have been resumed. It is understood that the English mint is buying large quantities and it is expected also that the United States government will buy several million ounces.

Market is Limited.

The market is, however, a limited one and buyers are afraid to commit themselves. The Cobalt district mines have suffered in consequence. Some have been closed down. Some are being operated with reduced forces. Some are producing as before.

The uncertainty has made it difficult for the producers and buyers to agree on prices. Consequently the companies find it advisable to await developments. Most of them will continue to produce silver, while a few have ceased operations.

In some cases shutting down is necessary. In other cases it is a doubtful expedient. Companies having a good cash surplus owe it to their employees and to the country to continue operations if it can be done at no great loss. To throw men out of work at this time is particularly regrettable.

Banks will Lend.

It is quite conceivable that a company might eventually make a few dollars more for its shareholders by stopping operations until the market improves. It is to be hoped, continues the above authority, however, that an endeavor will be made to keep the mines open even at the risk of slight losses. If over-production is feared more attention might be devoted to exploration and development. There is unfortunately an over-abundant supply of labor just now. Some companies are in a position to use it to advantage.

The application of the Temiskaming mine managers to the Dominion government for aid in marketing silver has been promptly answered by an announcement that the banks are now ready to advance 30 cents an ounce on silver bullion deposited with them. This will enable the producers to keep their employees at work during the period of uncertainty.

◆

GERMANY'S COLONIAL INVESTMENTS.

Should Germany lose in the present war, investments in her colonies will be prizes for those powers concluding the final treaty of peace. A recently published list of capital investment of Germany in her various colonial adventures, totals nearly $2,000,000,000. The largest are:—Brazil, $400,000,000; Africa, $380,000,000; Venezuela, $312,000,000.

◆

This notice has been posted in a Toronto business office: —"Kitchener and Jellicoe must run this war. We must run this business. No more war extras and no more war talk during business hours."

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

ABOUT MORATORIUM LAWS

Newfoundland Provides Legislation—Operation in France, Argentina, Ecuador and Egypt

Newfoundland is enacting legislation for the provision, if necessary, of a moratorium.

Further details regarding moratorium laws in various countries comes to *The Monetary Times* from British consular offices. The chargé d'affairs at Buenos Aires has telegraphed to the British Foreign Office, under date of August 12th, to the effect that the Argentine government has adopted the following financial measures owing to the war:—

(1) A moratorium has been granted for 30 days for obligations involving monetary payments due during the present month. Those involving payment in gold, unless the creditor accepts paper currency at its official rate of conversion, will be in abeyance during the time that the conversion office is authorized to suspend the issue of gold in exchange for paper currency. Up to August 17th, banks need only pay 20 per cent. of deposits.

Banking and Commerce.

(2) The conversion office is authorized to issue notes for discounting bills discounted by banks.

(3) The Argentine legation (in London) is authorized to accept gold deposited for banking or commercial purposes, against which the government will credit persons in Argentina, on receipt of advice, with the equivalent in paper currency at the official rate of conversion.

(4) The obligation of the conversion office to deliver gold for paper currency is suspended for 30 days, and the executive is authorized, if necessary, to prolong the term for a further 30 days, or to shorten it.

The British consul at Guayaquil, Ecuador, reports, under date, August 7th, that a decree has been issued by the government of Ecuador suspending for one month the law providing for payments in gold to holders of bank notes.

The British legation at Cairo, Egypt, reports that a moratorium has been declared in Egypt up to September 15th for banking and commercial business.

Moratorium in France.

In France, a decree dated August 10, provides for the suspension, until the cessation of hostilities, of all prescriptions and limitations in civil, commercial or administrative matters, and of all time limits allowed for serving, executing, or appealing against, the decisions of the judicial or administrative courts. The suspension of all prescriptions and limitations also applies to mortgage deeds and their renewal, and generally to all acts which, according to law, should be accomplished within a given time.

During the same period clauses in contracts which stipulate forfeiture in case of non-execution before a given time or date will be non-effective, provided the contracts were concluded before August 4th. This decree applies also to Algeria.

◆

CUBA RAILWAY COMPANY.

Monetary Times Office,
Montreal, September 9th.

The Cuba Railroad Company, of which Sir William Van Horne is president, has had a favorable year.

Gross earnings for the year ended June 30 last were $5,164,670 and net income as against dividends, $1,516,505 which compares with $1,029,258 and $37,448, respectively, in 1905 and $2,559,335 and $[illegible]72,[illegible], respectively, in 1910.

In 1912 the company paid a preferred dividend at the rate of 5 per cent. per annum. In the following year this was increased to 6 per cent. and simultaneously a dividend of 4 per cent. on the common was begun. The preference dividend was maintained last year and the common was raised to 6 per cent.

The gains in gross and net earnings during the past year are satisfactory and are of about equal percentage, being in each case 11.5 per cent. as compared with a year ago. In the president's report is intimated that three new sugar mills completed during the year were late and made only a little more than half a crop; but these together with another new mill will add largely to earnings in future.

HOARDING MONEY IS FOOLISH

It is Safer in the Bank—Recent Incidents at Home and Abroad

The hoarding of money is a foolish practice at any time, either in peace or war. The question of its safety preys upon the mind. Access to it is in secrecy. In the event of a real crisis, probably the money would be found of less use to the owner than if it were in the bank. This fact is emphasized in Europe. When the capital of Belgium was transferred from Brussels to Antwerp, the banks took along their funds with them. The citizens with savings tied in the proverbial stocking or hidden in the traditional mattress had to guard their savings. In Great Britain, in Canada or indeed anywhere in the British Empire there is not need to hoard money.

Felt Safe with Gold.

A Toronto man is said to have made a special trip to the United States to obtain $3,000 in gold. It is now in his vault and "whatever happens," he is reported to have said, "I have $3,000 of gold." If events were to occur sufficiently terrible to make that $3,000 of such extraordinary value, the same events likely would make it almost valueless for practical purposes. Probably he will do what the south of England lady did who, the other week insisted on withdrawing $1,500 from her bank in gold. Five days later she asked the bank to take it back, being afraid of robbery.

In India, silver is hoarded by the natives at all times. This has a considerable effect upon the world's silver market. Despatches from France state that immense sums of money in small coins is being hoarded there. In one little town the local branch of the Bank of France is said to have issued $50,000 in silver which entirely disappeared from circulation inside of a week.

What Lloyd George Says.

Mr. Lloyd George, the English chancellor of the exchequer, has made the most notable utterance of recent times regarding the hoarding of gold:—"It is vital that it should be made clear to those individuals who hoard gold and to the nation at large that any man who does this is inflicting a great injury on the nation. In this tremendous struggle finance is going to play a great part. It will be one of the most formidable weapons in this exhausting war, and anyone who for selfish motives of greed or through excessive caution or cowardice goes out of his way to attempt to withdraw sums of gold and appropriate them to his own use, let it be clearly understood that he is assisting the enemies of his country, and he is assisting them more effectively probably than if he were to take up arms on their behalf; and in the end he would not really benefit himself."

◆

GIFTS TO THE WAR FUND

The following banks have donated the sums named to the national fund inaugurated for the relief of the dependants of the Canadian contingents going to the front: Bank of Montreal, $500,000; Royal Bank, $50,000; Bank of Commerce, $50,000; Bank of Toronto, $25,000; Bank of Ottawa, $25,000; Dominion Bank, $25,000; Bank of Nova Scotia, $25,000; Banque Provinciale, $5,000.

The Canadian Pacific Railway has voted $100,000 to the fund and the Canada Sugar Refinery, $10,000.

The fund is making substantial progress in all parts of the country. In the Toronto and York division $930,000 has been subscribed.

◆

"We paid out $25,000 yesterday and we expect to pay out $42,000 to-day," said Mr. J. H. Burgouin, of the Credit Foncier Franco-Canadien, in an interview at Winnipeg. "We are not lending any money on apartment buildings and we do not want to lend any money to a man who is building houses to sell. We are ready to lend to any Winnipeg citizen who wants to build a house for his own use and who can satisfy us of his ability to carry the project through."

A General Banking Business Transacted

The Molsons Bank

136th Dividend

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the FIRST DAY OF OCTOBER NEXT, to Shareholders of record on 15th September, 1914.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City, on Monday the 2nd of NOVEMBER next, at three o'clock in the afternoon

By the order of the Board,
EDWARD C. PRATT,
General Manager.

Montreal, 25th August, 1914.

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-nine years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Ten and One-quarter Million Dollars of Shareholders' Money are a further pledge of their security.

These bonds may be had in sums of One Hundred Dollars and upwards.

Canada Permanent Mortgage Corporation

OPENINGS FOR TRADE

Four British Trade Commissioners Report Opportunities to Take German Business

In connection with the campaign to take from Germany its extensive trade, the British government requested its trade commissioners to cable information as to financial and commercial conditions in their districts and as to likelihood of regular payments being forthcoming for goods supplied. This information has been embodied in a special report submitted to the manufacturers of the United Kingdom, and is as follows:—

In Canada, Mr. C. Hamilton Wickes, with headquarters at Montreal, reports that, according to the information which he has been able to obtain, the present financial condition of importers is generally satisfactory. The approximate value of import trade from Germany is £3,000,000. The following is a list of certain goods in which, in his opinion, British firms might extend their trade as the result of existing conditions:—

Bristles, brooms, brass articles, brass tubing, boiler tubes, beans, combs, clothing, crude glycerine, litharge, lead pencils, locomotive tires, optical instruments, piano keys, ivory, perfumery, purses, leather, medicinal materials, chinaware, carbons, cutlery, carding machinery, copper tubing, electrical apparatus, enamelled ware, furs, ferro-silicon, fabrics for neckties, gelatine, glassware, gloves, gun wads, hides, hops, lamps, rubber, skates, socks, toys, velvets and zinc bars.

In Australia and New Zealand.

In Australia the British trade commissioner reports that the financial position in that market is strong. The Federal government is prepared to support the banks if necessary, and the execution of Federal, public and state works will be continued. The commercial position appears sound, as the banks are adequately supporting merchants. He considers that there is a good opportunity for manufacturers to secure valuable trade. Firms should cable to their agents that they are able to fill orders if they are in a position to give this assurance. Particular attention should be directed to trade in fencing wire, mild steel, wire netting, cotton hosiery, minor articles for apparel, rubber goods and chinaware.

From New Zealand the trade commissioner reports that the present conditions of trade are disturbed, but he anticipates that this is only temporary, and considers prospects to be good, and regular payments likely to be maintained. The demand for necessaries is not likely to diminish. An increasing demand for British goods may be expected, but prompt overtures should be made so as to anticipate competition from America.

In South Africa.

The trade commissioner in South Africa reports the existence of depression due to drought which was accentuated by the war. Prices for food-stuffs rose to a high level at first, but concerted action by the merchants and the reassuring statements which the Dominion government was in a position to make resulted in prices of present stock being fixed at 10 per cent. more than the normal market price. The action of His Majesty's government regarding insurance against war risks is highly appreciated. The banks are fully prepared to finance reputable merchants as hitherto, and merchants are ready to carry on trade. Indents supplied previously by Germany and Austria will be executed by the United Kingdom and France. The unavoidable decrease in the exports of diamonds, hides and feathers will affect the community proportionately.

FOUNDATIONS FOR CONFIDENCE

Natural Resources and Possibilities of Canada Should Help in These Times

"A great many of the Canadian business people look too much on the dark side," said Mr. C. W. Rowley, manager of the Canadian Bank of Commerce at Winnipeg, in an interview with *The Monetary Times*. "My confidence and faith in the British people are absolute, whether at home or at the heart of the empire, in their calm, sane, sound, safe judgment, and also in our people and institutions," he continued. "After the first hard blast of war is over, we will all settle down to business and push for trade expansion wherever possible, and supply many of the goods that heretofore have been supplied by Germany and Austria.

In an Emergency.

"After the announcement of war by Great Britain on August 3rd, I told our staff to keep calm and resolute, nail the good old flag to the masthead and throw the hammer away. Fighting for a just cause, we are bound to win and after it is over we should be a better, bigger and greater country than ever before. It seems to me that those who have gone to the front have shown us what to do in an emergency, and how to do it, and we are all proud of them. It is up to us who are left behind for one reason or another to see that we so conduct ourselves and the affairs of Canada that they on their return will be proud of us."

Mr. Rowley recalled that in 1912 he sent out some Dominion Day thoughts to his friends. "As they were absolutely true then, they are doubly so to-day," he added. Here they are:—

"We believe in our country, the Dominion of Canada. We believe in our King, our flag, our constitution, our laws, our institutions and the principles for which they stand. We believe in our future. We believe in our vast natural resources from Halifax to Victoria, our great possibilities, yea our wonderful certainties.

Advancement and Prosperity.

"We believe in the Canadian people, in their honesty, integrity, reliability, genius, in their brain and brawn. We believe that nothing can stand in the way of our advancement and prosperity.

"The great thing to remember is that we are all Canadians. In our veins runs the blood of many an old and new world nations. We are kin to each and identical with one only. We should keep ever before our eyes the fact that we are a British Canadian people, with high ideals and standards. Let us be true to ourselves, for then we cannot be false to any man. We who live in Canada should be proud of the fact and live so that Canada will be proud of us."

◆

NORTHERN ONTARIO'S POSSIBILITIES

Provincial Minister Foresees Great Things as a Result of Development—Settlers and Transportation

"A vast region of enormous possibilities awaiting proper facilities to become densely settled with prosperous people" is the description given by Hon. W. H. Hearst, Ontario's minister of lands, forests and mines, in his annual report of the clay belt of Northern Ontario. He adds, however, "It would be folly to attempt to bring large numbers into that region before it was properly opened up by railway and markets and employment available. It is better to make haste slowly than to have any setback later on." Some of the advances already made are shown in the following statements:—

There was sold during the year for agricultural and town site areas 202,088 acres for $151,840.93. The collection on account of these and former sales was $118,134.60. There was sold for mining purposes 34,[illegible]75 acres for $89,161.28. There was collected on account of these and former sales $95,068.94.

There was leased for mining purposes 9,313 acres for $9,313.24. There was collected on account of these leases and those of former years $20,878.43. There was leased of Crown Lands an area of 4,309 acres for $1,908.14. There was collected on account of these and the leases of former years $18,348.05.

The total area of Crown Lands disposed of by sale and lease during the year was 260,873 acres for a value of $259,956.88. The total collection on account of the sales, leases, etc., was $262,164.65.

Settlers by Hundreds.

The Temiskaming region, covering by that expression the country lying between Haileybury and Cochrane, has had a considerable influx of settlers during the past year.

In the New Liskeard agency 239 settlers purchased 32,083 acres of land. In the Englehart agency 112 settlers purchased 17,246 acres of land. In the Matheson agency 385 settlers purchased 58,317 acres of land. In the Cochrane agency 285 settlers purchased 42,683 acres of land, and in the Hearst agency recently opened, 63 settlers purchased 8,224 acres of land. Altogether in that region 1,084 settlers purchased 158,553 acres of land. In other parts of the province 137 settlers purchased 18,130 acres of land.

When the Transcontinental Railway is in regular operation, a time table established and reliable freightage at reasonable rates secured, people will move into that country in large numbers. At present the country is handicapped by uncertain communication and heavy charges. The progress of that country, too, particularly in the clay belt, will measurably depend upon the developments that take place there. The land, of course, is intended for actual settlers. The class of people who will probably go in there will not be men of large capital and will have to depend in the future on local markets for what they have to sell, whether it be agricultural products or timber, and also for employment during the winter season.

Pulp Companies Are Busy.

The Abitibi Pulp and Paper Company is rapidly completing a development which will give good markets and employment to a large number of people. This company will have a probable output of 250 tons of news print per day. They are erecting houses for their workmen. They have laid out their town site and are putting in sewers and a water system. They have taken out much pulpwood, and when in full running order will require 90,000 cords for their paper mill. It will be seen from this what an important industry the company is creating, and how such a development will assist in opening up that region.

The New Ontario Colonization Company is pressing forward their development by the building of roads and the erection of houses, and are, in other ways, making preparations to promote settlement on a considerable scale.

With the sale of pulp concessions, other developments may be expected in the near future, and as soon as the Transcontinental is running and reasonable freights obtained, outside buyers of pulpwood will come in and widen out the market for settlers' timber.

The department is preparing the way for settlement by the construction of roads which will enable settlers to get to their lands without delay or hardship.

Trust Company Service

This Company acts as Executor, Trustee, Guardian and Private Agent; as Trustee and Registrar for Bonds and Transfer Agent for Stocks; as Agent to pay Dividends, Coupons and Bonds; and as Agent to assume full management of Real Estate.

THE IMPORTANCE OF A WILL

If you die without a Will the law arbitrarily provides for a division of your estate. If your children are under age their shares are paid into Court and special application must be made to provide funds for their maintenance and education. The making of your Will is therefore a matter of paramount importance. The appointment of this Company as Executor is a guarantee of an efficient, responsible and prudent administration, with absolute fidelity to the terms of your Will.

TRADING WITH THE ENEMY

Canadians Are Forbidden To Do So—What It Actually Means

Following the proclamation in Great Britain against trading with the enemy, Canada has issued a similar proclamation. Doubts having arisen as to the exact meaning of the proclamation, the British governmnet has authorized the following explanation:—

(1) For the purpose of deciding what transactions with foreign traders are permitted, the important thing is to consider where the foreign trader resides and carries on business, and not the nationality of the foreign trader.

(2) Consequently, there is, as a rule, no objection to British firms trading with German or Austrian firms established in neutral or British territory. What is prohibited is trade with any firms established in hostile territory.

(3) If a firm with headquarters in hostile territory has a branch in neutral or British territory, trade with the branch is (apart from prohibitions in special cases) permissible, as long as the trade is bona fide with the brânch, and no transaction with the head office is involved.

(4) Commercial contracts entered into before war broke out with firms established in hostile territory cannot be performed during the war, and payments under them ought not to be made to such firms during the war. Where, however, nothing remains to be done save to pay for goods already delivered or for services already rendered, there is no objection to making the payment. Whether contracts entered into before war are suspended or terminated is a question of law which may depend on circumstances, and in cases of doubt British firms must consult their own legal advisers.

This explanation is issued in order to promote confidence and certainty in British commercial transactions; but it must be understood that, in case of need, the government will still be free to impose stricter regulations or special prohibitions in the national interest.

◆

OPPORTUNITY FOR MORE BUSINESS.

"There is no reason why, during the period of war, Canada should not get a big share of the world's trade heretofore controlled by Europe," said Mr. Richard Grigg, chief Canadian trade commissioner, in an interview. "If we get it in the time of emergency and care for it well, there is no reason why we could not hold it after peace had been concluded. While I am sure that I can say for every citizen of the Dominion that we deplore this great Armageddon on the other side, this appalling and perhaps needless loss of human life, property and business, one cannot be blamed for observing that it is an ill-wind that blows nobody good; that the war is bound to work for the prosperity of those nations and countries not involved, and I think I am safe in saying that Canada proposes to make hay while the sun shines.

"I want to say one word more, and that is this:—Britain herself is by no means out of the world trade and commerce because of the war. The manufacturers, merchants and bankers there are very much alive and are making plans to make the war work out to the commercial credit and benefit of the country. British shipping has not been interfered with yet to any great extent. The government is encouraging the exporters to go after the world trade that Germany is bound to lose, and I believe everything will come out of the war with her commercial prestige enhanced. I believe she will more than hold her own, and if any other countries are helped, commercially, they will be Canada and the United States."

◆

LONDON LOOKS AS USUAL.

Here is a pleasing extract from a letter received by *The Monetary Times* from London, England:—

"Firms are getting work done that they will not want until the war is over, or nearly so, just so as to keep men in work. That is the right spirit. London looks very much as usual. There is no depression anywhere."

CANADA IS A LARGE PRODUCER

That Will Help in Days of European Destruction—Many Bright Rays

Mr. R. D. Bell, of Greenshields and Company, in a discussion of the probable effects on Canada of the European war, says:—

Careful study based on sound principles gives good reasons why the present war should stimulate and better the Canadian financial and business position in some ways, and check and depress in others. Cheerful and popular as it may be to dwell on the former, it is necessary to face both if this discussion is to be of any real value.

At the outset let it be said that panic and paralysis which constitute the immediate effects of the unhappy situation which began at the end of last month, are over. Gradually the world's system of exchange is adjusting itself to the new conditions and in due time it will be effective enough to accommodate our commercial and financial needs.

Canada as a Producer.

The first direct fundamental effect of more than temporary nature concerns Canada as a producer of the products of agriculture and other natural resources. The able-bodied population of Europe has been withdrawn from production. This will materially injure this year's harvest, and will do the same for next year's, even should hostilities soon cease. The food products of Canada and America are already greatly enhanced in value and will enhance still further with the return to normal of exchange and Atlantic shipping facilities.

As this is the fundamental basis of Canadian wealth we have at once a broad underlying cause for increase of the nation's prosperity. This will, no doubt, more than offset this year's decrease in agricultural yield and give us more than the equivalent for the truant bumper crop which all Canada hailed last month as the Moses in the wilderness of depression.

Products of the Forest.

Of other natural products, those of the forest, which come next in size and importance to the field, will be in the main benefited. Whatever the lumber trade may or may not suffer from changed conditions should be offset by the stimulation of pulp and paper production. The tremendous demand for newsprint and the curtailment of the usual supply of all wood products from abroad are already giving us larger markets and higher prices in all such products. Our Maritime provinces should be well paid for their fishery produce. It is as yet difficult to judge the results upon our mineral wealth;—there are many diverse factors.

Remembering, then, that Canada is primarily and essentially a producing country, it must be seen that the primary effect upon us will be larger markets and higher prices for our produce. In other words, without the expense of any more effort or capital, Canada will this year produce from her natural resources far more wealth in terms of money than she has ever produced before, or would have produced for many years to come. It is quite probable that this fundamental factor will in the long run outweigh any effect of the other factors combined.

Industrial and Financial System.

When we approach the industrial and financial system that is reared on the basis of our natural productive ability, there are to be found many complex influences at work. The Balkan war, which began in the autumn of 1912, destroyed enough capital to create an industrial depression throughout the world. So much vaster are the present military operations that the effects of the destruction of capital will be impossible to conceive. At all events Canada is face to face with the curtailment of her supply of capital from abroad. Let us consider what this means.

In the past ten years Canada has been expanding rapidly on a basis of borrowed capital. This money has been spent in the construction of the machinery of production and exchange. The expenditure showed itself in our great excess of imports over exports which was largely due to the tremendous purchases of construction materials.

Now, by the most fortunate chance in the world, Canada's construction programme is effectively completed. While borrowing was easy we erected the machinery to handle a large production—luckily much larger than we even needed

SHREWD INVESTORS NOW

as in the panic period of 1907, are in the market to make purchases of any

INVESTMENT BARGAINS

that are offering.

When war is over, hoarded millions both at home and abroad will seek investment.

Many financiers believe Canadian Securities will then become more popular than ever before. This would mean tremendous appreciation in values.

Write for our list of "Bargain Lots."

It is a blessing that we built for the future, because for some considerable future there will be no more building. That is not necessarily a calamity. Without any further increase to the machinery available for production, we can produce, particularly with the existing conditions in Europe, enough wealth to create, eventually, a greater measure of real prosperity than we have ever known.

Under the circumstances we must expect the late excess of imports over exports, which had been decreasing since our expansion was checked by the Balkan war, to disappear altogether. With new capital and those things for which it was spent largely eliminated, and with the inevitable stop to our customary large importation of luxuries, we will have "favorable" balance of trade, an excess of exports over imports which should be quite large enough to pay the interest on our borrowed capital. Even without higher prices for our products, we should be able to do that. In other words, the economic change brought about by the war, while it will completely reverse our position, will not affect our solvency.

Forced to Quick Adjustment.

But such a change cannot be brought about without a tremendous wrench and much hardship. We have, perforce, to turn to production and leave further construction absolutely. This was a process which we were performing gradually. We are forced now to do it quickly. The worst of this will be felt by those who depend upon new capital and new construction. They must quickly see the writing on the wall and turn to activities directly concerned with production and its distribution. This will entail unsettlement, unemployment and the various other concomitants of hard times, but, in the long run, will increase national prosperity.

Industries which supply the fundamental needs of living to the Canadian consumer and his home should not be injured in the long run.

That Canada has passed through two years of constant liquidation is a source of the greatest strength. We can face the most awful catastrophe of modern times and play our part in ending it without the added burden of an over-extended business position or an inflated financial structure. We are thereby saved a great measure of distress.

◆

ALBERTA FARMERS SELLING DOLLAR WHEAT.

(Special Correspondence.)

Calgary, August 27th.

Alberta farmers are receiving more this year for their grain than at any previous period since grain growing became a factor in this province. No. 1 Northern passed the $1.02 mark yesterday and dollar wheat is no longer a will o'the wisp. A few cars of new grain are going forward, but the bulk of the yield will not be available for three weeks yet, as threshing has barely commenced where there is any quantity of wheat to market. Cattle and hogs are reasonably steady in price and a fair supply is being brought out. The feature of the foodstuffs market is the abundance and cheapness of fruit and vegetables compared to prices asked and paid in former years.

August is apparently due to pass without frost, and if a few more days of September are added to the present summer spell, then the district bounded on the south by High River and stretching northward to or beyond Edmonton will have had an excellent season. This prospect of plenty in the country is the redeeming feature in the world of business now harassed by curtailed credits and lessening trade in the urban centres. The crop movement is responsible for renewed activity at the Ogden locomotive and car shops of the Canadian Pacific Railway in Calgary, where 1,300 men are employed.

It has found work for many who had flocked from the south and east earlier in the year and who were out of employment until harvest time. The good return now accruing to the farmer for his produce will mean additional acreage under crop next year in all except the strip of dried-out country in the south.

A strike of gasoline is reported from the No. 2 well of the Calgary Petroleum Products Company, already owners of the first gasoline well. This announcement had little effect on stock quotations, the war situation apparently absorbing public attention.

MANUFACTURERS ADVISED ON DUTIES

"Forget That a Government Order is Opportunity for Additional Profit," Says Circular

A letter has been sent by the Canadian Manufacturers' Association, of which the following are extracts:

"It is the hope and the expectation of the executive committee of the Canadian Manufacturers' Association that throughout the continuance of the critical conditions with which our country is now faced, every member of the organization will not only recognize his responsibilities, but discharge them in the fullest measure.

"War is serious business—nothing more so. It is the business of a nation, a gigantic undertaking upon whose list of subscribers the name of every citizen must appear. In all things it calls for our best, whether of manhood, of courage and resourcefulness, or of material possessions. It demands of us that we shall give, that we shall sacrifice, that if necessary we shall share all things in common, to the end that we may ultimately achieve success. These are homely truths, self-evident, it may be, but each of us must see to it that individually we do not overlook their practical application.

Quality and Prices.

"In anything you may be called upon to supply the Government, for the use of those who have gone to the front, remember always that the highest quality of material and workmanship is none too good. If our soldiers are to be shod with shoes of your making, see to it that they are good shoes, for a footsore fighter is a poor fighter. Forget, too, that a Government order is an opportunity for an additional profit. Canada's battle is your battle, and you can assist her in no surer way than by seeing that she receives full value for every cent of money she pays you.

"For the time being you are in possession of supplies which, sooner or later, the people of Canada, your partners in the struggle, will want. Regard yourself not so much the possessor as the custodian of these supplies. No one will ask of you that you release them at a loss, but all will expect of you that you will refrain from converting a national misfortune into an opportunity for private gain.

Made-in-Canada Goods.

"Canada's ability, the Empire's ability to prosecute the fight with vigor must depend in a large measure upon the soundness of her industrial institutions and upon her capacity for production. Let us aim to make ourselves as far as possible self-sustaining. Let us buy all our supplies for manufacturing in Canada, from Canadian producers failing that, from within the Empire. The small saving on manufacturing cost that might in some cases be effected by importing from a neutral country will be an insignificant sacrifice compared to the good you will do by ensuring employment for Canadian or British bread winners. The consumer in Canada will no doubt act in sympathy; he will buy your goods in preference to goods that are imported. The press is constantly reminding him of his duty, and he is patriotic enough to respond. All that is expected of you is that you will be consistent, and as the larger buyer set the example.

Employment.

"Indications are not lacking that the coming winter will be a hard one, that our charitable organizations will have their hands full. The most fruitful cause of distress will be unemployment. As an employer of labor you will have not only your responsibilities, but the opportunity of fulfilling those responsibilities.

"In this connection two courses of action are recommended. On the principle that half a loaf is better than none, try as far as possible to keep all your staff working part time rather than a partial staff working full time. Next, remember that business which under normal conditions you would forego, because it promised either no profit at all or an insufficient profit, is business which under existing conditions you should accept because of the wages it will enable you to pay to those who might otherwise go hungry. Use every effort to keep the wheels turning. Lose no business in competition with an importer until you have exhausted every effort to beat him. If need be, take your workmen into your confidence. Your interests are their interests, and they may be found willing to help in ways you would not suppose."

MAY DISCOUNT TOWN'S FUTURE

Municipalities Should be Slow to Assume Liabilities—No Bonusing in Alberta

The great problem of urban municipalities during the past year in many cases has been that of financing the business of the municipality, states Mr. J. Perrie, Alberta's deputy minister of municipal affairs, in his annual report.

As a municipality is, of course, a spending organization, the financial question is always one of its big questions, but during the past year on account of the general financial depression, rather more difficulty has been experienced in meeting obligations than for some time past.

The danger which our municipalities must guard against in connection with this is the danger of their going too far in incurring liabilities to provide for the future of the municipality before such future is firmly established. In a new country such as ours, it is difficult to estimate what the future of a town will be, and it is wise for a municipality to go slow in contracting liabilities until conditions have become so settled that it can be fairly accurately estimated what the future of the town is likely to be.

Danger of Overestimating Growth.

If because of the opinion that there is a great future in store for a town, large indebtedness is incurred and then the expected growth does not follow, the result is that the ratepayers of the municipality will have to assume much too large an indebtedness in proportion to the population and the business carried on, resulting in a bad condition of affairs all round, and the town is likely to lose the future growth which it might otherwise have had if financing had been carried out more carefully.

As well as the loss frequently caused by overestimating future growth, there is also very often a danger of loss through towns issuing debentures to go into municipal ventures that are of a speculative character. Another feature of poor financing to be guarded against is that of issuing debentures for long terms to cover improvements that will have disappeared long before the debenture has been paid.

Prohibits all Bonuses.

Sometimes in the past municipalities have also got into debt through a desire to bonus some industry that they thought would be of great assistance to the municipality. This system of bonusing industry has, however, so frequently proved to be a detriment to the best interests of the municipality and has resulted in giving the municipality a load to carry without any benefit, that the legislature has seen fit by provisions in the Rural Municipality Act, Village Act, Town Act and all the different city charters, to prohibit any municipality from granting a bonus of any kind to any industry. This may seem like rather arbitrary action, but the results will be in the best interests of the municipalities.

◆

IMPORTANT PROVISIONS IN TIMBER CONTRACT.

Last year the pine timber in the Ontario townships of Thistle and McWilliams tributary to Lake Nipissing was offered for sale by public tender. The department of lands, forests and mines made careful examinations of the townships which showed that a large percentage of the timber in them was mature and that the large timber was very faulty. There was a request from the Ontario Pulp Company to be allowed to get a part of its supply in these townships, and there was the danger of fire owing to the construction of the Canadian Northern Railway in the neighborhood.

Under these circumstances it was considered advisable to offer the timber for sale, states Hon. W. H. Hearst, in his annual report, and it was accordingly sold, subject to an increase in ground rent from $5 to $10 per mile, and an increase in the timber dues from $2 per thousand to $5 per thousand, and the important condition was put in that no trees of a less diameter than 12 inches on the stump 2 feet from the ground should be cut. The increase of the ground rent and timber dues was a substantial one and the conditions prohibiting the cutting of small trees were new. The amount realized from the sale was $147.500 or an average per acre of about $3 with $5 per thousand to be paid when the timber is cut.

ENGLISH-SPEAKING NATIONS ARE TRADERS

Their Aim is Law, Order and the Open Door to Commerce Everywhere

"Great Britain, the naval arbiter of peace and commerce in Europe, and largely the protector of the world's maritime lanes for America's foreign commerce, has for decades looked upon the autocratic German Kaiser, not as the guardian of unselfish peace, but as the provocative member of European discord and over-armament.

"The Kaiser wants trade without paying for it by investment and wise rule. In other words, Alexander, Cæsar, Attila and Napoleon are his models.

"The British Empire and United States are tired of war and panic. We want order and the open trade door policy everywhere, for the German people as well as every other people, including ourselves now that our commercial opportunities awaken in a new and wider dawn. Every time hereafter that Germany or Mexico, or any other power, clanks the sabre of disorder and intemperate riot in the fields of commerce and civilization, the police fleet of Britain, United States and the English-speaking colonies will respectively be found there, to call out 'order, gentlemen.' At least that is my observation of recent events in the Far East, Mexico and Europe." So writes Mr. J. Stuart Thomson to *The Monetary Times*. Mr. Thomson is an authority on the Orient and author of books. Mr Thomson, who resides in the United States, is a Canadian and has been for years a worker for the partnership of Britain, Canada and United States in world-development and practical unity of naval police work. He has emphasized the united bond of language, blood, civilization and trade of these nations.

Attack Commerce's Guardian.

"Britain, like America, busy always in industrialism, sincerely wants uninterrupted peace, the open trade door and civilization, but if Germany persists in egging on, in race pride, mobilization, over-armament and war, Britain, without any major loss to herself, is quite prepared on every sea of the globe, to put a check to German belligerent activity, dynasticism, conscription and provocative over-armament. Only last May, the leading business man and financier of Germany, Dr. Jacob Riesser, president of the Hansa Bund of bankers and exporters, member of the Reichstag and professor of finance in Berlin University, wrote me in intimation that Germany was determined to attack Britain's wide flung guardianship of commerce on the high seas, and Britain's colonies as a corollary thereof, in the ambition, as he phrased it, 'to secure a place in the sun.' Soon may Germany covet a place in the shade, where to cogitate, and resolve on the limitations of absolutism and feudalism.

In the Far East.

"Britain does not oppose Germany's peaceful advance to the Mediterranean, through Austria, when Germany has the emigration to populate those countries with a majority of Teutons, who will keep the peace, and allow minorities to live, but Britain does oppose Germany's warlike incursion into Slav, Polish, French, Belgian and Netherlands countries, as it can be for no other purpose at present, except war, intimidation, provocation and disturbance."

In a comprehensive review of the situation in the Far East, Mr. Thomson says:—"Just as America struck Spain hardest in the Far East and not in Spain, so Britain will give Germany one of her first reformatory and punitive lessons in far-away China, where Hong Kong is Britain's impregnable naval dock and arsenal base."

◆

The British government has directed that for the remainder of the present season all shipping between Canadian and British ports should abandon the route through Belle Isle Straits and use that by way of Cape Race exclusively. This will enable the cruisers now employed on the North Atlantic to give more efficient supervision to shipping and protection from any possible interference by German war ships from now until the close of navigation. The wireless station at Cape Race has been restricted from doing any general business and required to handle only naval and official messages.

MUNICIPAL FINANCE IN SASKATCHEWAN

How to Eradicate Difficulties—Debentures for Permanent Works.

Temporary loans have been more difficult to secure during the past year than for sometime previous, comments Mr. J. N. Bayne, Saskatchewan's deputy minister of municipal affairs, in his report. One cause of this condition lies in the fact that municipal authorities very often incurred debts too freely, and actually found it more convenient in many cases to borrow than to collect taxes. Quite frequently too a rather care-free attitude was assumed in regard to the prompt repayment of current loans. One result was sure to follow, the money lending institutions closed down on granting loans until the municipality would collect its available assets in the form of taxes and clear up old indebtedness, a course with which it is hard to find fault. The municipality which is businesslike in securing amounts due to its office and prompt to meet its obligations has little difficulty even at this time of financial depression in obtaining reasonable accommodation at any chartered bank.

Must be for Permanent Work.

Our municipalities and their respective ratepayers are rising to meet the occasion, however, and the latter are finding it much more profitable to pay their taxes before they fall in arrears, while the former are rapidly improving in their methods of financing.

The creating of a debt, the repayment of which is to be spread over a period of years, is a question that should be approached with caution by any municipality no matter what its assets may be. Borrowing of this kind must be for the purpose of some permanent or "long-lasting" work. Its effect on those who will be ratepayers in after years must be considered. Aware of the importance of debenture indebtedness and of the desirability of having such created only where actually needed and advantageous, the government created on the first day of January last a "Local Government Board" whose duties are to supervise and authorize the borrowing by debenture of all municipalities in Saskatchewan. This board is similar in its functions to that of Great Britain.

Saskatchewan was First.

Although it has been created for only four months its existence has already had a beneficial effect on the prices offered for municipal securities. The fact that the purposes for which the loan is made have been subjected to careful scrutiny by the local government board produces a feeling of confidence, as regards its solidarity, in the prospective bond purchaser. The board consists of three men, each appointed for ten years. Saskatchewan is the first province in Canada to establish a board or organization of the kind.

◆

BACK TO THE LAND.

In an interview at Montreal, Mr. H. S. Holt, president of the Royal Bank of Canada, and a director of the Canadian Pacific Railway, was emphatic that the duty of the hour is to keep all activities going for the general benefit, so far as possible. He advocated more production from the land.

"We are an agricultural country," he continued, "producing breadstuffs; producing also wood for paper and other purposes. To what extent have we benefited by the incomparable inheritance which is ours? Why, the poor Belgian farmers would extract more from five acres than we would from 50. The fact is, we do not farm at all—in the best and most enlightened way. We have allowed millions of acres to lie idle; and such as we do claim to cultivate, we neglect and farm in a half-hearted way. A very considerable problem will be solved if the people in the towns and cities—the idle people—will get on the land and till it and extract from it the riches it waits to give the people at large. That is the problem—to cultivate our land, which is our chief riches. The question is pertinent at the present time. We could produce almost incalculable riches from the soil, which is lying idle. In a time like this, when foodstuffs are so precious, this question is well worth thinking about. Above all, it is worth while thinking out how the people who need the land are to be put on it to till it and extract sustenance from it."

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, bu the situation today justifies our conservative yet progressive policy.

CANADA'S EXPORTS INCREASED

June Figures Show Substantial Gain—Trade Openings

After citing the articles chiefly exported by Germany to the United Kingdom, a report of the department of trade, Ottawa, says:—"There are certain lines in which Canadian manufacturers ought to be able to obtain a share of the business if they can quote competitive prices, and above all, fill orders promptly and regularly.

"As an example, information has been received by an influential body of hardware dealers, that as it is practically sure that certain goods which Germany has been supplying in increasing quantities will no longer be procurable, importers must look for other sources of supply, and wishing to enquire into the prospects of being able to obtain hardware generally from Canada, preliminary steps have been taken to ascertain how they are situated.

"It would seem likely that the chief opening would be for export trade controlled by United Kingdom houses, but to illustrate the extent to which German competition has invaded this market, trade returns show that in 1913, imports into the United Kingdom from Germany of wire nails reached 1[illegible],959 tons, and for wrought iron tubes, 37,434 tons.

"A similar state of affairs must affect many of the other branches of trade, and in articles for the production of which Canada possesses natural advantages, manufacturers who can produce economically upon a large scale and are advantageously located for export, should have exceptional opportunities for securing export trade, if they are prepared to take it up in a serious manner."

Total Canadian imports for the 12 months ending June were $593,783,252 as compared with $690,0[illegible]0,335 for the 12 months preceding. Exports for the same period amounted to $473,7[illegible]2,0[illegible]6 as compared with $39[illegible],572,265 for the year ended June, 1913.

INCREASED EARNINGS FOR QUEBEC RAILWAY.

Monetary Times Office,
Montreal, September 9th.

Shareholders of the Quebec Railway, Light, Heat and Power Company will be pleased to hear that matters have not been growing any worse with the company since the present exceptional conditions developed. During the past two years it has been understood that negotiations were under way between Sir Rodolphe Forget and the government by which the company would be relieved from its responsibilities in connection with the Quebec and Saguenay Railway. At different times it was announced that negotiations had been successful and that money had been transferred on account of payment of claims against the railway, though no definite announcement has been made and the public is unaware of the result of the negotiations. While the breaking out of the war has affected earnings in the majority of cases in an adverse sense, it seems not unlikely that the opposite will be the effect in the case of the Quebec Railway Light, Heat and Power Company. The Valcartier Camp is within a short distance of Quebec and from the fact that 20,000 to 25,000 troops are in camp, the earnings of the Quebec Railway through the larger number of passengers carried by the company in Quebec will be augmented. The company also has profited by the establishment of the concentration camp near Quebec, through having obtained the contracts both for lighting and pumping water. The power required in connection with this service is said to be secured from the Jacques Cartier plant.

A sale of 82 acres of land adjoining the Valcartier camp to the government, is understood to have been made by the railway. The requisition order for this property was signed by Col. Wm. Price, who had charge of such matters for the government in connection with the Valcartier camp.

While the earnings of many public concerns in Canada show a falling off because of the falling off in industrial activity, the city of Quebec will not be as much affected from this standpoint as many other Canadian cities, because of the fact that it never has been a great industrial centre. Hence, there will be but slight falling off in earnings from this source.

WHAT A RAILWAY CARRIES

Some interesting figures are given in the Canadian Pacific Railway's report regarding its traffic. The statement of the earnings for the year ended June 30th, 1914, shows:—

Passengers	$32,478,146
Freight	81,135,295
Mails	1,132,714
Sleeping cars, express, telegraph and miscellaneous	15,068,667
Total	$129,814,823

The statement of working expenses for the year ended June 30th, 1914, shows:—

Transportation expenses	$42,250,286
Maintenance of way and structures	10,4[illegible]582
Maintenance of equipment	16,617,247
Traffic expenses	3,626,612
Parlor and sleeping car expenses	1,348,97[illegible]
Expenses of lake and river steamers	1,183,397
General expenses	4,322,103
Commercial telegraph	1,613,687
Total	$87,388,896

The description of freight forwarded compared with 1912-13 shows:—

	1913.	1914.
Flour, barrels	8,093,936	8,802,25[illegible]
Grain, bushels	171,952,738	184,0[illegible]4,241
Live stock, head	1,782,986	2,481,360
Lumber, feet	3,210,306,090	2,953,125,699
Firewood, cords	293,536	287,910
Manufactured articles, tons	9,519,346	8,148,012
All other articles, tons	9,625,665	9,159,112

Freight Traffic.

	1913.	1914.
Number of tons carried	29,471,814	27,801,217
Number of tons carried one mile	11,470,001,871	10,821,748,859
Earnings per ton per mile	0.77 cents.	0.75 cents.

Passenger Traffic.

	1913.	1914.
Number of passengers carried	15,480,934	15,638,312
Number of passengers carried one mile	1,784,683,370	1,587,368,110
Earnings per passenger per mile	1.99 cents.	2.05 cents.

◆

The mills of the Canadian Cottons Company are working to capacity on orders received from the Dominion government for the supply of outfits for the Canadian contingent.

Occasionally someone dies of overwork. But at the same time there are ten people dying from underwork. From which it may be seen that the risk of not working is great.

The Governor's speech in the Newfoundland legislature, stated that the purpose of the session was to enact bills for creating and financing a regiment, insuring public safety by providing a moratorium if necessary; also for the regulation of prices of food.

The mineral production of Ontario in 1913 had a total value of $53,207,311, the largest yet recorded in any year. Of this $37,507,935 was of metallic, and $15,699,376 of non-metallic substances. The increase over the output for 1912 was $4,865,000, or more than 10 per cent.

The suggestion that Canada is prohibiting the exportation of foodstuffs to any country but Great Britain is regarded here with interest. Canada, apparently, stands to gain very considerably by the present position, as the enhanced prices which she will certainly obtain for her wheat will make a big difference to her farmers.—London Financial Times.

The British chancellor of the exchequer, Lloyd George, has introduced a bill in the House of Commons enabling him, instead of actually issuing notes to bankers, to issue certificates, so as to give the bankers the benefit of State credit without actually taking out notes. The chancellor considers that this will undoubtedly be of great advantage in assisting them to finance trade.

Canadian Railroads and Earning Power

It has increased in ten years by 167 per cent.—Analysis of the Dominion's transportation problem reveals some interesting facts—Roads will establish new records in both expenditure and additional mileage

By J. L. PAYNE,
Comptroller of Statistics, Department of Railways and Canals, Ottawa.

(Reprinted from *The Canadian Engineer*.)

THE construction account of Canadian railways during the past decade runs into amazing figures. I cannot, however, go into details for the years prior to 1907, in which year an entirely new system of statistics was made effective, and must, therefore, content myself in this relation to deal with the facts since 1906. For that seven-year period, from 1907 to 1913, inclusive, there was an addition to capitalization of $465,949,063, or an average of $66,564,152 per annum. Cash aid by the Dominion, the provinces and municipalities amounted to $49,171,811 during the same term, or at the rate of $7,024,544 per year. Joining these two items of capitalization and aid, we have a total for seven years of $515,120,874, which would be equal to an average of $73,588,695 per annum. It might fairly be assumed that this large total represented the outlay, dollar for dollar, on construction. The increased capitalization includes $193,000,000 of stocks, which ordinarily would yield little or nothing in cash; but, in this instance, all but $65,000,000 of the aggregate has been made up of Canadian Pacific issues, which were sold at a substantial premium. It might, therefore, be taken for granted that the actual expenditure did not fall far short of the liability.

On the assumption that construction cost is fairly represented in the growth of capital liability, plus cash aid, two or three interesting facts are disclosed by analysis. During the seven years immediately under review, 7,951 miles were added to operative mileage in the Dominion. Of course, all the capitalization in question did not produce railway mileage in actual operation in 1913. Liability must necessarily precede the handling of traffic. On the other hand, there was undoubtedly more than $100,000,000 worth of bonds outstanding which had not been brought into the account; so that operative mileage left out might be regarded as balancing liability omitted. On that basis of calculation, since 1906 capitalization equalled $58,410 per mile per annum, and cash aid $6,183 per mile per annum. Such averages clearly show that (1), on the whole, we have been building railways up to a good standard, and (2) that public aid has been extended in generous measure. It is not straining the truth to say that no other country has been making such great sacrifices to provide itself with transportation facilities.

The cash aid of something like $5 per family per annum during the past seven years is only part of the story. Within a little over ten years the Canadian people has made itself liable for principal and interest in connection with guarantees of bonds aggregating $320,000,000, including the liability of $45,000,000 on account of the Canadian Northern, voted by Parliament in May last. This would bring the total of aid in cash and guarantees up to not less than $25 per family per annum during the past decade. It may demonstrate a splendid faith, or, in another aspect, it may merely reflect a sense of urgent need. No matter in what light it may be regarded, the liability, direct and indirect, is a matter of serious importance. The Canadian Northern has received a large proportion of the aid, both in cash and guarantees; and that system will unavoidably have a considerable unproductive mileage for some years to come. That is to say, the construction work it has had under way, and is about to undertake, lies very largely in those portions of the north-west which have not hitherto been served by railways; and it is a railway axiom that pioneer mileage does well if it earns operating expenses for the first three years. Nevertheless, the rapid settlement of the western provinces may create traffic quite sufficient to provide for the large fixed charges of the Canadian Northern system when it has been completed and placed on an operating basis.

The construction of the Moncton-Winnipeg section of the Grand Trunk Pacific should also be taken into the account of public aid to railways. The expenditure by Government on this work has already reached $150,000,000, and the Minister of Finance has stated in Parliament that the final cost will be $235,000,000, including interest on capital outlay up to such time as the agreement with the company which is to take it over becomes effective. This would bring the public contribution up to a little over $34 per family per annum during the past ten years, with more to come. The cost of the Transcontinental has been placed at $100,000 per mile, and this fact should carry with it the assurance that Government has built 1,805 miles of line up to a standard not hitherto attempted in Canada. Whether or not Government was setting a pattern, it is obvious that the days of cheap and more or less makeshift railway construction have passed. A low-grade railway may have been defensible in earlier times. It was a case of that kind of construction or nothing. But in these days it is recognized as sheer waste to follow such methods. Experience has amply demonstrated that it is true economy to build on sound lines and with a view to future needs.

If, however, Canada has added on a large scale to her capital liability on railway account during the past seven years, it is clear that the next seven years, barring some extraordinary disturbance in the financial situation, will establish new records in both expenditure and additional mileage. This prediction is not based on mere optimism. It rests on facts. Just a year ago there were in the Dominion 18,648 miles of line in various stages of construction. That was more than the entire operative mileage of the country in 1901. Of these 18,648 miles reported as being "under construction," nearly 9,000 miles were actually under contract. About 3,500 miles were completed, and 6,560 miles had not passed the survey stage. These are big figures. While this vast work was scattered all the way between the two oceans, more than 70 per cent. of it was located west of Ontario. At this moment it cannot be said how many miles were moved into the operating column during the past year; but for every mile completed, it is probable the construction of another mile was begun. It will involve a very large expenditure to carry this mileage to a finish and to equip it for the movement of traffic. It will also mean the employment of an army of men not now identified with transportation.

The labor aspect of railway operations in Canada is not generally recognized. It may not be amiss, therefore, to present a few facts in that regard. In 1913 there were 609 employees per 100 miles of line, as compared with 551 in 1907. This magnitude will increase with the growth of traffic. The total number last year was 178,652; and that figure represents an average increase of nearly 10,000 per annum during the past six years. The wages bill in 1913 reached the large total of $115,749,825, and made up 63.59 per cent. of operating expenses. In fact, if the matter be carefully examined, it will be found that, directly and indirectly, transportation interests provide a living for about 20 per cent. of the entire population of the Dominion. On the other hand, the cost of transportation, viewed as a tax, rises above all other public imposts, both in magnitude and distribution. Speaking broadly, nobody can escape the levy for carriage, or its incidence; whereas customs, municipal and other forms of taxation may in large measure be avoided by a considerable number in every community.

The ancient controversy as to the priority of the hen or the egg has its counterpart in the question as to whether transportation facilities create trade or trade creates transportation facilities. Without expressing any opinion on the subject, I have long been watching the co-ordination of these forces; for they do co-ordinate. Traffic and trade must move together. They are dependent on each other. Trade cannot grow without marketing facilities; and, just as the ship preceded settlement, so the railway must provide the channel for a nation's commerce, otherwise, there will not be any considerable volume of commerce. Leaving the matter at that point, it will be helpful to see by ten-year periods how Canada's railway mileage has grown. Here are the facts:—

	Miles.		Miles.
1863	2,189	1893	15,005
1873	3,832	1903	18,988
1883	9,577	1913	29,304

Traffic has moved upward with available mileage. Could old and new mileage be separated, it would undoubtedly be found that the former carries the larger proportion of traffic. New mileage, as has been said, must to a large extent develop its business; and this is often a slow process. The following little table shows the total tonnage hauled and the volume per mile of line since 1883:—

	Tonnage.	Per mile of line.
1883	13,266,255	1,384
1893	22,003,599	1,466
1903	47,373,417	2,495
1913	106,992,710	3,651

It will be observed that the productivity of old mileage has more than offset the dilution brought about by new mileage; and the table as a whole may be taken as showing in a most striking way the expansion of the Dominion during the past thirty years. That expansion is exemplified in the fact that while there was the largest addition to mileage between 1903 and 1913 there occurred during that same decade the largest increase of freight traffic. Passenger business does not show the same ratio of development, as the following table makes plain:—

	Passengers.	Per mile of line.
1883	9,579,984	1,000
1893	13,618,027	907
1903	22,148,742	1,166
1913	46,230,765	1,577

There has been little change during recent years in the proportionate relationship of commodities to the total volume of traffic. For example, products of agriculture made up 16.85 per cent. in 1907, and stood at 16.31 per cent. in 1913. Products of mines and manufactures have shown the principal growth. The former grew from 18,460,172 tons in 1907 to 40,230,542 tons in 1913, while the latter expanded from 7,974,641 tons to 19,694,240 tons during the same period. Nevertheless, the percentage of each class to the whole was not materially altered, except in those two cases. This would seem to show that production has followed along constant lines, and that growth, as represented in traffic, has been fairly uniform among the seven classes.

In no other respect does the widening of Canadian railway interests show up so impressively as in earning power. Going no farther back than 1888, and giving the facts at five-year intervals, the following table tells a strong story:—

1888	$42,159,152	1903	$ 96,064,526
1893	52,042,396	1908	146,918,314
1898	59,715,105	1913	256,702,703

It will be seen that as between 1888 and 1898 there was an increase of 41.6 per cent., whereas between 1903 and 1913 the betterment amounted to 167.2. This highly satisfactory result was achieved without any increase whatever in ratio. Net earnings showed up equally well. As between gross receipts and operating expenses—the popular method of measuring net earnings, but not the sound way—there was an advance from $11,507,106 in 1888 to $74,691,013 in 1913. Thus, while gross earnings grew by 509 per cent. during the whole period of 25 years, net earnings grew by 548 per cent. During at least 18 years of that period, there was on one hand a slight reduction of freight rates; while on the other there was a steady and pronounced advance in operating cost as represented chiefly in wages, prices for materials, and so on. Our railways have, therefore, raised net earnings very largely by better methods of operation.

At this point it would seem to be opportune to pause and ask: What, probably, will be the effect of the war now under way on the railways of Canada? No one knows; no one can do more than conjecture. The situation is as novel as it is staggering. It is a distressing topic, since war in all its aspects means waste. War is destructive and not constructive. To just the extent that Canadian commerce is hindered and production restricted there will inevitably be a reduction in the volume of traffic. Traffic is the life blood of railways. As it declines earnings fall off, and as earnings fall off the railways must cut down operating cost. The immediate effect of such economies will be a diminution of the pay roll, and we have already seen that salaries and wages make up 60 per cent. of operating expenses. The injury does not, however, end there. For every five persons who obtain a livelihood directly from the operation of railways at least one other person is dependent on that source indirectly. It therefore calls for no particular prescience to foretell a hard and trying year before the railways of Canada and all associated interests.

How far will the war bring about an enforced halt in construction work? The importance and far-reaching nature of such a question is obvious. Many thousands of miles of new line are in process of building, and other vast projects are assuming positive shape. The money markets of the world have been paralyzed, and money to the railway builder is what traffic is to the railroad operator. Therefore, we must look for some let-up in construction activity. It is inevitable. Let us hope it may be of short duration. When the war is over, we are likely to see a period of unparalleled expansion in Canada. We have the inchoate material for a development beyond our most sanguine dreams.

From the railway point of view, the recent troubled situation has been hurled upon us when we were proud of our progress and strong in our faith. Our railways had established a surprising record of growth, and great plans, expressive both of our transportation needs and our accumulating energy, were under way. In 1913 they had made an unprecedented addition to equipment, and were in a fine position to meet a swelling of traffic. Had all this happened as the result of mismanagement or miscalculation, from some cause suggesting internal weakness, the situation would be vastly different; but it came when our railway situation, viewed as a whole, was sturdy and sound. Therefore, while we may be embarrassed, we shall be able to take up again the immense work on this northern half of the American continent pretty much at the point where it suffered interruption.

PERSONAL NOTES

Mr. E. T. Miller has been appointed branch manager at Regina, Sask., of the Imperial Life Assurance Company.

Mr. W. A. Marsh, one of the directors of the Quebec Bank, died recently.

Mr. James J. Hill celebrated his seventy-sixth birthday on September 16th. Mr. Hill was born near Galt, Ont., in 1838.

Mr. J. Manuel, a well-known citizen of Ottawa, died at his residence in that city on Saturday. He was a director of the Ottawa Gas Company and the Ottawa Light, Heat and Power Company and a large shareholder of the Canadian Bank of Commerce.

Mr. A. E. Ham, insurance superintendent for Manitoba, will represent the Association of Western Superintendents of Insurance of Canada on the national council of the World's Insurance Congress, to be held at San Francisco during the Panama Exhibition next year. Mr. A. W. Ross will represent the Mainland Fire Underwriters' Association of British Columbia.

Mr. A. J. C. Galletly, retired bank manager, died suddenly at Victoria, B.C. The late Mr. Galletly became identified with the banking business by joining the staff of the Bank of Montreal, and holding important posts successively at Montreal, Brockville, Brantford, Port Hope and Halifax. He went to Victoria in 1889, and made that city his home ever since, retiring from the management of the branch in Victoria about two years ago.

Mr. R. B. Burland, formerly manager of the Home Bank of Canada branch at Neepawa, Man., has been appointed manager of the office of the Home Bank recently opened in Calgary. Mr. V. F. Chalmers, formerly manager at Grandview, Man., takes charge of the Neepawa branch. Mr. H. C. Wilson, formerly manager at Welwyn, Sask., takes charge of the Grandview branch, and Mr. J. B. Lorimer, from the Winnipeg office, goes as manager at Welwyn, Sask.

Professor Adam Shortt, who contributed an important article to *The Monetary Times Annual* early this year, has just returned from England, where he has investigated civil service organization and conditions with a view to their application to Canada. In Birmingham, Dr. Shortt, as a result of war conditions, had little ready money in his possession as the bank holiday extended for several days. In order to save enough to pay for his room at the hotel and to get to London, he made his last two meals on fourteen cents—a practical application of economics. On arrival in London he was able to cash a letter of credit by the intervention of a friend in the Bank of Scotland before the banks actually resumed business.

Mr. R. M. Ballantyne, of Montreal, was one of the seven new directors of the Canadian Coal and Coke Company elected at the annual meeting last week. Seven new names were added to the board and five of the old board retiring. Those added to the board were: Messrs. T. H. Saunders, Cleveland; D. W. Campbell, R. M. Ballantyne, O. W. Donner, Wm. Dobell, W. B. Ross and H. Beverley Robinson, while the members of the old board retiring are: Messrs. E. B. Greenshields, J. Stanley Hough, C. H Cahan, J. N. Greenshields and Raymond Brutinel. The board, as made up at present, consists of Messrs. H. A Lovett Hon. Robert Mackay, Hon. Nathanial Curry, J. W McConnell, T. H. Saunders, D. W. Campbell, R. M. Ballantyne, O. W. Donner, Wm. Dobell, John T. Ross, A H. Cook, W. B. Ross, and H. Beverley Robinson.

◆

PIT PROPS WANTED AT ONCE

Urgent inquiries have been received at the department of trade, Ottawa, from Great Britain with regard to pit props, owing to the Baltic being closed. Prices have risen from 25 per cent. to 50 per cent., and are still rising. The props should be 4 to 6 feet long and 3½ inches to 4 inches in diameter at the small end Spruce, pine and tamarack would be suitable, and the quantities are very large. Firms prepared to supply props should communicate at once with the department of trade and commerce, Ottawa.

A large supply of props is absolutely necessary for the prosecution of colliery operations in Great Britain Having regard to the importance of this matter, both from a business and patriotic point of view, it is hoped that every possible effort will be made to supply an urgent need. A cable received states that over a million pit props are urgently needed, chiefly fir, 4 feet to 7 feet long, 5 inches to 6 inches diameter tops; also straight poles, fir, spruce or larch, 20 to 30 feet long, 5 inches to 9 inches.

◆

There is only one way to get business: do it.

CANADA'S MOTTO IS BUSINESS AS USUAL

Some facts and figures and cheerful sentiment cited for the benefit of occasional wavering faith in a great country.

"I WOULD bid the people of Canada to be of good cheer. This is a time for courage and confident belief that the resources of the Dominion are equal to every stress which we may be called upon to meet. The present struggle has dislocated industry throughout the world, but it has also given great opportunities. The people of Canada should avail themselves of these.

"A better and wider market for food products is certain for some time to come at good prices, and Canada should increase as much as possible the area of cultivation, in order to profit thereby. This must necessarily tend to give an impetus to agriculture, the great basic industry of the country which will not only maintain, but strengthen our resources.

"Again, the Dominion can undertake the manufacture of many articles not hitherto made in Canada and thus do much to supply employment for those artisans and laborers who are temporarily out of work owing to the changes brought about by the war.—The Duke of Connaught at Canada's National Exhibition, Toronto.

WORK FOR 10,000 MEN

Sir William Mackenzie states that the Canadian Northern Railway will soon put 10,000 men on the finishing of the system.

CHANGE FOR THE BETTER

To *The Monetary Times*, Mr. J. H. Plummer, president of the Dominion Steel Corporation, says:—"Enquiries from abroad are beginning to reach us and a few weeks may change the situation for the better."

TEN TEXTILE MILLS BUSY

The favorable effect of present conditions upon the Canadian cotton industry has resulted in the resumption of full working time in the ten mills of the Dominion Textile Company, Limited.

BIG ORDER FROM ENGLAND

A rush order from England for 500 piano actions has been received by a Canadian house, *The Monetary Times* is informed by a member of the firm in question. This business formerly went to Germany.

PAINT BUSINESS IS GOOD

Announcing the usual quarterly dividend of 1¾ per cent. on preferred stock, payable to shareholders of record on the 15th, vice-president and manager C. C. Ballantyne, of the Sherwin-Williams Company of Canada stated that business was being maintained, that the company was in a strong financial position, and that there need be no anxiety regarding the payment of interest and dividends in the future.

WANT AGRICULTURAL LANDS

During the past month, the Saskatoon board of trade has received an unusual number of inquiries from various portions of the United States, with regard to the agricultural lands in the district. Practically all of such come from diversified farmers. Few of them are interested in land solely for wheat raising; in fact, those at present enquiring are farmers, men whom merely grain growing would not attract, but to whom it has now been demonstrated that this country is as well adapted for the growing of all farm crops and the successful handling of every branch of animal husbandry, as it is for the production of the world's finest wheat and oats. In contemplation of the achievements of mixed farmers now in the west, it is being borne home that if for merely grain growing the land was cheap a few years ago at $5 per acre, it is now cheaper for diversified operations at its current value of from $20 to $30 per acre—that is, from the standpoint of profitable productivity for its owner.

KNITTING COMPANY AT WORK AGAIN

The Oxford Knitting Company, Woodstock, Ont., which closed its plant shortly after the beginning of the war, resumed operations on Monday, with its full staff of 150 hands.

OCTOBER DIVIDENDS COMING

October dividends already declared call for a total disbursement to shareholders in concerns of a Canadian capital interest amounting to $13,456,748.

CANADA HAS BEST PLACE

That Canada should suffer least, have a quicker recovery from the effects of the present war, and ultimately make more from it than any other country in the world, is the opinion of Dr. Adam Shortt, civil service commissioner at Ottawa, and one of the best authorities on economics in the Dominion.

MOVING THE WESTERN CROP

The Canadian Pacific Railway will have a busy six weeks moving the harvest. For this it makes preparations in advance. Our wheat and grains of all descriptions will put about $250,000,000 in the pockets of the western farmers, while the higher prices which will obtain for wheat, especially, will compensate for any lessened bulk that may obtain. The company has on hand about 95,000 freight cars, and is turning them out at the Angus shops at Montreal at the rate of ten a day.

TASTE OF CANADIAN JAMS

The embargo on the exportation of jam from the United Kingdom will increase the demand for Canadian made jams. During the fiscal year ending March 31, 1914, over $500,000 worth of jams, jellies, and preserves were imported from the United Kingdom into Canada. The deficiency created by the shutting off of these imports under the embargo instituted by the British government must be made up by the Canadian jam factories.

INDUSTRIAL INQUIRIES AT MEDICINE HAT

That there is a continued substantial interest in the location of new industrial concerns in Canada, particularly from the United States, despite war conditions, is shown by a statemend made by secretary Willcox, of the Medicine Hat board of trade. During August, the records of Mr. Willcox's office show that there have been ten bona fide inquiries from industrial men, who desire special information before deciding at what point to locate a new factory in Canada. The inquiries were received mostly from widely scattered points in the United States, and one or two from other parts of Canada.

ALBERTA MAKING CROP HISTORY

"The profit of Alberta is represented by an increased production of all our agricultural products," says Premier Sifton. "Our essential industries, grain, live stock, and other forms of agriculture, are stimulated, and as a result our farmers are receiving greater returns for the capital and labor invested. The immediate effect of the war has been to encourage a rural movement from the urban centres and a larger area will be under crop next year than at any previous time in the history of Alberta."

BUSY AT FORT WILLIAM

Western Canada is once again sending grain to the head of the great lakes, and every hour sees a hundred wheat-laden cars cars arriving at Fort William and distributed to the terminal elevators. On September 5th and 6th 1,500 cars arrived at this terminal and the number is being exceeded each day. By September 15th nearly 1,000 cars per day were arriving and will continue at this rate for the next two months anyway. The bulk of the wheat received so far has graded one and two northern. No grain has been received yet of a lower grade than three northern.

CASH FOR PRODUCTIVE WORK

More production is an agricultural text upon which Mr. C. M. Cutts, an Alberta farmer, is basing practical work. He has a half section of land about two miles west of Aldersyde, near Calgary. He has made $4,525 from it this season.

Talking of his farm and work Mr. Cutts said:—"After retaining all my barley crop for feed, and all the seed and feed oats required for next year, I will be able to sell 6,500 to 7,000 bushels of oats and something over 100 head of hogs.

"Estimating the value of grain at the price I have been offered and the hogs at 8 cents per pound, which is somewhat under the present market price, I will be able to realize as follows from their sale:—

6,500 bushels of oats at 45 cents	$2,925
100 hogs (200 pounds) at 8 cents	1,600
Making a total of	$4,525"

More production allows one to jingle a little spare cash in one's own pockets instead of hearing it jingle in the lender's.

OPPORTUNITY FOR WOOD PULP TRADE

The sudden cessation, as a result of the war, of German exports of sulphite pulp to the United States has had the effect of diverting to Canada many contracts relating to the supply of paper. The Dominion is capable of producing unlimited supplies of wood pulp, and owners of timber rights of a suitable character, no less than actual manufacturers of pulp in Canada, are receiving a large number of valuable orders from the United States, the volume of which seems likely to increase. The production of wood sulphite, says the London Financial Times, has during recent years been a precarious industry; that is to say, the profits have been small and the risks great. Germany, however, with that ability for adaptation to commercial conditions which is so important a factor in her industrial success all over the world, has contrived to obtain a virtual monopoly of the wood pulp business, and apparently has made money out of it. Fortunately, Canada now has a chance of securing practically the whole of the trade. It is no betrayal of business secrets to state that paper manufacturers all over the world are searching for supplies of raw material now that the German market has been closed, and are paying whatever prices are asked in order to fulfil their contracts. If the Canadian interests are wise they will not exact exorbitant terms, but will stand out for contracts covering a period of years on a fair level of prices.

◆

Prices and values must be right.

Some are born moratorious, some achieve moratoria, and some have a moratorium thrust upon them.

CANADIAN LOCOMOTIVE COMPANY

Demand for Products Was Smaller—Company's Financial Position

Reflecting a period of financial liquidation in Canada, the annual report of the Canadian Locomotive Company was presented to the shareholders on Thursday.

The manufacturing profits of the Canadian Locomotive Company for the past year amounted to $334,114, as compared with $377,043 for 1913, being a decrease of $42,928. The interest from investments was $7,942.

The manufacturing profits and income from investments totalled $342,057, which has been disposed of as follows:—Bond interest, $90,000; preferred stock dividend, $105,000; adjustment of accounts and loss on investment bonds sold, $14,168; transferred to reserve for special replacement account, $40,000; balance to credit of profit and loss account from year's operations, $92,889. There now stands at the credit of profit and loss account $303,300, at the credit of reserve accounts $140,000, and an accumulation out of profits of three years' operations of $443,300.

Railways Did not Need Equipment.

The decrease in profits as compared with those of the previous year is accounted for, stated Mr. Æmelius Jarvis, president, by the smaller output of the works as a result of the curtailment of orders by the Canadian railways.

The cost of additions to the plant for the year amounted to $346,589, the funds for which have been provided by the sale of the company's investment bonds (the proceeds of which amounted to $277,140) and the balance has come out of accumulated profits.

The additions to the company's plant and equipment are expected to be completed within the next three months at a cost estimated not to exceed $50,000. The capacity of the works when completed will be from 15 to 20 locomotives per month.

The trade of Canada for the past 12 months has been steadily diminishing, consequently the railways' present equipment was ample for their existing mileage and needs. For this reason, added to the difficulties of obtaining money, many good orders from the railways have been postponed. On the other hand, a large amount of railway mileage in Canada is fast reaching a point of completion, to operate which additional equipment must be required. As our new plant is now practically completed we will be in an exceedingly advantageous position to take care of new work when it is offered.

Liquid Assets and Liabilities

At the present time the company is practically out of orders. The directors, foreseeing this situation, have guarded the company's financial position so as not to jeopardize the payment of interest and fixed charges. This is evidenced by the statement of liquid assets, which amount to $686,782, with quick liabilities of $139,806, or net liquid assets of $546,976.

The depreciation reserve account has not been added to this year, as the plant being new, the amount of $75,000 at the credit of this account was thought sufficient, and after laving aside $40,000 for special replacement account, the balance of $92,889 was placed to the credit of profit and loss.

Messrs. George A. Touche and Company, chartered accountants, examined the books, etc., of the company and their certificate was attached to the company's report.

While the company's earnings declined slightly, they are eminently satisfactory in view of the general dislocation of the company's plant during alterations and extensions. These changes amounted practically to a rebuilding of the plant and in the case of less enterprising firms might have meant the complete shut down of production while the alterations were proceeding. This work demonstrated ingenious engineering and good management and reflects the greatest credit upon the work of Mr. A. W. Wheatley, the general manager and his co-directors.

◆

Revised version says: "George, did you plant that cherry tree?" "Yes, father. I cannot tell a lie. I did it with my little tools; and also the apple and plum and pear tree; the wheat and the oats and the corn; the truck garden and the grape vine. I did it, father, because I believe this war is a straight tip to more production, and more production means more money and less borrowing."

War, Finance and Commerce

French Defence Bonds.

A decree has been signed in Paris to issue treasury bonds of from three months to a year, of 100, 500 and 1,000 francs and national defence bonds at 5 per cent.

Peru Ends Moratorium.

The Peruvian government, which proclaimed a moratorium for 30 days on August 7, has announced that payments will now be resumed.

Bordeaux Bourse Reopens.

A dispatch from Bordeaux says that at the request of M. Ribot, the minister of finance, the brokers have associated and decided to reopen the bourse at Bordeaux.

Horses for British Army.

Major L. Meredith and Dr. T. Greenside, of London, Ont., who represent the British government, made this week from Cincinnati, the first shipment of 3,000 horses for the use of the British army in the European war.

Krupps and War Loan.

Among the subscribers to the German war loan are the Krupp firm and family, who have taken $7,500,000 of the bonds. Further large subscriptions already have been received by the Reichsbank, says one of those optimistic Berlin dispatches.

Rothschilds Refused Coupon Payment.

The Austrian government, says a London cable, has offered to remit money for the payment of the coupons of the Hungarian loan of 1914, but as this would involve a transaction with an enemy's government the London firm of Rothschilds have declined to accept the offer.

Russia Buys Ice Breaker.

The Russian government has bought from the Great Lakes Towing and Wrecking Company a big ice breaking tug, which will leave immediately for Montreal to cross the Atlantic. It is believed the ice breaker is wanted to assist in keeping open the Russian White Sea port of Archangel.

Trading with the Enemy.

An extra of the Canada Gazette announces that "it is contrary to law for any persons resident in British dominions to trade or have any commercial or financial transactions with any person resident or carrying on business in the German Empire or Austria-Hungary without permission of the authorities."

Bank Cashes Belgian Notes.

The Bank of England has undertaken temporarily, on behalf of the National Bank of Belgium, to cash Belgian bank notes at the fixed exchange of 25.40 francs per £1. The arrangement has been made solely for the purpose of enabling refugees from Belgium to this country to obtain moderate amounts of cash to meet their immediate needs.

Fortunes for Dutch Mobilization.

Telegraphing from the Hague, the correspondent of the Exchange telegraph says that Queen Wilhelmina has accepted the offer of six of the richest men in Holland to give one-tenth of their fortunes to pay the expenses of the present mobilization, which is costing 1,000,000 guilders a day. A guilder is equivalent to about 48 cents in Canadian money.

Chocolate for Troops.

Messrs. William Neilson, Limited, Toronto, offered to supply the government with 65,000 bars of chocolate, for use in whatever manner the government should choose and the offer has been accepted by the minister of militia. The chocolate will be shipped to Valcartier, and from there will be trans-shipped with the Canadian commissariat to Europe.

Bank of Germany Statement.

The Imperial Bank of Germany issued the following statement on September 7:—Bullion, bank certificates and bank notes decreased 5,078,000 marks; gold increased 23,649,000 marks; lombards increased 3,883,000 marks; discounts and treasury certificates decreased 70,298,000 marks; commercial paper decreased 46,621,000 marks; notes in circulation decreased 96,807,000 marks; deposits decreased 22,395,000 marks.

Goods Made in the Empire.

"Whereas this country, as a part of the British Empire, is at war with Germany and Austria through the autocratic action of the military faction in Germany violating their solemn pledge to respect the neutrality of Belgium, and whereas inter-commerce between Canada and the enemies of the British Empire would materially strengthen those opposed to us and prolong the war. Resolved, that this meeting of the Winnipeg branch of the Retail Merchants' Association of Canada, Incorporated, recommend to all retail merchants to abstain from buying and selling goods made in Germany and Austria, and to deal in goods made in the British Empire and those countries which are friendly to the allies who are waging a war for civilization and humanity against the spirit of brute force as personified by the Kaiser."

◆

CENTRAL ALBERTA GETS GOOD PRICES

(Special Correspondence.)

Calgary, Sept. 10th.—The Central Alberta farmer is in receipt of war prices for things produced at a cost lower than for some years. Economy of production, preached during a period of low prices, reached a new point this season. Yet the greater part of this output, prepared for market under these conditions, is to-day bringing an average price almost thirty per cent. more than it did twelve months ago.

Besides the increased demand for foodstuffs supplies in the ordinary way, there is a good market for remounts, buyers from the British war office attending the larger centres to take over sound horses between five and nine years old and weighing between 1,100 and 1,300 pounds. For animals of this class the net price is about $165. To facilitate this trade the horse ranchers are arranging to have buyers visit their ranches, make selections which the horse wranglers will break to ride and drive, and when this is accomplished the animals are to be presented for acceptance or otherwise. This obviates the necessity of breaking horses which for any reason do not conform to the ideas of the War Office.

An effort is being made to create a fund in Calgary for the purpose of buying live stock, preferably milking cows, re-selling to farmers who are in a position to handle more than the number they have—but are without capital to finance the transaction—and accepting repayment on the instalment plan. There is evidently a wide field for an enterprise of this kind, and, judging from the names of prominent men who are lending their support to the scheme, something satisfactory should develop. There is also in contemplation a plan for assisting farmers to seed a larger acreage next year than they would in ordinary circumstances. It is proposed to have the Dominion Government guarantee a fund which would be raised in the first instance by some public body through a bank, and in the rather improbable event of the farmers and the organization being unable to repay, the government would do so.

A "Made in Calgary, Canada or the Empire" agitation is being pushed by many manufacturers and wholesalers here, who are urging shoppers to ask for goods manufactured by Britishers.

◆

Oh, to be a loan in London, says the municipal debenture.

The Union Bank of Canada has contributed $25,000 to the National Patriotic Fund.

"*The Monetary Times* urges that Canada's motto at the present juncture should be 'Business as Usual.' Then it tells of good business in all manner of lines," says a Great West Life bulletin. "That is the way—the Great West way. We Life men, of all people, may feel cheerful. We are selling a 'legitimate line' with a demand that ever grows."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Simcoe, Ont.—The bonds for hydro-electric extension to Simcoe have been sold.

Weston, Ont.—No bids were received for an issue of $22,152 5½ per cent. sewer debentures.

Barton Township, Ont.—Tenders are invited for $61,000 5 per cent. 20 and 30-year debentures. A. E. Bryant, clerk.

Chatham, Ont.—On October 12 ratepayers will vote on a by-law to issue $90,000 debentures for electric substation, etc.

Cardston, Alta.—The recent issue of debentures for which tenders were desired remains unsold, no satisfactory bids being received.

District of Saanich, B.C.—By-laws to raise $825,000 for street improvements and waterworks are being voted on tomorrow, September 19th.

Montreal, Que.—On account of the European war, the firm which recently acquired $730,000 4½ per cent. debentures, asked the board of control to cancel the sale of $624,000.

St. John, N.B.—An issue of $125,000 bonds may be decided upon for various expenditures already authorized, as it is anticipated that the debentures will be absorbed by local investors.

Truro, N.S.—Three bids were received for the recent issue of $74,250 5 per cent. 30-year debentures. Messrs. F. B. McCurdy and Company, Halifax, being the successful tenderers.

Oakville, Ont.—Permission has been received by the town clerk from the municipal and railway board to proceed with the issue of $35,000 worth of debentures for extension of waterworks.

Peterboro, Ont.—A credit balance of $47,4[illegible] is shown in the city's financial statement for the last seven months. An issue of short term bonds amounting to $100,000 is likely to be made shortly.

Goderich, Ont.—A by-law to loan the newly-organized Goderich Furniture Company, Limited, $25,000 and give the company a fixed assessment of $10,000 for a period of 20 years has been carried.

Shoal Lake, Man.—Tenders will be received up to October 15th for $11,000 5 per cent. 20-instalment debentures. F. Dobbs, secretary-treasurer. (Official advertisement appears on another page.)

Alberta.—The following school districts have been empowered to borrow:—North Clover Bar, No. 3117, $1,200. Jas. T. Trueman, Bremner. Wetaskiwin, No. 264, $8,500. E. E. Chandler, Wetaskiwin.

Neepawa, Man.—Several firms intimated to Mr. J. W. Bradley, secretary-treasurer, that owing to prevailing conditions, they were unable to make an offer for the issue of $7,500 6 per cent. recently offered.

Hamilton, Ont.—The board of control have recommended that this city give $20,000 towards the Hamilton to Toronto roadway scheme proper, and an additional grant of $10,000 to pay Hamilton men engaged on the job.

Medicine Hat, Alta.—The mayor read a statement at a recent council meeting which showed that the city owed the bank some $173,000, about $40,000 was owing in outstanding accounts, and some $62,000 was owed on contracts.

Excelsior, Alta.—A resolution authorizing the reeve and secretary-treasurer to renew our notes to the Canadian Bank of Commerce, one for $1,500 due August 29th, the other of $1,000 due September 1st was carried at a recent council meeting.

Calgary, Alta.—Five Canadian banks, with branches in Calgary, have each agreed to lend the city $100,000, or in all $500,000, to tide Calgary over the present financial crisis. The banks concerned are Commerce, Montreal, Dominion, Royal and The Molsons.

Vancouver, B.C.—The board of works has sanctioned the construction of sewers to cost $46,850. Also, subject to approval by the joint sewerage board, the construction of a sewer to cost $15,000. Other sewers, costing $24,750, were authorized to be constructed.

New Westminster, B.C.—In connection with contemplated work by the city, Alderman Dodd has stated that the following amounts will be expended:—Glenbrook sewer outfall, $10,000; Sapperton sewer outfall, $[illegible],500, with pipes, over $40,000; in other sections, $70,000; reservoirs contemplated, $45,000; stables, Eighth Street, $6,000; Columbia Street paving, both upper and lower, about $100,000.

Saskatoon, Sask.—"Saskatoon seems to have handled the situation very well," said Mr. A. J. McPherson, chairman of the Saskatchewan local government board, when visiting that city for the purpose of going into certain matters with the council. "Your city council," he added, "is doing all possible to keep the city in good order."

Fort William, Ont.—The financial report of the utilities of the city for the first six months of the present year has been prepared, and shows a total profit on the operation of all utilities of $20,954.34. The statement is as follows:—Water—Revenue, $47,653; maintenance, $16,745; gross profit, $30,908; fixed charges, $25,545; surplus, $5,463. Light—Revenue, $59,912; maintenance, $31,018; gross profit, $28,894; fixed charges, $14,649; surplus, $14,245. Telephone—Revenue, $31,565; maintenance, $14,542; gross profit, $17,023; fixed charges, $15,779; surplus, $1,244.

British Columbia.—Mr. Robert Baird, inspector of municipal offices, is visiting the southern section of the province including Kamloops, Armstrong and other points in the Okanagan district, the Boundary district, Greenwood, Grand Forks, Nelson, Cranbrook and Fernie. The object of the visit is one of inspection, surveying the new situation which has developed as a result of complications following the outbreak of the war. Mr. Baird will ascertain the state of the finances of the various municipalities, and their needs for the immediate future, afterwards presenting a report to the attorney-general.

Montreal, Que.—Arrangements have been made for a loan of $3,500,000 from the Bank of Montreal. The board of control passed the following resolution:—"The board of control is of the opinion that it is necessary under the present circumstances and monetary conditions to curtail capital expenditures to the utmost extent practicable. In consequence, the city will apply for an advance from the Bank of Montreal amounting to $3,500,000 on capital account, to cover the requirements until the end of the year. If on or before January 1, 1915, a permanent loan cannot be floated, the board of control asks that further accommodation be granted to the extent of about $500,000 per month for the months of January, February, March, April, May and June next, in anticipation of the revenue of 1915, to cover the excess of expenditure for maintenance over the receipts for that period, making $[illegible],000,000 in all."

* * *

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of September 11th, 1913; and September 10th, 1914, with changes:—

	Week ended Sept. 10, '14.	Week ended Sept. 11, '13.		Changes.
Montreal	$ 39,645,639	$ 55,091,035	—	$15,446,296
Toronto	29,079,895	42,187,686	—	13,107,791
Winnipeg	21,400,984	23,357,533	—	1,956,549
Vancouver	6,745,184	12,210,324	—	5,465,140
Calgary	2,006,561	4,553,581	—	1,547,020
Edmonton	2,207,546	4,280,205	—	2,072,659
Ottawa	3,964,803	3,679,795	+	285,008
Hamilton	*2,413,170	3,280,080	—	866,910
Victoria	1,814,434	3,110,597	—	1,296,163
Quebec	3,361,230	3,422,464	—	61,234
Regina	1,711,[illegible]25	2,21[illegible],504		5[illegible],66[illegible]

NEW INCORPORATIONS

Promoters Regaining Confidence Have Obtained Sixty Charters This Week

Canada's new companies incorporated this week number 60. The head offices of these companies are located in six provinces. The total capitalization amounts to $31,221,000, the largest companies being:—

The Safety Tire Company, Limited, Quebec, Que.	$ 1,000,000
Mullen Coal Company, Limited, Edmonton	2,000,000
Canadian Shipbuilding and Dry Dock Company, Limited, Owen Sound	2,000,000
International Petroleum Company, Limited, Toronto	19,440,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Prince Edward Island	1	$ 440,000
Quebec	17	2,185,000
Ontario	22	22,885,000
Manitoba	3	26,000
Alberta	12	5,130,000
British Columbia	5	555,000
	60	$31,221,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—Brown Jug Inn, Limited, $25,000.

Stettler, Alta.—Stettler Cigar Factory, Limited, $20,000

Lethbridge, Alta.—The Felger Farming Company, Limited, $360,000.

Medicine Hat, Alta.—Milk River Oil and Gas Company, Limited, $125,000.

Quebec, Que.—The Safety Tire Company, Limited, $1,000,000. J. G. Frenette, A. Moisan, A. Begin.

Berlin, Ont.—Curtis Fire Systems, Limited, $250,000. F. D. Curtis, W. M. O. Lochead, C. B. Dunke.

Hamilton, Ont.—Polish Falcons Gymnastic Association of Canada. E. Dembski, G. Zacierka, F. Latawiec.

Fort William, Ont.—R. E. Walker and Company, Limited, $150,000. R. E. Walker, H. H. Walker, T. S. Elmore.

St. Catharines, Ont.—St. David's Sand Company, Limited, $50,000. L. C. Wilkie, G. B. Burson, M. C. Houston.

Prince Edward Island.—The Bay State Fur Farms, Limited, $440,000. G. F. Johnson, J. G. Larsson, D. G. Haskins, Jr.

Port Colborne, Ont.—Port Colborne Development Company, Limited, $50,000. W. R. Willard, M. I. Brown, A. Cann.

Joncquieres, Que.—La Compagnie Simon Tremblay and Fils, Incorporated, $15,000. S. Tremblay, J. S. Tremblay, O. Perron.

Owen Sound, Ont.—Canadian Shipbuilding and Dry Dock Company, Limited, $2,000,000. T. H. Barton, C. B. Henderson, S. C. S. Kerr.

Ottawa, Ont.—Orme Investments, Limited, $100,000. F. L. Orme, M. Orme, W. C. Perkins. Morrisburg and Ottawa Construction Company, Limited, $40,000. A. J. Fraser, M. J. Brennan, G. D. Mumford.

London, Ont.—Warwick Wheel Company of Canada, Limited, $100,000. D. Ferguson, C. C. Ferguson, J. Brooks. Victor Amusement Company, Limited, $40,000. G. G. Holding, G. L. Jackson, F. J. Jackson.

Calgary, Alta.—Good Hope Oil and Gas Company, $500,000. The Famous Players Film Service, Limited, $50,000 The Summerland Oil and Gas Company, Limited, $1,000,000. Victoria Acreage (Canada), Limited, $20,000.

Vancouver, B.C.—Higgins Company, Limited, $20,000. Petroleum Leaseholds, Limited, $100,000. Lost Creek Mining Company, Limited, $10,000. Colonial Brewing Company, Limited, $400,000. R. L. Reid, D. S. Wallbridge, J. B. Boyd.

Edmonton, Alta.—Briere Brothers, Limited, $25,000. Edmonton Industrial Association Drilling Company, Limited, $20,000. Mullen Coal Company, Limited, $2,000,000. Gregory Cafe, Limited, $10,000. Paramount Athabasca Oil and Gas Properties, Limited, $1,000,000.

Winnipeg, Man.—Harrison's Taxicab and Auto Livery, Limited, $1,000. G. J. Chester, L. Harrison, S. L. Goldstine. Merchants Investment Company, Limited, $5,000. C. D. Hughes, MacAlpine, D. H. Ross, H. M. Leach. Regal Wine Company, Limited, $20,000. M. Hoffman, C. Nemerovsky, E. R. Levinson.

Full particulars furnished on application to

STEPHEN LUSTED,
Clerk.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Intercolonial Coal Company.—The output of the company for August totals 20,000 tons.

Mond Nickel Company.—The company made an issue in London last month of £300,000 7 per cent. non-cumulative preferred shares of £1 each to existing share and debenture holders.

Hedley Gold Mining Company.—The company has declared the regular quarterly dividend of 3 per cent and an extra dividend of 2 per cent., payable September 30th to holders of record September 18th.

Acadia Coal Company.—The output of the company at Halifax for the month of August was 30,470 tons, while the sales for the month totalled 20,500 tons, showing an increase of over 3,000 tons over the preceding month in output and 5,000 tons in sales.

Spanish River Company. Mr. W. E. Stavert states that the plants of the Spanish River Company and of the Lake Superior Paper Company have been working at 100 per cent. capacity. The Spanish River Company's year ended on June 30th, and the annual meeting is due to be called some time this month.

Metropolitan Bank.—The proposal to sell the assets of the Metropolitan Bank to the Bank of Nova Scotia was unanimously ratified at a meeting which represented practically the entire Metropolitan stock on Monday. The president, Mr S. J. Moore, presided, and the terms of the deal were generally approved.

Twin City Rapid Transit Company.—The Twin City Company's earnings for the month of August show an increase of $19,139, or 2.49 per cent. Earnings for the first eight months of the year are $6,074,204, the increase being $349,198, or 6.10 per cent. Earnings in the final week of August showed the first decrease of the year. It amounted to $2,775, or 1.09 per cent.

Hollinger Gold Mines.—The monthly report states at present 60 stamps are working, and during the month 16,891 tons of ore were hoisted from the various levels, at an average value of $15.46. A winze has been started below the 675-feet level, and the 800-feet level should be reached about the end of October. The plant expenditure for the month was $30,546, of which the larger amounts were for mining and marketing bullion. The total profits to August 12th are given as $1,015 451.

Canadian Bank of Commerce.—The bank having redivided its capital stock into shares of $100 each, pursuant to the provisions of the Bank Act, calls for tenders for the purchase of twenty-four shares of the par value of $50 each, being the shares of persons who continue to hold only one $50 share. Tenders must be for two such $50 shares or multiples thereof, and the highest tenders shall be entitled on payment of the amount tendered to one $100 share for each two $50 shares in respect of which they are the highest bidders. October 31st, 1914, is the last day fixed for receipt of tenders.

Provincial Silver Black Fox, Limited.—A cash dividend of 40 per cent., payable September 15th, and a further dividend of probably 20 to 30 per cent., to be paid after the annual meeting, is announced by the company, with head office at Charlottetown. This company was promoted last year by Hon. John Agnew and Mr. J. O. Hyndman, G. D. DeBlois and W. E. Agnew, who now form the Royal Investment Exchange. They are promoting also the John Agnew Fur Farms, Limited, which will be a sister company to the Provincial Company.

Porto Rico Railways Company, Limited.—The gross earnings of the company for August totalled $62,676, a decrease of $3,411, as compared with the corresponding month in 1913, or equal to 5.16 per cent. The net earnings for the month increased nearly $6,000, an equal of over 23 per cent., the total being $31,234, as compared with $25,300 for July, 1913. The figures for the first eight months of the year show gross earnings of $529,013. This is a decrease of over $42,010, equal to 7.36 per cent., as compared with the same period last year. The net earnings so far this year show a decrease of 2.37 per cent. The figures for the eight months are $243,090, as compared with $250,200, a difference of over $7,000.

Nova Scotia Steel and Coal Company.—The following circular, signed by Mr. R. E. Harris, president of the company, has been sent from the head offices of the company: "For some months past there has been great depression in the steel trade of Canada. Since the war began that depression has been emphasized, and we have been compelled to close down a portion of our plant, awaiting developments. It is impossible to predict what the effect of the war on the steel industry may be, but in view of the situation as it exists to-day your directors have with regret reached the conclusion that it would not be prudent to make further payments of dividends on the stocks of the company until the business situation improves. I, therefore, beg to advise you that the dividends on preferred and common stock usually payable on October 15th will not be declared."

Standard Chemical Iron and Lumber Company.—The company has altogether fifteen plants, twelve of which are located in Canada, one in Germany, one in England and one in France.

As a result of the war a serious dislocation of the company's business was anticipated owing to the fact that the company exported largely to England, and also large quantities of crude alcohol to France and Germany. All the Canadian plants were, therefore, shut down immediately except the Longford and Fasset, Que., plants.

During the past few weeks the company have succeeded in making important contracts in England for next year's delivery, and have also been able to liquidate the stocks in England owing to the complete shutting off of the continental supply of wood chemicals.

The company are proceeding to open up their factories, having started the Cookshire factory, and anticipate opening the largest plant at Sault Ste. Marie about October first. The other factories will be opened up gradually, and early next year we anticipate running to full capacity. The moratorium in England is not being taken advantage of to any extent as far as this company is concerned.

Canadian Coal and Coke Company.—The report for the seven months ending March 31st showed a loss of $72,225. This includes a loss on operation of $35,534, and interest on a temporary loan of something over $36,000, but not interest on the bonds or preferred stock.

H. A. Lovett, K.C., president, in referring to the work accomplished at the different mines, stated the temporary loan of $500,000, and the note issue of $1,000,000 put through to secure this, had to be taken up largely by the board itself. He hoped that conditions would be such before the end of the year that this year's business might be carried on without loss.

Mr. Lovett said that the Pacific Pass had shown a loss of $26,000, and the Western a loss of $23,000, while Lethbridge showed a profit of $8,000.

Late developments had led him to pay off the $200,000 which was in the hands of the company on the $500,000 temporary loan, and having the balance of $300,000 extended until October next. Permanent finances had yet to be arranged.

Mr. F. B. Greenshields, who retired from the board, bore Mr. Lovett out in this, and said that the board had received but very little support from the shareholders and creditors.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the first week in September:—

	1914.	1913.	Decrease.
Canadian Pacific Railway			
Sept. 7	$2,110,000	$2,496,000	$386,000
Grand Trunk Railway			
Sept. 7	$1,088,113	$1,099,259	$ 11,146
Canadian Northern Railway			
Sept. 7	$ 320,000	$ 382,400	$ 62,400

◆

Loyalty and business are both good,—in double harness.

Britannia ruling the waves is another form of business as usual.

Europe is getting the cannon ball and Canada only the echo,—in which fact is another cause for thanksgiving.

MAYOR MARTIN, OF MONTREAL

Mayor Martin, of Montreal, says he will not sign the contract adopted by the city council by which the Bank of Montreal takes the city out of a nasty hole, preserves its credit, and becomes the city's agent for five years. The mayor is reported to have said that he is running the city and wants no restrictions imposed regarding city loans. Mayor Martin appears to have no conception whatever of the delicacy of credit. Unless more careful, he will cause such a blow to Montreal's credit, that even his superior wisdom and strength will not be able to repair. Already Montreal's bonds are said to have been peddled in New York to the amusement and disgust of financial houses there who are accustomed to see cities finance in a business-like way. The best thing for Mayor Martin would be for the Bank of Montreal to cut the life lines and let him struggle and splutter in the icy waters of his conceit. But that would be mighty bad for Montreal's credit and financial position.

Later.—Mayor Martin has climbed on to the shore of safety and will sign the agreement, says a Montreal dispatch.

WAR AND TIGHT MONEY.

Speaking at Ottawa last summer, regarding the relations of finance and war, Mr. G. E. Roberts, director of the Mint at Washington, recalled the occasion when two years ago, a German warship steamed into a port of Morocco, with a remotely implied threat of war with France, with the result that so much French money was withdrawn from Germany that the Imperial Bank was obliged to expand its loans by $200,000,000 within 30 days, and meantime the Berlin Stock Exchange was in panic and German industries and securities lost hundreds of millions more. "No nation liveth to itself alone in the twentieth century," said Mr. Roberts. "The wealth of the world is now a common fund. There is a reservoir in London, another in New York, another in Montreal, and others elsewhere, but they are all connected. One cannot draw down the supply of capital in one without affecting the supply in all. One cannot burn up, confiscate, or destroy capital anywhere that the whole civilized world does not suffer loss."

There was not a remote district in Canada then where money was not tight and enterprise in check because of the war in the Balkan States. The same condition, due to Europe's war, is true to-day but there are some substantial factors of consolation which the country shortly must begin to see.

KEEP BUSINESS MOVING

There is more than sentiment in the watchword "Business as Usual"; there is good business in it. Business cannot go on entirely as usual because of certain dislocations caused by war conditions. At the same time, because of the supremacy of the British navy and the unity and extent of the British Empire, business can proceed almost as usual. While trade is checked in some directions it is stimulated in others. Many inquiries are being received by government departments, newspapers and business houses which show that new trade channels are opening. A million pit crops, for instance, are required immediately for use in British collieries. A Canadian firm has received an order for five hundred piano actions, an order which formerly went to Germany. Inquiries have been made for hickory golf shafts here and for a hundred and one things obtained previously where warfare now prevails.

Compared with other units engaged in the European struggle, Canada is one which suffers comparatively little. No check is placed upon its productivity in the fields, the forests and the fisheries. Its wheat areas will not be trampled by artillery horses. Its orchards will not be devastated. Its cities will not be razed. In the countries of the enemy, business is practically at a standstill. Every time a German ship of commerce makes a move, it finds itself a British prize. Internal financial and economic conditions are now such that whatever was the strength of preparation for war, the fabric must collapse within a comparatively short time. A Copenhagen despatch says that a meeting of all leading commercial people throughout Germany was held on Tuesday to discuss the economic situation which has arisen owing to Britain's intention to finish the war decisively, and the steps to be taken to enable export business to be continued. The situation at all the German centres of industry is most critical.

A message from Rome states that Hamburg is in a serious situation on account of lack of food and unemployment. A returned traveller brought the information, and says that while he was in Hamburg eggs were selling there at 10 marks ($2.50) a dozen, while fresh meat was priceless, all cattle having been requisitioned. The smallest quantity of fresh milk, butter and eggs is reserved for the hospitals, the remainder, together with all other available food, is taken to the army storehouses, where it is accumulated by the general staff for the use of the army. Traffic has practically ceased in Hamburg, it is asserted, and 1,500 ships are idle.

At Vienna, we are told that terrible anxiety prevails. The city is a large hospital for the wounded; food prices are soaring, and factories and businesses are closed. The big war loan which Germany will try to raise within its borders is said to be causing anxiety to German financiers, as it will force the hands of the bankers, while the attitude of the people is somewhat uncertain in view of the disastrous retreat of the German army in France.

An active imagination is not required to picture the plight of business on the European continent. That is one phase of war, but it should give a man in this country heart to try at least to carry on his business as usual. There is to be an "after the war" period. There is a business future. It may come with the spring of 1915, and so soon, because the British Empire is trying to do business as usual while Germany and Austria have had to put up the shutters.

SPEAK OF THE CAUSES

Tell the children the causes of this war. Teach them to respect the German as an individual, as a nation. Teach them to hate dogmatic military rule where civil life should reign supreme. Tell them for what great principles the British Empire is fighting. Suppress the sign of jingo and burn the "patriotic" button which abuses the enemy. Talk of peace after war, a war to maintain honor and to crush the spirit of bully. Bring the just cause of Britain to the playground. See that the playground does not forget the ethics of British life everywhere.

CANADA'S BOND MARKET

The bond market in Canada is comparatively dull, but there are some redeeming features. One bond house representative informed *The Monetary Times* that this business had been the first hit by the war, is the one most affected, and will be the last to recover. Yet, he added, the recovery should be substantial. This characterizes generally the attitude of bond houses to their business. Prior to the war there had been accumulating large sums the world over for investment. The outbreak has locked these again, and they are still accumulating. With the exception of war loans in London, practically no loans are being raised there. Large sums of money will be available in London and other loaning centres after the war. Government loans and war finance generally will have first call on the money markets for some time. This will minimize the ease with which certain other loans otherwise might have been floated. In due course, however, ample funds should be available for necessary financing, such as that of our municipalities, provincial governments and well-established corporations with a good record.

The Canadian government has yet to raise about $28,000,000 for war expenditure during the fiscal year to end March 31st, 1915. Special taxes and Dominion notes legislation have provided for $22,000,000 of the $50,000,000 war appropriation for that year. The balance will be raised by means of loans. *The Monetary Times* has suggested previously that it is not unlikely these offerings will be made in Canada or England, or in both countries.

The attitude of the United States administration prevents bankers in that country loaning money to either the Dominion or provincial governments here, because they are governments at war. The Ontario government made inquiries of United States bankers with a view to floating a provincial loan there, but the bankers stated that their interpretation is that President Wilson's ruling applies to Canadian provincial governments as well as to the Dominion government. Canada's provinces will probably finance by means of treasury bills, permanent loans being made later.

NECESSITY OF LIFE INSURANCE

Several municipalities have insured those of their citizens who have gone to the war. This was thought to be the best form of appreciation. It was an excellent investment for the families concerned. The outbreak of war has again revealed in places the curious attitude of mind towards life insurance. There has been a rush of applications for policies by men going to the front. Before the risk of being shot or sabred came into view, many of these applicants would not talk life insurance with the canvasser. They refused to discuss the need for insurance. They refused to buy a policy. They refused to protect their dependents. They refused to see that a policy, large or small, is one of the first necessities of life and one of the first practical administrators after death.

The thought of death on the battlefield brought many men to the life insurance office to confront in most cases a clause which properly enough requires an extra premium for military service. Yet the thought of death in the home, in a street accident, on the railroad train, on the farm, in the factory, in the office, in the thousand other places where death daily proves the necessity of life insurance, had had little effect upon those who now are so anxious to take out a policy. During war, is a good time for those in peaceful pursuits to buy the life insurance policy to which so many years of evasive thought have been given. One of the outstanding facts of life is that it comes to an end. Insurance lessens the strain upon those left behind.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September 11th:—

La Rose Mine, 85,000; Chambers Ferland Mine, 76,560; Cobalt Lake Mine, 64,060; Dominion Reduction Company, 84,000; Coniagas Mines 74,310; Cobalt Townsite Mine, [illegible],180; McKinley Darragh-Savage Mine, 258,020; total, [illegible],120 pounds or 486 tons. The total shipments since January 1st, 1914, are now 26,848,163 pounds, or 13,424 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,4[illegible]7,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,080 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

COMPANIES REGISTERED

The following companies have been registered to do business in British Columbia: Ransom Manufacturing Company, of Wisconsin; L. C. Smith and Bros. Typewriter Company, of New Jersey; Atlas Gas Engine Company, of Oakland, Cal.; the Imperial Canadian Trust Company, of Winnipeg.

The following companies have been registered to do business in Alberta: The Star Drilling Machine Company, of Akron, Ohio; Canadian Universal Film Company, Limited, of Toronto; Pittsburgh Perfect Fence Company, Limited, of Hamilton.

The following company has been registered to do business in Saskatchewan: Canadian Universal Film Company, Limited.

LAKE SUPERIOR CORPORATION RETURNS

Depression Affected Income Account—Comparison of Two Years' Returns

The annual statement of the Lake Superior Corporation for the fiscal year shows that the income derived by the financial parent from the operating subsidiaries was less.

The company's income account, with comparisons, was as follows:—

	June 30, 1914.	June 30, 1913.
Income derived from subsidiary companies	$437,880	$793,148
Other income	10,174	12,513
	$448,054	$805,661
Interest and general expenses (including interest on the first mortgage bonds)	424,644	386,482

It will be seen from the above comparison, the income derived from subsidiary companies, etc., amounts to $448,054, against $805,661, whilst the interest and general expenses for the year ended June last amounted to $424,644, as against $386,482, an increase of $38,162.

Disposition of Income.

In considering the income account of the Lake Superior Corporation it is necessary to turn to the results of the operations of the subsidiary companies to get at the true state of matters. The income for the year ended June 30th, 1914, amounts to $2,511,345, as against $2,514,221.

The disposition of this income gives an explanation of the decreased revenue handed over to the Lake Superior Corporation:—

	June 30, 1914.	June 30, 1913
Interest on bonds of the subsidiary companies and on bank and other advances	$1,542,323	$1,101,825
Sinking fund payments	154,725	102,511
Discount and expenses of securities sold	62,428	Nil.
Doubtful debts and losses of previous years	137,6[illegible]8	Nil
Reserves for depreciation and renewals	300,[illegible]02	Nil.
Paid to the Lake Superior Corporation	437,880	793,148
Carried forward	75,546	516,735

Sums Set Aside.

Interest charges have increased by $440,498, taking into account the fact that the balance of undistributed profits for the year 1913, has been carried entirely to reserves, there is an increase in the amount reserved under all categories for the year ending June 30 last of $121,[illegible]63. The sums set aside in respect of discount and expenses of securities sold, sinking fund, payments, reserves, etc., for the year under review, amount to $740,[illegible]09.

In view of the trade depression, the results of operations are pretty satisfactory. Further information will be available after the company's annual meeting, which will be held shortly.

◆

SEND SOME MAPLE LEAVES TO ENGLAND

The Canadian high commissioner's office in London is asking for maple leaves. They will be useful to the office in various ways during the year. Send a few small, leafy branches or some leaves to Mr. W. L. Griffith, secretary, Canadian High Commissioner's office, Victoria Street, London, S.W., England.

◆

GOLD FOR CANADA

Messrs. J. P. Morgan and Company engaged $5,000,000 in gold for shipment to Canada on Monday. The firm also made further shipments on Wednesday. It is expected that about $8,000,000 will be shipped by the firm to Canada before the close of the current week. These shipments are to be made in connection with the maturing obligations of New York city in Europe during September.

The Metropolitan Bank

AND

The Bank of Nova Scotia

Notice is hereby given of the intention of the undersigned Banks to apply, after the expiration of four weeks from the date of the first insertion of this notice in The Canada Gazette, to the Governor-in-Council and the Treasury Board, through the Minister of Finance and Receiver-General, for the approval of an agreement between the Metropolitan Bank and the Bank of Nova Scotia, whereby the Metropolitan Bank agrees to sell, and the Bank of Nova Scotia agrees to purchase, all the real and personal properties, assets, rights, credits and effects of the Metropolitan Bank, of whatever kind and wheresoever situate, and whereby, in consideration for such sale and purchase, the Bank of Nova Scotia agrees to allot and issue to the Metropolitan Bank, or to its nominees, five thousand fully-paid shares of the capital stock of the Bank of Nova Scotia, of the par value of one hundred dollars each, and amounting in all to the par value of five hundred thousand dollars, and to pay to said, the Metropolitan Bank, the sum of one million dollars, and whereby the Bank of Nova Scotia undertakes to assume, pay, discharge, perform and carry out all the debts, liabilities, contracts and obligations of the Metropolitan Bank (including notes issued and intended for circulation, outstanding and in circulation, and leasehold and other obligations). A copy of the said agreement may be seen at the office of the Metropolitan Bank, Toronto, Ontario, and at the Bank of Nova Scotia, Halifax, N.S.

The said agreement has been approved by a resolution of the Shareholders of the Metropolitan Bank, carried by the votes of Shareholders present, in person or represented by proxy, representing more than two-thirds of the amount of the subscribed capital stock of the said Bank, at a special general meeting of the Shareholders of the said Bank, duly called and held for the purpose. The said agreement has also been approved by a resolution of the Directors of the Bank of Nova Scotia.

Dated the fourteenth day of September, A.D. 1914.

By order of the Board

The Metropolitan Bank, by W. D. ROSS, General Manager.

By order of the Board

The Bank of Nova Scotia, by H. A. RICHARDSON, General Manager.

NOVA SCOTIA CARRIAGE COMPANY REORGANIZED

The Nova Scotia Carriage and Motor Car Company, Limited, has been reorganized. The new company will be known as the Nova Scotia Carriages, Limited. Halifax and Amherst men are interested in the company, which was organized two years ago to build carriages and automobiles at Amherst. Its career has been unprofitable. The company has an issued capital of $550,000 of 7 per cent. preferred stock and $1,000,000 common. The statement presented to the meeting this week showed a loss during the year of $77,000, with gross receipts of $[illegible],000. Of this loss, about $55,000 is accounted for in the writing off of values on buildings and plant and in other ways, the sum of $22,000 being the actual loss on the year's business.

In the reorganization the shareholders [illegible] common stock, and, instead of the old preferred and common, will hold 25 per cent. of preferred and [illegible] per cent. of common of the new concern.

The capital of the new company will be $[illegible] of preferred stock and $[illegible] of common [illegible] the new company, as compared with $550,000 preferred [illegible] and $1,000,000 common in the old. [illegible] liquidation. The company will not manufacture motor cars, but will confine itself exclusively to carriages, of which there is an annual consumption in the Maritime provinces of 12,000, compared with a total capacity for the company's factory of 5,000.

The German ambassador at Washington is another fellow doing business as usual.

DIVIDEND NOTICES

THE MONTREAL CITY AND DISTRICT SAVINGS BANK.

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared and will be payable at its Head Office, in this City, on and after Thursday, the 1st of October next, to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board.

A. P. LESPERANCE,
Manager.

Montreal, August 24th, 1914.

PORCUPINE-CROWN MINES, LIMITED.

DIVIDEND No. 3.

Notice is hereby given that a dividend of 3 per cent., for quarter ending 30th September, has been declared, payable the 1st October, 1914, to shareholders of record the 15th September.

Transfer books will not be closed.

Dividend cheques will be mailed on the 30th September by our Transfer Agents, "The Crown Trust Company."

By order of the Board,

JAMES COOPER,
Secretary-Treasurer.

Montreal, August 17th, 1914.

SHAWINICAN WATER AND POWER COMPANY

Notice is hereby given that a dividend at the rate of one and one-half per cent. (1½%) has been declared on the Common Stock of this Company for the quarter ending September 30th, payable October 10th to shareholders of record October 1st, 1914.

JAMES WILSON,
Secretary.

Montreal, Sept. 16th, 1914.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

SCHOOL DISTRICT OF SWIFT CURRENT, SASKATCHEWAN.

Sealed Tenders will be received by the undersigned up to and including the 30th day of September, 1914, for the purchase of $60,000.00 Debentures of the Swift Current School District No. 167 of Saskatchewan, for completing and equipping the Central and Elmwood School Buildings in the said city. Repayable in 30 years with interest at 6 per cent. payable yearly. Debentures approved by the Local Government Board of Saskatchewan. The highest or any tender not necessarily accepted.

J. T. DODDS,
Secretary-Treasurer.

Swift Current, Sask., 25th August, 1914.

VILLAGE OF SHOAL LAKE

ELECTRIC DEBENTURES FOR SALE

Sealed Tenders will be received by the undersigned up to six o'clock p.m., October 15th, 1914, for the purchase of $11,000.00 debentures, with coupons attached, dated October 1st, 1914, bearing interest at five per cent. per annum, payable in twenty equal instalments of $882.64 each, being principal and interest. The lowest or any tender not necessarily accepted.

For further particulars apply to

FRANK DOBBS,
Sec.-Treas.,
Shoal Lake, Man.

LEGAL NOTICE

AMERICAN LAFRANCE FIRE ENGINE COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of June, 1914, incorporating Harry Riley and William Robert Anderson, law clerks; Thomas Stewart Hagan Giles, bookkeeper; Harold Ernest McKitrick, barrister, and John Steuart Duggan, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, import, export and deal in fire engines, fire apparatus, carriages, cars, wagons, trucks, bicycles, automobiles, motor trucks and vehicles of all kinds, however propelled, and all accessories thereto or in connection therewith; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (c) To issue paid-up shares, debentures, debenture stock, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be required by or for any services rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (d) To sell, lease, turn to account, or otherwise dispose of the whole or any branch or part of the business, undertakings, properties, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, debentures or securities of any company having objects similar to those of this company; (e) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (f) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell or otherwise dispose of shares, stocks, debentures, bonds and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents as the directors may appoint; (g) To enter into partnership or any arrangement for sharing profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined; (j) To distribute in specie or otherwise, as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company; (k) To do all or any of the matters hereby authorized either alone or in conjunction with or as factors, trustees or agents for any other companies or persons, or by or through any factors, trustees or agents; (l) The powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (m) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "American LaFrance Fire Engine Company of Canada, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1914.

THOMAS MULVEY,
Under-Secretary of State.

NO MORTGAGE PROCEEDINGS DURING WAR

No more orders for sales will be given for the specific performance of sale or foreclosure in mortgage actions was a statement made at Calgary by Mr. L. F. Clarry, master-in-chancery. The various judges of Alberta have expressed themselves as being opposed to giving judgments in foreclosure proceedings in connection with mortgages during the depression caused by the great world war now being waged. The master-in-chancery says this understanding will continue until the war is over. It does not apply to anyone who has absconded from the province.

GIVING BRITISH TRADERS CREDIT

British Parliament Will Keep Wheels of Trade and Industry Going

The British chancellor of the exchequer, the Hon. D. Lloyd George, in a recent speech in the British House of Commons stated there were several special difficulties where, personally, he had not yet been able to make up his mind as to the best course to be adopted. The first was in regard to the moratorium. He had issued a questionnaire to some of the leading traders and manufacturers of the country to ascertain their views in regard to the moratorium, and up to that time he had received something like 8,000 replies. They were in the proportion of 4,500 in favor of bringing the moratorium to an end on September 4th, to 3,500 in favor of extending it. That showed how very divided the trading community was on the subject. The bankers and financing houses were almost unanimously in favor of extending it. The retail traders, he certainly thought, would have been overwhelmingly in favor of putting an end to it, but they were not. There was a majority, but only a majority, in favor of ending it. He should say the manufacturers were two to one in favor of bringing it to an end, but that one-third represented very important interests, who feared that if the moratorium were suddenly brought to an end we might have a crash. It was a thing that could not be decided altogether by a majority. Merchants were in favor of an extension of the moratorium. He was trying to consider whether it was possible to get a limited moratorium, which would protect particular interests without interfering with those who would rather have no moratorium at all.

Discounting of Bills.

With regard to the discounting of bills, it was a step which involved risk, but at such a time we must keep up the credit of this country. We had got to keep the machinery of trade and commerce and industry going so that we should not find ourselves at the end of the war with the business which we have been transacting with the whole of the civilized world having passed away to some other country. A good deal depended on the banks. He thought the government had done for the banks as much as they could be expected to do, but they did not do it in order to strengthen their balances or increase their dividends, but in order to enable the banks to finance the trade of the country through a difficult period. If the government and the country were prepared to take risks, the banks must also take risks. A considerable number of banks had behaved admirably, but it might be necessary to name the banks that had not, although he did not think that would be desirable now. Some banks had not done well, and he thought it better that it should be said so.

Shareholders and Depositors.

He did not think they had thought of their shareholders, but of their depositors. He thought, however, the time had come when they really ought to take risks, with the credit of the state behind them to the extent that it was. He had called attention to complaints which had come to him and had told the banks that unless the trader of the country received the usual facilities, and even greater facilities, he had no doubt the House of Commons would take steps to place behind the trader the necessary credit in order to enable him to carry on. He was glad to say that the banks have come to the conclusion after very careful consideration that they could finance business much more liberally than they were in a position to do during the first fortnight, and he hoped to receive in the course of the next few days reports which showed that this more liberal policy was having a good effect.

Big and Small Men.

Mr. Austen Chamberlain, after complimenting Mr. Lloyd George, said he had had some complaints that the chancellor was forgetting the small man, but that was short-sighted on the part of the small men, for he could say from his personal knowledge that the chancellor had been thinking of the little men just as much as of the big men. Some banks had done all they could to meet the treasury, but some had not done all they might have done in view of the existing difficulties. While making all allowances for the difficulties which undoubtedly existed, those who desired to strengthen the hands of the chancellor of the exchequer in his endeavor to re-establish the machinery of commerce and trade found it difficult to justify the action of any institution which withheld facilities it had in its power to grant. He did not think it was desirable to say more than that, and he would not even say that without saying that there were many of these institutions which were doing their very best to meet the emergency in which the country was placed, and he was quite certain the chancellor of the exchequer was wise in proceeding gently.

Mr. Joynson Hicks suggested that the limit of the moratorium should be gradually extended so that it should apply only to debts of larger amounts, rising from $25 to $50, $100, $150, etc.

MORE PRODUCTION IS ONE OF THE WAYS TO SOLVE MANY PROBLEMS

The following table gives the official figures regarding the areas and final estimates of yield and value of the principal field crops of Canada last year:—

Crop.	Area. Acres.	Yield per acre. Bushels.	Total yield. Bushels.	Average price. $	Total value. $
Fall wheat	970,000	23.29	22,592,000	0.80	18,185,000
Spring wheat	10,045,000	20.81	209,125,000	0.66	138,277,000
All wheat	11,015,000	21.04	231,717,000	0.67	156,462,000
Oats	10,434,000	38.78	404,669,000	0.32	128,893,000
Barley	1,613,000	29.96	48,319,000	0.42	20,144,000
Rye	119,300	19.28	2,300,000	0.66	1,524,000
Peas	218,980	18.05	3,951,800	1.11	4,382,000
Buckwheat	380,700	21.99	8,372,000	0.64	5,320,000
Mixed grains	473,800	11.30	17,539,000	0.97	17,084,000
Flax	1,552,800	33.33	15,792,000	0.55	8,685,000
Beans	46,000	17.19	800,900	1.88	1,505,000
Corn for husking	278,140	60.30	16,772,600	0.64	10,784,000
Potatoes	473,500	165.88	78,544,000	0.49	38,418,000
Turnips, etc.	186,400	358.30	66,788,000	0.28	18,643,000
Hay and clover	8,169,000	*1.33	10,859,000	*11.48	124,696,000
Fodder corn	303,650	8.62	2,616,300	4.78	12,506,000
Sugar beets	17,000	8.71	148,000	6.12	906,000
Alfalfa	93,560	2.54	237,770	11.85	2,816,200
Total	....	....	....	....	$709,230,500

*Ton

Last year, the value of the field crops was $709,230,500, compared with $635,473,100 in 1912. The total production by Canada in 1913 is estimated at $2,753,000,000 divided as follows:—Agriculture, $709,000,000; industries, $1,500,000,000; forest products, $70,000,000; fisheries, $34,000,000; minerals, $140,000,000; animals and products, $300,000,000. Canada has immense possibilities as a producer. Production relieves the money tension, improves the trade balance and makes less the necessity of borrowing. More production will help to bring back normal times.

SECURE EMPIRE AND WORLD TRADE

Hints of Sir George Foster for British Empire's Home Workers

Owing to Germany's superhuman efforts to build up a strong industrial system and a vast overseas trade, its industrial output has wonderfully increased and Sir George Foster, Canada's minister of trade and commerce, shows in a special report that German sea tonnage has increased from 1,511,579 in 1893 to 3,153,724 in 1913, and her foreign trade from $1,678,780,000 to $4,966,298,400. In 1913 German exports were as follows:

To Great Britain	$ 342,291,000
Canada	14,473,835
Australia	21,063,000
British South Africa	11,162,200
New Zealand	2,540,000
United States	169,741,000
France	187,996,200
Russia	209,440,000
China	29,226,400
Japan	29,202,000
South America	157,960,000
All other countries	1,227,862,387
Total	$2,402,967,000

"Under present conditions," says Sir George, "she has lost for the time being all this trade, her industrial production has been greatly reduced and her commercial marine has been practically swept from the seas. What this means to Germany we can all see: a total loss during the continuance of the war and a long period of struggle after ensuing peace to regain even a part of her former proud and profitable position, and a probable total loss of her expensive and hardly-bought colonial possessions.

Build Position Strongly.

"What we do not so clearly see is that this immense void in production and distribution must be filled—others must step into her place to make and distribute what Germany has for the time being been forced to surrender. For the British Empire—home and overseas—the instant pressing duty is to possess itself of a generous share of the production and trade thus lost to Germany, and so to reap the advantage of a great industrial and commercial victory which shall in some measure compensate the costly sacrifice of war. Not only should we fill to the greatest possible extent the void thus created, but we should make our position so strong in these markets as to secure ourselves from being ousted by Germany hereafter. Here is a peaceful field of operation in which we can carry on a bloodless, but most effective and profitable warfare.

"First, let us fill, so far as possible, the call for the $16,000,000 worth of goods with which Germany and Austria provided us last year, and which will this year be absolutely debarred.

"And what we cannot supply ourselves, let us purchase from Great Britain and other parts of the empire. Let us covenant together to buy goods 'Made in Canada,' 'Made in Britain' and 'Made in the Empire'; thus shall we give employment, and the profits of production to the empire's home workers. Then let us find the details of what Germany and Austria have produced and sold to other countries, and set ourselves to supply as large a part of this as possible.

Markets for Millions.

"Here are markets for hundreds of millions' worth of products, the making of even a portion of which will keep our industries going and give employment to hundreds of thousands of our people. If consumers determine to buy only Canadian and Imperial goods, and producers to provide them at lowest prices and of good quality, a co-operative work of inestimable value will have been begun."

A statement follows Sir George's exhortation, showing the extent of German trade with Canada. In 1914 Canada imported from Germany goods worth $14,686,069 and exported $4,433,736. Some of the principal articles imported and the values were as follows:—Iron and steel goods, $2,824,900, including tubing, steel locomotive tires, cutlery, machinery, wire, angles, beams, tools, etc.; drygoods, textiles, etc., $2,230,886; fancy goods, $1,139,903; paper, $350,187; furs, $667,267.

ENGLISH TREASURY CERTIFICATES

Scheme is Proposed to Provide Additional Credit for Trade

Considerable interest has been aroused in financial and commercial circles by the currency and bank notes (amendment) bill which Mr. Lloyd George introduced in the British House of Commons recently, and which gives power to the treasury to issue treasury certificates as distinct from the new £1 and 10s. notes. From inquiries made by the London Financial Times, they understand that the exact form in which these treasury certificates are to be issued and the precise details of procedure with regard to their issue have not yet been settled. So far as the general public is concerned, however, the scheme will not affect the measure already in force for the provision of currency in the form of £1 and 10s. notes which pass from hand to hand in the daily business of individuals, the payment of wages, etc. The idea is to create credit as distinct from ordinary currency, and the new treasury certificates which will represent this credit will not go into general circulation.

Credit from the State.

By the scheme the banks will be able to obtain credit from the State. So far the banks have not been obliged to do this, but it may be necessary for them to take advantage of the proposals in order that the trade of the country may be resumed and kept going. Under a general scheme for financing trade the banks may be called upon to give more credit than they have at present available, in addition to that already outstanding, which in the prevailing circumstances cannot be called in. For instance, a bank may be asked to give extended credit to a big industrial enterprise in order that the workpeople may remain in employment. The articles made by these workpeople, however, may, owing to the restricted state of oversea trade, have to be put into stock, and it would therefore be impossible to the employers to repay advances from their bank. With such cases multiplied the banks themselves might require additional credit, and under the scheme for the issue of treasury certificates this credit will be obtainable in a form in which it can be used. The credit will, it is understood, be granted to the banks against a deposit of securities.

Treasury and the Banks.

The treasury could, of course, give credit to the banks by issuing to them £1 and 10s. notes, but this would not be in a practical form and would only increase the amount of notes unnecessarily without performing the object in view. What would be required would be a form of credit which they could pass through the clearing house and liquidate their indebtedness to one another. There are obvious difficulties to prevent the passing of large blocks of £1 and 10s. notes for merely credit purposes. At present the banks obtain the notes they require for ordinary currency uses from the treasury and pay for them by a cheque on the Bank of England. This operation, however, does not increase the amount of credit at the disposal of the banks such as will be the case when treasury certificates are issued against a deposit of securities.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended September 4th:—

La Rose Mines, Limited, 89,230; Peterson Lake Silver Company Mine, 65,390; City of Cobalt Mine, 85,090; Trethewey Mine, 48,830; O'Brien Mine, 63,610; Cobalt Lake Mining Company, 61,950; Coniagas Mine, Limited, 180,930; total, 595,030 pounds, or 297 tons. The total shipments since January 1st, 1914, are now 25,875,043 pounds, or 12,937 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons; in 1913, 20,261 tons.

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

EASE EVERY FINANCIAL TRANSACTION

This is the Policy for Abnormal Times—United States War Taxes

The peculiarly difficult financial problems of the moment are being successfully dealt with, with great self-possession and good sense and very sound judgment; but they are only in process of being worked out. If the process of solution is to be completed, no one must be given reason to doubt the solidity and the adequacy of the government which stands behind the whole method by which our difficulties are being met and handled, were the words of President Wilson, of the United States, when requesting that congress provide additional revenue to be raised by internal taxes.

"The treasury itself could get along for a considerable period, no doubt, without immediate resort to new sources of taxation, but at what cost to the business of the community? Approximately $75,000,000, a large part of the treasury balance, is now on deposit with national banks distributed throughout the country. It is deposited, of course, on call.

Scrupulously Safeguard Situation.

"I need not point out what the probable consequences of inconvenience and distress and confusion would be if the diminishing income of the treasury would make it necessary rapidly to withdraw these deposits. And yet without additional revenue that might plainly become necessary, and the time when it became necessary could not be controlled or determined by the convenience of the business of the country. It would have to be determined by the operations and necessities of the treasury itself. Such risks are not necessary and ought not to be run. We cannot too scrupulously or carefully safeguard a financial situation which is at best, while war continues in Europe, difficult and abnormal. Hesitation and delay are the worst forms of bad policy under such conditions.

"And we ought not to borrow. We ought to resort to taxation, however we may regret the necessity of putting additional temporary burdens on our people. To sell bonds would be to make a most untimely and unjustifiable demand on the money market; untimely, because this is manifestly not the time to withdraw working capital from other uses to pay the government's bills; unjustifiable, because unnecessary.

Country Able to Pay Taxes.

"The country is able to pay any just and reasonable taxes without distress. And to every other form of borrowing, whether for long period or for short, there is the same objection. These are not the circumstances, this is, at this particular moment and in this particular exigency, not the market to borrow large sums of money. What we are seeking is to ease and assist every financial transaction, not to add another single embarrassment to the situation."

In order to meet every demand upon the treasury without delay or peradventure and in order to keep the treasury strong, unquestionably strong, and strong through the present anxieties, President Wilson urged that an additional revenue of $100,000,000 be raised through internal taxes devised to meet the emergency. Such sources of revenue should be chosen as will begin to yield at once, and yield with a certain and constant flow.

◆

NIPISSING GETS AN OPTION

The Nipissing Mines Company, through Mr. Charles Richardson, has taken an option on 1,501,000 shares of the McIntyre Mines at 40 cents a share. The stock will be deposited with the Chatham and Phoenix Bank, New York. The Nipissing Mines Company has sixty days from September 7th in which to examine the property and elect whether it will take the mine on the terms laid down. These are approximately $200,000 in sixty days and a similar amount at the end of two like periods, the price paid for the control being $600,400.

The Nipissing Company agreed to take any other stock offering in addition to the block giving it control, and also relieved President Albert Freeman of McIntyre bonds of the par value of $90,000. The promoters of the McIntyre claim that the mine was sold at a small price, considering the amount spent in developing the property.

UTILIZE WHAT WE HAVE

Agricultural and Industrial Possibilities—Supply the Allies at War

"Agriculturally and industrially, Canada should take advantage of the opportunity for increasing her productiveness. This is the juncture when the thought should be turned in this direction.

"Of course, we cannot tell how long the war will last or what will be the ultimate situation; but we should not, as some are disposed to do, sit down and conjure up the gloomiest of possibilities. We know that, so far, we are in a position which has many favorable features. Our financial situation is good. It has not suffered from any disturbance. There is general financial confidence. No financial support has been withdrawn from any proper business. It is true that we cannot obtain money from abroad for new enterprises; but no firm, or corporation, doing its regular business, in a legitimate way, has had to complain of lack of credit from the banks.

"The latter are affording normal facilities in every case. No anxiety need be felt as to the ability of the banks to move the crop, especially in view of the assistance which the government has arranged to give the banks, if necessary." So said Mr. H. B. Walker, manager of the Bank of Commerce, at Montreal when interviewed by the Montreal Gazette.

Have Work to Do.

"It would be the part of wisdom to go on doing our work as if under normal conditions. Of course, in some lines there has been a reduced demand for goods; but in others, as, for instance, the milling, the sugar, the clothing, the boot and shoe business, there has been increased trade.

"There has in a word, been no disruption; and the great and urgent thing is to continue the mutual confidence that now exists.

"We, in Canada, have spent large sums on developing work—agriculturally and industrially. It is now for us to produce, from the plans we have established—produce agriculturally, to the fullest extent, and in the case of manufacture, to the limit of the market that can be developed for our goods. For one thing, we can learn to patronize our own manufactures more and more, while we may also be able to supply, as respects agricultural and manufactured products, other countries whose own product has been rendered unavailable through the limitations of war. And one thing patriotic Canadians should insist on, and that is—that when they go to buy goods they should demand to see the trade mark upon them—the new trade mark, if you like—"Made in Canada." This is the point to emphasize—that it is up to us to utilize to the full, in so far as possible, the facilities we have been supplying ourselves with, at great expense, in increasing our own productiveness. That will go a long way to keep things normal, and it will, at the same time, extend our business.

Confidence is Currency.

"The great thing is to maintain confidence. That can be done by cultivating in one's self a cheerful spirit and by trying to get others to share it. There is a tendency, if one gave way to it, to take a pessimistic view of things; but we in Canada have certainly no reason to indulge that feeling. Our business is to cultivate an optimistic spirit. Nothing must close or fail to work that can properly be maintained in its integrity. All our people must stand together, working with a single purpose, and that to maintain things in so far as possible, as though we had not to see the scarehead lines in the paper.

"It will be surprising how valuable and stimulating such a spirit will prove to be. Those who can speak a reassuring word should do so. In a general way, our position is favorable in many vital regards. We have unimpaired financial confidence—which is an asset of the first importance. If our people stand together and if every form of activity is maintained to the utmost of its power—these features will make for the general improvement and betterment."

◆

Orders have been received at the customs offices at Sarnia that no horses are to be allowed to leave Canada.

"It is a tribute to the power of the British empire, that in face of the greatest war the world had ever seen, we are able to go about our business as usual."—Judge Coatsworth at Toronto.

The Molsons Bank

136th Dividend

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the FIRST DAY OF OCTOBER NEXT, to Shareholders of record on 15th September, 1914.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City, on Monday the 2nd of NOVEMBER next, at three o'clock in the afternoon

By the order of the Board,
EDWARD C. PRATT,
General Manager.

Montreal, 25th August, 1914.

SEASONED SECURITIES

This Corporation was established in 1855, and for more than fifty-nine years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. Ten and One-quarter Million Dollars of Shareholders' Money are a further pledge of their security.

These bonds may be had in sums of One Hundred Dollars and upwards.

WINNIPEG, CANADA

NOTES AS POLICY PREMIUMS

Cash Settlements Are Best Method—Complications in Paper Transactions

The custom among life insurance salesmen of taking notes for premiums causes more trouble and misunderstanding than almost any other phase of the business, thinks Mr. T. Price Thomas, provincial manager of the Excelsior Life Insurance Company for Saskatchewan. There seems to be something about life insurance that tends to procrastination in the payment of premiums, particularly in places where the system of credits and long-time settlements is in common use. Perhaps it comes from the idea that the event insured against is considered a long way off, and though the insurance deal is closed, the prospect thinks he ought to be allowed to take his time in paying for it.

The transaction is an immediate one on the part of the company, and the prospect should be made to see that it should be the same with him.

Note Becomes a Claim.

Were he to die, the company would be expected to pay the face of the policy within a reasonable time after the claim is filed, and the fact that this is the practice of all the companies should be brought out by the salesman in his endeavor to secure a cash settlement when the policy is delivered.

When a policy paid for in part by a note becomes a claim, the settlement always involves extra trouble to explain, especially if the claimant is a widow and unused to business methods, why a certain amount must be deducted from the face of the policy to pay for the note, with interest.

A great number of contested settlements arise from this cause. Even when explained carefully, an impression may remain in the mind of the beneficiary that an injustice has been done and the occurrence may come up to the prejudice of the salesman in securing applications. One often hears such matters discussed, and generally by persons who do not understand the transaction, and consequently as the story is passed along it departs more and more from the truth.

Must Be Careful.

Very often, too, a salesman is so eager to secure an application that he is somewhat careless as to the financial standing of the party who gives the note. It should be a steadfast rule on the part of every life insurance salesman never to accept for his company a note that he would not take himself if it involved a personal transaction. It is true in the majority of cases that a note is as good as cash payment, but the salesman who conducts the negotiation leading up to the transaction is the best judge, and he should be familiar with the financial standing of his prospect. By making certain on this point he will save himself wasted time and effort, and often embarrassing complications with the head office.

◆

GERMANY'S MINERAL WEALTH

Canada's mineral wealth as a factor in its industrial growth is noted in an article on another page of this issue and Germany's growth in a like manner is shown.

The value of Germany's mineral output in 1912 was $502,250,000, and the yield, in metric tons (one metric ton = 2,204 pounds), as follows:—

Coal	174,875,207	Lead ore	142,839
Lignite	80,934,797	Copper ore	974,285
Iron ore	27,199,044	Rock salt	1,296,302
Zinc ore	643,598	Potassic salt	11,161,202

The value of production of German foundries in 1911 was:—

Pig iron	$212,627,750	Copper	11,003,500
Zinc	28,589,750	Tin	4,874,000
Lead	11,038,000

MUNICIPAL TREASURY BILLS

These Will Probably Be Considered as Approved Securities in Dominion Notes Legislation

The legislation adopted at the last session of parliament authorizing advances in Dominion notes to banks upon approved securities will prove of great benefit to Canadian provinces, cities and other municipalities whose treasury bills, afloat in London, will mature during the next few months, says an Ottawa dispatch. These treasury bills or short date obligations had been issued with the expectation on the part of the provincial or municipal authorities concerned that they would issue permanent securities in due course, and from their proceeds retire treasury bills as they matured. The procedure they had adopted in issuing their bills, and that they intended to pursue in retiring them, was the usual and ordinary method of public financing.

Some Have Made Loans.

Some of the public bodies in question had made their issues before the outbreak of the war; others intended to go upon the market this fall. In the former case the proceeds of the loans have not been available in their entirety at least by reason of the British moratorium, which has postponed the obligation of the underwriters and subscribers.

At the same time, *The Monetary Times* learns that several London underwriting firms have not taken advantage of the moratorium, the payment of part of the Canadian Northern loan, to the railroad company, being an instance of this. As for the subscribers it is not possible for them now to make the permanent issues to which they looked forward, as the London market is closed for the present to new issues of even the highest class of securities.

The aggregate of these outstanding treasury bills is large.

During the past 18 months the total has been reduced by about 33 per cent., according to information of *The Monetary Times*. But even so, the aggregate is still high, and new treasury bills are being issued in certain cases. A part of this indebtedness will undoubtedly be met from the proceeds of permanent securities, because, as stated above, the moratorium is not being taken advantage of by all underwriting houses. In certain other cases the maturing bills will be renewed upon terms of reduction in amount by part payment. The balance will be taken care of by the bankers of the provinces and municipalities interested.

Advances to Banks.

In this connection the Dominion government's offer to make advances to the banks will doubtless be availed of to such extent as may be necessary, as no question can arise as to the value as collateral of the securities of Canadian provinces or the larger cities and municipalities concerned. The legislation under which this aid will be granted is found in the fourth section of the finance act passed at the war session. It provides that the governor-in-council may by proclamation authorize the making of advances to the chartered banks by the issue of Dominion notes upon the pledge of securities deposited with the minister of finance of such kind and amount as may be approved by the treasury board, such advances to be repayable at such times as the board may determine with interest at a rate likewise determined by the board of not less than 5 per cent. per annum.

◆

COMPANIES INCREASING CAPITAL

The following companies with Dominion charters have increased their capital stock:—

Liggett's, Limited, from $50,000 to $150,000.

Metal Products, Limited, from $25,000 to $100,000.

The following companies in Prince Edward Island have increased their capital stock:—

Regal Black and Silver Fox Company, Limited, from $240,000 to $500,000.

The Royal Silver Black Fox Company, Limited, from $25,000 to $195,000.

The following company in Manitoba has increased its capital stock:—

Guaranteed Securities, Limited, from $1,000,000 to $2,000,000.

Guaranteed Investments

An investment, promising a satisfactory interest return, and guaranteed by an institution of 32 years' standing, and with a Paid-up Capital of $1,500,000 and Reserve of $1,500,000, should interest Investors There are features of this investment offer that make it worth your further investigation.

GERMAN INDUSTRIES BEING SMASHED

In Berlin Paper Dr. Lederer Discusses Extent German Trade Has Suffered

The Berlin Vossische Zeitung discusses the extent to which German industry already has been hit by the war, according to a cable to the Times from Copenhagen. Dr. Emil Lederer, the writer, says that the removal of all men capable of bearing arms has "smashed industry to atoms." All links uniting various trades have been broken. The crisis with regard to money and credit which occurred in the first instance was accentuated by the necessity of financing the war by a single stroke. The attempts made to meet the crisis by liquidating assets only made matters worse. The unfortunate thing, he says, is that this liquidation, which is customary at all crises, does not in the present instance affect merely a small body of speculators, but expresses the fact that German industry and its production are on a fictitious basis.

There is Much Unemployment.

Complete transformation, Dr. Lederer says, is necessary in order to cope with the new conditions brought about by the war. At present there is little sign of this. We see the apparent paradox, says Dr. Lederer, that in spite of increasing absorption for military purposes of men capable of working there is an increase of unemployment among those that remain behind. Even the much-sought-after labor of women cannot find employment. Day after day undertakings shut down or their output is diminished. Those, indeed, which continue at work are working with aimless overpressure because of uncertainty, so the net output is diminished.

What, asks Dr. Lederer, are the decisive economic facts? Does the complete break-up of industry which threatens Germany involve a disruption also of agriculture and the supply of necessities. The war means for Germany, first, the prevention of exports, especially articles of luxury; secondly, prevention of imports of means of subsistence, especially raw materials such as cotton and copper; thirdly, reduction of demand of all at the front and restriction of demand of those remaining at home. There no longer is any demand for articles of luxury.

Good Harvest Will Help.

Against these facts, which apparently involve the gloomiest possible outlook for the near future, Dr. Lederer says, must be set others equally decisive. Germany has had a remarkably good harvest, so on the whole the purchasing power of the agricultural industry is relatively big. The same thing applies to industries which supply the needs of the army and other public purposes. The problem is to use this purchasing power in such a way as to revive all those branches which supply the needs of the above-mentioned industries. The question is how to build around the sound kernel.

It will require foresight and perhaps great expenditures, for forces which could bring about this reorganization automatically do not exist. It must be remembered, Dr. Lederer says, first, that the amount of available labor is considerably reduced; secondly, available raw materials probably will not be sufficient for a long time; thirdly, the needs of private industry have during the war undergone considerable diminution and change. These facts must first be recognized. Then a systematic plan of reconstruction must be drawn up with the help of chambers of commerce and similar organizations. The writer concludes by recommending the formation of a central permanent committee representing all interests under control of the ministry of the interior to see what can be done.

◆

Get busy and business.

Dr. Emil Lederer says German industry is "smashed to atoms." Now for the British rake.

The man who has built moratorium earthworks around his business, sitting smugly on a pile of unpaid debts, forgets there is such a thing as retaliation dynamite.

A British submarine took forty winks at the bottom of a German harbor. That is business nerve in the right place,—a hint for landlubbers.

CENTRAL RAILWAY GETS JUDGMENT

Much Criticized Company — Split With Contractors — Terms of Decision

Monetary Times Office,
Montreal, September 16th.

The Central Railway Company of Canada has just had an important judgment rendered in its favor by the Privy Council. This company has figured in a good many discussions in Canada of late and further particulars of the case referred to are now available.

The case arose out of a contract for building a line of railway from Montreal to Midland, Ont., given out by the company to Messrs. C. J. Willis and Sons, contractors, Montreal. The company was to satisfy the contractors that the money would be forthcoming before work started. The following July an issue of £1,000,000 first mortgage 5 per cent. bonds was arranged for, the contractors agreeing to underwrite £30,000 of these. Although the issue was only partially successful, work was commenced under the contract.

Company and Contractors.

In October of the following year, being 1912, the difficulties of the Central Railway became acute, and trouble arose between it and the contractors. The company blamed the contractors for not making sufficient progress with the work of construction and for not procuring the track-laying equipment, and the contractors blamed the company for not providing the funds. Finally, the contractors wrote the company that unless further moneys were paid the trustees for the bondholders, they would cease work on construction of the road. The company replied that in such case the contract would be cancelled and the contractors would be held liable for damage for non-fulfilment of contract. Little change took place in the relationship between the company and the contractors till March, 1913, when the latter were notified that the work had been taken out of their hands. The contractors then brought action for damages.

What Decision Gives.

The first judge awarded the contractors damages to the extent of $18,825, and the company was prohibited from undertaking the work of construction or letting the work to any other contractor. The company appealed from this decision to the Court of King's Bench, and the latter part of the decision was there set aside. In order to sustain their position, the contractors then carried the case to the Privy Council, where their interests were looked after by Sir Robert Finlay, K.C., A. W. Atwater, K.C., and John D. Crawford. For the company were Donald McMaster, K.C., and F. S. McLennan, K.C.

The decision now announced gives Messrs. C. J. Willis and Sons the right to complete the work and earn the remuneration to which they would be entitled under the terms of the contract; but as they had refused to carry out their part of the contract, the court would not grant an injunction to prevent the railway company securing the performance of the contract by other means. The appeal was, therefore, dismissed with costs.

◆

ST. CATHARINES INSURES TROOPS

The city council of St. Catharines, Ont., will insure all the soldiers from that city who have gone to the war. Single men will be insured for $500, married men with wives $1,000, with wife and two children $1,500, with more than two children $2,000. This will cost between $7,000 and $8,000.

GOING AFTER GERMAN TRADE

Some of the Articles Germany Has Supplied to Canada

The following is a list of some of the articles in which there is German and Austrian competition in neutral markets:—Machinery, cutlery, hosiery, steel wire, hollow ware, chemicals and dyes, pottery, paper, clothing, cotton prints, woolen and worsted piece goods, cotton hosiery, gloves, boots and shoes, furniture.

The director of the commercial intelligence department of the British board of trade, in a letter covering an extensive memorandum, which has been sent out broadcast to traders, says:—"In view of the state of war which exists between this country and Germany and Austria-Hungary, the board of trade are confident that British manufacturers and merchants are already devoting special attention to the opportunities now afforded them of establishing themselves in colonial and neutral markets in certain lines of trade in which German and Austrian or Hungarian manufacturers and merchants have hitherto transacted a large proportion of the business.

"The present safety of the trade routes, coupled with the protection afforded by the state scheme of war risk insurance, and the financial measures taken by his Majesty's government to facilitate the continuance of business transactions, should enable this to be done to a very considerable extent, in view of the fact that German and Austro-Hungarian trade with overseas countries must necessarily be at a standstill.

Canadian Imports from Germany.

Canadian imports from Germany amounted in 1912-13, to $14,500,000, and included:

Cotton manufactures, $1,040,000 (including socks and stockings, $442,000; lace, white or cream colored, $227,000).

Drugs, dyes, chemicals, etc., $750,000 (including aniline and coal-tar dyes, etc., $228,000).

Earthenware, etc., $343,000 (including tableware, $301,000).

Electric apparatus, $112,000.

Fancy goods, $1,128,000 (including lace, lace collars, etc., $198,000; toys, $534,000).

Fur skins, wholly or partially dressed, $377,000.

Fur skins, not dressed, $1,204,000.

Glass and manufactures of, $256,000.

Gloves and mittens, $380,000.

Jewelry, $175,000.

Iron and steel and manufactures of, $2,124,000 (including cutlery, $400,000; machinery, $282,000; locomotive and car wheel tyres, $326,000; tubing, $340,000).

Zinc and manufactures of, $350,000.

Lamps, side-lights, head-lights, etc., $178,000.

Musical instruments, $103,000.

Paints and colors, $231,000.

Paper and manufactures of, $285,000.

Silk manufactures, $275,000.

Sugar, $310,000.

Tobacco and manufactures, $186,000.

Woolen manufactures, $1,080,000 (knitted goods, including knitted underwear, $104,000; outside garments for women and children, $148,000; clothing, $330,000; fabrics, $285,000).

Canadian Imports from Austria.

Canada imported from Austria-Hungary goods amounting in 1912-13 to $1,700,000, including:—

Breadstuffs	$202,000	Hops	$ 44,000
Buttons	76,000	Jewelry	45,000
Cotton manufactures	56,000	Iron and steel, and manufactures of	23,000
Drugs, dyes, chemicals, etc.	56,000	Lamps, side-lights, head-lights, etc.	145,000
Tableware of china, etc.	74,000	Silk fabrics	174,000
Electric apparatus	26,000	Tobacco, pipes, pipe mounts, etc.	153,000
Fancy goods	36,000	Furniture	23,000
Glass and manufactures of	90,000	Woolen manufactures	83,000
Gloves and mittens	53,000		

Canadian manufacturers will probably make here some of the goods hitherto purchased in Germany and Austria, at the same time seeking to capture German trade elsewhere.

NEED NOT PAY GERMAN DEBTS

If English Bill Passes—Practical Phases of Trading With the Enemy

Shipping forwarding agents in London are much perturbed and indignant over the action of certain German firms who are circularizing and canvassing importers in Canada, offering to attend to their business from this country on a cut basis, and suggesting contracts for one year on these cut rates, says a Canadian Associated Press cable. This endeavor is evidently made with the view of getting the trade into German hands when the war is ended, and seeing that the cut is only a penny or two per package it would not mean a very considerable item to Canadian firms in the course of a year, but it would mean all the difference between efficient service and the reverse in this country.

Germans are Working Canada.

German shipping and forwarding firms who have their head offices in Berlin, with offices at different ports in the United Kingdom, are at present working Canada most assiduously, and a strong word of caution is necessary, as it may not be generally understood that Canadian houses supporting German firms at the present time are assisting Germany in her finances for war.

It must also be pointed out that as Germany is destroying neutral shipping by dastardly sowing of mines there is serious risk of German firms shipping bombs or explosives as ordinary merchandise, and causing untold disaster.

Do not Pay German Debts.

Attorney-General Sir J. A. Simon has introduced a bill in the British House of Commons which considerably enlarges the scope of existing provisions for the suppression of trade with the enemy. It prohibits the making of any payment to an alien enemy, though the obligation arose out of a contract made prior to the outbreak of the war.

A section of the London press is crusading against companies under contracts, with the Admiralty and War Office, who, though domiciled in England, are German in character. One of them is Siemens Brothers and Company, of which Von Chauvin, of the Grand Trunk Railway board, is chairman, says a Canadian Associated Press cable.

It is asserted that trading with these companies is now illegal. The London Globe suggests they go into voluntary liquidation to ensure that no profits made during the war go to Germany.

◆

ONTARIO'S MINERAL PRODUCTION

The statistics of Ontario's metallic production for the half year ended June 30th have been compiled by the provincial bureau of mines. As in most other industries, the production as a whole for the half-year shows a decrease. Copper, nickel, cobalt and cobalt and nickel oxides show an increase, but there is a decrease in gold, silver, iron ore and pig iron. However, there is likelihood of the gold output being increased in the near future. Trade depression does not affect the "market" for this metal. At present, throughout the world the market for practically all other minerals is seriously depressed.

The following is a summary of metallic production in Ontario for the half-year ended June 30th, 1914, compared with the production during the similar period of 1913:—

Product.	Quantity.	Value, $.	Same period 1913.	Increase or decrease.
Gold, ounces	99,269	2,011,069	2,171,147	D.
Silver, ounces ..	13,379,044	7,053,418	7,693,713	D.
Copper, tons ...	8,357	1,197,059	832,645	I.
Nickel, tons	13,105	2,872,843	2,514,414	I.
Iron ore, tons ..	47,160	118,119	141,324	D.
Pig iron, tons ..	343,408	4,429,664	5,051,840	D.
Cobalt, tons	129	22,581	7,374	I.
Cobalt and nickel oxides, lbs...	757,268	370,152	186,347	I.

MORE MORATORIUM LAWS

Many Countries Have Adopted Them—Canada Still Paying Its Debts

He is a wise man who has a [illegible] knowledge of Europe's moratorium history. Here is more information regarding the moratorium laws in various countries. A Belgian decree of August [illegible]th supersedes that of August 2nd and provides that the period during which protests and appeals regarding negotiable instruments signed before August 2nd are to be made is postponed up to and including September 15th, 1914.

Payment cannot be demanded from the drawers, endorsers, or other responsible parties, during this period. During the same period the holder is relieved of the obligation to demand payment on the due date. He is expected to inform the debtor or the principal party that the bill can be paid at the domicile of the holder. Interest will accrue from the date of falling due until payment.

From August 16th until September 15th the withdrawal of cash on bank deposits effected before August 3rd, cannot exceed 1,000 francs per fortnight. Deposits not exceeding 1,000 francs may be withdrawn entirely.

In Brazil and Italy.

A [illegible] days' moratorium was declared in Brazil as from August 16.

A royal decree has been issued in Italy, authorizing the banks of emission—viz., the Banca d'Italia, the Banca di Napoli, and the Banca di Sicilia, to increase the maximum limit of their note circulation by one-third in each case.

Another decree authorized the banks (other than the banks of emission) and pawn establishments, between August 4th and 20th, to limit withdrawals to 5 per cent. of each individual account. By the same decree bills payable in Italy which fell due from August 1st to 20th, inclusive, were prolonged for 20 days.

The government of Salvador has issued a decree authorizing the banks of the republic to meet their obligations in their own notes until peace has been re-established in Europe for one year.

One in Sweden, Too.

The King of Sweden has issued a proclamation whereby a moratorium is established for debts made before August 6th. These debts shall not be payable until September 7th, and debts payable before September 7th, shall not be payable until a month after. The moratorium is not in force in regard to rates and taxes or other public debts, excepting such debts as are mentioned in paragraph 11, of the Royal Ordinance of May 16th, 1884, relating to patents, and paragraph [illegible] of the Royal Ordinance of July 15th, 1884, relating to trade marks.

The following is a partial list of the countries which, according to press dispatches and other advices, have resorted to moratoria or similar devices, such as extended bank holidays, or which have at least passed special acts authorizing a resort to a moratorium:—

Argentina, Austria, Brazil, Bulgaria, China, Cyprus, Denmark, Egypt, England, France, Germany, Italy, Norway, Peru, Russia, Sweden, Switzerland, Turkey and Uruguay.

There is not a moratorium in operation in Canada.

◆

JAPANESE, GERMAN AND BRIT'SH WAR LOANS

A German war loan of one billion marks ($238,000,000) in Treasury bills, and an unlimited State loan has been announced at Berlin, according to a dispatch received at the German Embassy at Washington. The loan bears five per cent. interest, and was given out at 97.50.

The Japanese Diet has adopted the war programme of the Japanese Government providing for a war appropriation of 53,000,000 yen (about $26,500,000).

The Imperial Government has come to the financial assistance of the Union of South Africa by lending it £7,000,000 ($35,000,000).

NEW BRITISH TREASURY BILLS

Tenders were received at the Bank of England on August 26th for a further issue of £15,000,000 of treasury bills. Of the amount offered, £10,000,000 is understood to be required as a loan by the British government to the Belgian government. The new bills, of six months' currency, are dated August 29th, and fall due for payment February 28th, 1915. The amount of applications received reached £40,193,000, against £42,115,000 last week, when a first amount of £15,000,000 was offered. Tenders at £98 1s. 5¾d. received about 81 per cent.; those above received in full. The bills secured an average price of £98 2s. 3d., equal to an average rate of discount of £3 15s. 6.09d. per cent. As a result of this issue the amount of treasury bills outstanding is raised to £43,100,000, as to £36,000,000 held by the public and £7,100,000 placed privately with various government departments. The following statement shows particulars of outstanding treasury bills, together with the amount of applications for each issue:—

British Treasury Bills.

GERMANY WAS BUYING CANADIAN WHEAT

Monetary Times Office
Montreal, September 16th, 1914.

Grain is moving freely out of Montreal harbor. Three million bushels of wheat were exported to Europe recently and the movement shows no sign of abatement. There is not much of last year's Canadian crop left and the bulk of the wheat leaving Montreal just now is new American Winter wheat. It is practically all going to Great Britain and France. No shipments can be made to Holland or to Norway and Sweden on account of the danger from mines. A prominent local grain dealer informed *The Monetary Times* that about 50,000,000 bushels of wheat have been exported from Montreal to Europe this year, of which about 15,000,000 bushels were despatched during August.

The price of Canadian flour has advanced 70 cents per barrel since the end of July, and grain men are of the opinion that a further advance of 30 cents will almost immediately be announced. They look for a continued European demand for Canadian wheat and flour, and say that export prices are not much out of line with recent quotations on the Chicago and Winnipeg grain exchanges. A long war would result in famine prices in wheat and flour. It is stated that there are plenty of tramp vessels at this port available for carrying grain to Europe. They are mostly of British and Norwegian registration.

Local grain dealers confirm the report that the greater part of the wheat shipped from the port of Montreal this season, prior to the war, went to Germany. Probably two-thirds of the total exports went to Rotterdam and Antwerp, for shipment to Germany. Up to August 1st, about 35,000,000 bushels of wheat were shipped from Montreal and it is probable that 20,000,000 bushels were consigned to Germany. In normal years, Germany only imports from 30,000,000 to 40,000,000 bushels of wheat. The opinion is expressed in many grain circles that the war will not interfere with the harvest in Germany this year.

The government order for one million bags of flour for Great Britain is stated to be divided as follows:—

One-quarter million bags of flour each were purchased from the Lake of the Woods Milling Company, the Ogilvie Flour Mills Company, and the Maple Leaf Milling Company, while the remaining quarter million was divided between the Western Canada Flour Mills, the St. Lawrence Milling Company and other concerns.

◆

The Gillett Company's gift of 100 cases of yeast to Canada's naval service department might also have helped certain business men to rise to the occasion.

WHAT BIG NAVIES COST

An interesting tabulation of the sums spent on new construction by Great Britain and Germany on their respective war fleets is made by Shipping Illustrated. The table is as follows.—

	Great Britain	Germany
1904-05	£13,100,000	£4,300,000
1905-06	11,400,000	4,700,000
1906-07	10,500,000	5,200,000
1907-08	8,800,000	5,100,000
1908-09	8,500,000	7,100,000
1909-10	11,100,000	10,200,000
1910-11	14,700,000	11,400,000
1911-12	17,500,000	11,700,000

The German estimates do not include pensions or appropriations for coast guard and reserve, a matter of about £4,000,000, which is included in the British budget. Similarly, £11,000,000 should be added to the German figures as the cost of enlarging the Kiel canal. Germany has borrowed not less than $220,000,000 in the last twelve years on account of her navy.

◆

CANADIAN CONVERTERS WILL BENEFIT

Monetary Times Office,
Montreal, September 16th.

Among the firms to be benefited by war would seem to be Canadian Converters. The president of Canadian Converters is authority for the statement that the weekly orders being received by the company are showing increases as compared with a year ago, and that this has been so for two months past. Business from the country sections is good, being sufficient to more than make up for any decreases in larger centres; the latter are expected to begin to improve.

The president commented on the fact that no cancellations were being received, the absence of this being in large part due to the fact that buyers placed their orders in a conservative manner. Repeat orders were being received constantly. He was of the opinion that the present war would result advantageously to the Canadian Converters Company as well as to a number of other concerns, such as Penmans. The war would bring about a complete stoppage of imports of German and Austrian hosiery, underwear and shirts, and the effect of this would be felt in the increased orders which it would be necessary to place with Canadian manufacturing concerns. German concerns would not be in a position to resume operations for a long time after the ending of the war, and this, together with other influences, would give Canadian concerns an excellent opportunity to get themselves in a position to capture and retain the trade.

◆

MILLING INDUSTRY INCREASES PROFITS

Monetary Times Office,
Montreal, September 16th.

Preliminary statements concerning the milling business indicate that three large Canadian milling companies whose years closed at the end of last month will show increased profits. The companies are the Lake of the Woods, the Ogilvie Flour Mills and the Western Canada Milling Company. The flour milling business has not been too prosperous during the past few years, and companies reported decreased profits, while a few passed their preferred dividends, and even their bond interest.

Throughout the past year conditions have been more favorable than for some time previous, and since the war broke out the price of flour has advanced considerably. Not only has there been an active demand for domestic and export purposes, but the government entered the market and made purchases, which added quite a little to the profits which would in any case have been made.

So far as can be ascertained, the profits of all three companies will exceed those of the previous year. For the year ended August 31st, 1913, the profits of the Ogilvie Flour Mills amounted to $576,734, and profits available for dividends were at the rate of 13.27 per cent. on the common stock. Net earnings of the Lake of the Woods Company were $540,677, profits available for dividends being at the rate of 16.46 per cent. on the common. Net earnings of the Western Canada Company were at the rate of 11.05 per cent

COST TO SUPPLY MONTREAL'S WATER

Monetary Times Office,
Montreal, September 16th.

The cost of taking over the system of the Montreal Water and Power Company will be greater than assumed a few weeks ago, when the report of the experts was published. In this report the physical assets of the company were assessed at a total of $5,400,000, the stocks, etc., $1,020,000, and franchises, $700,000, making a total of $7,120,000, should the city decide to take over the property of the company.

To this must be added the cost of connecting the company's system with that owned by the city itself. This cost was estimated some time ago by Mr. Lesage at $1,750,000, although it would appear that work performed by the company since would lessen this cost by perhaps $250,000. This would leave about $1,500,000 to be added to the previous estimated cost, making a total of $8,620,000.

This cost of coupling up the systems would undoubtedly have to be added, as above, to that of the purchase of the company's system, as otherwise the advantage of its ownership would in large part be lost. It may be remembered that the city of Montreal was without water for a week or more at the beginning of the present year through the breaking of the big intake conduit, and that almost the only measure of relief was afforded by the connections which were established with the Montreal Water and Power Company's system. These connections, however, were inadequate, and one of the advantages of purchasing the system would lie in the support one system would give to the other through making these connections adequate.

◆

TREASURY BOARD HANDLE APPLICATIONS

The effect of Canada's recent financial legislation is to continue the existing situation established by order-in-council previous to the recent session, particulars of which were given in a recent issue of *The Monetary Times*, the only change being that application from the banks for advances upon approved securities are to be made to the treasury board. The board will avail itself where necessary of professional advice as to the quality and value of securities offered as collateral.

As the arrangement hitherto existing is superseded by that provided under the statute, the minister of finance, the Hon. W. T. White, has written a personal letter of thanks to each of the members of the special advisory committee, consisting of the president of the Canadian Bankers' Association, the general managers of the Bank of Montreal and the Royal Bank, and the managers at Montreal of the Canadian Bank of Commerce and of the Imperial Bank. The services of these gentlemen, either individually or associated with other bankers, will continue to be available to the treasury board.

Under the new arrangements, securities may, for convenience, be lodged by the banks with the Royal Trust Company at any of its offices in Canada, or with the finance department at Ottawa. The minister has also made an arrangement through Hon. George Perley, with the Bank of England, London, whereby securities may be lodged with that institution for account of the minister of finance.

In the letter notifying the presidents of the banks of the new arrangements and enclosing them copies of the act and of the necessary forms of application and pledges, the minister states: "The legislation to which their attention is directed was intended by parliament to enable the banks of Canada to extend in this time of stress such credit facilities to the community as may be proper, having regard to prevailing conditions and the observance of sound banking principles."

BE PREPARED!

These are the days of stress and strain in financial circles, and the breaking of the war-cloud has greatly added to the prevalent anxiety.

The intense surprise experienced at the declaration of war clearly shows the necessity for every financial institution being prepared for unforeseen emergencies.

The Mutual Life has sometimes been criticised even by its best friends for carrying too large a surplus, but the situation today justifies our conservative yet progressive policy.

ATTRACTIONS OF CANADIAN INVESTMENTS

Some Facts and Figures Regarding Canadian Pacific's Position—Mines Development

Holders of Canadian Pacific stock should on no account be frightened into selling at the prohibited quotations—namely, round 158 to 160—for they in no way represent anything like the intrinsic price that would be quoted if the stock exchange were to open its doors. During the past few months it is a well-known fact that huge amounts of Canadian Pacific stock have been sold in England, New York and Montreal for German account, and it is shrewdly suspected that at the present moment the market is largely oversold, suggests a London Financial Times correspondent. Just before the stock exchange closed its doors the greatest excitement prevailed in the "Canada Pac." market, the range in fluctuation being as much as and even more than 10 points in a day; no one had a good word for the stock or the country, and this has no doubt caused many timid holders to sell their holdings. Since the stock exchange closed its doors the company has declared its usual 2½ per cent. for the quarter (being at the rate of 10 per cent. per annum) on the ordinary stock, and we have now before us the accounts for the year ended 30th June, 1914, which, considering the great set-back in trade and emigration, can only be regarded as highly satisfactory.

Important Considerations in Investments.

The amount required to pay the 10 per cent. dividends for 1913-14 was $20,259,500 against $17,170,700 in the previous year, owing to issues of about $62,000,000 additional common stock, and there was a surplus of $9,698,300, or nearly sufficient to pay a further 5 per cent. dividend after paying all charges. This is a very strong position to be in. The shareholders at the annual meeting to be held on October 7th are to be asked to approve of increasing the capital by $75,000,000, but no issue is anticipated without the authority of shareholders, so that we may take it when general conditions have improved the stockholders may look forward to further substantial bonuses in the shape of new stock upon favorable terms. There are now several most important considerations which should appeal to shareholders and investors alike in Canadian Pacific stock, and, in fact, all Canadian securities.

Since the war broke out our Canadian colonies have given practical proof of their devotion to the Mother Country in supplying not only expeditions of men and money, but also the gifts of wheat, oats, etc., and in a speech delivered by the Duke of Connaught from the Throne to the Canadian Parliament on Tuesday, 18th August, His Royal Highness said: "As the representative of the King, I must add my expression of thanks for the splendid patriotism and generosity displayed throughout the length and breadth of the Dominion." These actions cannot but cause a great revulsion of feeling in favor of the Dominion of Canada, both from an investor's point of view, whose first consideration is undeniable security and emigration, and while it is a fact that during the past half year the tide of emigration from the United Kingdom has declined by about 64 per cent., the Canadian Government has realized the situation and discouraged emigrants from all countries apart from agriculturists and domestic servants.

Buy if Possible.

A record and bountiful harvest seems practically assured, and this must naturally benefit the railways and go a long way to make up the past shrinkage in the traffic returns.

It will also act as a stimulant to emigration, and many of the newly laid tracks of railway (for the moment unprofitable) which are known to pass through immense coal and iron deposits are in course of active development, which, with an ever-increasing population, will bring a large revenue to the railways. It is true that for many months past Canadian railways and land securities have been under a cloud owing to financial stringency, over-speculation in land and excessive building operations, and a halt was necessary for recuperation, as the pace was too fast during the past few years, but with the attractions the country is now certain to command (even from a loyal and patriotic point of view), together with the fertility of land in the north-west, much greater strides may be confidently looked for in the future, and with the termination of the war renewed attention will be directed to Canadian Pacific stocks by English investors. It may be finally remarked that the common stock in 1913 rose to 255 and the dividend was just the same then as now, namely, 10 per cent. per annum. Enough has been said to warn holders of stock not to be tempted into selling, but rather to take advantage and buy if they can do so at anything round the so-called unofficial prices.

◆

MONTREAL TRAMWAYS AGREEMENT

Monetary Times Office,
Montreal, September 16th.

That the Tramways Company officials are renewing their efforts to bring about a settlement of the franchise question with the city of Montreal is suggested. The present would seem a favorable opportunity, stock exchanges being closed, and attention has been entirely diverted, for the time being, from the stock markets, which are usually the means through which the first intimation that something is taking place is revealed. The belief is expressed that the company is making good use of its opportunity, and that negotiations are under way which will result successfully. Citizens would welcome a settlement of the relationship, providing it took place along lines which would be fair to the city. Should the negotiations end successfully, it is said the work of constructing additional lines would be commenced almost immediately. This would supply work at a period when employment is needed.

◆

MONTREAL'S WATER SUPPLY.

Monetary Times Office,
Montreal, September 16th, 1914.

After discussion and threats of litigation, the question of the valuation of the Montreal Water and Power Company, has reached a definite basis. The two experts, Messrs. Butler and Gagnon, appointed by the city of Montreal, to make the valuation, have reported the company's system as a going concern to be worth as follows:—

For the company's system as a going concern	$5,400,000
Stock	1,020,000
Franchises	700,000
	$7,120,000

The valuation took place in connection with the negotiations for the purchase of the company by the city of Montreal. The citizens of Montreal and vicinity are supplied by two systems. One of these is owned by the city and supplies the greater proportion of the water required, the other being owned by the Montreal Water and Power Company, supplying the towns of Westmount, Maisonneuve, Outremont and certain other sections. There is a third system also which supplies a portion of Notre Dame de Grace and westward, but this is a small one and has not come in for much attention.

The company and the city reached the point of a discussion of price. Difficulties then arose. The city demanded an examination of the books and physical assets, in order to ascertain the actual value. The company was not willing to grant this. Later, a threat was made to expropriate portions of the company's plant and the company in all probability appealed to Quebec. Eventually negotiations reached the point where the experts were appointed to report on the value.

The report does not make any recommendation, but it is generally thought that the board of control will favor the purchase. The city may enter into possession by purchasing the company's stock, giving in return [illegible] registered stock of the city to the amount of $[illegible], bearing 4½ per cent. interest for 40 years and assuming the liabilities. It is considered that the revenue would be sufficient to carry the interest.

In this connection it is of interest to note that the city has been operating its water department at a profit, but that during the past year, in deference to many years of agitation, the water tax was lowered to 4 per cent. of the rental paid by the tenant, it having previously been 5 per cent. Total collections of water and business taxes from August 1st to September 1st amounted to $1,0[illegible]2,872. On the whole, it is expected that the reduction in the tax will represent a loss of about $15[illegible] to the revenue of the city on the entire collections for the year.

CANADA WILL SUFFER LEAST

Will Also Recover Quickly From War Effects and Profit Considerably, Too, Says Dr. Shortt

Professor Adam Shortt, of Ottawa, has returned to Canada from England. Before leaving London he interviewed Sir George Paish and other leading authorities on financial conditions in London. He discussed with them the problems of British finance, especially in their relation to Canadian conditions. The impression prevailed in London, said Dr. Shortt, in an interview with the Toronto Globe, that there is no reason for any Canadian financial panic, and no reason why Canada should not profit greatly from European conditions as affected by the war.

Expect War to be Short.

According to the London financiers, the war will not be of long duration. Many of them expect that the struggle will be practically decided by Christmas, and, in any event, by next spring, the problem of financial and food supplies for Germany and Austria being the determining factor. With the British navy in control of the seas, and food supplies for the allies from abroad being thereby guaranteed; with the financial resources of Russia, France and Great Britain considerably greater than those of the enemy, and with the prospect of both Germany and Austria being unable to maintain the present pace or to till their fields next year, Dr. Shortt says the pressure from financial stringency and from shortage of food supplies in Austria and Germany should compel them to come to terms with the allies within a very few months. That is the impression which prevails among the best economic authorities in Great Britain.

To Stimulate our Trade.

As to Canadan conditions affected by the war, Dr. Shortt pointed out that, because of the limitation of European supplies of food, lumber and the other necessities of life which Canada produces, there must be an increased demand from Europe for the things which are produced by the Dominion from its natural resources. This increased demand means higher prices and a stimulus to the basic industries of Canada which, in turn, must mean increased national prosperity in practically every line of economical production in Canada.

He noted that in the past international wars had invariably meant good times in Canada, especially for the basic industry of agriculture. "A good harvest and a bloody war" were ironically said to be the farmers' prayer. There was economic justification, at least, for such an idea, especially under present conditions in Canada. Before the war broke out, said Dr. Shortt, there was in process a necessary and salutary readjustment of financial and industrial conditions.

Halt had been Called.

Urban development had far outdistanced agricultural development. The floating of securities of all kinds for industrial enterprise, the mushroom growth of cities, enormous expenditures and borrowing for municipal, provincial and national purposes, real estate speculation, and all the other concomitants of boom times had developed a condition where European financiers were already calling a halt and financial stringency had already made itself severely felt. On the other hand, agricultural production had not by any means kept pace with urban and industrial expansion.

The chief need of Canada before the war broke out was to get people back to the land and to stimulate agricultural expansion on a profitable and permanent basis. The effect of the war, Dr. Shortt said, would be to accelerate the process which had already begun. The wind was let out more rapidly from inflated securities, bringing them down to real values, while the enhanced prices for foodstuffs and other commodities of natural production would mean a greater stimulus toward restoring natural industries to their proper place in the Dominion.

Market for our Products.

As a result of the waste of money and of all surplus European capital on the war, he continued, there would have to be a consequent economy for some years to come on "the luxuries and frills" on the part of the European nations. But for food products and other necessities there must still be practically the same, or increased, demand. Canada's exports were at least eleven-twelfths necessities of life.

Only a very small proportion of our manufactured exports could be considered as "frills." And it was only in regard to the latter that European economies and the shortage of capital would be felt to any degree. Moreover, after the war had been brought to a close capital seeking investment would be apt to consider only the safest kind of opportunity.

Canada, with its national prosperity based on the development of its natural resources, could offer to European investors a safer field and a more ready return in dividends than any other country in the world. Basic conditions were sound, so far as Canada was concerned, and, though there would undoubtedly be hardship in some quarters through the more rapid but necessary readjustment of abnormal conditions in consequence of the war, the ultimate result should, within a few months at most, be beneficial for the whole country. There was absolutely no reason for any financial panic or for any pessimistic view of business conditions in Canada.

Some of the Financial Problems.

Dr. Shortt admitted that there would be considerable difficulty experienced for some time to come with regard to municipal, provincial, national and railway financing. Canada had considerably over-borrowed in the past few years, and even without the war there would have been necessity for strict economy and a slowing down in regard to borrowings and all unnecessary expenditures for some little time in the future.

The war had emphasized the necessity, recognized months ago, by the banks in Canada and by every student of economics for the putting on of the brakes. As would be the result in Europe in regard to economy on the frills, so in Canada pending a restoration to normal conditions and the natural increase of general wealth through the development of agricultural prosperity, there must be a cutting out of the frills here in regard to public expenditures, in regard to the flotation of new or doubtful enterprises, and in regard to further railway expansion.

As to the British Moratorium.

As to what would happen in Great Britain when the moratorium period expires, Dr. Shortt said that financiers in London could give no very definite opinion. The moratorium, he said, was declared not so much because of any financial panic in Britain itself, as because of the international situation, with Germany and Austria endeavoring to hit Britain financially by selling all securities held by these nations in the great clearing house of the world and forcing a great drain of gold from London.

There was, he said, ample evidence of a deliberate design by Germany during the week immediately preceding the declaration of war to create a financial panic in London by a concerted selling of stocks, not only from Germany direct, but through Holland and Denmark. It was to prevent this panic, to keep the London supply of gold from being exhausted and to prevent a needless sacrifice of good securities on the market that the moratorium was declared. Dr. Shortt believed that there need be little fear but that all securities having sound value will be maintained at their intrinsic market worth. Wildcatting, however, is doomed for many years to come.

◆

The Kaiser's wishes are towards Paris and his feet to Berlin—wrong way to do business.

Has Montreal had enough of Mayor Martin? If so, Montreal wants to work a little harder at election time.

"We are going along about as usual—not restricting credit to our customers for their legitimate requirements, but not taking on new business or making advances for other than business purposes."—Mr. H. B. Mackenzie, general manager of the Bank of British North America.

The suggested panacea for hard times is, in a few words, this:—(1) Force the banks to lend lots of money; (2) authorize the government to print it for them; (3) legislate people out of the necessity of paying it back. It sounds like a triumph of genius, yet so simple that it is surprising it was not thought of before. Still those who do not mistake glibness for profundity are apt to suspect that its advocates have miscalculated something somewhere.—Toronto Telegram.

Canada's Thirty-Seven Millions Sterling

THAT *sum was obtained in London by the Dominion since January—Underwriters take Large Shares of Issues—Review of Loan Market Overseas—War Has Stopped for the Present All British Loans to Canada.*

DESPITE persistent grumbling and an abundant supply of pessimism, Canada has managed to do pretty well in the London market this year. According to the records of *The Monetary Times*, Canadian loans issued overseas for the first seven months of 1914 aggregate £37,378,176, compared with £47,363,425 for the whole of 1913. The figures for the past few years are as follows:—

1905	£13,530,287
1906	6,427,500
1907	11,203,711
1908	29,354,721
1909	37,411,723
1910	38,453,808
1911	39,855,517
1912	32,456,603
1913	47,363,425
*1914	37,378,176

* Seven months.

With numerous loans which would have been made during the remainder of the year, the total for 1914 would probably have been somewhere near the estimate made by *The Monetary Times* in March last, namely, £43,000,000. But the war has stopped borrowing.

More Loans to Come.

Several of the larger Canadian cities, well known in London, were preparing to market heavy loans, as were also railroads and governments. Industrial corporations, too, might have tried their luck, although London was not inclined to accept Canadian loans of this class anyway.

While over £34,000,000 have been obtained, the results of our loans generally, so far as the public is concerned, have been poor. The following table, compiled by *The Monetary Times*, illustrates this fact:—

Borrower.	Amount.	Left with under-writers.
Algoma Steel Corporation	£ 500,000	84
Dominion of Canada	5,000,000	78½
Vancouver	425,000	86
Toronto Power Company	523,655	81
Winnipeg	1,150,000	73
British Columbia	£ 1,500,000	50
Grand Trunk Railway	1,500,000	53
Montreal	1,500,000	37
Nova Scotia	760,000	82
Edmonton	350,000	60
Vancouver Drainage Board	500,000	88
Dominion of Canada	5,000,000	88
Montreal Central Terminal	1,028,800	73
Quebec province	1,000,000	83½
South Vancouver	223,287	62
Greater Winnipeg Water Bd.	400,000	97
Ontario province	1,000,000	90
Canadian Northern Ry.	3,000,000	80
	£25,360,742	

Left With Underwriters.

Of the issue by the 18 borrowers noted above of total securities of £25,360,742, the underwriters took £19,158,761. When one adds to that sum the large amount of securities, issued by countries other than Canada, and left with the underwriters, it will be realized that the market was pretty well glutted, especially as investors are not anxious to part with their funds at present.

The leaving of large shares of security issues with the underwriters is not a reflection on Canadian credit. It represents market conditions generally and emphasizes the tendency of purchasers to wait for new issues to drop to a discount.

Canadian loans are not the only ones to meet such receptions. The city of Keiff loan was applied for only to the extent of 18 per cent., leaving 82 per cent. in the hands of the underwriters. Nor did the sale of Borax Consolidated Deferred shares attract the support expected, the underwriters being called upon to take up 40 per cent. of their commitments. The South African loan also went badly, 64 per cent. of the issue being left with the underwriters.

While Canada has received considerable funds in England this year, and many first-class loans were in contemplation, *The Monetary Times*, in its recent inquiry on the spot in London, found a decided wish there that the Dominion should give the market a rest. War has brought the respite. Montreal suggested that it would try New York instead of London with a large loan of $7,300,000. This proposal aroused much discussion. London naturally is the best market for Canadian securities. Commenting on the Montreal proposal, the London Financial Times says:—

"The impression has been gaining ground in the Dominion, that it would perhaps be wise at the present juncture to turn temporarily to New York for a part of the financial accommodation needed. The principal reason is not that the money can be obtained in New York on easier terms than in London, and probably it can also be said that resentment or annoyance at British lecturing of Canada for over-borrowing has had practically nothing to do in causing New York to receive more favorable consideration.

Overstocked with Canadian Securities.

"The underlying reason for the apparent desire to try the United States market arises out of the conviction that British investors have rather overstocked themselves with Canadian securities in the past five or six years. Unfortunately, a considerable number of the Canadian ventures have turned out badly. Taking into consideration these points and the developments in connection with the Grenfell breakdown, it has seemed that, in order to preserve her prestige or standing in the English market, Canada should refrain from pressing her securities for sale while conditions in these important respects are unfavorable. No doubt the best results would be obtained if Canada's circumstances had been such as to permit her to refrain from fresh borrowing altogether; but with two unfinished Transcontinentals and other projects in hand which could not be suddenly dropped without great loss, an absolute cessation of borrowing all at once seems out of the question. To some experts the next best thing appeared to be to sound New York as to the prospects of borrowing there for the time being until conditions righted themselves in London."

As to Borrowing Limit.

When Canadian towns and cities and other corporations go to New York with their loans they get no preference over United States borrowers. As a matter of fact the preference is given to the home borrowers. In the past few years it has been the case frequently that a Canadian city would borrow in London at a lower interest rate than that paid in its home market by a United States city of the same class. When, however, a Canadian city, under present conditions, takes a loan to New York it will probably be required to pay a rate higher than United States cities pay. As the borrowings of the United States cities are more closely restricted, many investors in the United States are inclined to discriminate against Canadian municipals on the ground that their borrowing limit is too high.

That Montreal has a perfect right to turn elsewhere than to London for her finance, and that New York has an equally good right to make a profit as intermediary when she sees the opportunity, no one would deny, is the statement of the London correspondent of the New York Annalist. But it is doubtful whether the Canadian borrower is altogether prudent is changing its market, and whether the New York lender will find it altogether easy to "shoot" the bonds on London when the time comes.

The same writer says: "To put the matter bluntly, Montreal has for the moment sucked the European market dry—at least it has sucked it dry at the terms that it is disposed to offer, and consequently it appeals for help to New York. We do not imagine that the bonds will stay in the United States for good and all, but rather believe that they are finding a temporary resting-place, to be exported at a profit to London, their traditional home, when things look brighter here. They are waiting under cover until the clouds roll by." Since that was written, the Bank of Montreal has agreed to finance the city.

Paying Higher Rates.

Canada, like other borrowers, is having to pay more for money than was the case a few years ago. Ten years back, the Dominion government could borrow at a little over 3 per cent. In June it offered 4 per cent. stock to the public at 98, which means that the rate of interest to the purchaser will be a fraction over 4 per cent. The province of Quebec, when it entered on the London mar' this month to borrow £1,000,000, had to make the rate of interest 4½ per cent. in order to get nearly par for its stock. The city of Montreal had to offer the same rate of interest when it floated its recent loan, and certainly will not pay less when next it borrows. Sound municipal and other institutions are offering securities at prices and under conditions which assure the buyers between 4½ and 5 per cent. on the money they invest.

New Capital Applications.

The applications for new capital on the London market for the first half of 1914, according to the Economist, total £152,000,000. A ten years' summary from the records of new issues, excluding conversion loan and vendors' shares, is given below:—

Year.	First half-year.	Second half-year.	Whole year.
1904	£ 70,559,000	£ 52,460,000	£123,019,000
1905	104,216,700	62,970,700	167,187,400
1906	85,324,600	34,848,600	120,173,200
1907	89,733,200	33,896,800	123,630,000
1908	109,673,500	82,530,200	192,203,700
1909	121,073,000	61,283,200	182,356,800
1910	188,077,000	79,362,100	267,439,100
1911	117,483,800	74,275,600	191,759,400
1912	110,434,600	100,506,400	210,850,000
1913	120,359,600	100,506,400	210,850,000
1914	152,349,300	....	....

The total for the first half of 1914 is the largest since 1910, the year of the rubber craze. In July, loans of £21,947,742 were obtained in London by various borrowers, seven of them Canadian. In August, the total was £33,536,000, of which £31,900,000 were British government bills. There were not any Canadian flotations that month.

These few firms who are cutting wages because of abnormal, adverse factors, presumably will increase wages in times of abnormal prosperity and profits.

"*The Monetary Times*, in a very sane article, deals with the general relation between the war and Canadian business. We commend it to the thoughtful consideration of readers." Victoria Colonist.

Even if Count von Bernstorff, German ambassador at Washington, is suffering from sunny halucinations, we must admire him for trying to do business as usual.

Take with a grain of salt the New York statement that since the war began Canadian corporations have made inquiries in the United States for loans totalling more than $100,000,000. The ciphers need pruning.

HOW WILL CANADA MARKET LOAN?

Analysis of the Situation Points to the Possibility that the Imperial Government May Do the Work Through the Bank of England

HOW will Canada raise its war loan? This question is arousing widespread interest. The Dominion has voted a war appropriation of $50,000,000. The details of the expected expenditure of $30,000,000 between now and the end of the fiscal year ended March 31st, 1915, for military purposes, as given by Premier Borden, include the following:

Pay of 25,000 officers and men for seven months, $6,100,000; rations at 40 cents per man, $2,100,000; purchase of 5,000 horses at $200 per horse, $1,000,000; transport to Quebec, $450,000; ocean transport, $1,000,000; transport abroad, $300,000; return transport to Canada, $1,450,000; engineers' services at Halifax, Quebec and elsewhere, $500,000; equipment, $2,400,000; clothing, $300,000; ammunition from Dominion arsenal, $660,000; censorship, $150,000; pay and maintenance of troops on guard in Canada, $2,000,000; for additional troops and unforseen expenditure, $7,615,000.

The special war taxes, which will not fall heavily upon the people, will bring an extra revenue estimated at $7,200,000. The new legislation regarding Dominion notes will give the government $15,000,000. Other sums will be raised by way of loans. These cannot be obtained in the United States because of President Wilson's attitude regarding loans to belligerent nations. There are left only two other sources, Canada and Great Britain. Regarding the suggestion that a fairly substantial amount to a government loan might be subscribed in Canada, there are important adverse considerations. If any sum of consequence were subscribed by Canadians, it would be at a high rate of interest, much higher than Canada is accustomed to pay. This would be a mistake from the standpoint of Canada's credit, and we can hardly think that the amount raised would be in proportion to the damage done to Canadian credit. A loan in London by Canada, as usual, is quite out of the question, if for no other reason, from the fact that the stock exchange is closed, and there is no machinery for underwriting such an emission.

Still, there remains the possibility of Canada arranging a loan from the Imperial government, and in view of all that Canada has done since the commencement of the war, *The Monetary Times* anticipates there would be little difficulty. For such purposes as fresh loans, there is practically only one source from which money would be forthcoming in Great Britain at present, and practically any country, and that is the Imperial government through the medium of the Bank of England. The German government, no doubt, will raise money by way of loan, but only for their own purposes. Indeed, they are said to be issuing a 5 per cent. loan at 97, and no doubt the moneyed classes in Germany have been very definitely told that they are expected to subscribe liberally. England's rôle in time of war has always been to finance itself, if engaged, and also its allies; or, if not engaged, to finance friendly nations. It has already loaned Belgium £10,000,000. No doubt, should the war prove to be prolonged, the ability to raise money will be the deciding factor.

If, as we hope and believe, success will attend the arms of the allies, then, after the Imperial government has funded its floating indebtedness, the British colonies may be able to issue a loan. Once the stock exchange situation has been more or less satisfactorily arranged to meet present conditions, we may see some improvement. Months, anyway, must elapse before credit, as one London authority says, "can think of getting on to its hands and knees, much less begin to creep."

However, by the process of elimination there appear to be bright prospects, in the comparatively near future, of a Canadian loan being financed by the Imperial government. This would be further practical evidence, in times of war, of what Lloyd George has aptly termed "the silver bullet."

ONTARIO'S FINANCIAL LEGISLATION

Mortgagees Must Secure Order From Judge Before Taking Foreclosure Actions

The following statement regarding the proposed limited moratorium in Ontario affecting property transactions has been issued by Hon. R. A. Pyne, acting prime minister:—

"The Ontario government is of opinion that conditions in the province do not call for any legislation in the way of a general moratorium. It has, however, been brought to the attention of the government that mortgagees and vendors of property in some cases are taking advantage of their legal position to foreclose their mortgages and securities where, owing to circumstances brought about by the present war, the mortgagors and purchasers are unable to make their payments, and where it would be unjust and unfair under the circumstances that they should lose their properties, upon which in many cases they have paid large amounts.

Judge can Give Relief.

"It is therefore, the intention of the government at the next session of the legislature to introduce an act requiring mortgagees, holders of agreements of sale, options and other like securities to secure an order from a Judge before taking proceedings, either through the court or otherwise, to foreclose or forfeit such mortgages or securities for default in payment of principal, and giving judges power, upon a proper case being made out, to relieve from forfeiture and to extend the time for payment of principal moneys.

"It is not intended by such proposed legislation to in any way interfere with rent, interest or other payments of this character, or in any case where a judge does not feel that justice and right demand that some relief be given.

"It is the intention of the government to make such legislation retroactive, and the judges and the legal profession are particularly requested to make note of the proposed legislation and of this fact."

No Further than Principal.

Despite the explicit terms of the Ontario government's announcement with reference to impending legislation to prevent foreclosure for non-payment of principal moneys due, an impression has become current that the proposed action will endanger the incomes of those whose resources are invested in mortgages. Members of the government emphasize the fact that the legislation that will be brought before the House next session will not strike at incomes. So far there has been no thought of extending the moratorium, such as it is, further than principal payments.

◆

Fight or pay; but do business.

CANADA'S MOTTO IS BUSINESS AS USUAL

Some facts and figures and cheerful sentiment cited for the benefit of occasional wavering faith in a great country.

"READJUSTMENT is taking place favorably and the outlook is distinctly promising. Many of our industries have suffered, but the first and worst effects will gradually wear away. Others have been greatly quickened and stimulated. The higher prices for grains and other agricultural products will more than neutralize this year's shortage in amount. For the future agricultural production should be immensely stimulated and this for years past has been the great need in Canada. This will solve the problem of the high cost of living, the overcrowding of cities and consequent unemployment. It will also enable Canada to increase greatly its exports, thus ensuring payment of our interest and other obligations abroad and the preservation of our national credit. With so many men offering their lives for the Empire and undergoing hardships, privation and suffering at the front it is the duty of every man at home to put forth his utmost effort to increase production, to add to the national wealth, that the wastage of war might be repaired and the strength of the nation increased to meet whatever of struggle and stress that may lie before us."—Hon. W. T. White, minister of finance, addressing the board of trade, Gananoque, Ontario, this week.

INDUSTRIAL PEACE IN CANADA

Advices to the department of labor show that Canada is enjoying an era of industrial peace, there being no labor disputes of note and no boards of conciliation sitting. The whole trade situation is daily becoming brighter, says an Ottawa despatch, and statistics for the past month, when available, will, it is understood, show a surprising improvement in conditions.

REDOUBLE EFFORTS IN BRITISH COLUMBIA

"It is highly desirable," says Premier McBride, of British Columbia, "notwithstanding the war, to preserve the business equilibrium of the country, and though efforts may have to be redoubled to achieve this end, we should all be prepared to do our best. There is no cause for undue concern or alarm in British Columbia if our people maintain the high standard of efficiency for which the province has long been noted; we cannot fail to pursue this line, not only to meet present-day requirements, but also to prepare in the most pronounced way for any tests that may be applied in the future."

LAND SELLS WELL AT PORT MOODY .

Seventy blocks of land at Port Moody and Coquitlam, in the Dominion railway belt, were auctioned at Port Moody. The lots were from five to thirty acres in area. Most of them were sold readily, quite a number of bidders being present. The upset price was $5 per acre, and most of the lots were sold at prices ranging from that up to $18 per acre. The Dominion government land agent, Mr. Magee, of New Westminster, was in charge of the sale. The purchasers of the land bind themselves to five years homestead duties in addition to the price paid.

CONFIDENT AND OPTIMISTIC

Practically without exception the pulp and paper manufacturers of the Dominion are quite confident and optimistic. The news market is holding well, and all other lines are firm. The demand for good qualities of pulp is keeping up satisfactorily, and orders by the score have had to be cut down or restricted by sulphite manufacturers. About six weeks ago the available stocks of newsprint and sulphite began to be called into requisition. At the present time about 50 per cent. of these supplies have been used up and it is probable that another six weeks will see the end of the stocks. After this period has elapsed, there is almost certain to be a rise in the price of Canadian pulp. There is almost sure to be a steady increased demand, and conditions in general will have settled down to a new level far above that which has been in evidence in the Dominion.—Pulp and Paper Magazine of Canada.

IMPROVEMENT IN SALES

"There has been a noticeable improvement in our sales during the last week, and the sentiment among the buying public is vastly better now than around the 1st of the month," says Mr. James A. Ogilvy, of Messrs. Jas. Ogilvy and Sons, Montreal. "This month's turnover will be well above the corresponding period last year."

BRITAIN GIVES US PREFERENCE

There are accumulating evidences of the fact that the war is stimulating the demand for Canadian goods in Great Britain, says a Canadian Associated Press message, and Canada's ready response to the call of the motherland for assistance is having its effect in the preference given in the United Kingdom for Canadian foodstuffs and all other lines of Canadian export. Sir George Foster said recently that in all orders placed by the British government for food supplies, etc., preference was given to the overseas Dominions, and the total of orders already placed in Canada amounted to millions of dollars.

PRODUCING AND STORING

The outlook for silver mining companies is now much brighter than in the first few days of the war. A market has been found for silver ore, and the prospect of an advance in price of the metal is in some quarters considered very good. At Cobalt the few important mines which were closed down are now producing again. Transportation has been made safer on the Atlantic by the driving of the enemy's warships from the trade routes. The risk of shipping even such a valuable cargo as silver bullion will, it is hoped, soon be a small one. In the meantime bullion is being produced and stored.—Canadian Mining Journal.

◆

Buy a barrel of apples made in Canada.

Use caution, but don't go to sleep on it.

Try less credit and more elbow grease.

Confidence is useless if it gives only lip service.

No man must be too proud to work. It is the only way to make money that will keep.

Double the wheat acreage, help Canadian business, and puncture Berlin militarism.

It is too early to talk peace. The system that caused the war has to be strangled first.

China, cut off from the foreign loan market, is getting its national queue greased with moratorium oil.

The only good point, if true, regarding the Kaiser to-date, is that he has invested money in Canada.

FAITH IN EXCELLENT SOIL

"Our faith in the excellence of our soil, which is the real basis of the permanent prosperity that will come, is only strengthened by the experience of this year, trying as that experience is to those who are called upon to go through it. The government feels encouraged to continue and extend the efforts of that for years have been made to impress the fundamental truths of dry land agriculture upon the minds of settlers, and additional means to this end will be provided in the near future. I feel sure that upon reflection you, too, will take this view, if you do not already share it, and will encourage every settler in your district to study the problem this winter and tackle it afresh next spring, meantime accepting the buffetings of fortune in the spirit of true pioneers.—Premier Scott, Saskatchewan

MANY LARGE WAR ORDERS

The Adams Wagon Company, Brantford, Ont., recently received the third order for wagons from the military authorities at Ottawa, and the Slingsby people of the same city have received two orders for blankets—one for the navy and the other for the army. A Toronto firm has received a large order for many thousands of towels, shirts and "companions," —a linen case with scissors, needles, cotton, etc. Harness-makers are working overtime to equip 7,500 horses. Many big war orders are being placed in all parts of the country. These help the employment situation and circulate money. In addition to the 700,000 bushels of oats purchased and shipped from Fort William by the Dominion government for the Imperial army, an additional 500,000 bushels of oats, mostly of this year's crop, have been purchased from the Grain Growers' Company. The oats will be shipped from the elevators controlled by this firm at Fort William.

MAKING PAPER BOXES

The paper box business is a good barometer of business conditions generally because it quickly feels any marked increase or falling off in the shipping orders of the many articles that are packed in paper boxes. It is, therefore, most encouraging to learn that the paper box manufacturers throughout the country are experiencing increased activity since the war began.

The Rudd Paper Box Company, for example, has increased its staff about 20 per cent. since the breaking out of hostilities, and in addition the employees in some departments are working overtime several nights a week. This company reports that the orders from manufacturers since the war began show a decided increase over the run during the previous six months. One customer, a manufacturer of a food product, has more than doubled his standing order of 200,000 boxes a month. Another customer has ordered 65,000 canisters as a three months' supply instead of his regular order of 7,500 canisters a month. Still another customer has placed an initial order of 50,000 boxes for a Made-in-Canada article that is to replace a similar article that was imported from Germany before the war began.

The significant and encouraging fact in connection with the increased activities in the plants of the Rudd Paper Box Company, Limited, and other paper box manufacturers is not so much the increased activity in those plants in itself, as the great increase in the packing and shipping of orders by manufacturers generally that is indicated by the increased demand for paper boxes.

The Brazilian moratorium has been extended to December 14th.

Maintain and strengthen Canadian credit in London by more production here.

"There is nothing, either good or bad, but that thinking makes it so."—Shakespeare.

An official statement from Berlin says:—"Subscriptions to German war loan, which began at savings banks, have surpassed all expectations."

NEW ELEVATOR AT SASKATOON

At Saskatoon a new elevator has been commenced for the Canadian Pacific Railway. This work will employ 1,000 men, and will cost $2,000,000.

MILLION DOLLARS FOR PUBLIC WORKS

On Monday the Toronto city council adopted by-laws amounting to $1,284,343 to cover the cost of constructing the new registry office, a cold-storage plant at the municipal abattoir completion of the new Technical school building, Danforth Avenue and Gerrard Street car barn sites, and the erection of a dormitory and cell building at the Industrial Farm.

WILL COMPLETE NEW BUILDING AT UNIVERSITY

Despite the war, work on the buildings at the University at Saskatoon still keeps on and it will not be long until all the stonework is completed, think Richardson Builders, Limited, the contractors. At present a large number of masons are at work on this job, and the stone work being set at present is gradually approaching the second story. The cost of the new building will be $300,000.

DIVIDENDS AS USUAL

The directors of the Consolidated Rubber Company have declared the regular quarterly dividends on the company's preferred and common shares payable October 1st. The company will maintain operations to capacity at all the factories during the winter, as the prospects are bright for new business and several large orders are in hand. No reductions in staff will be made. The directors have voted the sum of $2,500 to the Patriotic Fund, which contribution with the money already subscribed by employees totals over $6,700.

MUST BE PLUCK IN THE OFFICE

We cannot avoid some all round loss, representing the cost of the war, but with prudence and enterprise that will soon be recovered. Neither can we avoid a shaking in our commercial and domestic life. But we can, if we choose, prevent even partial collapse in various departments of industry.

The main point is that Canada's business must be a going concern. It is not alone from our boys at the front that pluck is expected. There must be pluck in the office, and the shop, and the factory, and in the home.

Carry on the business. Pay your way. Help to spread that cheerful confidence in the good times which will follow the suppression of Kaiserism.

SHOULDER THE BURDEN

"I fear there has been far too much disposition to make the first burden of this trouble rest upon the working people. There are too many working people being dismissed. There is a great disposition to reduce the working staff. I know sound economy calls for it. This is not a war trouble. This is a readjustment of the affairs of Canada, and was inevitable with us even without any war. And when the readjustment has taken place, let us play the part of men. If we have been foolish and have entered upon engagements which we cannot meet, let us take our punishment, no matter how bitter it is, and let us start over again and learn that honest labor is the only road to success."—Mr. J. W. Flavelle, at a Canadian Club luncheon, Toronto.

Buy a barrel of apples made in Canada.

The Royal Bank has opened a branch at College and Bathurst Streets, Toronto.

PERSONAL NOTES

Mr. Henry E. Rawlings, vice-president of the Guarantee Company of North America, has been elected a director of the Montreal Telegraph Company.

Mr. Homer J. Hale has been appointed manager of the central Ontario branch of the Canada Life Assurance Company, with headquarters at Hamilton.

Mr. J. W. Lamoreaux, president and general manager of the Tuckett Tobacco Company, died on Sunday at his residence, Queen Street South, Hamilton.

Mr. C. L. Richardson, deputy commissioner of finance, of Edmonton city, has resigned. Mr. Richardson has accepted a position with Messrs. McIntosh and Hyde, the well-known chartered accountants.

Mr. A. J. Meiklejohn, of Ottawa, president of the Canadian Association of Life Underwriters, was elected third vice-president of the National Association of Life Underwriters of the United States, at the closing session of their convention at Cincinnati, Ohio.

Major E. C. Norsworthy has been elected a director of the Canada Cement Company. He is now at Valcartier with the Royal Scots and will leave for the front shortly. He is the Montreal manager and a director of the Dominion Securities Corporation and is well known in Montreal's financial spheres.

Mr. Burland, who takes the management of the new Calgary office of the Home Bank, has been in the service of that bank for a number of years, and comes to Calgary from Neepawa. He has been selected for the post, partly because of his experience in the line of banking which will be a large part of the bank's business in Calgary.

Mr. H. Reginald Davison, industrial commissioner of Vancouver, is to visit Cincinnati, Ohio, Toronto, Montreal and Winnipeg. The journey is made necessary to conclude arrangements which are expected to lead to the establishment of new industries in Vancouver as the culmination of an extended correspondence with different manufacturers in the cities mentioned.

Mr. E. J. Chamberlin, president of the Grand Trunk Pacific, is on a tour of inspection of the road, which will extend to Prince Rupert. He is accompanied by Mr. J. E. Dalrymple, vice-president; Mr. Molson Macpherson, director of the Grand Trunk Pacific; Dr. A. Hutchinson, chief medical officer, and Mr. Morley Donaldson, vice-president and general manager of the Grand Trunk Pacific.

Mr. Richard T. Coady, former city treasurer of Toronto, died at his residence, 94 Kendal Avenue, Toronto, on Sunday. Mr. Coady spent his life in Toronto, having been born in the Queen City in 1852. Mr. R. T. Coady was educated in his native city. He was for four years accountant with the firm of Messrs. Thompson, Smith and Son, lumber dealers, and then he entered the city's service as accountant in the treasury department in 1873. In a short time he was promoted to the dual position of chief accountant and assistant treasurer, and in 1888 he succeeded the late Mr. S. B. Harman as city treasurer. In his incumbency of this office he visited England several times in connection with the flotation of city bonds. Mr. Coady was well liked.

Mr. W. E. Redway, pioneer of steel shipbuilding in Canada and inventor of many improvements in ship design and equipment, died at his residence, 473 Broadview Avenue, Toronto on Saturday. Mr. Redway was born in Exmouth, Devon, England. In 1884 he was elected a member of the Institute of Naval Architects. He came to Canada in the same year, and was the first builder and designer of steel vessels in the Dominion. He designed the Mayflower, the first steel boat built in Canada. For 30 years he was connected with the Doughty Engine Company and the Polson Iron Works. Latterly, however, he had become an independent consulting naval architect. Some of the largest hydraulic and dipper dredges in Canada were designed and built by Mr. Redway. He has also built many passenger and other steamers, which have been delivered all over the country from the Yukon to Halifax.

Mr. A. R. Bishop has assumed the managership of the Sun Life Company's operations in the South China agency, the headquarters of which are in Hong Kong. Mr. Bishop, although still a young man, has had much experience in life assurance and financial work. He joined the head office staff of the Sun Life of Canada some 12 years ago. Later he left and was for some time occupied in the banking business; at the beginning of 1910 he re-entered the employ of the company, going to Singapore, Straits Settlements. Here he worked for three years, and on his return to Canada in the summer of 1913 he was appointed to the managership of the company's business in Prince Edward Island, Canada. As manager Mr. Bishop continued to obtain good results, and when, by the transfer of Mr. F. Morgan to Chile, a vacancy occurred in the South China agency, he was chosen to fill it.

Mr. G. D. Finlayson, whose portrait appears on this page, is the new superintendent of insurance for the Dominion, with headquarters at Ottawa. This is a position of great responsibility and Mr. Finlayson is a man who can carry it. Although only 31 years old, he has for several years past proved his sterling merit and qualities in the insurance department at Ottawa. He was born in Pictou County, Nova Scotia, and was educated in country schools, the Pictou Academy and the Dalhousie University. He graduated in Arts in 1907 and entered the Dominion insurance department immediately after graduation. He was admitted to an Associateship of the Institute of Actuaries of Great Britain in 1911.

G. D. FINLAYSON,
Appointed Superintendent of Insurance for the Dominion.

Mr. Alex. W. Wright, of Niagara-on-the-Lake and Toronto has been appointed as vice-chairman, and Mr. George A. Kingston, the third member of the Workman's Compensation Board of Ontario. Mr. Price was appointed chairman some time ago. Mr. A. W. Wright was born in Markham township in 1845, and spent his earlier years in the woolen business. Afterwards he was editor of the Stratford Herald and the Guelph Herald, respectively and subsequently of the National Journal of the Knights of Labor in New York. He was for several years secretary of the Canadian Manufacturers' Association and was Dominion commissioner in 1896 to examine and report on the sweating system in Canada. Mr. George A. Kingston is an expert on liability law, and has had a successful legal career in Ontario. He was born on a farm in Hastings county in 1869, and received his early education there and in Campbellford and Belleville. In 1892 he graduated from the Law School in Toronto, and was called to the Bar in the same year. He was a student in the law office of Judge Clute in Belleville, and was later connected with the Mulock and Lount firm in Toronto. Later he engaged in the insurance business, becoming a specialist in liability law. He was first with the Employers' Liability Company and later, up to the present, associated with the Union Trust Company. He has published a compendium of liability law.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Hamilton, Ont.—The Bank of Hamilton has announced that it will extend to the city of Hamilton a credit up to $750,000.

West Vancouver, B.C.—A by-law to borrow $120,000 for waterworks is under preparation and may be submitted to the ratepayers.

Alberta.—The following school district has been empowered to borrow: Monitor, No. 3056, $4,000. A. C. Beamer, Monitor.

Kentville, N.S.—A portion of the $11,000 5 per cent. 20 and 25-year debentures has been sold. The outbreak of war delayed the disposal of the entire issue.

Bracebridge, Ont.—The money by-law voted upon recently was defeated. Lack of interest was shown in the voting owing to uncertainty of financial conditions.

North Monaghan Township, Ont.—The total assessment of the township for the year 1914 being the sum of $899,273.25, a rate of 3 2-5 mills on the dollar for county purposes, and the rate of 5 mills on the dollar for township purposes will probably be levied.

New Westminster, B.C.—The figures reported by the city treasurer's office show a decrease of only five per cent in collections, compared with those of the same period of last year. The figures for this year are as follows: Current taxes, $237,116; local improvement taxes, $35,204.

Burnaby, B.C.—The following statement was submitted at a meeting of the finance committee of Burnaby by Reeve Fraser: December 31st, 1913, arrears in taxes, $259,725; taxes received August 31st, $66,846; August 31st, balance of arrears, $192,879; tax levy, 1914, $454,545; August 31st, 1914 taxes received, $204,543; arrears of 1914, $249,010; tax receipts, 1914, arrears, $66,846; tax receipts, 1914, current, $204,543; total receipts, August 31st, 1914, $277,390.

Edmonton, Alta.—Mr. H. C. Ulen, of the Ulen Contracting Company, of Chicago, has offered to buy $90,000 worth of five per cent., 20-year electric light department debentures at 90 net to the city, the debentures to be made payable at the First National Bank in Chicago or the Imperial Bank in Toronto. Mr. Ulen has completed trunk sewer contracts, and Edmonton owes him more than that amount covered by the debentures. The offer was referred to the finance commissioner for a report and recommendation.

The tax rate has been fixed at 17½ mills.

Peterboro, Ont.—Mr. F. Adams, city treasurer, informs *The Monetary Times* that an issue of short-term debentures has been issued for the purpose of paying for extending the sewage system and street paving work. For the former, $70,000 will be issued, and the latter $82,000. These bonds are for two years at 6 per cent. per annum, the city reserving the right to pay them off at any time after one year. Applications have been received for about $80,000, and this will be sufficient to carry on the work for the balance of the year and give employment to men out of work. This issue has been favorably received by the citizens.

Ontario.—The Ontario government has issued the following statement regarding the legality of municipal contributions to the Canadian Patriotic Fund:

"Inquiries have been made of the government on behalf of the Canadian Patriotic Fund as to whether it will favor legislation confirming grants of money by municipalities to the fund. In reply the government has decided to announce that it is its intention when the Legislature meets to ask it to validate any gift that may be made to any patriotic fund by any municipality in the province. The effect of this announcement will be to remove any doubts as to the power of municipalities to take action in regard to making contributions toward any of the patriotic funds."

Winnipeg, Man.—Assessment Commissioner Harris' return shows that the total levies for the present year amounted to $5,815,091.43, made up of a total general tax of $4,159,654.26, a total special tax of $1,217,173.77, and a business tax of $438,263.40.

The tax rate for the year is 14.8 mills, made up as follows: municipal, 9.941 mills; public library, .287 mills; public schools, 3.973 mills; municipal commissioner, .199 mills; public parks, .5 mills.

The total land values of the city are given as $169,082,890, while the value of buildings and improvements is $81,708,450, making a total assessable value of $250,791,340. Exemptions amount to $44,153,270. The amount to be raised in general city and school taxes is $4,155,711.83. The levies for local improvements of different kinds are as follows:—

High pressure, $73,842.51; sewer connections, $4,502.81; abatement of nuisance, $700; sewers, $231,466.87; sidewalks, $117,126.69; pavements, $520,087.92; boulevards, $14,136.88; street openings, $76,586.41; plumbing, $5,152.70; waterworks charges, $69,052.84; boulevard maintenance, $29,498.88; tree planting, $4,083.37; private approaches, $4,273.60; ornamental street lights, $56,564.54; special survey charges, $2,891; areas, coal chutes and ornamental gateways, $6,108.75. Total special tax, $1,217,173.77.

Toronto.—The Toronto Hydro-Electric Commission proposes, subject to the consent of the City Council and the Ontario Railway Board being obtained, to increase its capital by another $2,000,000. The money is required to increase the capacity of the system and for extensions of the lighting of the streets and parks of the city. Included in the amount is a sum of $443,100.56, the difference between the face value of the debentures already issued and the amount realized by their sale, and a further sum of $220,428.45 as an allowance to cover the cost and contingencies of the sale of the proposed new issue, a total of $663,529.01. The balance of the proposed new issue will be expended as follows: Extensions of street and park lighting, $24,627.93; increasing the supply of power for the operation of the civic car lines, $34,713.49; increasing the capacity of the system, $1,260,985.66, a total of $1,320,327.08.

The previous issues of debentures, amounting to $5,650,000, authorized under by-laws endorsed by the people, have been sold, and the proceeds used on construction and bringing the system up to its present standard. It is estimated the proposed new issue will be self-sustaining, as it is estimated it will produce a revenue of $469,027, of which $9,027 will come out of the taxpayers' pockets for extra street and park lighting. After all charges have been met a surplus of $9,398.46 is anticipated.

The Toronto city council has authorized the issuing of debentures for the raising of over $1,284,000 to cover municipal works contemplated or already under way. The debentures authorized were: For completing the new technical school, $654,879; for a dormitory for the industrial farm, $81,860; for the purchase of a site for the Gerrard and Danforth Avenue car barns, $65,488; for a storage plant for the municipal abattoir, $49,116; for the new registry office building, $433,000.

Montreal.—Mr. Charles Arnoldi, city treasurer of Montreal, has issued a statement on the civic financial position. The amount of loans which the city had the power to issue in 1914 was $31,573,520, composed of general public works loan, $13,253,520; electric plant, $2,000,000; underground conduits, $5,000,000; working capital, $5,000,000; waterworks and filtration, $6,320,000. Of this total amount, the city issued loans amounting only to $10,621,000, made up as follows: public works, $190,000; light, $381,000; underground conduits, $730,000; working capital, $3,000,000; waterworks and filtration, $6,320,000.

There were temporary loans issued as well, $5,000,000 being for public works on the security of the $13,253,520; two or three millions were taken from receipts of special loan issues, and also used for public works. In fact, the whole $13,253,520 has been appropriated, about eight millions spent, and the balance is held up because the security cannot secure the needed money, except for the $3,500,000 which the Bank of Montreal will lend to the city.

The London Globe, commenting on the financial arrangement made between the city and the Bank of Montreal, says: "The appointment by the city of Montreal of the Bank of Montreal as its sole agent for five years will be warmly welcomed in financial circles, where Montreal has hitherto been notorious for its happy go lucky financial policy. Undoubtedly the finacial stringency has had a sobering effect upon Canadian municipalities, which are now more willing to listen to the advice of bankers regarding their borrowings and financial policy, and are generally more alive to the necessity of strict economy in expenditure."

Mayor Martin has signed the agreement with the Bank of Montreal by which the bank becomes the city's financial agent for five years. The bank also will advance the city funds to meet obligations till the end of the current year to the extent of about $3,500,000, also the sum of $2,500,000 for the first few months of next year if the city's loans are not floated before that time.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Vancouver, B.C.—Vancouver's fire department record as compiled by Mr. N. Lee for August, shows that it responded to 76 alarms during the month as follows:—False alarms 3, bush fires 27, chimney fires 4, small fires where no damage occurred 19, smoke scares 3, fires outside city limits 2, fires where a loss occurred 18. The total loss for the month was $29,695 with insurance paid $17,410, leaving the property loss above insurance $12,285. The total value of property involved was $210,575. Hose laid at fires was 24,100 feet, while 1,549 gallons of chemical was used. A list of alarms, where the damage exceeded $50, follows:—

August 1—Telephone alarm at 8.20 p.m. Fire in Winton automobile 6581 in the 1,000 Block, Pender Street W., caused by backfire in carburetter. Car owned by W. Pearce. Damage, $200.

August 4—Telephone alarm at 10.15 a.m., to 1300 Howe Street, owned by D. Kilpatrick and occupied by Baby's Own Dairy on main floor and Mrs. James on the second floor. Small fire on roof caused by sparks from chimney. Damage, $80, covered by insurance.

August 17—Alarm from Box 2113 at 7.55 a.m. Fire in dwelling at 2728, Second Avenue E., caused by an overheated stove setting fire to partition. The building was a mass of flames when the fire apparatus arrived, both house and contents being a total loss. Building owned and occupied by H. W. Frith. Damage, $1,400, partly covered by insurance. Telephone alarm at 1.17 p.m. to 1066 Comox Street. Small fire on roof caused by sparks from chimney. Building owned and occupied by Mrs. C. E. Graves as a dwelling. Damage, $70, covered by insurance.

August 22—Telephone alarm at 6.25 a.m., to 697 Broadway E., owned by Royal Bank of Canada and occupied by W. C. Wilkins and used as a chicken house. The building and some incubators were practically a total loss. Damage, $225.

August 24—Telephone alarm at 2.17 p.m., to 648 Howe Street, owned by T. F. Yorkston and occupied by G. McCulley British Columbia Brass Works. Fire on second floor in workshop caused by a can of paint igniting from gas stove on work bench. Damage, $270, covered by insurance. Alarm from Box 134 at 4.33 p.m. Fire in 1½ story frame building in rear of 711 Keefer Street, owned by T. Allardyce and occupied by T. Natasuka and used as a dyeing and cleaning establishment. The blaze was caused by a gasoline explosion and spread to a two-story dwelling in the rear at 530 Heatley Avenue, owned by O. Johnson and occupied by

J. C. Lynch, slight damage being done before the fire was brought under control. Damage, $6[illegible], partly covered by insurance.

August 25—Alarm from Box 228 at 2.30 p.m. Fire at 149 and 155 Fifth Avenue W., owned by J. N. Menzies and W. J. Henning and occupied by H. Dogasaki as a dwelling and Lee Wy as a laundry, respectively. The fire was on the roofs of both buildings and had a good hold when the Department arrived, considerable damage resulting to the laundry. The blaze was evidently caused by sparks from a bush fire on the adjoining lot. Damage, $606, partly covered by insurance. Alarm from Box 24 at 10.20 p.m. Fire in miscellaneous goods store at 14[illegible] Hastings Street E., owned by W. Lindsay and occupied by Brundrett and Smith. The fire started in the rear of the building from some unknown cause, considerable damage resulting to the stock before being extinguished. Damage about $4,630, covered by insurance.

August 28—Alarm from Box 1342 at 12.07 a.m. Fire at the Sunset Sash and Door Factory at 724 Broadway W., owned and occupied by W. T. Arbuthnot. The building, which was an old two-story frame structure with basement, was a mass of flames when the apparatus arrived and together with contents was a total loss. The heat was so intense the several buildings in the vicinity suffered slight damage, having windows broken and paint blistered, while the nurses' home across the lane, had considerable damage done to the roof. Cause of fire unknown. A team of horses in the rear were burned before a rescue could be effected. Damage, $21,387, partly covered by insurance.

The following fires were adjusted by Paterson and Waugh, Edmonton:—

Marwayne, Alta.—May 12—George Lowe's farm barn. Loss, building, $53. Cause unknown. Insurance, Commercial Union, building, $25.

Entwistle, Alta.—August 14—Mrs. Jessie Schultz's pool hall. Loss, building, $1,432; fixtures, about $750. Cause unknown, supposed to have been lightning. Insurance, North Empire, building, $500.

Yellowhead Pass Coal and Coke Company, Limited.—Coal mine. Loss, lamp house building, $120; contents, $674. Cause unknown, supposed to have been caused by employees dropping cigarette or cigar stub near building. Insurance, Yorkshire, Fidelity Phœnix, Commercial Union, Rochester German Underwriters, building, $18.75 each; contents, $100 each. Schedule, $24,125. Each company covers $6,031.25 pro rata.

Edmonton, Alta—August 14—277-279 Jasper Avenue East. Charles Lyons' retail dry goods, jewelry store 1st, signs showcard painter and vacant 2nd. Loss, contents (dry goods only), $479; fixtures, $77. Cause unknown. Insurance, contents (stock, dry goods), Fidelity Phœnix, $4,700; Fidelity Phœnix, $2,000; North Empire, $5,000; Caledonian, $2,500; General Accident Fire, $2,500; Germania, $2,500; Canada National, $2,500, fixtures, Fidelity Phœnix, $300.

By a vote of 20 to 1 the Montreal city council at a special meeting rejected the recommendation of Mayor Martin and Controllers Hebert and Cote, to purchase the plant of the Montreal Water and Power Company at $8,000,000.

NEARLY HALF WAS LIFE INSURANCE

An application for the probate of the will of the late Dr. Bruce L. R[illegible] was filed this week in the Surrogate Court, Toronto. The estate totals $26,800, and is composed of real estate, stocks, bonds and cash in the bank. There is also life insurance of $12,500.

◆

NATIONAL FINANCE COMPANY

The Monetary Times understands that the National Finance Company, of Vancouver, is going into voluntary liquidation. The company has been in existence for many years, and according to recent figures has a paid-up capital of $1,542,000; total assets of $5,530,000, and a reserve of $400,000. There are branch offices at Ottawa and Toronto. The Toronto manager states that the present action is taken to conserve the best interests of the shareholders.

◆

NO TRADE WITH ENEMIES

Prohibition of commercial and financial relations between Canada, Germany and Austria is extended by an order-in-council from Ottawa.

No resident of the Dominion is to pay any sum of money for the benefit of the enemy, nor to give security for the payment of any debt or sum of money for the benefit of an enemy, or to act in behalf of an enemy in drawing any negotiable instrument, nor to enter into transaction with an enemy affecting stocks or shares or to enter into any insurance contract with such enemies, or to directly or indirectly supply goods for the benefit of the enemy.

The leaving of British ships for an enemy's port is prohibited. The general effect of the order is to preclude any commercial, financial or any contract with a country at war with Canada.

◆

UNITED STATES BANKERS WILL MEET OBLIGATIONS

The United States bankers' plan for a $100,000,000 gold fund to meet American obligations to Europe has been approved by the Federal Reserve Board.

National banks in central reserve and reserve cities will be asked to contribute to the fund, but country banks are not expected to participate. Although a syndicate of New York bankers has arranged to take care of $80,000,000 of that city's European obligations, national banks in New York will be counted upon for contributions to the additional $100,000,000 fund. The gold will be deposited in the branch of the Bank of England in Ottawa, Canada.

The first call on banks probably will be designed to bring out from $20,000,000 to $25,000,000. Details of the plan will be considered this week.

◆

CANADA TO-DAY

Canada bulks large in the British Isles in these days of war. The identification of the Dominion with the Empire in the present crisis and its war gifts to the mother country have aroused great interest. What sort of a country is it—with a population drawn from the United Kingdom and the United States chiefly, and also from other countries the world over—that is sending flour, oats, apples, salmon, wheat, in such immense quantities to the Old Land? The best and most timely answer to the question, given in great detail, and illustrated profusely, is the publication, "Canada To-Day, 1914." This is the fourth "Canada" Annual, with 200 pages and 200 illustrations. It is published by the Canada Newspaper Company, Limited, Kingsway House, Kingsway, London, W.C., England, and is the best volume of its kind. It is worth easily five times its nominal price, 25 cents.

◆

A business coward deserves the fate that will get him.

"There is a very excellent feeling here about Canada and every part of the Empire, who are coming forward nobly to take their share in the responsibilities with which the British race is confronted."—Extract from a letter to *The Monetary Times* from London.

NEW INCORPORATIONS

Seven Provinces Represented in This Week's List—No Million Dollar Companies

Canada's new companies incorporated this week number 49. The head offices of these companies are located in seven provinces. The total capitalization amounts to $10,526,000.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
British Columbia	9	$ 275,000
Alberta	8	7,305,000
Saskatchewan	8	1,000,000
Manitoba	2	140,000
Ontario	8	1,100,000
Quebec	12	520,000
Prince Edward Island	2	186,000
	49	$10,526,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Shaunavon, Sask.—Hotel Systems, Limited, $100,000.

Prince Rupert, B.C.—Acme Importers, Limited, $50,000.

Wetaskiwin, Alta.—Omega Oil Company, Limited, $500,000.

Edmonton, Alta.—Farney Truck Company, Limited, $25,000.

Lloydminster, Alta.—A. F. Miller Hardware Company, Limited, $15,000.

Vegreville, Alta.—The Vegreville Drug and Book Company, Limited, $40,000.

Hamilton, Ont.—Finch Brothers, Limited, $125,000. W. H. Finch, F. Finch, C. W. Finch.

Moose Jaw, Sask.—Dominion Petroleum Company, Limited, $700,000. Bon Ton Store, Limited, $5,000.

Saint Boniface de Shawinigan, Que.—P. Gelinas and Cie, Limited, $45,000. J. A. Desy, P. Gelinas, L. W. Picard.

Dundas, Ont.—Caldwell Feed and Cereal Company, Limited, $100,000. J. Warwick, A. J. Thomson, W. S. Morlock.

Saskatoon, Sask.—Planet Elevator Company, Limited, $50,000. Pearson Securities, Limited, $30,000. The Great Western Furniture Company (1914), Limited, $50,000.

Quebec, Que.—The Canadian Salvage Association, Limited, $10,000. L. C. Webster, W. W. Wotherspoon, W. Q Stobo.

Arnprior, Ont.—The Gardner Mercantile Company, Limited, $35,000. H. W. W. Gardner, S. J. Gardner, A. R. Gardner.

Prince Edward Island.—The Paragon Silver Black Fox Company, Limited, $150,000. The Reid-Rayner Knitting Mills, Limited, $36,000.

Regina, Sask.—The Regina Cold Storage and Warehousing Company, Limited, $50,000. Canyon City Saw Mills Company, Limited, $15,000.

Calgary, Alta.—Canadian Consolidated Oils, Limited, $5,000,000. The Western Canada Cordage Company, Limited, $500,000. Ontario Syndicate, Limited, $225,000. Northern Oils, Limited, $1,000,000.

Winnipeg, Man.—Columbia Grain Company, Limited, $40,000. L. J. Halilgrimson, H. J. Lindal, H N. Hannesson. Canadian Electric Shoe Shining Machine Company, Limited, $100,000. J. V. Anderson, C. W. Douglas, O. D. Springer.

Vancouver, B.C.—Hosking Construction Company, Limited, $10,000. Burns Drug Company, Limited, $50,000. Canadian Printing and Publishing Company, Limited, $10,000. The Pacific Merchandisers, Limited, $25,000. United Mortgage Company, Limited, $100,000. British Columbia Sheet Metal Works, Limited, $10,000. The Family Estate Company, Limited, $10,000. Edinburgh Glasgow Investment Company, Limited, $10,000.

Toronto, Ont.—Balmoral Athletic Club. S. A. King, H. Mihell, H. Gilbert. Tanner and Gates, Limited, $100,000. F. W. Tanner, F. W. Gates, J. E. Day. Alliance Realty Company, Limited, $100,000. J. S. Duggan, B. H. L. Symmes, G. W. Morley. The Dominion Travelling Bag Registry, Limited, $40,000. G. E. Shaw, J. F. Tassie, J. E. Hammond. J. Henry Peters Company, Limited, $500,000. J. D. Montgomery, F. H. Hurley, A. Traill. Kehillas Jacob Congregation. A. Smith, L. Shulman, J. H. Albert. Vapo Company, Limited, $100,000. J. E. Day, S. C. Arrell, E. E. Purvis.

Montreal, Que.—A. McDougall and Company, Limited, $250,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. Maison Viau, Limited, $25,000. F. Harel, U. Genest, E. Viau. The Shefford Publishing Company, Limited, $20,000. E. T. Sayers, J. A. Beaudry, L. Charlebois. La Compagnie W. Cormier, Limited, $20,000. C. Bouchard, R. Chatel, J. Briere. Gardaix, Limited, $20,000. A. C. Attendu, C. Gardaix, J. E. Champagne. Salle Donagana, Limited, $20,000. L. M. Comtois, C. Charbonneau, R. Charbonneau. The Senate Company, Limited, $20,000. T. McBrearty, J. P. McLure, J. O'Grady. Clerk Hotel Company, Limited, $50,000. Mrs. C. Fitzpatrick, A. Clark, F. Grannery. Adanac Cafe, Limited, $20,000. A. Labbe, A. Desjardins, M. A. Labbe. Alfred Charbonneau, Limited, $20,000. H. Roger, S. Roger, L. Roger.

Application is being made for letters patent for the following companies:—

Bideford, P.E.I.—Prince County Fox Company, Limited, $30,000. B. M. Hill, K. B. Richards, W. B. Hayes.

Summerside, P.E.I.—The Equity Silver Black Fox Company, Limited, $20,000. W. A. Brennan, A. R. Brennan, W. Tanton. South West Malpeque Oyster Company, Limited, $18,000. R. Barrett, J. Barrett, A. MacNeill. South East Malpeque Oyster Company, Limited, $18,000. A. MacNeill, J. S. Allen, A. C. Saunders.

◆

CONTROLS OCCIDENTAL FIRE INSURANCE COMPANY

The North British and Mercantile Insurance Company have secured the controlling interest in the Occidental Fire Insurance Company of Wawanesa, Man.

The authorized capital of this company is $500,000, all of which has been subscribed, and over $170,000 paid up. The company operates under a Dominion government charter. The Occidental began business in 1901, and a Dominion charter was secured in 1908. The company has made satisfactory progress, and has taken a good position among Canadian fire insurance companies.

The Occidental will continue to transact business under its own name, and will be greatly strengthened by having behind it the North British and Mercantile Insurance Company. The company will operate as an independent concern.

◆

A moratorium protects dishonesty as well as inability to pay.

The better the Canadian-made goods, the more will be sold.

Berlin regrets to announce the result of its introduction to Miss Calculation.

Business faith is one of those intangible assets that count in the year's profits.

The British colliery owners, in co-operation with the Imperial Board of Trade, are sending special commissioners to confer with Mr. C. Hamilton Wickes, British Trade Commissioner at Montreal, as to the possibility of securing a supply from Canada of timber props for coal mines, hitherto largely supplied from Baltic ports. The value of this trade, says Mr. Harrison Watson, Canadian Trade Commissioner in London, is $20,000,000 annually. He says reasonable prices should be quoted in Canada. The props can be obtained by the English buyers elsewhere if desired. The five commissioners are: Messrs. W. Windham, representing the Imperial Board of Trade, N. Cummings and D. B. Harrower, of the Timber Trade Federation of the United Kingdom; E. B. Whalley, of the Mining Association of Great Britain, and R. Gomme, secretary of the Board of Trade.

MORE PRODUCTION

As frequently emphasized by *The Monetary Times*, one of the most practical ways to solve many of the problems troubling the country to-day is a concentration of thought, money and labor upon more production. Last year the value of the Canadian field crops was approximately $709,000,000. The value of the products of the forests, fisheries, mines and factories, and animal products totalled about $2,044,000,000, making altogether a total estimated production valued at $2,753,000,000. Many opportunities exist to make money from natural resources, but insufficient business initiative is displayed in high places to turn many channels of profit to account. As a notable instance, there is the apple crop of Ontario Within a few weeks, tons of apples will be rotting in the orchards unless there is businesslike co-operation among public authorities and the farmers.

There is little time to lose, either, in making preparations for what should be raised and gathered in Canada next year. Each provincial government might well get down to business, assisting in all practical ways to increasing general production in the province. An inevitable shortage in the world's food supply will come as a result of the war. Lord Milner pointed out the other day that although the present harvest is abundant, an immense decrease in the production of 1915 must result from the fact that all the able-bodied males of France, Germany, Austria and Russia are now engaged in fighting. Of the 650,000,000 quarters of wheat and rye annually produced throughout the world, 350,000,000 come from these countries, and the other producing countries cannot possibly make up the deficiency. Lord Milner predicts that in the latter half of next year, if not before, all the nations which live on wheat or rye will be competing for a share in the diminished supply.

Some interesting tables have been published by the authorities at Ottawa regarding the food supplies of the British Isles. From these, it appears that the total annual wheat requirements of the United Kingdom are in round figures about 288 million bushels, of which quantity only about 58 million bushels, or one-fifth, are produced at home. With its free food markets, practically all the wheat-producing countries send their surplus of wheat to the United Kingdom, and this so works that any shortage from one country in any particular year is made good by the surplus supplies from other countries. But though the countries thus laid under contribution are numerous, the chief sources of supply are practically limited to six countries, viz., Canada, British India, Australia, the United States, Argentina and Russia, the first three countries being within the British Empire and the last three closely bound to the United Kingdom by ties of kindred, friendship and interest. The supply from Russia, amounting to from 10 to 30 million bushels, according to season, must, it is feared, be greatly curtailed if not entirely cut off owing to the war. At any rate, the supply from that source cannot now be certainly counted upon. The supplies from Germany and Austria-Hungary necessarily cease and France will retain all her produce; the Roumanian supply also can hardly be relied on; so that a total deficiency of from, say, 22 to 25 million bushels will have to be furnished from countries other than those mentioned.

Can this deficiency be supplied either by countries within the British Empire or by other friendly countries? If we assume that of the quantities now exported to countries other than the United Kingdom by Canada and Australia 10 million bushels can be diverted by each of these countries to the United Kingdom, 20 million bushels of the British deficiency can thus be supplied, leaving only the small balance of from 2 to 5 million bushels to be furnished by non-belligerent countries.

Although this year, owing to drought, the yield of wheat in Canada may not equal the excellent crop of 1913, the reports of crop prospects in the United States are this year particularly favorable, both as regards increase in area sown and anticipated yield. It has been stated in some quarters that the countries of the British Empire are in a position to supply the whole of the grain supplies required by the United Kingdom. This is not borne out by official statistics. It is, however, likely that higher prices for grain will stimulate greater production, and wheat will probably replace other crops to a considerable extent.

Similar considerations to those here noted apply to cereals other than wheat, these being imported by the United Kingdom largely from the feeding of farm live stock and therefore indirectly for purposes of food. Upon a general view of the situation, therefore, it would appear that the effects of the war need not greatly disturb the equanimity of the British Empire as far as grain supplies are concerned, provided that the command of the seas continues to be retained.

Canada can produce much more, with the exertion of comparatively little effort. Sir George Paish asserted, after his recent visit to the Dominion, that this country's production, given the proper application of capital and labor, would within fifteen years astonish its most ardent admirers.

◆

A moratorium is an emergency measure for a lending country for a short period and postpones (only) the payment of certain debts. Its operation under other conditions offers considerable dangers to national credit.

WESTERN CREDIT MEN'S CONFIDENCE

Continue Development of Vast Resources, Say They—Present Value of Crop

(Staff Correspondence.)

Winnipeg, September 22nd.

Among the young organizations of western Canada that are making their influence felt more and more for sane administration of the business that passes through their hands, is the Canadian Credit Men's Trust Association. We say western Canada for the reason that it is here that this association has been expressing itself for a longer period than the eastern branches. That it is an important factor is being repeatedly demonstrated in these days of more than common stress in financial and commercial circles, by the fact that no large movement is considered to be fully representative without a quota of personnel from its official staff or membership.

Two hundred and fifty men, representing the Bankers' Association, the Grain Exchange, the Implement and Lumber Associations assembled at the Canadian Credit Men's meeting and dinner at Winnipeg. Mr. R. R. Wilson, president of the association, was in the chair.

From Outside Sources.

Mr. Vere Brown, superintendent of the western branches of the Canadian Bank of Commerce, stated:—"That while the west was paying in part the penalty for a period of unparalled prosperity and development, the real cause of the present restrictive conditions was largely outside of our own country. The prosperity which we have enjoyed has been based primarily upon the development along agricultural lines. The return of prosperity will be when the processes of development along these same lines are again set in motion, but must be accompanied by an adequate application of the accumulative scientific knowledge in agricultural progress.

"This year's crop promises to produce more returns, than that of any previous year, the railways were in better condition to handle it and the banks never yet have failed to provide the money."

As to commercial banking credits Mr. Brown intimated that these would be as carefully provided for as ever. The railroad development must continue until the requirements are satisfied, and while immigration has experienced a setback this year, Mr. Brown would not be surprised to see next year start the period when the increase would set in with more pronounced vigor than ever before.

In conclusion, Mr. Brown advanced the idea that Winnipeg should have an agricultural bureau, akin to the work of the industrial bureau, and to further the agricultural interests of Manitoba.

West will Benefit.

We are producing, said Mr. H. M. Belcher, of Gaults, Limited, what every man, woman and child must have at a fair price and the capital necessary to develop it in best-paying quantities must be found as surely as water must find its own level.

Mr. Annis, manager of Marshall Wel's Hardware Company, put his finger on the vital points one after another of past weaknesses and failures, pointing out some of the remedies and advising as to the changes in methods which would have to be adopted by every credit man.

Mr. S. T. Smith, president of the Winnipeg grain exchange, said that there was no doubt as to the solidity of this country, the experimental stage having been passed years ago. Speaking for the exchange, he said that its members were well equipped and ready to do their part in the marketing and sale of the crop.

Western Canada's Products.

Mr. S. R. Tarr, editor of Canadian Finance, showed that the value of the agricultural output of western Canada this year would greatly exceed that of 1913. His figures showed that the total price of this year's crop would be on the farm, about $230,500,000, against $216,000,000 for the 1913 crop. The totals included values of grain used for seed, local milling and fodder. Much of this represented "economic consumption" in the way of preparing live stock for disposal at undoubtedly favorable prices. "It is certainly not beyond the mark to speak of a quarter billion dollar crop for the middle west this year, when the values of hay, alfalfa and root crops are taken into consideration. And the costs of harvesting and threshing are this year much less than in 1913."

Mr. Bruce Walker, commissioner of immigration, indicated the lines upon which the Dominion government were going to help the needy settlers to help themselves—by loaning them money for one year without interest, after the first, 5 per cent. interest must be paid, the assistance in every case to be obtained through the local dealer, thus enabling the retailer to remain in business and at the same time to sell his goods at a fair price to responsible customers.

TAKE THE MIDDLE COURSE

Finance Minister White Tells Business Men That That Is the Best Way

The first effects in Canada of the war necessarily had been serious, said Hon. W. T. White, minister of finance, addressing the board of trade at Gananoque, Ontario. Being a borrowing country, Canada had experienced an almost complete cessation of the money flow, from which her immense capital expenditures, governmental, municipal and corporation had been largely financed. Canada, from the sale of Dominion, provincial, municipal and corporation securities in Great Britain and United States had been in receipt of funds aggregating about four hundred million dollars a year, or over thirty million dollars a month.

Take the Middle Course.

All great public works, whether by the Dominion, provincial or municipal governments or by railway or other large corporations had depended for their financing upon the capital so raised abroad. The result had inevitably been curtailment of programme on the part of all these public and corporate bodies. The instinctive Canadian caution which could always be depended upon in times of crisis had met the situation by prompt contraction and panic had been avoided. He had talked with representatives of provinces, of municipalities, of railway and other corporations, and they were all of the same sound view, not on the one hand to close down construction, nor on the other to attempt to carry out the full programme they had planned. Either course would be most unwise. The sound policy was the middle course, and this he believed was being generally adopted.

How to Employ Funds.

Construction programmes should be so revised as to give the greatest amount of employment for the funds available. While international markets were at present closed no doubt borrowing, although on a much reduced scale, would be possible later and increased thrift on the part of the public would be a material factor in furnishing new national capital. The spirit with which the Canadian community had met the situation was wholly admirable.

War had broken out among the great nations of Europe and international commerce had been prostrated by the shock. The marvel was that it had been so well sustained. Of all the factors entering into the recovery which has so far taken place, the most important by far was the silent victory of the British navy which had kept the seas open to commerce. Had the British navy failed in this what would have been the financial and commercial conditions of Canada and the United States to-day?

Efficient Shock Absorbers.

Financial expedients had been promptly adopted by the Canadian and other governments which had acted as efficient shock-absorbers. This was the function of such expedients—to absorb, cushion and buffer shock. They were not intended as permanent measures.

Buy a barrel of apples made in Canada.

The London, England, board of trade is authorized to seize any articles of commerce which are unreasonably withheld from market on payment of fair prices.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Collieries, Limited.—The Canadian Collieries (Dunsmuir) will not meet the half-yearly interest on its bonds for the present.

Winnipeg Paint and Glass Company.—The Winnipeg Paint and Glass Company, Limited, has postponed the payment of the half-yearly dividend on its preferred stock due this month owing to the financial situation.

Belding-Paul Corticelli Company.—A director of the Belding-Paul Corticelli Company has stated that if collections were not so slow the company would be in a position this fall to resume its preferred dividends. He says that the company has now $75,000 more on its books than at the same time last year.

Twin City Rapid Transit Company. For the first week of September the earnings of the Twin City Rapid Transit Company were $185,293, a decrease of $33,128 compared with the corresponding period last year. In 1913 the State Fair was held from September 1st to 6th, but this year from September 7th to 12th, inclusive.

Maritime Telegraph and Telephone Company.—A statute passed at the last session of the Nova Scotia Legislature is now to be put into effect for the first time, according to an order passed this week by the board of public utility commissioners. It provides for the valuation of the entire plant of the Maritime Telegraph and Telephone Company—at the expense of the company.

Mexico Tramways Company.—The statement of earnings and expenses from traffic only for the month of August, 1914, in Mexican currency, is as follows:—

	1913.	1914.	Inc. or dec.
Total gross earnings	$635,445	$687,593	+ $52,148
Operating expenses	284,309	343,866	+ 59,557
Net earnings	$351,136	$343,727	— $ 7,409

Canadian Western Lumber Company.—Sales of lumber produced during June $169,601, the amount of lumber sold being 11,931,000 feet. Of 80,170,000 feet of lumber manufactured since January, 75,673,494 feet have been sold, the price realized being $1,117,841; this compares with $1,791,871 twelve months ago. In June of this year the amount of lumber manufactured was 16,748,000 feet, of which only 9,782,000 feet were sold, producing $140,507.

Nipissing Mines Company.—The quarterly report of the Nipissing Mines Company compares with previous return as follows:—

	Sept. 8th.	June 8th.
Cash	$ 730,140	$ 865,318
Bullion	126,040	250,140
Ore in transit and on hand.	507,831	210,412
Totals	$1,364,020	$1,325,870

Ore on hand and in transit has increased largely, due apparently to the crisis in the silver market, the company holding on to some of its productions in the hope of higher prices. The regular dividend of 5 per cent., payable October 20th, has been declared.

Lake Superior Corporation.—The directors of the Lake Superior Corporation have decided not to pay any interest this year on the income bonds. On October 1st, 1913, the full 5 per cent. was paid on the issue. The annual report states:—

"While the volume of business has been fully maintained and the earnings compare favorably with those of the previous year, the outlook is somewhat uncertain. The demand for steel products has fallen off, and money stringency, owing to the European situation, is operating as an adverse factor. In view of the continuing necessity for outlay upon the older plants and properties of the steel company and its consequent inability to provide the Lake Superior Corporation with sufficient revenue, the directors regret that this year they will be unable to pay any interest on the income bonds."

Consumers' Gas Company. Authority has been obtained to change the par value of the shares from $50 to $100. Shareholders will exchange their present $50 stock for new stock in the proportion of two for one. The directors also have authority to allot unissued stock at a price not lower than 150. Holders of single shares will be unable to make exchange, and the odd shares are to be called in by the company and sold by tender.

Mexican Light and Power Company, Limited.—The statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, for the month of August, 1914, in Mexican currency, is as follows:—

Gross earnings:	1913.	1914.	Inc. or dec.
The Mexican Light and Power Co., Limited..	$696,078	$616,775	— $79,303
Pachuca Light and Power Co.	139,690	123,475	— 16,215
Total gross earnings.....	$835,768	$740,250	— $95,518
Net earnings:			
The Mexican Light and Power Co., Limited..	$542,723	$455,867	— $86,856
Pachuca Light and Power Co.	70,720	73,126	+ 2,406
Total net earnings	$613,443	$528,993	— $84,450

Dominion Steel Corporation.—The directors of the Dominion Steel Corporation have decided to defer action on the preferred dividend, due on October 1st. The dividend is cumulative, and will be paid just as soon as business shows some indication of recovery.

The war has hit the steel industry hard, but the company is operating about half time, while outside of the United States Steel Corporation and perhaps the Bethlehem Steel Company, it is doubtful if any concerns across the line are doing as well.

Mr. J. H. Plummer said that it was unfortunate to think that the demand was so slack just when the plant had attained such a high state of efficiency, both as regards production and quality. He said the quality of the steel being turned out had been the subject of unsolicited congratulations from both customers and independent expert inspectors.

The company has not lost any time going after new business arising out of the war, and, while early orders were small, there is a fair chance of early business. England has already placed orders for 2,000 tons of nails and 2,000 tons of wire rods, and negotiations are pending in another direction regarding an order for rails.

DIVIDEND NOTICES

SHAWINICAN WATER AND POWER COMPANY

Notice is hereby given that a dividend at the rate of one and one-half per cent. (1½%) has been declared on the Common Stock of this Company for the quarter ending September 30th, payable October 10th to shareholders of record October 1st, 1914.

JAMES WILSON,
Secretary.

Montreal, Sept. 16th, 1914.

NIPISSING MINES COMPANY,

165 Broadway, New York, Sept. 14th, 1914.

The Board of Directors has to-day declared a regular quarterly dividend of five per cent., payable October 20th, 1914, to shareholders of record as of September 30th, 1914. The transfer books close September 30th, 1914, and reopen October 19th, 1914.

P. C. PFEIFFER.
Treasurer.

CANADIAN PACIFIC RAILWAY COMPANY

Notice to Shareholders

The Thirty-third Annual General Meeting of the Shareholders of this Company for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the seventh day of October next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

Special Meeting

The meeting will be made special for the purpose of considering, and, if approved, of authorizing an increase of the present authorized Ordinary Capital Stock of the Company by the amount of $75,000,000, that is, from $260,000,000 to $335,000,000, in order to make it accord with the amount for which the Company has the sanction of Government, no portion of such additional stock to be issued, however, until the authority of the shareholders has been obtained at a Special General Meeting called for the purpose.

The common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Friday, the twenty-first day of August. The Preference Stock Books will be closed in London at the same time.

All books will be reopened on Thursday, the fifteenth day of October

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, August 10th, 1914.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

SCHOOL DISTRICT OF SWIFT CURRENT, SASKATCHEWAN.

Sealed Tenders will be received by the undersigned up to and including the 30th day of September, 1914, for the purchase of $60,000.00 Debentures of the Swift Current School District No. 167 of Saskatchewan, for completing and equipping the Central and Elmwood School Buildings in the said city. Repayable in 30 years with interest at 6 per cent. payable yearly. Debentures approved by the Local Government Board of Saskatchewan. The highest or any tender not necessarily accepted.

J. T. DODDS,
Secretary-Treasurer.

Swift Current, Sask., 25th August, 1914.

LEGAL NOTICE

AMERICAN LAFRANCE FIRE ENGINE COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of June, 1914, incorporating Harry Riley and William Robert Anderson, law clerks; Thomas Stewart Hagan Giles, bookkeeper; Harold Ernest McKitrick, barrister, and John Steuart Duggan, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, import, export and deal in fire engines, fire apparatus, carriages, cars, wagons, trucks, bicycles, automobiles, motor trucks and vehicles of all kinds, however propelled, and all accessories thereto or in connection therewith; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the company's business or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (c) To issue paid-up shares, debentures, debenture stock, bonds or other securities of the company in payment or in part payment for any property, rights or easements which may be required by or for any services rendered to or work done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (d) To sell, lease, turn to account, or otherwise dispose of the whole or any branch or part of the business, undertakings, properties, liabilities and franchises of the company to any other person or company for such consideration as the company may think fit, and in particular for shares, debentures or securities of any company having objects similar to those of this company; (e) To apply for, purchase or otherwise procure or acquire any patents of invention, processes, licenses, concessions and the like conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention, process or idea which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect to, or otherwise turn to account the property, rights or information so acquired; (f) To subscribe for, purchase, take in exchange or otherwise acquire, take and hold bonds, debentures or other securities of any other corporation, and to sell or otherwise dispose of shares, stocks, debentures, bonds and other obligations of any other company having objects similar in whole or in part to the objects of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company, notwithstanding the provisions of section 44 of the said Act, and to vote all shares so held through such agent or agents as the directors may appoint; (g) To enter into partnership or any arrangement for sharing profits, union of interest, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined; (j) To distribute in specie or otherwise, as may be resolved, any assets of the company among its members, and particularly the shares, bonds, debentures or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company; (k) To do all or any of the matters hereby authorized either alone or in conjunction with or as factors, trustees or agents for any other companies or persons, or by or through any factors, trustees or agents; (l) The powers in each paragraph to be in no wise limited or restricted by reference to or inference from the terms of any other paragraph; (m) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "American LaFrance Fire Engine Company of Canada, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 22nd day of June, 1914.

THOMAS MULVEY,
Under-Secretary of State.

ACCOUNTS AND BOOKS of large or small business concerns audited, systematized, written up weekly or monthly and Trial Balance taken off. Supervising bookkeepers' work a specialty. Financial and annual statements drawn up by experienced Public Accountant. Charges moderate. Address Box 373, *Monetary Times*, Toronto.

GOVERNMENT AND FINANCE IN OLD LAND

How Firms Voted Regarding Moratorium Extension—Emergency Currency Notes—Conditions of Discounting by Bank of England.

An official white paper has been issued by the British government containing papers relating (1) to the assistance rendered by the treasury to banks and discount houses since the outbreak of war, and (2) to the questions of the advisability of continuing or ending the moratorium and of the nature of the banking facilities now available. The latter is perhaps the more interesting phase of the subject in view of the termination of the moratorium, as at present proclaimed on October 4th. On August 19th, the treasury sought the opinion of the banking and commercial community of the kingdom on the question whether the moratorium should be ended, extended or modified. No less than 8,256 replies were received, and were tabulated by the treasury, as in the table at the foot of this page.

The white paper goes on to detail the arrangements made for placing currency notes at the disposal of the banks for meeting exceptional demands.

In England and Wales, it is stated, currency notes are issued through the Bank of England to bankers as and when required up to a maximum limit not exceeding, in the case of any bank, 20 per cent. of its liabilities on deposit and current accounts. The amount of notes issued to each bank is treated as an advance by the treasury to that bank bearing interest from day to day at the current bank rate, the security for the treasury advance consisting of a floating charge on the assets of the bank up to the amount of the notes issued. The bank is permitted to repay the whole or any part of any advance at any time.

Any amount repaid may be re-borrowed in case when necessity arises, provided that the total amount outstanding at any one time does not exceed the authorized percentage of the bank's liabilities. Any sums received by the Bank of England in repayment of advances are either applied forthwith to cancelling any currency notes which have been returned from circulation and are for the time being in the hands of the Bank of England, or, in so far as any such sums may exceed the amount of currency notes returned from circulation in the hands of the Bank of England at the time of receipt, are carried to a separate account in the books of the Bank of England and applied to the cancellation of notes as and when they return from circulation.

In order to give the banks the advantage of the credit allowed under this arrangement, even though actual currency may not be required, it is proposed by the amending bill to take power to issue certificates in lieu of actual notes. The effect of the issue of these certificates will be that the banks will be able to obtain credits with the Bank of England on the same terms as currency notes, and the expense of printing and handling notes will be avoided except in so far as the notes may be required for actual circulation.

Applies Throughout Kingdom.

The arrangement in England and Wales applies generally to Scotland and Ireland; but in the case of banks of issue in Scotland and Ireland currency notes, instead of being issued to the public, are used as cover for the banks' own notes. This arrangement has in practice the effect of enabling the Scottish and Irish banks of issue to exceed the normal limits of issue of fiduciary notes so long as such excess issues are covered by currency notes. The new certificates will also be available for the purpose of cover for these issues.

Two letters addressed by the treasury to the Bank of England on the discounting of bills by the bank are included in the paper, as is also the announcement published on August 13th relative to the discounting of bills. The arrangement is formally set out in a letter from treasury to Bank of England, dated August 27th, 1914. The secretary (Sir John Bradbury) writes:—

"Gentlemen,—With reference to the letter addressed to the Governors of the Bank by the chancellor of the exchequer on the 12th instant on the subject of the discounting by the Bank of England of bills of exchange accepted prior to August 4th, I am directed by the Lords Commissioners of his Majesty's treasury now to place on formal record the arrangement announced in the press notice accompanying the letter referred to, as follows:

Conditions of Discounting.

"1. The Bank of England will, upon the application of the holder of any approved bill of exchange accepted before August 4th, 1914, discount such bill at any time before its due date at Bank rate without recourse to such holder. (In the case of date bills the acceptance, if undated, may be deemed to have been given in course of post from the date at which the bills were drawn.)

"2. It will be for the Bank of England to decide in any particular case whether a bill is to be approved, but the Bank will be prepared to approve such bills of exchange as are customarily discounted by them and also good trade bills and the acceptances of such foreign and Colonial firms and bank agencies as are established in Great Britain.

"3. Upon the maturity of any bill so discounted the Bank of England will give the acceptor the opportunity of postponing payment pending further notice, interest being payable in the meantime at 2 per cent. over Bank rate varying.

"4. The date at which such further notice shall be given shall be determined by the Bank after consultation with the treasury.

"5. Arrangements will be made for preserving all existing obligations, so far as possible, in respect of bills discounted.

"6. The Bank of England are to be indemnified for any action taken by them in the matter, and to be guaranteed by

SAVINGS DEPARTMENT

Interest allowed on deposits at all Branches of Bank from date of Deposit

the treasury against any loss which may be incurred by the Bank as the result of their operations.

"7. Such loss is to be calculated in accordance with an account to be kept in the following form:—

	£		£
Amount of approved bills discounted at Bank rate, payment of which has been postponed		Amount realized by the Bank in respect of approved bills, payment of which has been postponed	
Net deficiency		Interest received at 2 per cent. above Bank rate (varying) in respect of approved bills, payment of which has been postponed, less allowance to the Bank for interest (at [illegible] per cent. below Bank rate varying and exceeding [illegible] per cent.) .	
	£		£

"8. The chancellor of the exchequer has undertaken to ask Parliament to pass the legislation necessary for giving statutory authority for this scheme, and for charging against the exchequer the amount of the ultimate loss which may be incurred by the Bank in carrying it into effect."

◆

THE HOUSE OF JACK BILT

This is the house of Jack Bilt.

At least, its the plan of the house which would have gone up had not the big war upset the pet schemes of Jack Bilt.

These are the bricks, few undelivered, the tiles and the slate, which would have been used and are now lying idle, until times do improve, to make good the plans of the very fine house which, if not for the war, would have been that of Jack Bilt.

Here is the hardware, the lumber and drain pipes, the bath and the fittings, on top of the bricks and the rest of the good stuff, piled in the storeyard instead of in action, doing business as usual, because of the war, which made timid men tremble, put a crimp in the plans, to say nothing of faith, of that good-hearted man, but an expert in blue glass, and no other than Jack Bilt.

This is the labor, biting their blue lips, cursing their fortune, hands lying idle, families not paying, looking at Bilt's site, foundations completed, laths from Vancouver, nails from the factory, brains of the builder, architect, draughtsman, all lost in Jellicoe, Kitchener, Europe; unsold the hardware, lumber and drain pipes, piled in the storeyard, because Jack is the unit, staying at home too, planning the battles, land, sea and airship, of generals and colonels, who'd much rather he would mind his own business, pay and be cheerful, let go his money, at least not to hoard it, next spring to say to all his friends gathered, This is the house of Jack Bilt.

These are the companies which made all those bricks, too, for Jack and his kinsmen, the hardware and drain pipes, the bath and the lumber, the laths and sashes, the glass and the fittings, a thousand and one things, solemn directors duly assembled, business declining, orders not coming, sorry but must be, dividends passed, no [illegible] forthcoming, alas and alack, for gentleman Jack, [illegible] of his money in the bonds and the stocks of all these companies, now making the stuff, which Jack and the others forgetting that money has a habit so common goes round and around, coming back to the giver—forgetting all that, [illegible] without any foresight, just cancelled their orders, did their full share in blocking the cogwheels of business and commerce, instead of just trying, doing business as usual, transforming their plans, and erecting the house of Jack Bilt.

INCORPORATED BY ROYAL CHARTER

The Court of Directors hereby give notice that an Interim Dividend for the half year ended 31st May last of forty shillings per share, being at the rate of eight per cent. per annum, will be paid, less Income Tax, on the 3rd day of October next, to the proprietors of shares registered in the Dominion of Canada.

The dividend will be payable at the rate of exchange current on the 3rd day of October next to be fixed by the Managers.

No transfers can be made between the 19th inst. and the 2nd prox. inclusive, as the books must be closed during that period.

By order of the Court
JACKSON DODDS
Secretary.

BUSINESS ACCOUNTS

Current accounts opened for business firms, corporations and individuals on favorable terms. Loans made to responsible people. Interest allowed on permanent deposits.

INTERNATIONAL FINANCING IS COMPLEX

Gold Links Nation With Nation—Substitutes Seem of Little Avail

Monetary Times Office,
Montreal, September 23rd.

The movement of gold from New York to Ottawa is a leading topic of discussion in banking circles. It would appear that from $5,000,000 to $8,000,000 gold has been shipped to Canada's Finance Minister by New York bankers. The view is held at Montreal that if this gold movement is carried to its logical conclusion, $80,000,000 gold will have been received at Ottawa from New York before the close of the present year. The New York loan of $100,000,000 is maturing, and of this amount $80,000,000 is held in Great Britain. The United States has abundance of gold, and there is no reason why this $80,000,000 obligation should not be discharged.

Apart from the $80,000,000 which must be remitted to London in connection with the New York loan presently maturing, it is said that the United States owes Great Britain $150,000,000. New York bankers have been unwilling to part with the gold, because they think that the United States will ship enough cotton and wheat to Great Britain this year to render the export of gold unnecessary.

It has been pointed out that there is likely to be little demand for American cotton this year as most of the Manchester cotton mills are idle and the value of grain shipments to England is problematical. One banker said: "The United States hates to part with the gold. The country is richer in the precious metal than any country in the world. Every little bank has gold holdings equal to at least 25 per cent. of its circulation, and in times like the present this percentage tends to increase."

Banks Will Make Use of Offer.

In conversation with *The Monetary Times* a prominent banker made the assertion that the Canadian banks are in a strong position in the matter of cash reserves. Many private depositors have reduced their balances in order to meet their household and running expenses, but this has been more than offset by the lessened demand for accommodation from municipalities and commercial houses, due to the slackening of general business. The $50,000,000 set aside by the Finance Minister at Ottawa for the accommodation of the banks has, it is understood, up to the present time scarcely been touched, only one or two of the smaller banks having applied for funds. In all probability each Canadian bank will apply for its proportionate share of the loan in order that invidious comparisons may be obviated, it being considered good policy for the banks to avail themselves of the government's offer.

Financing Crop Movement.

Montreal bankers say that the problem of financing the Western crop has not yet been fully solved. The Canadian banks are objecting to advancing funds to the grain men until assured that they will receive gold in return from Great Britain. They are not disposed to accept London or New York funds, because of the difficulty of disposing of grain bills under present conditions. The movement of gold from New York to Ottawa may be the means of settling the difficulty. This gold has been shipped to the Finance Minister for the credit of the Bank of England. The Bank of England it has been intimated, should turn this gold over to the Canadian banks at the request of the grain buyers in England, upon presentation in London of the necessary grain bills, insurance certificates and other documents.

On being asked to explain the situation as regards German and Austrian shareholders in Canadian companies, a banker said:—

"Any Canadian company forwarding their dividends to German shareholders would be guilty of treason. On the other hand, the government is forbidden by the rules of international law to confiscate these dividends. At the present time, these companies are holding back the dividends, but the solicitor-general of Canada may, if he so desires, compel any Canadian company to turn them over to the government for its use, rendering an account of the moneys so obtained, and he cannot confiscate the dividends, but merely use the funds for war purposes, to be repaid at the conclusion of peace. To the best of my knowledge, the solicitor-general of Canada has not up to the present time made use of dividends accruing to German or Austrian holders of Canadian securities."

THE Bank, having over 310 Branches in Canada extending from Halifax to Prince Rupert, offers excellent facilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers' Cheques issued available in all parts of the world.

RESULTS OF A YEAR'S WAR

Destruction of Capital—Construction Checked—Adjustments in Finance Industry

That the European war will last more than a year, possibly two years, depending on whether the German farmers are interfered with in planting next year's crops, is the opinion of Professor Mavor, head of the department of political science at the University of Toronto, who is among the best-informed authorities on European economic systems in America.

"It is a mistake to think that Germany will be starved out in a short time. The large agricultural areas are practically self-supporting. I lived with farmers in Westphalia and Brandenburg who never purchased anything but a little salt, sugar and tea. The supply of Russian grain is of course, cut off, as well as wheat imports to the amount of some 80,000,000 bushels. However, there are vast herds of cattle on the plains of Hungary, and there is the Roumanian wheat to be considered. Italy sends some wheat products, such as macaroni, to Germany ordinarily. These will be cut off if for no other reason than the impossibility of maintaining exchange.

As given to the Boston News Bureau:—

"One of the chief points for consideration is the fact that the German farmers while ordinarily prosperous are accustomed in poor years to reduce their standard of living very considerably. These people, like the Finns, can subsist on absolutely nothing but rye, which they prepare in ingenious forms. They can undoubtedly thrive on food that the Frenchman and the Englishman would starve on.

"The manufacturing centres are, of course, already feeling the terrible hardship of war, since production must have practically come to an end. It will be easy enough for the Germans to start their factories after the war, but it will be a very difficult thing for them to pick up their trade routes again.

Works on Small Profits.

"The German is a good manufacturer. He will make you anything you want in any way you want, but he is a very poor trader as compared with those of Great Britain or the United States. Britain and the United States will undoubtedly take over permanently a large portion of Germany's great trade, which has been built up at enormous cost. German trade has been based on an extremely narrow margin of profits. In places it has actually been carried on at a loss, notably on the China coast, in order to gain a footing. Manufacturers are simply working for the banks, and the capital system is so delicate that it must be shattered in this war.

"Russia is in the best shape, politically and internally, for war that she has ever been in her history."

Destroying Much Capital.

Mr. G. Dunn, president of the J. G. White Engineering Corporation, who was in Europe at the time war was declared, is quoted by the Electrical World, regarding the effect of the conflict upon business conditions in the United States as follows:—

"First—An enormous amount of the world's capital has already been destroyed, and more will be destroyed; consequently construction enterprises and new projects of all kinds which flourish on surplus capital seeking investment will be severely checked for a long time.

"Second—Further destruction of capital due to the continuation of the war will probably be greater if the allies are defeated than if Germany is defeated, since the capital of Great Britain, France, Belgium and Russia is much greater than that of Germany and Austria, and it is probable that the former nations would go far toward exhausting their greater joint resources before accepting defeat. The financial and industrial effects of the war, therefore, are involved to a considerable extent in the result of the fighting.

Benefit from South American Trade.

"Third—There will probably be greatly increased exports from the United States of foodstuffs and manufactures, which will mitigate and to some extent offset the tremendous capital losses in the United States resulting from the destruction of security values and the contraction of credits. There will probably be a general increase in interest rates, and also probably a certain amount of American capital available for smaller construction enterprises that are near

enough home to be locally known and bring out the resources of the very small investor.

"Fourth—South America will suffer not only through lack of European capital, which has been the principal source of supply for the development of her new enterprises and the extension of her commerce, but also severely through reduced capacity of Europe to take and pay for South American exports. American and Canadian markets will inevitably be benefited by the demand for such South American imports as Europe cannot supply. While these South American purchases will be of much benefit on account of the business they represent, they will be of more value because of the new channels of trade they will open and the new connections they will establish. Their immediate value should not be over-estimated, however, in view of the reduced buying power South American countries will experience from the reduction of their usual exports to Europe.

"Fifth—Any forecast at this time can be presented only as an offhand opinion, since the consequence of the great struggle will so fundamentally affect American international commerce, finance and industry that no one can see clearly the adjustments that must follow."

◆

FIRE PREMIUMS AND LOSSES

The average rate of premiums charged in Canada on each $1,000 of fire risks taken in 1913 is $12.084, as against $12.905, which was the corresponding rate in 1912.

The losses incurred (approximate) during the year, compared with the amount of risk current (taking for this the mean of the amounts in force at the beginning and end of the year), have been at the average rate of $5.00 per $1,000 current risk. The corresponding rates for 1882-3-4-5-6-7-8-9-90-1-2-3-4-5-6-7-8-9-1900-1-2-3-4-5-6-7-8-9-10-11-12; are $5.68, $5.56, $5.37, $4.54, $5.48, $5.70, $4.70, $4.19, $4.84, $5.33, $5.61, $6.17, $5.50, $5.75, $5.15, $5.38, $6.20, $4.99, $8.38, $6.68, $4.06, $5.22, $12.05, $4.88, $4.97, $5.69, $6.41, $4.83, $5.61, $5.07 and $4.73, respectively.

The losses are distributed very unevenly among the different companies as appears from the following, computed on the above basis, where, for convenience of comparison, the corresponding rates for 1912 are appended within parentheses:—

Pacific Coast, $1.81 ($3.26); Alliance, $2.54 ($3.12); Northwestern National, $3.16 ($4.74); Western, $3.16 ($2.43); British America, $3.38 ($3.47); Commercial Union, $3.72 ($4.75); Canadian, $3.73 ($3.48); London Assurance, $3.84 ($3.61); London Mutual, $3.87 ($3.00); American Lloyds, $3.89 ($0.51); Canada National, $3.90 ($4.88); Scottish Union and National, $3.90 ($3.20); London and Lancashire, $3.91 ($3.51); Niagara, $4.03 ($10.48); Mercantile, $4.06 ($3.79); Hartford, $4.08 ($4.90); Mount Royal, $4.22 ($3.58); Equity, $4.24 ($4.60); Caledonian, $4.27 ($4.03); Royal Exchange, $4.35 ($5.66); Royal, $4.40 ($4.39); Home, $4.47 ($5.27); Phœnix of Hartford, $4.51 ($3.61); Law Union and Rock, $4.55 ($4.71); Anglo-American, $4.58 ($4.14); Quebec, $4.60 ($3.69); Atlas, $4.67 ($4.91); Provincial, $4.68 ($0.82); British Colonial, $4.70 ($3.42); Union Assurance, $4.80 ($3.97); North British and Mercantile, $4.88 ($4.27); Liverpool and London and Globe, $4.88 ($4.86); Montreal-Canada, $4.89 ($3.62); Fireman's Fund, $4.96 ($9.52); Phœnix of London, $5.01 ($4.83); Ætna, $5.01 ($4.00); Northern, $5.07 ($4.80); Northwest, $5.08 ($5.26); German American, $5.08 ($5.49); Queen, $5.10 ($4.07); Ontario, $5.22 ($5.19); Norwich Union, $5.25 ($5.29); California, $5.34 ($1.32); Employers' Liability, $5.39 ($4.67); Sun, $5.42 ($4.62); Firemen's, $5.45 ($1.35); Liverpool-Manitoba, $5.46 ($6.31); Dominion, $5.64 ($5.31); Insurance Company of North America, $5.68 ($4.51); British Northwestern, $5.73 ($4.08); Acadia, $5.83 ($5.78); Continental, $5.87 ($8.53); Connecticut, $5.88 ($4.62); St. Paul, $5.90 ($7.00); Springfield, $5.91 ($5.49); Imperial Underwriters, $6.00 (......); General Accident, $6.03 ($5.06); Guardian, $6.31 ($6.22); Yorkshire, $6.41 ($4.14); Factories, $6.97 ($9.08); Insurance Company of State of Pennsylvania, $6.98 ($10.13); Palatine, $7.12 ($1.37); Nova Scotia, $7.13 ($5.04); Sovereign, $7.31 (5.69); Fidelity Phenix, $7.37 ($7.67); American Central, $7.57 ($4.62); Rimouski, $7.81 ($7.45); National of Hartford, $7.87 ($9.12); Providence-Washington, $7.96 ($6.20); Equitable, $8.04 (......); L'Union of Paris, $8.22 ($6.97); Occidental, $8.43 ($7.24); North Empire, $8.69 ($5.56); Westchester, $8.75 ($7.36); Hudson Bay, $9.26 ($6.60); National Union of Pittsburgh, $9.74 ($9.12); Générales, $9.78 ($0.71); American, $12.18 (......); Germania, $14.69 ($5.35); Lumber, $14.89 ($8.26); Central Canada Manufacturers, $17.16 ($9.60).

By the order of the Board,

EDWARD C. PRATT,
General Manager.

Montreal, 25th August, 1914.

INVESTMENT vs. SPECULATION

"A high return should at once excite suspicion in the mind of the prospective investor."—*Financial Post.*

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investment, or endeavoring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favorite investment, because they know that if they invest $1,000 in these Bonds they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upward. They are, therefore, available for the investment of small sums.

Canada Permanent Mortgage Corporation

BRITAIN'S EFFORTS FOR PEACE

Official White Paper Shows That Sir Edward Grey Strove to the End

There has been published as a British government white paper the final dispatch written in London on August 8th from Sir Edward Goschen, until recently British Ambassador at Berlin, wherein is given a graphic description of the incidents and scenes of Britain's state of war with Germany.

Sir Edward writes: "In accordance with the instructions contained in your telegram of the 4th instant, I called upon the secretary of state that afternoon and inquired in the name of his Majesty's government whether the Imperial government would refrain from violating Belgian neutrality. Herr von Jagow at once replied that he was sorry to say that his answer must be "No," as in consequence of the German troops having crossed the frontier that morning Belgian neutrality bad already been violated. Herr von Jagow again went into the reasons why the Imperial government had been obliged to take this step—namely, that they had to advance into France by the easiest and quickest way, so as to be able to get well ahead with their operations and endeavor to strike some decisive blow as early as possible. It was a matter of life and death for them. I pointed out to Herr von Jagow that this 'fait accompli' of the violation of the Belgian frontier rendered the situation exceedingly grave, and I asked him whether there was not still time to draw back and avoid possible consequences. He replied that it was now impossible for them to draw back."

Chancellor was Agitated.

Sir Edward Goschen then records how he presented the British ultimatum, to which Herr von Jagow replied that he could give no other answer than that which he had given earlier in the day—namely, that the safety of the empire rendered it absolutely necessary that the Imperial troops should advance through Belgium. In a short conversation which ensued Herr von Jagow expressed his poignant regret at the crumbling of his entire policy and that of the Chancellor, which had been to make friends with Great Britain, and then through Great Britain to get closer to France. I said that this sudden end to my work in Berlin was to me also a matter of deep regret and disappointment, but that he must understand that under the circumstances, and in view of our engagements, his Majesty's government could not possibly have acted otherwise than they had done.

Sir Edward subsequently saw the Chancellor. "I found the Chancellor very agitated," he writes. "His Excellency at once began a harangue which lasted for about twenty minutes. He said that the step taken by his Majesty's government was terrible to a degree just for a word—neutrality—a word which in war time had been so often disregarded. Just for a scrap of paper Great Britain was going to make war on a kindred nation who desired nothing better than to be friends with her. All his efforts in that direction had been rendered useless by this last terrible step, and the policy to which, as I knew, he had devoted himself since his accession to office, had tumbled down like a house of cards. What we had done was unthinkable. It was like striking a man from behind while he was fighting for his life against two assailants. He held Great Britain responsible for all the terrible events that might happen.

Honour of Great Britain.

"I protested strongly against that statement, and said that in the same way as he and Herr von Jagow wished me to understand that for strategical reasons it was a matter of life and death to Germany to advance through Belgium and violate the latter's neutrality, so I would wish him to understand that it was, so to speak, a matter of life and death for the honour of Great Britain that she should keep her solemn engagement to do her utmost to defend Belgium's neutrality if attacked. The solemn compact simply had to be kept, or what confidence could anyone have in engagements given by Great Britain in the future?"

To that the Chancellor asked, "But at what price will that compact have been kept? Has the British government thought of that?"

"I hinted to his Excellency as plainly as I could that fear of consequences could hardly be regarded as an excuse for breaking solemn engagements, but his Excellency was so ex-

cited, so overcome by the news of our action and so little disposed to hear reason that I refrained from adding fuel to the flame by further argument."

Sir Edward says that after this interview he drew up and handed in to the Central Telegraph office in Berlin a telegram reporting to the Foreign Office. That telegram was apparently never dispatched.

A footnote to the white paper states that it has never reached the Foreign Office.

The dispatch goes on to relate that a fly-sheet issued by the Berliner Tageblatt was circulated stating that Great Britain had declared war against Germany. The immediate result of this news was the assemblage of an exceedingly excited and unruly mob before his Majesty's embassy. The small force of police which was sent to guard the embassy was soon overpowered, and the attitude of the mob became more threatening. Sir Edward Goschen says:—"We took no notice of this demonstration as long as it was confined to noise, but when the crash of glass and the landing of cobble stones into the drawing-room where we were all sitting warned us that the situation was getting unpleasant, I telephoned to the Foreign Office an account of what was happening. Herr von Jagow at once informed the Chief of Police, and an adequate force of mounted police was sent with great promptness, and very soon cleared the street. From that moment we were well guarded." Sir Edward relates in some detail the full and complete apology made next morning by Herr von Jagow, who declared that the "pestilential Tageblatt," by getting hold of the news, had upset his calculations, and adds that the Emperor sent one of his Majesty's aides-de-camp with the following message:—

How Message was Delivered.

"The Emperor has charged me to express to your Excellency his regret for the occurrences of last night, but to tell you at the same time that you will gather from those occurrences an idea of the feelings of his people respecting the action of Great Britain in joining with other nations against her old allies of Waterloo. His Majesty also begs that you will tell the King that he has been proud of the titles of British Field-Marshal and British Admiral, but that in consequence of what had occurred he must now at once divest himself of those titles."

"I would add," continues Sir Edward, "that the above message lost none of its acerbity by the manner of its delivery."

◆

EMERGENCY LAW FOR FORECLOSURES

Hon. J. H. Howden, attorney-general of Manitoba, has introduced in the provincial legislature a bill dealing with land contracts which provides that no proceedings may be taken for the sale of any land in default of payment in respect of mortgage or agreement of purchase, if such default took place before August 1, 1914, until after the lapse of six months from that date, or if default occurred after August 1, no proceedings can be taken for six months after the date of default. Any sale made in contravention of this section shall be absolutely null and void.

In all actions for foreclosure the sale period to be allowed for redemption shall be one year, and in all pending actions for such foreclosure, in which the time fixed for redemption is after July 31, 1914, the same is extended for one year from the date so fixed for redemption. Action may be brought, however, for payment of interest on unpaid principal or for taxes and unpaid insurance premiums, but if judgment is secured no certificate of judgment shall be issued until after six months has lapsed.

The lieutenant governor in council may repeal this act at any time by proclamation in the Manitoba Gazette.

◆

Cut out war poems and get down to business.

About a month ago the Canadian government was asked by the Imperial authorities to purchase 700,000 bushels of oats, and 10,000 tons of hay. Some of the latter has already been landed in France. In that short time the government had to purchase the hay, secure presses, and have it baled and shipped. This work was done under the supervision of Mr. A. H. Harris, of the Canadian Pacific Railway.

WANT $150,000,000 AT OTTAWA

United States Reserve Board's Plan for Foreign Exchange —Bank of England's Stand

A Washington dispatch says:—By what legal authority the federal reserve board, the comptroller of the currency or the secretary of the treasury may require national banks to subscribe to a $150,000,000 fund of gold to be deposited with the Ottawa, Canada branch of the Bank of England in order to facilitate the foreign exchange situation was the subject under discussion recently by treasury officials.

When the federal reserve board met, Secretary McAdoo placed before it the report of the committee appointed at the conference of bankers held previously on the plan to relieve the foreign exchange situation. This plan called for the deposit of a gold fund of $150,000,000 with the Bank of England in Ottawa. Only $25,000,000 of this is to be paid in immediately, the remainder to be on call. All national banks would be required to subscribe pro rata to the fund in order to relieve the strain on New York institutions.

Important Legal Questions.

The question of legal technicalities was first taken up by the board. In the first place, it was asked whether any government body or official has the power to require national banks to subscribe to such a fund.

In the second place it was asked how should the subscribing banks be permitted to carry their subscriptions on their books. These and numerous other technicalities were discussed throughout the day without arriving at a solution.

The special committee suggesting the plan was composed of James B. Forgan, Sol Wexler, L. L. Rue, Benjamin Strong, Jr., and Thomas H. Beal. At first it was suggested that this fund be created in New York city, so that the gold balances being held within the confines of the United States could be lawfully counted in as a reserve asset. It is understood that the Bank of England, through the state department, gave notice that it would not favor any such arrangement and would not recognize the payment of any debt through a deposit of gold within the borders of the United States.

Bank of England Stand.

In return the Bank of England held that only by the deposit of gold in Ottawa could a transfer of funds be recognized. In view of the stand taken by the Bank of England the plan of the New York institutions was abandoned, and in its stead it was suggested to accumulate the gold fund at Ottawa. This in turn has raised the technicality as to what item the national banks in the United States would be allowed to charge off any balances owned in Ottawa. Merely announcing that no conclusion had been reached on the suggestions made, the federal reserve board made public the text of the recommendations of the Forgan committee. It follows:—

"The committee appointed by the conference of bankers appreciates the desirability of relieving the present international exchange situation and particularly of regulating the outflow of gold. The committee at the same time realizes the necessity of promptly meeting the obligations of banks, corporations, and individuals to Europe, thereby maintaining the high credit of the country and demonstrating its ability to meet its obligations.

Plan of the Board.

"For this purpose and with this object in view, this committee recommends to the federal reserve board the following plan:—

"'That the banks of this country, especially those located in reserve and central reserve cities, be requested to contribute to a gold fund of $150,000,000, of which $25,000,000 is to be immediately paid into the depository of the Bank of England in Canada, for which a participation deposit receipt will be furnished to each contributing bank. The remainder of the contributed amounts to be subject to call by the New York committee through the local committees of the respective cities and to be paid for in New York exchange.

"'Said New York committee to be appointed by the New York Clearing House Association and said local committees to be appointed by the clearing house associations of the respective contributing cities.

"'The committee appointed by the New York Clearing House Association is to be charged with the duty of handling the said fund or fixing the price at which foreign exchange is to be bought and sold, and is to make requisition from time to time upon the respective contributing cities through the local committees thereof. Said local committees shall have supervision in the respective cities of the shipments and general withdrawals of gold.

"'This committee recommends that the federal reserve board take steps to ascertain the amount of gold that will be contributed by the banks in the respective cities and that it use its influence to have the said banks contribute their proper pro rata.'"

Plan May be Stopped.

A later dispatch said: The Federal Reserve Board has not yet approved the Foreign Committee plan for the relief of the foreign exchange situation. It is now more than likely that the plan will not receive the full approval of the board.

This change in the prospect is due to the representations made yesterday to the board by J. P. Morgan, Jacob H. Schiff and Benjamin Strong, jun., of New York, who gave the board a great deal of information that was needed to make clear the whole situation.

The fact that the payments in behalf of the city of New York, which will soon be required, have been taken care of by a syndicate of New York bankers makes a very important curtailment of the necessity for adopting such a radical plan of action as was recommended by the Morgan committee representing the recent clearing house conferences.

Local Banks Can Handle.

The general view was that if New York obligations can be taken care of by local banks it was reasonable to expect that the remaining amount of indebtedness to Britain and other countries might be taken care of in a similar manner without disturbing the business of this country and eventually without greatly reducing the gold supply here.

Besides this, the grain shipments every day are now offsetting our debts abroad and reducing them by over a million dollars a day. Every day that passes, therefore, materially relieves the situation and minimizes the necessity that two weeks ago was pronounced very acute.

◆

MISCELLANEOUS INSURANCE IN CANADA

Insurance business other than fire or life was carried on in Canada during the past year by 68 companies: 26 Canadian, 13 British and 29 United States companies. Twenty-eight of these companies likewise transacted fire insurance.

In addition to these 68 companies, there were five fraternal orders or societies which carried on sickness insurance and also life insurance.

Of the 26 Canadian companies which carried on business other than fire or life, 21 transacted miscellaneous classes of business only. Of these, 14 transacted sickness insurance, 12 accident insurance, six plate glass insurance, eight guarantee insurance, five automobile insurance, three steam boiler insurance, three burglary insurance, one weather insurance, one hail insurance, one live stock insurance, and one title insurance, according to the report of the superintendent of insurance.

At the end of the year the assets of these 21 companies amounted to $7,509,093.

Their total liabilities amounted to $2,117,308, made up as follows:—

Unsettled losses	$ 505,917
Reserve of unearned premiums	1,383,791
Sundry	227,600
	$2,117,308

The excess of assets over liabilities was $5,391,785. The capital stock paid up in cash was $2,683,210. There was thus a surplus over all liabilities and capital stock of $2,708,574, being an increase in surplus over the preceding year 1912 of $127,189.

The total net gain in surplus was $83,776. Thirteen companies made a gain, and eight companies showed a loss.

The dividends declared amounted to $262,191, which is less than the interest and rents earned upon investments. The total net underwriting gain was $161,230, as against a gain of $88,276 in 1912.

Investments should be made with safety the essential factor: a reasonable interest return and negotiability the next considerations.

SHERBROOKE COMPANY'S FINANCING

Effect of Unfavorable Money Market Conditions—Gross Earnings Show Gain

A gain of $15,344, or 12.13 per cent. in gross earnings and $2,092 or 4.03 per cent. in net, is shown in the annual return of the Sherbrooke Railway and Power Company, together with a rise of $13,251 or 17.7 per cent. in operating expenses. Mr. C. J. McCuaig, president, states in his report:

"The industrial depression which affected the whole of the Dominion of Canada during the past 18 months affected both the street railway earnings and the power revenue, as several manufacturers reduced their power requirements.

"The prospects, however, for increased earnings in 1915 are as favorable as can be expected, although they must be necessarily affected to some extent by the European war.

Should Show Increase.

"During the existing financial conditions in the past year the directors were unable to sell sufficient securities to cover the entire cost of these extensions, and purchases and advances were obtained from the company's bankers to cover the balance required.

"The company has contracted for the greater part of the power available from its present development and the earnings should show a satisfactory increase as soon as normal conditions again prevail."

Net revenue of the company was sufficient to meet bond interest and interest on current liabilities, but when all deductions had been made, including $3,202 for disputed taxes over a period of three years, the credit balance carried forward from the previous year had to be drawn down to the extent of $2,059.

Two Years' Returns.

The operating accounts for the past two years compare as follows:—

	1913-14.	1912-13.
Gross	$141,990	$126,646
Operating expenses	87,969	74,718
Net	$ 54,020	$ 51,927
Less:		
Bond interest	48,265	46,273
Other interest	2,041	927
Accidents	1,049	758
Other deductions	4,123	3,093
Total deductions	$ 56,079	$ 51,053
Balance	*2,059	874
Previous balance	3,216	2,341
Total profit and loss	$ 1,157	$ 3,216

*Deficit.

◆

CANADIAN TRADE

A slight gain in exports and a large decline in imports are the features of Canadian trade for the first four months of the current fiscal year. The total trade for the four months ended July was $306,908,379, a decrease of $51,196,503, as compared with the same period of last year. Imports totalled $172,041,715, a decrease of $55,627,806. Exports totalled $134,866,664, an increase of $4,431,257.

The chief increases in exports were in manufactures and animal produce. During the four months Canada exported goods of Canadian manufacture to the value of $21,670,403 and animal produce to the value of $17,283,007, increases respectively as compared with the corresponding period of last year of $5,627,508 and $4,100,86.

Exports of agricultural produce for the four months totalled $42,615,242, a decrease of a little over nine millions.

For the twelve months ending with July the total trade of the Dominion was $1,061,[illegible], a decrease of nearly $37,000,000. Imports, which totalled $577,936,319, fell off by $114,000,000. Customs revenue for the twelve months totalled $97,094,410, a decrease of $[illegible].

Manufacturers, Shippers and Boards of Trade Are Making Province a Distribution Centre for Trade

(Staff Correspondence.)

Vancouver, September 19th.

Flour shipments during the past month to the Orient by Canadian milling companies indicate an attempt to further secure this trade in China and Japan. Among the shippers were the Ogilvie Flour Mills Company, the Vancouver Milling and Grain Company, the Robin Hood Company, the Moffet Flour Company and the Ellison Milling and Elevator Company, of Lethbridge. Shipments amounted to approximately 60,000 sacks, the destination being Hong Kong and Yokohama. Large shipments of flour at one time went out on almost every C.P.R. liner to the Orient, being shipped by American mills, but last month the amount from this source was small. There are more boats going direct from Seattle, but the indications are that Canadian manufacturers are able to place more of their product in the Orient market, where large quantities are in demand.

Shippers and Harbor Rates.

That the lumber mill companies have their eye on possible markets is shown by the shipment of 400 bundles of fir pickets to Tongatabu, Friendly Islands.

The Wayfarer, which has been in the Calcutta trade, of the Harrison direct line will load at Vancouver next month for London and Liverpool. Other boats of this line will follow.

The Vancouver board of trade is supporting the petition of lumbering and other interests to the marine department, against the rates imposed by the new harbor commission. It is believed that these will work a hardship and will divert trade to Seattle, since the expense of handling traffic through this port will be too burdensome.

Officers of Manufacturers' Association.

The British Columbia Manufacturers' Association has elected the following officers for the ensuing year:—President, Mr. K. J. Morrison, Vancouver; vice-president, Mr. J. A. Cunningham, Vancouver; vice-president for Vancouver, Mr. H. H. Welsh; for Victoria, Mr. J. C. Pendray; for New Westminster, Mr. J. R. Duncan; honorary treasurer, Mr. E. G. Byres. Speaking of present conditions, Mr. Morrison said that industrial openings were better than ever before, and the elimination of German competition with the opening of the Panama Canal should give opportunities for manufacturers here as elsewhere in Canada. He stated the instance of a letter he had received from a London house, which sold British Columbia wire nails, stating that as it had secured large quantities of wire nails in Germany the supply of which was now cut off, it wanted to know to what extent and under what conditions the required amount could be supplied from Vancouver. Other local people were receiving similar enquiries. Manufacturers complain of the freight rates, as the eastern manufacturers shipping west can get a much better rate than the western manufacturers shipping east.

MUNICIPAL BOND FINANCING

Sinking Fund Investments—Small Purchases by Local Citizens

A Toronto bond house tells *The Monetary Times* that its sales of municipals in August were not greatly less than for that month in 1913. There is a fairly good tone in evidence among the bond houses, who anticipate satisfactory business when normal times return. The municipal bond sales in Canada for August, as compiled by *The Monetary Times*, amounted to $411,755, compared with $2,154,260 for July and $526,300 for the corresponding period of last year.

During the first eight months of the year Canadian municipalities have sold approximately $27,061,000 of their debentures. This compares with a total of $20,550,000 for the twelve months of 1913. Municipal bond sales in the United States to the end of August exceeded $5,000,000, compared with $20,000,000 for the year 1913. There may be fairly large sales of municipals in the United States during the remainder of the year.

Peddling Montreal's Bonds.

The most notable city financing in recent weeks was the loan of $6,000,000 by the Bank of Montreal to the city of Montreal. The bank imposed certain very necessary conditions and will act as the city's fiscal agent for the next five years at least. Some extraordinary stories, apparently true, are in circulation as to the attempted peddling of Montreal bonds in New York. It is time the city authorities took a few kindergarten lessons in the maintenance of the credit of such an important city as Montreal.

Several municipalities are purchasing their own debentures as sinking fund investments. Stratford, Ontario, has empowered its treasurer to invest in city debentures the cash now to the credit of the sinking fund. Lethbridge, Alberta, has received $100,000 from the sinking fund committee borrowed on the hypothecation of debentures authorized by recent money by-laws.

Some Local Purchases.

Small blocks of bonds are being purchased by citizens in many parts of the country. Berlin, Ontario, has obtained some of its peoples' savings at 5 per cent. for public works and will sell its debentures later. Mr. W. J. Southam, of Hamilton, has offered to buy $250,000 debentures for local improvement work in connection with the McKitterick survey. Mr. J. H. Burnham has offered to take $2,000, and Mrs. J. Lynch $1,000 of Peterborough's bonds in connection with by-laws passed for local construction work.
